Rhode Island, one of the United States, bounded S. by the Atlantic, N. and E. by Massachusetts, and W. by Connecticut. Ratified the Constitution on May 29, 1790, last of the original thirteen states; the smallest of the states, of about the same area as Gloucestershire, Eng. Narragansett Bay penetrates the state northwards some 30 m., and contains some 15 islands, from the largest of which the state takes its name. This is Aquidneck, or Rhode I., 15 m. long, with the city of Newport, most famous of American summer resorts. At the head of the bay are Providence, and 4 m. N., up the Seekonk R., Pawtucket. Fourteen other cities exceed 4000. Almost all are manufacturing centres. Providence and Newport are alternate capitals. The country generally is rough and hilly, less suited for agriculture than grazing. Market-gardening and dairying to supply the cities are important, particularly on the Bay Is. The bay and Atlantic give the state a mild and fairly equable climate [**Newport**]. R. I. is pre-eminently manufacturing, with a denser population than any other state, and ranks first in the *per capita* value of its total manufactured product, and also of cotton and woollen goods. Absolutely it is second in cotton, and fourth in woollen goods. Other important products are dyed and printed textiles, foundry and machine products, from steam engines to nails, screws, and files, worsted goods, and jewellery. Most of the rocks are of Laurentian age, but Carboniferous rocks occur on Aquidneck I., and stretch to the NW., yielding a little graphitic coal, valued for certain purposes. The school year is the longest in the states, and the attendance under the compulsory law is good; but the large foreign population, and the insufficiency and poor administration of the factory laws on child labour, explain the rather high percentage of illiterates. Area, 1250 sq. m. P. 345,500. See **United States,** table. [**W. S.**]

Rhodes, eccles. par., Eng., Lancashire, Prestwich and Middleton pars., 1 m. SW. Middleton, PMT.O. P. <3000.

Rhodes, isl., in the Ægean Sea, near the SW. ct. of Asia Minor, 10½ m. ESE. Cape Aleppo. The island is traversed lengthwise by mountains, the highest point, the ancient *Atabyron,* being 4070 ft. high. Numerous streams rise in these mountains, flowing between banks fringed with oleanders, myrtles, and agnus cactus (chaste-trees). The climate is delightful, temperature always equal; the island was renowned in the early ages for the purity of its air. The chief plants cultivated are olives, vines, and fruit-trees, and there are beautiful forests of conifers. The commerce is declining, and does not now much exceed a total of £100,000 per annum in all. Anciently called *Ophiussa, Pelagia,* and *Trinacria,* &c., R. was very famous in antiquity, its chief cities being *Ialysus, Kamirus,* and *Lindus.* In the Greek era it was an artistic centre of importance; the ancient colossus, representing Apollo, the patron of the island, was overthrown by an earthquake, 222. In the 3rd and 2nd centuries B.C. the Rhodians were the first sailors of the world, and had a large trade with Sinope. The island attained its chief importance on the overthrow of Alexander's empire; it kept its autonomy until the time of Vespasian, who reunited it to the Roman empire as a maritime prov. After this it fell to the Eastern emperors. R. was then occupied by the Arabs until 1310, when the Knights Hospitallers of St. John seized it. They evacuated it in 1522, after heroically sustaining a siege for six months against Suliman, sultan of the Ottoman Turks. Since then it has remained an integral part of the Ottoman empire. Length, NE. to SW., 50 m.; 25 m. across; area, 565 sq. m. P. 29,200, all Greeks except 7000 Turks and 2500 Jews. C. Torr, *Rhodes in Ancient Times* (1885) and *Rhodes in Modern Times,* Cambridge (1887).

Rhodes, or **Kastro,** seapt. tn., Turkey in Asia, at the N. point and cap. isl. Rhodes; surrounded by ramparts. The former region of the Knights Hospitallers to the NW. contains the knights' hospital, the Grand Master's palace, and the Cathedral of St. John. The last two buildings were in part destroyed by an explosion, 1856. The tortuous 'Knight's Road' has preserved its feudal aspect entirely. R. is the seat of a Greek archbishop. The town had three ports—the N., defended E

by the mole of St. Nicholas, the central or commercial port, protected by the St. Ange tower and E. by the Mill tower, and the SE. port, defended on the E. by a line of reefs; the central port is the only one used at the present day, but it is partly choked up, and open to dangerous NE. winds. The first meridian of ancient geographers passed through R., which was, moreover, a centre of artistic and intellectual activity during the days of Greek culture. P. about 11,000; 5000 Turks, 1500 Jews, the remainder Greeks.

Rhodes, Inner and **Outer.** See **Appenzell.**

Rhodes Bay, bay, central Africa, at the S. end of Lake Tanganyika, in the SE. of Hore Bay.

Rhodesia, fortified post, Brit. Central Africa, on the Kalungwisi, a short distance from E. shore of Lake Mweru, in about 9° 5′ S., 29° 10′ E. The name is also popularly applied to all the territories of the Chartered South Africa Company.

Rhode-St.-Genèse, comm., Belgium, prov. Brabant, arr. Brussels. P. <4000.

Rhodes Wood Reservoir, meteorological stn., Eng., Cheshire, in Longden Dale (valley of the Etherow), in 53° 29′ N., 1° 56′ W. Alt. 520 ft. Mean annual rfall. (1866-80), 46.81 in.

Rhodogeidio, par., Wales, Anglesey, 5 m. SSW. Amlwch, 1 m. NNW. Llanerchymedd stn. P. <500. See **Llanerchymedd.**

Rhodope, mts., part of the Balkans, running nearly parallel with the chain of the Great Balkans, and separating Thrace and Macedonia. The W. part is the highest; here the peak of Muss Alla reaches an alt. of 10,200 ft. The E. part, composed of several chains running in various directions, gradually sinks to the shores (650 ft.) of the Ægean Sea. R. consists of a confused network of mountain groups. Length about 180 m. Called by the Turks **Dospad Dagh,** by the Bulgarians **Despoto Dagh.**

Rhön, mts., Ger. See **Rhön-gebirge.**

Rhondda, parl. div., Wales, Glamorganshire, traversed by the **Rhondda R.** (r. bk. trib. of the Taff), and bounded on the E. by the **Rhondda-fach R.,** which separates it from the E. div. and the parl. bor. of Merthyr-Tydfil; coal mined. P. 68,700.

Rhondda Valley, Wales, Glamorganshire. See **Llanwonno.**

Rhône, dep., E. France, formed in 1793, by division of dep. Rhône-et-Loire, out of the ancient provs. of Lyonnais and Beaujolais; divided into two arrs.: Lyons (cap.) and Villefranche. Surface generally mountainous, the principal stretches of level country being the valley of the Saône and the dist. S. and E. of Lyons. The mountains belong chiefly to three groups: the Beaujolais Mts. in the NW., mainly of porphyry, parallel to the Saône, culminating in St. Rigaud (3320 ft.), the highest point in the dep.; the Tarare Mts. in the W., formed of granite and metamorphic schists, extend N. and S. of the Brevenne valley, rising in Boussièvre to 3295 ft.; in the S. the mountains of Lyonnais, of granite, gneiss, and carboniferous formations, trend from S. to NE., highest point 6355 ft. The dep. belongs chiefly to the basin of the Rhone, which enters it in the E. and flows S. near, or on, the E. frontier; its principal tribs. are the Saône, which joins it on r. bk. at Lyons (after forming part of the E. boundary further N., and receiving the Azergues on r. bk.), and the Gier in the SE.; a narrow belt in the W. is drained to the Loire. As to climate, see **Lyons.** Of cereals, grown chiefly in the plain of Venissieux and the Saône valley, the most important is wheat, then rye; the vine covers about one-tenth of the surface, chiefly in Beaujolais and the S., but the production per acre is below the average for France; mulberry (Villefranche). Coal is worked at Givors, Amplepuis, and several other places; no iron is found, but of other metalliferous minerals the dep. yields about one-third of the total for France, argentiferous lead (Poule, Vernay, &c.), copper (Chessy, &c.), manganese (Villefranche). Textile manufactures are very important; Lyons is the centre of the silk industry, carried on widely throughout the dep.; velvet (Arbresle), plush (Thizy), silk-dyeing (Villefranche, Varau, &c.), printing of stuffs (Neuville, Saint-Genis-Laval), cotton goods (Amplepuis, Thizy), muslin and embroidery (Tarare, &c.). Metallurgical industries include iron and copper smelting (Givors); important chemical works (Arbresle, Neuville, &c.). Area, 1104 sq. m. P. (1891) 806,700. See **France,** table.

Rhone, ancient *Rhodanus,* important riv., Europe, rises in Switzd., in the Rhone Glacier, on the W. of Mount St. Gothard, between Mounts Furka and Grimsel, at an elevation of 5750 ft., flows SW. past Brieg and Sion to Martigny, where it turns sharply to the NW., and enters the Lake of Geneva (*g.v.*) near its SE. extremity. At Geneva it leaves the lake and takes a SW. direction, receiving from the left the muddy Arve. At Parc, 20 m. from the Swiss frontier, it becomes navigable; its course, after deflections to S. and to N., is now W. to Lyons, where it receives the Saône (r. bk.) at 532 ft. above sea-level, and it then flows nearly due S., past Givors, Vienne, Tournon, Valence, Avignon, Beaucaire, to Arles, where it separates into several branches, forming a delta called the Île de la Camargue, and enters the Gulf of Lyons, Mediterranean. The W. arm is called Le Petit Rhone, and the E., which carries 86 per cent. of its volume, the Grand Rhone; the latter issues in the Gulf de Fos (See **St. Louis du Rhône**). Other principal affluents, on right, the Ain, Ardèche, and Gard; on left, the Isère, Drôme, and Durance. Its fall is much greater than that of the Rhine, and consequently its navigation is difficult and dangerous. It is connected with the Loire by means of the Saône and Canal du Centre; the Canal of Burgundy unites it to the Yonne and Seine, and that of the Rhone and Rhine connects it with the Rhine. The Rhone formerly disappeared at a place called the Perte du Rhone, 25 m. SW. Geneva, but the rock which covered it has been removed. Below Lyons it is navigated by steam-packets, which, by means of the Saône, ascend as far as Châlon. Length, 504 m.; extent of basin, 38,000 sq. m.; discharge, 19,400 to 529,800 cubic ft. per second.

Rhone and Rhine Canal. See **Rhine and Rhone Canal.**

Rhonehouse, or **Kelton Hill,** Scot., Kirkcudbrightshire, 2 m. SW. Castle Douglas, 1 m. ESE. Bridge of Dee stn.

Rhön-gebirge, mt. group, Ger., partly in the Thuringian states, partly on the NW. frontier of Bavaria, and the NE. frontier of Hesse-Nassau, between the upper Fulda, upper Werra, and Franconian Saale; a volcanic mass of basalt, phonolite, and trachyte, 18½ m. by 9½ m. Highest peak the Wasserkuppe, about the middle of the range (50° 29′ N.), alt. 3115 ft. The Kreuzberg in the SE. (alt. 3050 ft.) is crowned by an old Franciscan monastery, a great resort of pilgrims and tourists, commanding, as it does, a magnificent view.

Rhos, P.O., Wales, Pembrokeshire, 4 m. from Haverfordwest. *Rhos,* or *ros,* Cymric-Celtic, in Wales 'a moor,' in Cornwall 'a valley;' *e.g.,* Ross, a town in Hereford; Rosecrewe, 'the valley of the cross;' Rosvean, 'the little valley.'

Rhos Bay, small bay, Wales, on the NW. of Denbighshire.

Richmond, tn., U.S., Vermont, Chittenden co., on the Winooski R., 12 m. SE. by E. Burlington. P.<1500.

Richmond, co., U.S., Virginia, in the E., crossed by 38° N., E. of 77° W., bounded on the SW. by the estuary of the Rappahannock.

Richmond, city, U.S., Virginia, Henrico co., on the l. bk., and immediately below the falls, of the James R., 110 m. NW. by W. of the SE. corner of the state, with coal-mines. Directly on the opposite bank, and connected with it by five bridges, is Manchester. Vessels drawing 16 ft. can ascend to the city at low tide, and those of 18 ft. draught to Warwick, 3 m. below. Depth at entrance to port at high water at ordinary spring tides, 16 ft.; at ordinary neap tides, 15½ ft. deep; in port at high water, 17 ft.; at low water, 14 ft. A railway has been built around the falls, and improvements are in progress which will render the docks accessible by vessels drawing 20 ft. in a channel 100 ft. wide to the mouth of the river. It is intended eventually to deepen the channel to 22 ft. at low water. There is regular steam communication with Norfolk, Baltimore, Philadelphia, and New York. The manufactures, which are very important, include tobacco and cigar factories, iron-works, machinery, waggons, furniture, cotton goods, sheetings, shirtings, stoneware, and electro-plating. The principal exports are cotton and tobacco. R. is noted for its numerous and excellent educational institutions. The town is chiefly built upon elevated grounds on either side of the Shockoe Creek Valley, and is one of the healthiest cities of the U.S. R. was founded in 1737, and became the state cap. in 1779. In 1861 it was made the cap. of the Southern Confederacy, and during the war it was one of the central objects of attack and defence. In 1865 the city was fired by the Confederate army to prevent the tobacco warehouses and the stores from falling into the hands of the Federal forces, the estimated loss being 8,000,000 dollars. P. (1790) 3800; (1830) 16,100; (1850) 27,600; (1860) 37,900; (1870) 51,000; (1880) 63,600; (1890) 81,400.

Richmond, city, Victoria, Bourke co., suburb of and 2 m. E. Melbourne. P. 38,800.

Riesenbeck, vil., Prussia, in the N. of prov. Westphalia, circle Teckenburg, 20 m. N. Münster. P. (comm.)<4000.

Riesenburg, tn., Prussia, prov. W. Prussia, circle Rosenberg, 20 m. SSE. Marienburg. P.<5000.

Riesengebirge ('Giant Mountains'), mt. range, Ger., separating Bohemia from Prussia, prov. Silesia, continuous eastward with the Sudetengebirge, and westward with the Erzgebirge. The Elbe rises on its S. side. Granite is the prevailing formation on the Silesian side, where the mountains descend very steeply, and crystalline schists on the Bohemian, which has a much gentler slope. Snow lies on the summits eight or nine months in the year. This range is crossed by three passes, one from Landeshut to Trautenau, another from Hirschberg to Reichenberg, and the third from Hirschberg to the Elbe valley. The R. are much frequented by German tourists. Glaciated area, estimated by Partsch, at 32.5 sq. m.; lower limit of *firn* (*nevée*) 3700-3900 ft. Length, NW. to SE., 24 m.; breadth, 16 m. Mean alt. 4300 ft.; culminating point, the Schneekoppe, or Riesenkoppe, 5260 ft.

Riesi, comm., Sicily, prov. and 14½ m. S. by E. Caltanissetta; sulphur is mined here. P. 11,900.

Riestedt, vil., Prussia, prov. Saxony, circle Sangerhausen, 8 m. W. by S. Eisleben; has lignite mines. P.<3000.

Rietfontein ('reed-fountain'), mission stn., Brit. Bechuanaland, in 26° S., 16 m. from W. frontier.

Rietfontein, settlement, Cape Colony, in 32° 52′ S., 24° 5′ E., Graaff Reinet dist. Alt. 2264 ft. Mean rfall. (16 yrs.), 11.46 in.

Rieti, the ancient Sabine *Reate*, tn., Italy, Umbria, prov. Perugia, on the Velino, 16 m. SE. Terni; has mineral springs, and a cathedral of the 16th century. P. 9000.

Riff, a Berber tribe in the N. of Morocco, mainly to the E. of 5° W.

Riffelhorn, peak on the N. side of the Gorner glacier, where it contracts to form the Boden glacier, 3 m. S. Zermatt, Switzd., Valais. Alt. 9615 ft.

Rig, or **Bender** (or **Bunder**) **River,** small port, Persia, on the Persian Gulf, 22 m. NNW. Bushire; roadstead sheltered by two islets.

Riga (Esthonian **Ria-lin**), seapt., Russia, in population the fifth city of the empire. It is situated at the S. extremity of the **Gulf of R.** (115 m. long, and 100 m. in width; greatest depth, 27 fathoms), 8 m. above the mouth of the W. Düna (*q.v.*), in 56° 57′ N., 24° 6′ E., 360 m. SW. St. Petersburg (*viâ* Pskov). The bar at the mouth of the Düna having only 14 ft. of water over it, and the roadstead, although protected by a mole, being still exposed to winds, part of the vessels are unloaded at Bolderaa or Mühlgraben. The entrance into the Düna is protected by the Dünamünde fortress. R. consists of the old town, which has preserved several of its Hanseatic features, and three suburbs, St. Petersburg, Moscow, and Mitau, the last of which, on the l. bk., is connected with the former by a floating bridge and a high viaduct. Its cathedral, built in 1204, and rebuilt in the 16th century, is said to possess the largest organ in the world. R. has a technical high school (over 1000 students). One-half the population is German, the remainder being Russians and Letts in equal parts, with nearly 5000 foreigners and 2000 Esthonians. The larger commerce is in German and partly English hands. R. is a great market for export of timber, shipped from Volhynia and White Russia, and especially flax, grown in the W. provs., as well as for hemp and all sorts of cereals, especially oats; eggs, tallow, tobacco, rugs, and various minor articles also add to the importance of the exports, the annual value of which is about £5,000,000. Although the port of R. freezes for an average of 127 days every year, and has a rival in Libau, the facilities offered by the railways running to the E. and SE. enable R. to hold the fourth place (after St. Petersburg, Odessa, and Libau) in the exterior trade of the empire. The imports, consisting chiefly of salt, fish, wine, oil, and fruits, raw cotton, machinery, and coal, attain an annual value of upwards of £2,000,000. R. is the cap. of the govt. of Livonia, and the seat of a governor-general. Mean temp., yr. 42.9° F., Jan. 23.6°, July 65.7°; mean rfall. (31 yrs.), yr. 20 in., May–Nov. 14.6 in. P. (1867) 102,040; (1891) 181,935.

Rigi, spelt by the French **Righi,** the Latin *Mons Rigidus*, mt., Switzd., between lakes Lucerne on the S., Zug on the N., and Lowerz on the E. It is covered with forests and meadows at its base, with pasturage higher up, and has on its slopes eleven villages, many châlets, and numerous hotels both on the

slopes and at the top. There are two funicular railways to the summit, one going from Vitznau, on Lake Lucerne, the other from Art, by Lake Zug. The highest point, the Kulm, is 5905 ft. high, from whence is seen a magnificent panorama, also the curious mirage phenomenon, the 'Spectre of the Rigi.' Other well-known peaks are the Kaltbad (5230 ft.), and the Staffel (4740 ft.). Mean rfall. Rigi-Kulm (13 yrs.), 59.2 in.

Rigi, three-peaked mt. in the Cascade Mts., U.S., Washington, in 47° 22′ N., 121° 15′ W.; so called on account of its supposed resemblance to the Swiss Rigi. Alt. about 7500 ft.

Rimini, the ancient *Ariminum,* seapt. and city, central Italy, prov. and 28 m. ESE. Forli, 31 m. SE. by S. Ravenna, on the Marecchia, 2 m. from its mouth in the Adriatic. Chief edifices, the bridge of Augustus over the Marecchia, the arch of Augustus, and remains of the palace of the Malatestas. Has mineral springs and baths, and here the Flaminian Way terminated. Its port, though shallow, is frequented by fishing vessels; manufactures silk; it is a summer bathing-resort. It was the seat of a great ecclesiastical council in A.D. 359. The Malatestas reigned at R. for three centuries from 1203, and are notable as much for their crimes as for the protection given by them to the artists of the Renaissance, especially those who adorned the cathedral, or the Church of St. Francis, dedicated to the 'divine Isotta,' wife of Duke Sigismund; in the interior are the tombs of the Malatestas. Comm. P. (1871) 33,900; (1881) 37,100. Lighthouse, visible 11 m.

Rio das Velhas, riv., Brazil. See **Guaicuhy.**

Rio de Janeiro, maritime state of Brazil, including the valley of the lower Parahiba (which partly forms the N. frontier) and that part of the coast-line which trends E. to W. to the N. of the Tropic of Capricorn, as well as that part where the general trend changes first SW. to NE., and then S. to N. It has on its NW. the E. portion of the Serra da Mantiqueira, including its culminating summit, Itatiaia-ossu (about 10,000 ft.), and includes the Serra dos Orgãos, to the S. of the valley of the Parahiba. Extreme length, E. to W., about 260 m.; breadth, 60–100 m. Chief product, coffee. Cap. Nictheroy, at the mouth of the bay of, and opposite the city of, Rio de Janeiro. See **Brazil,** table.

Rio de Janeiro, frequently called by the Brazilians simply **Rio,** city, Brazil, on the W. side of the bay of same name, just within the entrance, mainly occupying a low plain bounded by granite hills both on the N. and S., those on the S., Tijuca, Corcovado, and further off Gavia, extending between the city and the sea-coast; observatory (crowning the hill of Castello, immediately adjoining the bay) in 22° 54′ 24″ S., 43° 10′ 21″ W. The original nucleus of the city, composed of dark and narrow streets, most of them nevertheless traversed by tramway lines, lies immediately S. of the expansion of the bay about 4 m. from the entrance, but the suburbs now extend S. along the base of the hills and the shores of the bay to the sea-coast and the lake of Freitas, and inland for about 10 m. W. of the bay. Rio de J. is essentially a seaport, its magnificent bay, which forms its harbour, giving it all its importance. This bay has a mouth less than a mile in width, but deep enough for the largest vessels, and capable of being easily defended. On the W. side the fort of São João occupies a promontory jutting out from the Pão de Assucar ('Sugar-loaf'), and the opposite promontory is occupied by the fort of Santa Cruz, while the islet of Villegagnon, opposite the city, is also fortified. The bay stretches 17 m. inland on a due N. to S. line, and has a width in the interior of 15 m. due E. to W. Its chief drawbacks are that it is not deep enough near its shores to allow of large vessels approaching the quays, in consequence of which they anchor N. of the islet of Villegagnon, and that its communications with the interior are impeded by the mountains separating it from the valley of the Parahiba. The railway running W. from Rio de J. crosses the mountains to the W. of the Serra dos Orgãos in steep gradients, culminating at an alt. of 1350 ft., while that chain is crossed by the railway from Nictheroy (opposite the city) at an alt. of 3510 ft. Rio de J. is nevertheless the chief seaport in Brazil, the value of its exports reaching about £14,000,000–15,000,000, nearly two-thirds of which represents coffee. Chief import, English coal. Various manufactures are carried on, but none specially characteristic. The

city is more noted for its gardens and avenues of the lofty palm, *Oreodoxa regia*, than for its public buildings. Its botanic gardens, near the lake of Freitas, which contains the *Oreodoxa* from which all the others in the city are descended, and which was brought hither by Portuguese fugitives from Cayenne in 1806, are among the most noted in the tropics. Among the public institutions (besides the observatory) are an important school of medicine, the Misericordia hospital, a polytechnic school, a museum of natural history, and a library of 200,000 volumes. The health of the city suffers considerably both from natural causes and defective sanitation. The coast mountains shut it off from the Atlantic breezes. Marsh fever prevails in the swampy tracts lying between the original city and its N. suburb of São Christovão, as well as near the lagoon of Freitas. The drainage is bad. In places there are open sewers, and a filthy canal, dug for the drainage of swamps in 1858, pollutes the air close to the central railway station. Phthisis is rife, infant mortality high, and yellow fever has been recurrent in summer since 1849. (As to climate, see **Brazil.**) The population is kept up and increased principally by immigration, mainly of Italians and Portuguese, along with Englishmen, North Americans, French, Germans, and Swiss, among the mercantile and professional classes. The first (short-lived) settlement in the bay was made by a Huguenot adventurer in 1555, on the island called after him—Villegagnon (previously Sergipe). A few years later the Portuguese founded the first settlement on the mainland, where a city soon began to grow up under the name of São Sebastião de Rio de Janeiro. From 1763 this city has been the capital of Brazil, but it is now about to be deprived of that position. P. about 500,000 (estimate based on the official census of 71,607 families in 1890), of *municipio neutral* (which extends about 40 m. W. from the bay), about 550,000.

Rio Grande, city, U.S., Texas, Starr co., on the Rio Grande, 110 m. WNW. of the mouth of the river, at the head of steam navigation. Mean temp. (15 yrs.), yr. 73.6° F., Jan. 58.5°, July 86.4°; mean rfall. (6 yrs.), 22.52 in. P. <2000.

Rio Grande, Rio Grande del Norte, or **Rio Bravo del Norte,** riv., U.S., rises in the San Juan Mts., near R. G. Pyramid (a mountain about 13,700 ft.), flows E. then S. to New Mexico, which it enters between the Sierra Madre and the Rocky Mountains, then SE., separating Texas from Mexico, to the Gulf of Mexico, which it enters in about 26° N. It is of little use for navigation, being very shallow, and obstructed by rocky ledges, cataracts, and sandbanks. After a dry summer the channel is empty for 100 m. above El Paso, its waters being drawn off for irrigation, though it is also subject to floods from April to June. Trib. Rio Pecos. Estimated length, 1800 m.

Rio Grande and Denver Railway. See **Colorado,** state.

Rio Grande do Norte, the north-easternmost state of Brazil, at the angle of the continent called Ponta Touros, or Calcanhar ('heel'), where the coast (300 m.) becomes due N.–S. The littoral is low, swampy, and, in the E., wooded (wax-palm, *Copernicia cerifera*). In the interior the Serra da Borborema traverses the country, through which passes riv. Piranhas–Serido (navigable to Assu, 28 m.), dividing the whole state (S. to N.) into two equal parts. The Apodi–Upanema–Mossoro (navigable for 22 m.) drains the W.; many minor and *wadi*-like rivers (Petitinga, Ceará-Mirim, Potengy or Rio Grande do Norte, Mibipu) drain the E. Rio Grande do Norte is in the zone of periodical droughts. Sugar-cane, cotton, tobacco, are the chief products. Numerous cattle. Salt is obtained (Assu, Mossoro). No good ports. The rivers are navigable only for small boats. See **Brazil.**

Rio Grande do Norte, seapt., Brazil. Same as **Natal.**

Rio Grande do Sul, the southernmost state of Brazil, N. half of a penin. (the republic of Uruguay being the S. half) between the Atlantic (E., 430 m. of coast) and riv. Uruguay (N. and W.), only attached to the rest of Brazil (state of Santa Catharina) by a sort of isthmus, formed by one of the Serras do Mar (S. Ararangua, which becomes further on the Serras Geral and then the Serra do Herval); it is the S. extremity of the Brazilian plateau. The N. is occupied by Serra Geral and the upper part of the basin of the Uruguay (partly composed of forests—Araucaria, Peroba, Cedrela, Nectandra, partly of campos); the S. by the basins of rivs. Ibicuhi (affluent of Uruguay), Jacuhi–Tacuari (with German colonies: S. Leopold, &c.), Camacuam (with Italian colonies: Conde d'Eu, Dona Izabel, Caxias, &c.), entering Lagoa dos Patos–Viamão. Extensive pastures in the S. and SW., cattle-rearing forming the principal industry. Sugar-cane and coffee are grown in the N. Wine is produced in the Camacuam valley, Montenegro. The minerals include gold, lead (Lavras de Santo Antonio), coal (Jaguarão, Candiata, São Sépé, São João d'Herval, Arroio dos Ratos), agates, cornelians, amethysts (riv. Uruguay). All the state is very healthy. See **Brazil.**

Rio Grande do Sul, seapt., Brazil, cap. and chief seapt. of state of same name, in 32° 2′ S., at the end of a narrow tongue of land jutting NE. at the S. end of the Lago dos Patos, just within the mouth of that lagoon. Exports cattle products. The development of the port is retarded by the bar at the mouth of the lagoon, 6 m. S. of the town, usually preventing the access of vessels drawing more than 11½ ft., though the depth fluctuates according to wind. Loading and unloading by means of lighters, or alongside quays. The construction of piers 1300 ft. long and the dredging of a channel to a depth of 26 ft. between these piers is projected. Mean temp. (9 yrs., 1877–79, 1882–87), yr. 66.0° F., Jan. 75.9°, July 56.3°. P., including São Jose on opposite side of lagoon, 23,000.

Riohacha, seapt. tn., Colombia, on the N. ct., in about 72° 58′ W.; connected by a direct line of navigation with the U.S.; vessels anchor several miles from the shore. Drake burnt and sacked the town, 1596, and it was again burnt down in 1820 by the insurgent troops of the Irish legion.

Rio Hondo, tn., Argentine Republic, 60 m. S. by E. Tucuman; to the NW. the warm sulphur spring of Los Sotelos.

Rioja, or **La Rioja,** prov. in NW. of the Argentine Republic, more than one-third of the size of Great Britain, extending from the Chilean prov. of Atacama in the NW. to the prov. of Córdoba in the SE. Surface mountainous in the NW., where the Sierra Famatina approaches 20,000 ft. in its highest peak, and even the valleys reach a height of 10,000 ft., level in the SE., where, however, there are isolated granitic chains (Malanzan, &c.), known collectively as the Sierras de los Llanos. Only important river the Bermejo; the other streams used up for irrigation, the climate being very dry [**Rioja,** tn.]. Chief crops maize, wheat, lucerne. The prov. is rich in minerals, including coal at Paganzo (S. of town of Rioja, in 30° 10′ S., 67° 25′ W.), native copper and copper ore in the Sierra de Famatina, native silver and silver-lead, iron, and others. See **Argentine Republic,** table.

Rioja, tn., Argentine Republic, cap. prov. R., 208 m. SSW. Tucuman. Alt. 1670 ft. Mean temp. (4 yrs., 1875-78), yr. 69.3° F., Jan. 81.5°, July 56.3°; mean rfall., 11.9 in., April–Sept. 1.6 in. P. 6000.

Riudsu-saki, point on the S. ct. of Shikoku I., Japan, S. of the entrance to Urato or Varado Bay, with lighthouse in 33° 30′ N., 133° 36′ E., visible 10 m.

Riuklu Islands (in Chinese pronunciation **Luchu,** or **Loochoo,** a name sometimes officially adopted by the Japanese themselves, though the letter *l* is foreign to their language), a group of nearly forty islands in the Chinese Sea, stretching SSW. between Japan (Kiushiu) and Formosa. The largest islands are Tanega, Yaku, or Yokuno, Oshima, Tokuno, Okinawa, or Great Riukiu (between 26° and 27° N., crossed in the middle by 128° E.), Miyako, Ishigaki, and Iriomote. Some of the islands are of volcanic origin, some coralline. They are subject to earthquakes and typhoons, but have a healthy, though warm climate, and produce rice, sugar, sago, tea, maize, fruits, dye-woods, &c. Since the beginning of the 17th century they have been virtually subject to Japan, and in 1876 were incorporated in the Japanese empire. Total area, 1860 sq. m. P. (census, Dec. 31, 1891) 411,000. See *Geog. Jour.,* v., with map, p. 408.

Riva, fortress, Asia Minor, on the Black Sea, near mouth of the Bosporus, 18 m. NE. Constantinople.

Riva, tn., Austria, Tirol, 20 m. SW. Trent, at the N. end of Lake Garda. Industrial and commercial centre of Lake Garda, and is a winter resort. Mean temp., yr. 55.5° F., Jan. 38.2°, July 73.7°; rfall. 45 in. P. 5100.

Riva, comm., Italy. See **Rivamonte.**

Rivadavia, tn., Argentine Republic, Salta, on Rio Bermejo, 235 m. NE. Tucuman. P.<2000.

Rivadelago ('shore of the lake'), vil., Spain, Leon, prov. and 67 m. NW. Zamora, on the Rio Tera, near Lake San Martin de Castañeda. Three long-frequented springs of sulphuretted soda mineral waters. Alt. 2625 ft. P.<2000.

Rivadéo, or **Ribadeo,** comm., N. ct. Spain, prov. Lugo, 57 m. E. by N. Ferrol; no docks or quays. Lighthouse on Panche I., visible 9 m. P. 8700.

Rivadesella, tn., Spain. See **Ribadesella.**

Rivadumia, comm., Spain, Galicia, prov. and 9 m. NNW. Pontevedra. P.<3000.

Rivals, The, or **Yr Elfi,** mt. with three peaks, Wales, Carnarvonshire, Lleyn Penin., 5½ m. NE. Nevin. On the eastern peak are the ruins of the fortified British town Tre'r Ceiri.

Rivalta, comm., Italy, Piedmont, prov. and 7 m. S. by W. Alessandria. P.<3000.

Rivamonte, or **Riva,** comm., Italy, Venetia, prov. and 13 m. NW. Belluno, in the Imperina valley; celebrated coppermines. Alt. 3180 ft. P.<2000.

Rivara, vil., Italy, Emilia, prov. Modena, 9 m. SE. Mirandola. P.<4000.

Rivara, comm., Italy, Piedmont, prov. and 18 m. N. by W. Turin. P.<2000.

Rivarolo Canavese, tn., Italy, Piedmont, prov. and 18 m. N. Turin. P.<2000.

Rivarolo Fuori, tn., Italy, Lombardy, prov. Mantua, 3½ m. SW. Bozzolo, on the Delmona. P.<3000; comm. P.<4000.

Rivarolo Ligure, comm., Italy, Liguria, prov. and 2½ m. NNW. Genoa. P. 8900.

Rivas, tn., Central America, Nicaragua, cap. dep. R., 60 m. SE. by S. Managua. Its port on the lake is the village San Jorge. R. is the ancient Indian village *Nicarao.* The isthmus of R., separating the Lake of Nicaragua and the Pacific, is 12½ m. across, and descends to a level of 20 ft. above the level of the lake, and 150 ft. above the Pacific Ocean. Mean temp. (7 yrs., 1880–86), yr. 80.2° F.; mean annual rfall. (5 yrs.), 56.13 in. P. 10–12,000.

Rivas (or **Ribas**) **del Sil,** comm., Spain, Galicia, prov. and 40 m. SE. Lugo, on the Sil. P.<4000.

Rivaulx, or **Rievaulx,** par., Eng., Yorkshire, N. Riding, Whitby div., on the Rye, 18½ m. ENE. Ripon, 2½ m. WNW. Helmsley stn. **R. Abbey,** beautiful ruins of the first Cistercian abbey founded in Yorkshire, in the early part of the 12th century. **R. Moor,** an upland tract to the N. 5311 ac. P.<250.

Roche-Derrien, La, vil., France, dep. Côtes du Nord, on the Jaudy, 57 m. W. by N. St. Malo; slate quarried. P. <2000.

Rochefort, comm., Belgium, prov. Namur, on the Lesse, 26 m. S. Huy; has marble quarries and lead-mines. Is a tourist resort on account of its caves, which extend from 2 m. E. the town to 3 m. to the W. R. was formerly the cap. of the county of the Ardennes, and belonged to the family of La Marck. Was besieged and taken several times in the 15th and 16th centuries. P. <3000.

Rochefort, vil., France, dep. Jura, on the Doubs, 23 m. WSW. Besançon, arr. and 4 m. NE. by E. Dôle. P. <2000.

Rochefort, or **Rochefort Montagne,** tn., France, dep. Puy-de-Dôme, cap. cant., arr. Clermont-Ferrand, 15 m. WSW. Clermont. P. <2000.

Rochefort-sur-Loire, tn., France, dep. Maine-et-Loire, arr. and 10 m. SW. Angers; has the ruins of an 11th century castle, destroyed 1214. During the Huguenot wars R. was an important point of dispute. P. <2000.

Rochefort-sur-Mer, tn., France, cap. arr., dep. Charente-Inférieure, on the Charente (r. bk.), 9 m. from the Atlantic, with a naval and a commercial harbour, the former protected by batteries. There is an arsenal (with extensive magazines and foundries), separated from the town by fortifications, but communicating with the naval harbour; military barracks. The commercial harbour, higher up the river, has three wet docks, one of 15½ ac., quayage 3692 ft., and depth 25½ to 29½ ft.; another of 3 ac., quayage 1556 ft., and depth 17½ to 22½ ft.; the third of 2¾ ac., quayage 1486 ft., and depth 17½ to 22½ ft. The dry dock is 326 ft. long, cradle 46½ ft. The channel of the river has been deepened. The staple industry is shipbuilding, with some manufacture of sails and furniture. The naval school, now transferred to Brest, was founded at Rochefort, which is still one of the five military ports. Its importance began under Colbert. The climate is rather unhealthy, the town being situated in a marshy district. P. (1872) 26,600; (1891) 33,300.

Rochefoucauld, La, tn., France, dep. Charente, cap. cant., arr. and 13 m. ENE. Angoulême; manufactures cloths, linen, and cart-awnings. The castle, to which the town owes its origin, was founded at the end of the 9th century, and rebuilt in the 12th and 14th centuries. The second Duke of Rochefoucauld was the celebrated author of the 'Maxims.' P. <3000.

Roche-l'Abeille, vil., France, dep. Haute-Vienne, arr. St. Yrieix, 6 m. S. Limoges; serpentine is quarried here. Here the combined forces of Coligny and Deux-Ponts defeated the Romanist army under the Duke of Anjou and Philippi Strozzi, 1569. P. <2000.

Roche-la-Molière, tn., France, dep. Loire, arr. and 3 m. W. St. Étienne; coal is mined here. P. <3000.

Rochelle, vil., Canada, Quebec, Shefford co., 8 m. from Waterloo. P. <1500.

Rochelle (La), fortified city and seapt., France, cap. dep. Charente-Inférieure, on the Atlantic, in the inlet formed by the isls. Ré and Oléron, 296 m. by rail SW. Paris, and 18 m. NNW. Rochefort. The fortifications are 3½ m. round, with seven gates and three towers, the oldest dating from 1384, and the 'lantern-tower' having seven stories. The harbour is the chief on that coast, with an outer basin, still protected by the historical stone mole of Richelieu (area 7½ ac., quayage 2793 ft., depth 18½ to 22½ ft. over sill); an inner basin (area 3½ ac., quayage 1023 ft., depth 17 to 20½ ft. over sill); St. Nicholas' basin (with quayage 908 ft., depth 8 to 11⅜ ft. over sill); the tidal harbour (area 8 ac., quayage 2506 ft., depth 16¾ ft. at high water). There is besides the basin La Pallice, which is a rival port 3½ m. NW. Rochelle (dock 2333 ft. long, quayage 5556 ft., depth 30 to 36 ft. over sill). The chief buildings in R. are the cathedral, in massive Grecian style, with a dome; the town house, resembling a fortress; the episcopal palace, with a library of 25,000 volumes, and a museum; the arsenal; several hospitals, &c. The parade-ground, which is the chief *place*, shows the site of the castle demolished in 1590. R. was formerly called *Rupella* ('little rock'); at the Reformation it was a centre of Calvinism; it endured a six and a half months' siege against the Roman Catholic army, losing 20,000 men, and afterwards another of eight months, before capitulating to Cardinal Richelieu (1628). Three thousand of its best citizens were lost to it by the Edict of Nantes, and its commercial prosperity was finally ruined when France lost Canada. The present line of fortifications were drawn up by Vauban. In 1892 there occurred in this neighbourhood a remarkable plague of white ants. Rfall. 25.98 in. P. (1872) 19,500; (1891) 26,800.

Rochelle, city, U.S., Illinois, Ogle co., 76 m. W. Chicago. P. <2000.

Rochester, or **Belle River,** vil., Canada, Ontario, Essex co., on Belle R., 208 m. SW. Toronto, 13 m. E. Windsor. P.<2500.

Rochester, episcopal city, parl. and (since Henry II.) mun. bor., port, and market-tn., Eng., Kent, 8 m. N. Maidstone, in the diocese of Rochester, on the Medway, with stns. on the L. C. & D. R. and SE. R., and (**R. Bridge**) on L. C. & D. R. The chief trade is from the naval and military establishments, some shipping and fishing, and manufactures of agricultural implements, traction engines, oil and oil-cake. The port has a patent slip 300 ft. long, with cradle 120 ft. The town grew up round a castle which was built to defend the passage of the river on the site of the famous Norman keep, which is still a prominent feature. It is 104 ft. high, with walls 12 ft. thick; and being purchased by the corporation in 1883, the grounds now form a public garden overlooking the Medway. The cathedral dates from 604 (rebuilt 1077, and again 1115, enlarged 13th century); 306 ft. long, with fine Norman doorway and nave, Early English choir. Diocese, founded by Ethelbert on his conversion by St. Augustine, includes parts of Kent, Surrey, and Sussex; P. (1891) 1,938,000; revenue, £4500. Market-day, Tu. City and bor. (both parl. and mun.) P. (1801) 6800; (1851) 14,900; (1871) 18,400; (1891) 26,300; eccles. par. (**R. St. Margaret with Boarstal**) P. 7000.

Rochester, tn., U.S., New Hampshire, Strafford co., on Cocheco R., 29 m. E. by N. Concord. P. 7100.

Rochester, city, U.S., New York, Monroe co., on the Genesee R., here crossed by the aqueduct conveying the Erie Canal, 67 m. ENE. Buffalo. Within the city the Genesee descends 226 ft., forming three cataracts of 96 ft., 25 ft., and 84 ft. respectively, affording water-power largely used in flour-milling industries, but now mainly used in supplying electrical power for lighting, for railway locomotion, and various industries. The manufactures are ready-made clothing (third city in U.S. at census of 1890), boots and shoes (fourth in U.S.), tobacco, photographic apparatus, agricultural machinery, &c. R. is noted for its nurseries, the largest in America, and covering thousands of acres around the city. The university of R. and the theological seminary, founded by the Baptists in 1850, have valuable libraries. R. was first settled in 1810. Alt. 508 ft. (R.R.); signal station, 589 ft. Mean temp. (15 yrs.), yr. 47.1° F., Jan. 24.6°, July 70.7°; mean rfall. (11 yrs.), 37.32 in. P. (1820) 1500; (1870) 62,400; (1880) 89,400; (1890) 133,896.

Rocky Mountain House, settlement, Canada, dist. Alberta, on the N. Saskatchewan R., 101 m. NNW. Calgary.

Rocky Mountains (probably so-called by reason of the unusually extensive appearance of bare rocks), the main series of elevations forming the crest of the great highland region of the W. of N. America, in Canada and the United States, of which the eastern slope carries the waters of the Missouri, Saskatchewan, and Mackenzie Rivs., and the western those of the Colorado and Columbia. Not all the system has been well explored as yet; knowledge of the northern parts being scanty, and mostly confined to the regions near the waterways. Topographical surveys have been made in the SE. of Brit. Columbia for railway purposes, and throughout nearly all that portion within the United States. Geologically, the ranges in Colorado are best known, but large areas are still unsurveyed. The strata are largely of Mesozoic and more recent ages, though Archæan formations exist in the series of ranges from the Wind River Range to the Colorado or Front Range. The great plateau itself rises almost imperceptibly from the central lowland of the continent, the streams being navigable up to and among the outer ranges, and attains an alt. of from 6000 ft. in New Mexico, 5000 ft. in Colorado, and 3000 ft. in Montana, thence descending gradually northward. The western edge of the plateau is along the Sierra Nevada and Cascade Mts., and their slope to the Pacific is short. Between the two great series there are hundreds of ranges of lesser magnitude, some, as the Blue Mts. in Oregon, loosely connected by intermediate ranges, others distinctly separate, though with the same general trend. In Canada the total width of the highland is much less, the ranges lie near together, and the plateau character is not so perceptible. The Canadian section has the name Rocky Mts. attached to the chief of its eastern ranges, from Montana to about 62° N. Mounts Hooker and Brown, to which altitudes of about 15,700 and 16,000 ft. were respectively assigned, were long reckoned the chief peaks of this section; but according to Coleman, the peaks in the positions given to these mountains are only 8000 and 9000 ft. respectively, though other peaks in the neighbourhood of the position of Mount Hooker are about 12,000 or 13,000 ft. At 62° N. the Pelly Mts., 6800 ft., and the Glenlyon Mts., 5000 ft., mark the westward trending towards the Pacific. W. of the Yukon R. the Alaskan Mts. continue the system to Bering Sea, and in their westernmost prolongation constitute the Aliaska Penin. Three great cross valleys allow the passage of the Yukon at 63° N. below Fort Selkirk, of the Liard at 59° N. below Fort Halkett, and of the Peace at 56° 30′ N., the two latter streams tribs. of the Mackenzie. The prevailing type of valley is, however, longitudinal, and in the SE. of British Columbia, between the parallel ranges of the Rockies, Caribou, Brisco, Purcell, Selkirk, and Gold Mts., lie the upper courses of the Fraser, Thompson, Columbia, Kootenay, and Flathead Rivs. Further S. the eastern range, called in Montana the Missouri Range, and the Cour d'Alène or Bitter Root Mts., a continuation of the Selkirks, are joined in lat. 46° at Deer Lodge Pass (5808 ft.), and enclose a great upland valley containing many minor parallel ranges, and drained by the Clarke Fork of the Columbia. Such a high enclosed valley is typical of the Rocky Mts. in the United States. A second encloses the SW. part of Montana, bordered on the W. to lat. 44° by the Bitter Root, on the E. from 47° to 46° by the Big Belt, the Bridger, and the Crazy Mts. (Conical Peak, 10,727 ft.; Crazy Peak, 11,178 ft.), and from 45° 30′ to 44° by the Snow Mts. and the Shoshone Range; drainage to the NE. by the Missouri and Yellowstone. Its southernmost portion is the Yellowstone National Park (*q.v.*). Detached ranges outside its borders are, on the W., the Salmon River Mts., 44° to 45°; on the E. the Little Belt, Snowy, and Beartooth. Within the Yellowstone Park are the Absaroka and the Gallatin Mts. A third great valley, that of the Big Horn, lies in the NW. of Wyoming, on its W. and S. the Shoshone Range (Washakee Needle, 12,253 ft.) and the Wind River Mts. (Fremont's Peak, 13,790 ft.; Glacier Peak, 13,499 ft.; Union Peak, 11,593 ft.); on the E. the Big Horn Mts., from 43° to 45°, and the Pryor Mts. E. of the Big Horn are the Wolf Mts., the Powder River Range, and the Black Hills (Harney Peak, in South Dakota, 7700 ft.). From 44° to 41°, between 110° and 113° W. long., extend a series of ranges mostly meridional, the Teton Range (Grand Teton, 13,691 ft.), the Snake River Range, Blackfoot Range, Gros Ventre Mts. (Gros Ventre Peak, 11,464 ft.), the Wyoming Range (Wyoming Peak, 11,490 ft.), Salt River Range, Portneuf Range, Bannack Range, Bear River Range, Absaroka Ridge, Meridian Ridge, and the northern part of the Wasatch Mts. These contain the water-parting between the Columbia and Colorado Rivs.; to their E. a high plateau, 6000–7000 ft. in alt., with a width of 90 m., extends for 275 m., a fourth enclosed valley. It is bordered on the N. by the Wind R. and Rattlesnake Mts., E. by the Laramie Range or Black Mts.; it carries the continental water-parting, the Green River Basin and Bridger Basin, in the W. being drained by the Green to the Colorado, the Laramie Plains, in the E. by the Platte to the Missouri. Medicine Bow Range (Snow Peak, 12,230 ft.) lies to the SE. A fifth great plateau valley is the basin of the upper Colorado R., bordered on the E. and W. by the two most massive series of elevations of the Rocky Mt. system. On the W. are the Wasatch Mts., extending through six degrees of lat. (Spanish Fork Peak, 10,000 ft.; Provo Peaks, 11,000 ft.; Timpanogos Peak, 11,957 ft.; Lone Peak, 11,500; Clayton Peak, 12,000 ft.). At lat. 40° 45′ N. the Uintah Mts. (Mount Agassiz, 13,000 ft.; La Motte, 14,000 ft.) extend E. from the Wasatch to the plateaux or *mesas*, that abut the eastern border ranges. The elevations E. of the Colorado Basin consist of (1) a series of massive groups overlooking the plateau; (2) an eastern series of closely placed ranges fronting the Great Plains; (3) lofty enclosed valleys between the two series, separated by cross ranges, and known as Parks. These latter are North Park, in Wyoming and Colorado, area 700 sq. m., alt. 7500 ft., drained by the N. Platte; Middle Park, in Colorado, 7000 ft. high, drained by the Grand; South Park, in Colorado, 8000 to 10,000 ft. high, area 1000 sq. m., drained by the Arkansas; and the valley of San Luis, in Colorado and New Mexico, 35 m. wide and 140 m. long, with an area of 5000 sq. m. at an alt. of 8000 ft., with the upper course of the Rio Grande. The ranges and groups of the series W. of the Parks are the Park Range (with peaks over 14,000 ft.), the Elk Mts., the Sawatch Mts. (Mount of the Holy Cross, 14,176 ft.; Mount Harvard, 14,375 ft.), the Garita Hills, the San Juan Range, and the Uncompagre Mts. E. of the Parks, the Front or Colorado Range (Long's Peak, 14,271 ft.; Gray's Peak, 14,341 ft.; Pike's Peak, 14,147 ft.), the Sangre de Cristo Range (Blanca Peak, 14,464 ft., the highest of the Rockies in the United States. Farther S. the elevations are detached and of less height, the Zuni Mts. in New Mexico being the chief.

Passes and Railways.—In Canada, N. of the Pacific Rly. are the gorges of Peace, Liard, and Yukon; the Smoky R. Pass, at 54° 10′, from Peace R. to Fraser R.; the Leather or Yellowhead, at 52° 55′ N., 3746 ft. elevation, from Athabasca R. to Fraser R., and traversed by an important waggon road from Jasper House to the Fraser valley; the Athabasca Pass, at 52° 20′, between Mounts Brown and Hooker, 6025 ft. elevation; Howse Pass, 4500 ft. The passes used by the Canadian Pacific are the Wapta or Kicking Horse, 5323 ft., over the main range in Alberta; the Rogers, 4327 ft., over the Selkirks; and the Eagle, 1828 ft., over the Gold Range. To the S. are the Kananaski, about 5700 ft., the Kootanie, about 6000 ft., between the Saskatchewan and Kootenay. Marias Pass, 8500 ft., is between the Marias R. and the Flathead R., on the Great Northern Rly., in Montana. The Northern Pacific crosses the Big Belt, in the Bozeman tunnel, at an alt. of 5567 ft. The Utah Northern crosses the Portneuf Range in the Portneuf Pass, alt. 6610 ft. (ancient outlet of Lake Bonneville); the Bitter Root at Sohon Pass, 5100 ft.; and Deer Lodge Pass, in a tunnel 5808 ft. high. Not used by railways are the Teton Pass, 8404 ft., between Teton and Snake River Ranges; Two Oceans Pass, 8200 ft., S. of Yellowstone National Park, between tribs. of Yellowstone and Snake Rivs.; and South Pass, 7429 ft., between the valleys of Sweetwater and Green R., used as an emigrant route before railways were built. The Union Pacific Rly. uses Evans Pass in Laramie Range, 8423 ft. Further S. the Muddy Creek Pass, 8772 ft., from N. to Middle Parks. In the Front Range are Kenosha Pass, 9981 ft., on Denver and South Park Rly.; Loveland Pass, 11,876 ft., waggon road; Ute Pass, 8551 ft., waggon road; and Grey and Torrey Pass, 13,929 ft. In the Park Region are Hoosier Pass, 11,627 ft., waggon road; Weston's Pass, 12,109 ft., waggon road; Trout Creek Pass, 9613 ft., waggon road; French Pass, 12,044 ft., waggon road. On the Denver and Rio Grande Rly. are Mosquito Pass, 13,308 ft., in the Park Range; Marshall Pass, 10,852 ft., and Poncho Pass, 8946 ft., in the Saguache Mts.; Mosca Pass, 9787 ft., in the Sierra Blanca; Placer Pass, 9526 ft., and Poison Pass, 8672 ft., in the Sangre de Cristo Range. In the San Juan Mts. Cinnamon Gulch, 12,659 ft., is

traversed by a waggon road. The Atchison, Topeka, and Santa Fé Rly. crosses the Raton Range by a tunnel, near Trinidad, at an alt. of 7612 ft. The Atlantic and Pacific reaches 6477 ft. at Coolidge (New Mexico), on the Continental Divide; while the Southern Pacific Rly. finds its greatest elevation to the W. of the Rockies. [C. H. L.]

Rombach, vil., Ger., Alsace-Lorraine, circle and 10 m. N. by W. Metz. P. (comm.) <3000.

Romblon, one of the Philippine Is., in 12° 35′ W., 122° 15′ E.

Rome, Italian **Roma,** cap., Italy, situated on the Tiber, 14 m. from its mouth, in lat. (observatory) 41° 54′ N., long. 12° 29′ E. The greater portion of the city lies on the E. or l. bk., on the Pincian, Quirinal, Viminal, Esquiline, Capitoline, Palatine, Celian, and Aventine Hills, and on the low ground between them and the river. On the W. or r. bk. of the Tiber (Italian Tevere) lie the Vatican and Janiculan Hills, and between the latter and the river the suburb of Trastevere. R. is surrounded by walls, in the main coincident with the ancient circuit built by the Emperor Aurelian in 271 and the succeeding years. Of the several gates which pierce the walls the most notable are the Porta del Popolo (ancient *Porta Flaminia*) on the N., the Porta Pia (ancient *Porta Nomentana*) on the NE., the Porta San Lorenzo and the Porta Maggiore on the E., the Porta San Sebastiano (ancient *Porta Appia*) and Porta San Paolo (ancient *Porta Ostiensis*) on the S., and Porta San Pancrazio (ancient *Porta Aurelia*) on the W. Since 1877 more than a dozen modern forts have been built at distances of 1–3 m. from the city wall. The Tiber, 55 to 115 yards wide, winds through 2¾ m. within the walls, and is crossed by about a dozen bridges, including the ancient Ælian, Aurelian, Cestian, and Æmilian bridges. Since 1870, and more especially since 1882, the municipality has very greatly improved the city, by deepening and straightening the Tiber, by embanking it (and so checking the former disastrous inundations), by laying out new suburban dists.

in the NE. and SE. and on the N. of the Vatican Hill, and more particularly by the construction of broad, handsome new streets, partly radiating southwards from the Porta del Popolo, partly crossing the city from E. to W. Nevertheless there still remain many gloomy, narrow intersecting thoroughfares, and the filthy Jews' quarter at the foot of the Capitoline, as well as large spaces of cultivated ground within the circuit of the walls. The larger portion of modern R. is built on the ancient *Campus Martius*, and N. of the old imperial city. The principal street is the Corso, nearly a mile long, running S. from the Porta del Popolo; it is the scene of the carnival, and one of the fashionable resorts of the Romans; another circles round the Pincian Hill. The chief popular resort is the Circo Agonale, between the Corso and the river. R. is splendidly provided with fountains, the handsomest being the Fontana di Trevi, between the Quirinal and the Corso. Water is still conveyed to the city by a dozen or more of the ancient aqueducts, some of them magnificent arched structures linking the hills together. In addition to being the civil cap. of Italy, R. was for ages the ecclesiastical centre of the world, and is still the headquarters of the Roman Catholic faith. This accounts for the fact that there are some 350 churches within the city limits. Amongst these the first place must be accorded to St. Peter's on the Vatican, begun, on the N. side of Nero's Circus, where so many Christian martyrs perished, in the reign of Constantine the Great (first half 4th century), but entirely reconstructed from designs by Bramante, Michel Angelo, and Maderna between 1506 and 1626. Its form is that of a Latin cross, surmounted by a vast dome; its length, 614 ft.; its width, 450 ft.; height of nave, 148 ft.; height of cross crowning the dome, 435 ft. Amongst the artistic and antique treasures which adorn its interior are the altar of the ancient church, covering the tomb of St. Peter, tombs of Popes Sixtus IV., Innocent VIII., Clement XIII., Paul III., and Pius VII., a statue of Pius VI. by Canova, a 5th century bronze statue of St. Peter, a Pietà by Michel Angelo, pictures by Giotto, and frescoes by Melozzo da Forlì. In the SE., or opposite extremity of the city, is the mother-church of R., the cathedral-church of the Pope as bishop of R., called St. John the Lateran, the first foundation of which dates from 324, though reconstructions have gone on almost continuously ever since. It contains the Corsini Chapel, one of the handsomest in the city. The following churches may be enumerated as amongst the most interesting, either for the art-treasures they shelter, or because of their archæological or architectural features: S. Clement, Santa Maria Maggiore (with magnificent chapels and frescoes by Guido Reni), S. Paolo Outside the Walls, Santa Maria del Popolo (with the Chigi Chapel by Raphael), San Luigi, the New Church (with altar-pieces by Rubens), San Giovanni de' Fiorentini, San Lorenzo in Damaso, Sant' Andrea della Valle, San Carlo, Santa Maria sopra Minerva (the only Gothic church in the city), the Jesuits' Church (containing the tomb of Ignatius Loyola), Santa Maria Araceli, San Gregorio Magno, Santa Croce, Santa Maria in Cosmedin, San Lorenzo Without the Walls, San Pietro in Vincoli (with the tomb of Julius II. by Michel Angelo), Santa Maria degli Angeli, Santa Agnese, Santa Costanza, Santa Onofrio (with Tasso's tomb), San Pietro in Montorio, Santa Maria in Trastavere, Santa Cecilia, and Santa Maria la Rotonda (the ancient Pantheon). Under extensive areas of R. run the ancient Christian catacombs, exceptionally rich in memorials of early Christianity.

Next after her churches, Rome's greatest architectural monuments are her palaces. The largest of these, and one of the largest palaces in the world, is the Vatican, which contains the residence of the Pope; the Sistine Chapel, with superb frescoes by Michel Angelo and other artists; the Pauline and Nicoline Chapels, splendidly decorated by Fra Angelico and Michel Angelo respectively; the halls and arcades (*loggie*) of Raphael, Perugino, and others; the grand picture-gallery; the Vatican library, one of the richest of the world in valuable MSS.; the sculpture-galleries, enriched with the Apollo Belvedere, Laocoon, Antinous, and other masterpieces of ancient Greek genius; besides Etruscan and Egyptian museums. The Lateran Palace, beside the church of St. John the Lateran, also belongs to the Pope, given by Constantine the Great to the bishop of R., and used as the papal residence until the emigration to Avignon in the 14th century. It is now converted into a large sculpture-gallery, picture-gallery, and museum of Christian antiquities from the catacombs and elsewhere. In front of it are the Holy Steps (Scala Santa), the traditional ascent to Pilate's court-house in Jerusalem, and never ascended except kneeling on the knees. The King of Italy inhabits the Quirinal Palace (1573–1608), the former summer residence of the popes. A little to the W. of the Corso is the Parliament House. The Capitoline Hill is crowned by three palaces, all designed by Michel Angelo, one occupied by the municipal authorities, the other two containing collections of Etruscan antiquities, ancient bronzes, sculptures, &c. E. of the Vatican is the mediæval citadel of R., the Castello Sant' Angelo, the ancient tomb of Hadrian. Other remarkable palaces are the Palazzo di Venezia, Palazzo Barberini, Borghese, Caffarelli, Colonna, Corsini (seat of the Academy dei Lincei), Doria, Farnese, Farnesina, Torlonia (formerly Albani), Rospigliosi, Sciarra, Spada, Chigi, Mattei, &c., nearly all containing picture-galleries or other valuable works of art; and the Villas Medici, Borghese, Ludovisi, Massimi, Pamfili, &c. The ministries of the interior, public works, and finances, the university, Roman College (with the Kircher Museum and the old observatory), the art exhibition, the science institutes of the university, the hospital Santo Spirito, and the railway station, are all noteworthy edifices. The public educational, charitable, and scientific institutions include the university (four faculties) with Alexandrine library, new observatory, botanical garden, &c.; the technical institute, the royal school of engineers, the royal lyceum, the royal institute of fine arts; the various colleges of the Papacy (Vatican seminary, Roman college, College de Propaganda Fide, College St. Thomas Aquinas); the academies of St. Luke (art), Tiberine (literature), Arcadian (literature), Lincei (natural science), the royal academy of Santa Cecilia, and several societies of artists; the libraries of the Vatican, Casanatense, Angelica, Alexandrina, Lancisiana, Vallicelliana, Corsini, Barberini, Chigiana, and Vittore Emmanuele; various handsome theatres (*e.g.*, Apollo, National, &c.), hospitals, orphanages, &c. The monuments to King Victor Emmanuel and to Garibaldi, and the graves of the English poets Shelley and Keats, in the Protestant churchyard, deserve mention.

The chief industry of the inhabitants of R. is connected with the production of objects of art, and the supply of the numerous artists, invalids, and ecclesiastical and other visitors; its manufactures are confined to silk ribbons, &c., strings for musical instruments, imitation pearls, mosaics, jewellery, trinkets, glass, pottery, and bricks.

The remains of ancient Rome comprise the Cloaca Maxima (that is, the great sewer), the aqueducts, the circus of Maxentius, the Coliseum (formerly the Flavian amphitheatre), the theatres of Marcellus and of Pompey, the palace of Septimus Severus and other palaces of the Cæsars on the Palatine, the temples of Æsculapius (on an island in the Tiber), Concord, Venus, Piety, Castor and Pollux, Vespasian, Cæsar, Faustina, Fortuna, Holy City, and Vesta, the Basilica Julia, Basilica Ulpia, the mausoleum of Augustus, the tomb of Cæcilia Metella, the mausoleum of Hadrian (the castle of St. Angelo), the pyramid of Caius Cestius, the columbaria and tombs on the Appian Way, the colonnade of the Twelve Great Gods, the Tarpeian rock (on the Capitoline), the Mamertine prison, the Prætorian camp, the Pantheon, the baths of Caracalla, Diocletian, Titus, Constantine; the triumphal arches of Augustus, Titus, Constantine, Septimus Severus, Drusus, Gallienus, and Dolabella; the columns of Antoninus (Marcus Aurelius) and Trajan, several Egyptian and Roman obelisks, and the Roman Forum. According to tradition, R. was founded by Romulus in 753 B.C. In the year 510 B.C. the city, already covering the 'seven hills,' threw off the sway of the early kings and declared herself a republic. Then, having subdued the greater part of southern Italy, she measured herself against Carthage in a series of gigantic wars, in the course of which R. herself was threatened by the great Punic general Hannibal (264–146 B.C.). Thenceforward her armies conquered region after region, until she became the mistress of great part of the then known world. But before this march of conquest was completed the city had passed through the throes of civil wars, arising out of the ambitions of her great commanders, and had taken unto herself an emperor in the person of Octavian (28 B.C.). The profligacy, incompetency, and tyranny of the emperors of the 3rd century greatly weakened the empire, and Diocletian (284–305) deprived R. of great part of her prestige by virtually establishing coequal caps. on the frontiers threatened by the barbarians and the Persians. Constantine (324–337), forcing Christianity upon the empire, transferred the seat of government to Byzantium. Valentinian I. divided his dominions (368) into the Eastern and the Western Empire. In 403 Ravenna was chosen as government headquarters of the West, chiefly because of the increasingly dangerous inroads of the Germanic and other barbarians. R. itself was taken and plundered by Alaric the Goth in 410, and by Genseric the Vandal in 455. In 476 the empire of the W. came to an end, and R. lost all her privileges as cap. She was twice besieged (537 and 547) during the wars between the Ostrogoths and Belisarius, general of the Eastern Empire. In 554, when she was incorporated in the Eastern Empire, R. had reached the lowest stages of impoverishment. But the Bishop of R. began to restore to the city something of her former importance, which rapidly increased after R. was given to the popes by Pepin and Charlemagne, in the 8th century, and especially after the latter in 800 assumed the (iron) crown of the ancient Roman Empire. But after the downfall of the Franks the city became the scene of petty feuds between the nobles and the papal authority. In 1084 the latter called in to their aid the Normans, who plundered the city. In 1145 the populace weary of the increasing anarchy, proclaimed a republic.

This brought down the army of Frederick I. of Germany, who took the city by storm in 1167. But for the greater portion of four centuries, during part of which time the popes reigned at Avignon in France, R. was more or less the scene of lawless anarchy; and it was only after the return of the papal court, in the 15th century, that R. was able to resume her position as a city of world-wide importance and reputation. She was, however, sacked once again by the Imperialists under the Constable de Bourbon in 1527. From 1809 till 1814 R. was cap. of the dep. R. in the French Empire under Napoleon I., and at the latter date was given back to the Pontiff. The city was garrisoned by French troops from 1849 till 1870, after which she was occupied by Italian troops, and since that time has been the capital of the kingdom of Italy. The city is fairly healthy, except in the hottest weeks of summer. As a winter residence it enjoys a high repute. Alt. 50–170 ft. Mean temp., winter 44.8° F., summer 76.6°, yr. 59.7°; rfall. (1825–91), yr. 30.6 in., Oct.–Nov. 8.5 in. P. (1870) 226,000; (1881) 300,500; (1891, estimated) 436,000. [**J. T. B.**]

Rome, city, U.S., Georgia, cap. Floyd co., on r. bk. of Coosa R., 60 m. SE. by S. of NW. corner of state, in the centre of rich iron ore deposits; cotton shipping port, and health resort. Alt. 627 ft. (R.R.). P. 7000.

Rome, formerly **Fort Stanivix,** city, U.S., New York, one of the caps. of Oneida co., on the Mohawk R. and the Erie Canal, at the confluence of the Black R. Canal, 35 m. ENE. Syracuse, and 13 m. NW. Utica. R. is the centre of dairy-farming and cheese factories, and has extensive manufactures of agricultural implements. P. (1870) 11,000; (1880) 12,200; (1890) 15,000.

Rome City, vil., U.S., Indiana, Noble co., on Sylvan Lake, 8 m. NE. Albion; has valuable mineral springs. P. <1500.

Romedal, vil., Norway, prov. and 7½ m. ESE. Hamar, on an E. feeder of Lake Mjösen. P. (comm.) <5000.

Romeo, vil., U.S., Michigan, Macomb co., 32 m. N. Detroit; manufactures of agricultural implements, steam-engines, &c. P. <2000.

Römerbad, comm. and watering-place, Austria, Styria, dist. Cilli, 33 m. E. by N. Laibach. P. <2000.

Römerstadt, tn., Austria, Moravia, cap. dist. R., on riv. Mohra, 22 m. N. Olmütz. P. <5000.

Rometta, comm., Sicily, prov. and 7½ m. W. by S. Messina. P. <5000.

Romford, stn., Canada, prov. Ontario, on the C. P. R., 436 m. by rail W. Montreal.

Romford (rŭm'ford), market-tn. and par., Eng., in the SW. of Essex, R. div., 16½ m. SW. by W. Chelmsford, on the G. E. R. and London, Tilbury, and Southend Rlys.; noted for its ale; firework factory in par. Market-day, W. 7224 ac. Tn. P. 8700; par. P. 10,700; parl. div. P. (1891) 103,500; eccles. par. (**R. with Noak Hill**) P. 5300 (since the date of the census Noak Hill has been made a separate eccles. par.).

Romford, vil., U.S., Connecticut, Litchfield co., 34 m. E. Poughkeepsie (N. Y.). P. <1500.

Römhild, tn., Ger., duchy Saxe-Meiningen, circle and 8½ m. WSW. Hildburghausen; from 1681 to 1710 the seat of a branch of the house of Saxony. P. <2000.

Romiley, par., Eng., Cheshire, Hyde div., 2½ m. E. by N. Stockport, with stns. on the M. and M. S. & L. Rlys., PM.T.O. P. <2000; tn. (**Bredbury and R.**) P. 5800.

Romilly-sur-Seine, tn., France, dep. Aube, on the l. bk. of the Seine, arr. Nogent-sur-Seine, 23 m. NW. Troyes; 2 m. to the NW. are the remains of the Cistercian abbey Scellières or Sellières, founded 1167, where Voltaire was originally buried, 1791 (his remains were afterwards transferred to the Pantheon at Paris). P. 7000.

Rominte, riv., Prussia, prov. E. Prussia, flows NW. and enters the Pissa just above Gumbinnen; not navigable.

Romita, tn., Mexico, state of and 28 m. WSW. Guanajuato. P. (comm. and dist.) 16,900.

Rommerskirchen, vil., Prussia, Rhine Prov., circle Neuss, 12½ m. SSW. Düsseldorf. P. (comm.) <3000.

Romney, vil., Canada, Ontario, Kent co., on Lake Erie, 36 m. ESE. Windsor. P. <1500.

Romney ('marsh island'), **New,** mun. bor. (since Queen Elizabeth), cinque port, and par., Eng., Kent, Ashford div., 22 m. SSW. and in the diocese of Canterbury, in the flat alluvial dist. called Romney Marsh; on the SE. R. It was a busy port till the reign of Edward I., when the harbour was destroyed by the silting up of shingle, the Rother having then changed its course. R. has a large annual sheep fair. In the town-hall are preserved many important documents and charters relating to the Cinque Ports. The par. of New R. contains the new watering-place of Littlestone-on-Sea. Mun. bor. P. <1500; eccles. par. (**New R. with Hope**) P. <1500. See **Romney Marsh.**

Romney, Old, par., 2 m. W. New Romney. P. <250.

Romney Marsh, Eng., Kent, is a level tract of rich pasture, containing several villages, secured against the sea by an immense embankment, under the management of a corporation. Formerly it was an arm of the sea; but having become silted up, the land was reclaimed and became celebrated for the fattening of cattle, which, according to Camden (1607), were, in his day, driven thither for the purpose 'from the furthest part of England.' The tract is under the management of an ancient corporation known as the 'lath of the level of R. M.' Area, 24,950 ac.

Romny, dist. tn., Russia, govt. and 112 m. NW. Poltava, on Kremenchug-Vilna Rly.; machinery works, fabrication of boots and shoes; great fairs. P. 15,250.

Romö, isl., Prussia. See **Röm.**

Romont, or **Remund,** comm., Switzd., cant. and 14 m. SW. by W. Freiburg. P. <2000.

Romoos, vil., Switzd., cant. and 13 m. W. by S. Lucerne, in the Entlebuch. P. <2000.

Romorantin, tn., France, dep. Loir-et-Cher, on the Sauldre, cap. arr., 37 m. NW. by W. Bourges; manufactures cloths; famous for its asparagus. P. 6500.

Rompon, vil., France, dep. Ardèche, arr. Privas, 14 m. SSW. Valence; 2 m. to the NE. is the thermal establishment of Celles-les-Bains, with eight aerated ferruginous springs, one of which is an artesian well. P. <2000.

Romsdal, dist., Norway, prov. Trondhjem, watered by the Rauma, and celebrated for its fine scenery, particularly the Romsdalshorn (5095 ft.) and the Troldtinder. See **Rauma.**

Romsdal Fjord, fiord, on the W. ct. of Norway, opens into the Molde Fjord, just above 62° 30′ N.

Romsey (rŭm'zi), mun. bor. (since James I.), par., and market-tn., Eng., Hampshire, New Forest div., 8 m. NW. Southampton, in the diocese of Winchester, on the Test, with stn. on branch of L. & SW. R. The trade is mostly connected with agriculture; there are also paper and leather mills, and a manufactory of 'Berthon' collapsible lifeboats. Originally on an island (ey); noted for its Norman abbey. Market-day, Th. Mun. bor. P. <4500; pars., **R. Infra,** P. <2500; **R. Extra,** 9979 ac., P. <4000; eccles. par. (**R. with Lee**) P. 5500.

Romsey, tn., Victoria, Bourke co., 34 m. NNW. Melbourne. P. <1500.

Romsley, par., Eng., Salop, Ludlow div., 6 m. NW. Kidderminster, 2 m. E. Highley stn. P. <250.

Romsley, par., Eng., Worcestershire, dist. Bromsgrove, 3 m. S. Halesowen, P.O. P. <500.

Ron, tn., Brit. India, Bombay, dist. and 51 m. ENE. Dhárwár; has seven black stone temples. P. 6400; Hindus, 5100.

Ron, isl., off the N. ct. of New Guinea, between the bays of Geelvink and Vandamen. Area, 40 sq. m.

Rona, South (possibly 'seal island,' from *ron*, Gaelic, 'seal'), isl., Scot., Inverness-shire, W. ct., 5 m. long (N. and S.), separated from Raasay I. by **Kyle R.**; lighthouse, in 57° 35′ N., visible 21 m. P. 181.

Ronáhl, tn., Brit. India, Oudh, dist. Faizábád, near the r. bk. of the Gogra, 66 m. E. by S. Lucknow, 10 m. W. Faizábád, near the Oudh and Rohilkhand Rly. P. 5400; Hindus, 3700; Moham. 1700.

Ronald, Loch, small lake, Scot., Wigtownshire, 8½ m. W. Newton Stewart, drained W. into the Tarff Water.

Ronaldshaw, vil., Canada, Ontario, Grey co., 17 m. from Mount Forest. P. <1500.

Ronaldshay, North, isl., Scot., the most northerly of the Orkney Is., in Cross and Burness par., 2½ m. NNW. Taftness, in Sanday. Area about 4 sq. m.; surface generally low. Lighthouse, in 2° 24′ W., visible 18 m. P.O. P. 501.

Ronaldshay, South, isl. and par., Scot., Orkney Is., the most southern island of the group, 6 m. NNE. Duncansby Head; surface mostly low, level, and well-cultivated; length, 8 m. Area, including **Burray, Hunda, Pentland Skerries,** and **Swona Is.,** 115,062 ac. P. <3500; isl. P. 2315.

Ronan, mt., Canada, Quebec, Dorchester co., 35 m. SE. by E. Quebec.

Ronas Voe, inlet, Scot., Shetland Is., Mainland, on the W. ct., in 6° 31′–33′ N. **R. Hill,** to the N., is the highest summit in Shetland (1475 ft.).

Ronay, isl., Scot., Inverness-shire, off the SE. of North Uist. P. 6.

Roncal, comm., Spain, prov. and 34 m. E. Pamplona. P. <2000.

Roncegno, tn., Austria, Tirol, dist. Borgo, 15 m. E. Trent; hot baths, with arsenical ferruginous springs. P. <2000.

Ronce-les-Bains, La, sea-bathing resort, France, dep. Charente-Inférieure, arr. Marennes, 2½ m. NW. La Tremblade, opposite Oléron I.

Roncesvalles (in French **Roncevaux**), comm., Spain, in the Pyrenees, prov. and 23 m. NE. Pamplona. The church, in memory of Roland, a paladin of Charlemagne, slain in the gorge of R. in an ambuscade of Basques about 780 A.D., is a resort of pilgrims. P. <2000.

Ronceverte, vil., U.S., W. Virginia, co. and on riv. Green-

brier, 11 m. W. White Sulphur Springs by rail; it has a mineral spring. P. <1500.

Ronchamp, tn., France, dep. Haute-Saône, arr. Lure, 11 m. WNW. Belfort; coal is mined here, the coal-beds having an area of 6½ sq. m. To the NW. is a chapel, a resort of pilgrims. P. <2000.

Roncherolles-en-Bray, vil., France, dep. Seine-Inférieure, arr. Neufchâtel, 20 m. NE. Rouen; has a sulphur spring. The chapel is a resort of pilgrims. P. (comm.) <2000.

Roscoe, settlement, U.S., S. Dakota, Edmunds co., 85 m. NE. by N. Pierre.

Roscoff, tn., France, dep. Finistère, on the N. ct., 33 m. NE. Brest, arr. and 12½ m. NW. by N. Morlaix. Has a tidal harbour not available for large vessels, 18 ft. deep at high water ordinary spring tides, dry at low water. Has naval workshops, and lobster beds, and a famous zoological laboratory; and is a fishing-port and sea-bathing resort. Here Mary Stuart embarked for Scotland, 1548. P. <2000.

Roscommon, inland co., Ire., prov. Connaught, in the Shannon valley, l. bk., divided into the baronies named in the following table:—

Baronies.	Acres.	Pop. 1891.
Athlone, North and South	137,523	22,558
Ballintober North	30,854	6,774
Ballintober South	48,113	9,579
Ballymoe	23,287	2,523
Boyle	81,164	18,777
Castlereagh	82,081	16,492
Frenchpark	71,204	17,604
Moycarn	29,596	4,484
Roscommon	81,585	15,606
Total, Roscommon	585,407[1]	114,397

1 Exclusive of 22,824 ac. under large rivers and lakes.

Surface mostly level, being W. part of the central limestone field of Ireland, varied by some heights, and in the N. rising to an abrupt mountainous range with two summits over 1000 ft. high. The rivers are tribs. of the Shannon, its E. boundary, and there are many lakes, the most remarkable (besides those formed by the Shannon) being Lough Kea, with interesting ruins on two of its islands. Other antiquities in this county are the abbey of Boyle, the Oran pillar tower, and Roscommon Castle, with a quadrangle 220 ft. long, and five towers. The name of this county means 'Comain's Wood,' after an Irish saint of the 6th century. Through the limestone composing the geological floor there protrudes sandstone, *e.g.*, Slieve Bawn in the E. (857 ft. high). There are coal strata on the borders adjoining Leitrim and Roscommon, and ironstone was formerly dug to S. of the riv. Arigna. Coal centres are Kilronan, Gubbarudda, Tullynaha. The 'Plain of Boyle' is a famous sheep-pasture. For agricultural statistics, see **Appendix,** pp. 10–12. The county returns two members to Parliament, and is in the Connaught circuit. See **Ireland,** table.

Roscommon, par. and mun. and market-tn., Ire., W. co. R., bar. S. Ballintober, 16½ m. WSW. Longford, on the M. G. W. R. Market-day, S. Par. 9819 ac., P. <3500; tn. P. <2000.

Ross, West, P.O., Ire., co. Mayo, 6 m. from Castlebar stn.

Rossall Point, cape, Eng., in the NW. of Lancashire, in 53° 55′ N., 2 m. W. by S. Fleetwood.

Ross and Burnmouth, vil., Scot., Berwickshire, on the E. ct., on Ross Bay, 5 m. NNW. Berwick-upon-Tweed, with a stn. (**Burnmouth**) on the N. B. R. P. <500.

Ross and Cromarty, co., Scot., extending from the German Ocean to the Atlantic, 'Cromarty' (*q.v.*), consisting of several detached portions throughout Ross. Both, together with the small dist. of Ferintosh (formerly in Nairnshire), form one county since 1891. Ross includes in the Hebrides the N. and greater part of Lewis, besides Bernera, Orensay, Pabbay, and some smaller islands. Both the E. and W. coasts are much indented, the W. being more attractive to lovers of scenery; interesting spots are Loch Maree and the cataract of Glomach, 370 ft. Geologically, the NW. mainly gneiss, schists, and other crystalline rocks, with red conglomerates and sandstones forming picturesque ranges. Along the E. ct. the schists are covered with Old Red Sandstone formations. The only considerable stretches of level ground are towards E. Elsewhere lofty ranges rise frequently to over 3000 ft., such as Carn Eige (3877 ft.) and Mam Soul (3862 ft.) on the Inverness-shire border; Ben Wyvis (3429 ft.), though detached, Ben Attow (3383 ft.), and Ben Slioch (3217 ft.) overlooking Loch Maree. Ross was not made a county till 1661, but the earldom dates from Malcolm IV. The glens and low grounds are fertile. For agricultural statistics, see **Appendix,** pp. 10–12. County town Dingwall, not far from which is the health-resort of Strathpeffer. Area, 2,003,065 ac. (land, 1,976,400 ac.). P. (1891) 77,800.

Rossano, the ancient *Roscianum,* comm., Italy, Calabrie, prov. Cosenza, 46 m. N. Catanzaro; an archbishop's see; cultivates olive-oil and silk. P. 18,000.

Rossan Point, cape, Ire., co. Donegal, 2 m. N. Malinmore.

Rotterdam, the most important commercial city of the Netherlands, prov. S. Holland, at the confluence of the Rotte with the Meuse or Maas, 40 m. SSW. Amsterdam, lat. 50° 54′ N., long. 4° 29′ E. The city is built in the form of a triangle, one side of which is parallel with the Maas. The Boompjes, a fine quay, extends 1½ m. along the river, and is shaded by a row of elms. A dyke extends through the middle of the city, and protects the central parts from inundation. The Hoog Straat (High Street) is built on the dam which embanks the Maas, and separates the new from the old town. The new quarter, Willemskade, with handsome residences, has been built since 1860, on ground gained from the riv. Maas. The

principal streets are intersected by canals, which are lined with trees and crossed by drawbridges. The principal features of interest are the cathedral church of St. Lawrence (which is built of brick in the Gothic style, and contains the tombs of De Witt, Cortenaer, Van Brakel, and other illustrious Dutchmen; the Boymans' museum; an academy of art and science; botanic and zoological gardens; the central prison of the Netherlands; many superior schools; and statues of Erasmus, born here in 1467, the poet Tollens, and the statesman Hogendorp. The principal commercial emporium of Holland, R. is credited with two-thirds of the total trade of the country. Vessels drawing 22 ft. can approach the city at low tide by way of the New Waterway (Maas and Scheur) and the canal recently cut to the sea through the Hook of Holland. Besides the superb quays on the Meuse and the Koningshavn (King's Haven), nearly 4 m., with various depths (at the Boompjes 23.6 ft. ordinary low water), there are numerous basins in open communication with the river. The petroleum docks are on the l. bk. of the Meuse, opposite Delfshavn. R. is one of the first markets of the world for grain, coffee, tobacco, indigo, and petroleum. The exports are the products of the industrial towns of the Netherlands and E. Germany, as well as cattle and agricultural produce of all kinds for the London markets. R. is one of the principal emigration ports of the Continent, whence sail 5000 to 15,000 persons every year, the majority for the United States. Its canals admit vessels of upwards of 1000 tons burden; and a ship-canal has been cut across the isl. of Voorn. R. has regular communication by steamers with New York, Batavia, London, Hull, Leith, Havre, Hamburg, and the ports on the Rhine. The principal industries are steamboat building, founding, shipbuilding (yards at Feijenoord), sugar-refining, distilling, chemical products, margarine, chocolate, fire-engines, furniture, straw hats, clocks, and textiles. James, Duke of Monmouth, and Grinling Gibbons, the wood-engraver, were born here. Mean temp., Jan. 35.6° F., July 66.2°. P. (comm.) 209,000.

Rotthausen, vil., Prussia, Rhine Prov., circle and 5 m. NE. Essen; coal is mined here. P. 8000.

Rotti, or **Lote,** isl., Eastern Archipelago, SW. of Timor I., of which it is an administrative dependency. Highest alt. under 800 ft.; coral reefs at an alt. of 150-200 ft. The only fairly well sheltered anchorage in Cyrus Bay, in SE. Area about 650 sq. m. P. variously estimated at 54-62,000.

Rottingdean, par., Eng., Sussex, Lewes div., on the S. ct., 4 m. E. Brighton; sea-bathing resort. PMT.O. P.<2000.

Rottington, par., Eng., Cumberland, Egremont div., 3½ m. S. by W. Whitehaven, 1 m. NW. St. Bees stn. P.<250.

Rottnest, isl., W. Australia, Perth co., 12 m. W. by N. Fremantle, in 32° S. and 115° 33′ E.; contains the seaside residence of the governor of the colony. Mean temp. (6 yrs., 1880-85), yr. 64.3° F., Jan. 72.0°, July 57.6°. P.<1500.

Rotton Park Road, stn., Eng., Birmingham, Edgbaston div., on the L. & NW. R.

Rottum, isl., Holland, in the North Sea, prov. Groningen; 3½ m. long, by 1-2 m. broad.

Rottwell, tn., Ger., in the SW. of Würtemberg, Black Forest circle, on the Neckar, 31 m. SW. Tübingen; until 1784 R. was the seat of the imperial high court of justice; ceded to Würtemberg in 1802. Alt. 1960 ft. (about 200 ft. above the Neckar). P.<5000.

Rotuma, isl. of volcanic origin, Pacific, in 12½° S., 177° 40′ E., nearly 300 m. NNW. from the nearest member of the Fiji Is., about 16 m. long, 4-5 m. wide; has no harbour, but sheltered roadstead at NE. end. Chief product copra, the coco-nut palm being unusually productive here. Ceded to the British in November 1879; annexed to the Fiji Is. in 1880.

Roubaix, tn., France, dep. Nord, 7½ m. NE. Lille, on the Lille and Ghent Rly., and a canal communicating with the Scheldt. R. has since the French Revolution grown into importance for manufactures of cloths, shawls, velvets, and other textiles of wool, cotton, and silk; annual value over £16,000,000. There are also other manufactures. There are two museums, and an industrial school for weaving. So early as 1469 privileges were granted to R. by Pierre, the *seigneur* of the dist. P. (1804) 8700; (1872) 74,900; (1891) 115,000.

Roudham (raud'am), par., Eng., Norfolk, Mid div., 23 m. SW. by W. Norwich, 2½ m. E. by S. of its stn. (**R. Junction**) on the G. E. R. and G. E. & Colne Valley Rly. P.<250.

Rouen, ancient *Rotomagus,* city, France, cap. dep. Seine-Inférieure, on r. bk. of the Seine; on the l. bk. is the large industrial suburb of St. Sever, where are the principal maritime establishments, 70 m. NW. Paris, 45 m. (70 m. by the windings of the river) E. by S. Havre. Chief edifices, the cathedral-church of St. Ouen (one of the most elaborate Gothic edifices in the world), the palace of justice, archbishop's palace, museum, hôtel-de-ville, with a library of 110,000 vols., and many handsome fountains. It is the see of an archbishop, has an academy of sciences, several higher technical schools, &c. As a manufacturing town R. is chiefly noted as the principal centre of cotton spinning and weaving in France (hence called the 'French Manchester'), but it also carries on the spinning and dyeing of woollen and linen stuffs, the manufacture of broadcloths, velvets, chemicals, machinery, and has shipbuilding yards and petroleum refining. With the assistance of the state great efforts have been made of late years to improve the position of R. as a seaport. Docks, including separate timber and petroleum docks, have been provided, the quays along the river banks (already in part lighted by electricity) have been greatly extended, and above all, the shoals of the Seine have been continuously dredged to a greater depth. In 1887 vessels of 2000 tons could reach the port, and in 1893 it was reached by vessels of 3750 tons, with a draught of 22 ft. The dredging is to be continued till a channel is afforded with a depth of about 23½ ft. throughout. The railway connections have also been improved, and an important viaduct is now (1894) being made across the river at R. to bring into direct communication the Western Rly. serving the N. and NW. of France with the Orleans Rly. serving the middle and W. of France. The trade is principally carried on with England, Russia, Spain, Italy, and the United States. R. became the cap. of the Normans in the beginning of the 10th century, and continued thenceforward to be the cap. of Normandy. Here Prince Arthur was murdered by John of England; Philip Augustus seized it in 1204. It was English again from 1418 to 1449, and during this period Joan of Arc was burned in its principal square, 1431. Here were born the Chevalier de la Salle, the founder of the French colony of Louisiana, died 1687; the dramatist Pierre Corneille, 1606-1684, and his brother Thomas, 1625-1709; Fontenelle, 1657-1757; the romancist Gustave Flaubert, 1821-1880; and the composer Boieldieu, 1775-1834. Mean temp. (15 yrs.), yr. 51.6° F., Jan. 39.9°, July 65.7°; mean rfall. 25.59 in. P. (1872) 102,500; (1891) 112,100; including suburbs, 158,100.

Roumania, in Roumanian **Romaniea,** a kgd. of Europe, about equal in area to England exclusive of Wales, bounded S. by Servia and Bulgaria, E. by the Black Sea and Russia, W. and N. by Hungary. The Danube (300 m.) forms the S. frontier, the Pruth (Prutŭ) the E. frontier, the Carpathians the W., and the Transylvanian Alps the N. The kingdom consists of the ancient provs. of Walachia (the portion S. of the Transylvanian

Alps, composed of Little Walachia, W. of the Aluta, and Great Walachia, E. of that river) and Moldavia (the portion E. of the Carpathians), and the dist. of the Dobruja, between the Black Sea and the Danube. It is divided into the 32 provs. enumerated in the following table:—

	Area in sq. m.		Area in sq. m.
Doljui	2,618	Bacău	1,552
Gorjiu	1,846	Botoşanĭ	1,139
Mehedinţĭ	2,077	Covurluĭ	1,081
Romanaţĭ	1,459	Dorohoi	1,141
Vâlcea	1,633	Fălciu	819
Little Walachia	9,633	Iaşi	1,201
Argeş	1,741	Neamţu	1,614
Brăila	1,664	Putna	1,278
Buzĕu	1,892	Roman	722
Dâmbovița	1,377	Suceava	1,317
Ilfov	2,008	Tecucĭ	981
Jalomița	2,718	Tutova	958
Muşcel	1,147	Vasluiŭ	838
Oltŭ	1,108	**Moldavia**	14,649
Prahova	1,795	Tulcea	3,263
Rîmnicu-Sărat	1,290	Kustenji	2,761
Teleorman	1,836	**Dobruja** (Dobrogea)	6,023
Vlasca	1,714		
Great Walachia	20,283	**Total**	50,588

The **physical conformation** is very simple. As to the frontier mountains, see **Transylvanian Mts.**, under **Carpathians.** The surface slopes by broad and gentle terraces in Walachia S. to the Danube, in Moldavia SE. to the Pruth and its confluence with the Danube. In Moldavia the rivers descend from the mountains SE. to the Pruth, the principal being the Sereth (Seretŭ) and its tribs., the Moldova, Bistriţa, Trotuş, Buzĕu, and Bârlad, all except this last on its right, and the Ialomiţa. In Walachia they flow S. inclining to E., and embrace the Argeş, the Vede with its affluent the Teleorman, the Oltŭ (Alutha), and the Jiulŭ. The Bulgarian side of the Danube is steep and rocky, averaging 250–350 ft. in alt., but sometimes reaching 500 ft. On the Roumanian side it is low and marshy, and accompanied by several lagoons and islands (Baltas). The Dobruja, a low tract of Quaternary alluvium, stretches 140 m. alongside the Black Sea, its mean elevation being 500 ft., and its culminating point (Sacar Bair) 1765 ft. This coast is broken by the two large lagoons of Jezero Rasim and Liman Sinoe. Near the confluence of the Pruth and the Danube, a few miles N. of Galatz (Galaţi), is Lake Bratişu, a sheet of some considerable size. **Geologically,** the nucleus of the mountains consists of metamorphic rocks, overlain by limestones and conglomerates of, for the most part, the Miocene and Eocene periods. The foot-hills consist principally of Tertiary sandstones and clays. The plains, in other words the greater proportion of the area, are alluvium of quite recent date. R. is exposed to the bitterly cold winds which sweep in from Russia on the NE., and in consequence of this fact the **climate** is one of great extremes and wide range, often a wide daily range. On the plains the extreme limits are 96.8° F. and −18.4°. The mean for the year is 52.9°; summer 72.5°, winter 27.5°. The spring is usually very short. The rainfall averages 25½ in. during the year, superadded to a snowfall of 28½ in. R. possesses extensive **forests,** both of conifers and foliage trees, which however have been, and are being, rapidly felled. The forests are found both on the mountains and in the Danube marshes, where the willow, poplar, alder, aspen, are the prevailing trees. Respecting the **fauna,** it is sufficient to record the presence of the wolf, lynx, and wild boar, and of the vulcan, falcon, and eagle. Salmon, sturgeon, trout, carp, and other fish abound in the Danube and its marshes, and attract great flocks of wild-fowl. Insects swarm in the plains. **Natural Products.**—R. is essentially an agricultural region, its vast plains being splendidly suited for growing wheat and maize (this latter the staple food of the people), with barley, oats, rye, millet, colza, hemp, flax, and tobacco, in addition to aniseed, coriander seed, and thyme in Moldavia, and water-melons beside the Danube. Previous to 1864 the land was owned almost entirely by the nobles and the state. In this year the government promulgated a scheme for the compulsory sale to the peasantry, on comparatively easy terms, of about one-third of the total cultivable soil. The peasantry have, however, only acquired about one-eighth of the land offered to them, and are, moreover, stated to be heavily in debt. In Walachia the nobles farm their land in a sort of metayer system, in Moldavia they farm it themselves. A kind of communal ownership prevails in prov. Vasluiŭ. About 3½ per cent. of the total area is natural pasture, on which the people feed large flocks of sheep, cattle, and swine. The most valuable of Roumania's **minerals** are petroleum, extracted in the provs. of Buzĕu, Bacău, Rîmnicu-Sărat, and Dâmbovița, and rock-salt, mined in nearly all the provs. lying between the Sereth, the Ialomiţa, and the mountains, the chief centres being at Ocna in Bacău, Slănicŭ and Doftana in Prahova, and Salinele-Mari in Rîmnicŭ-Vâlcii. This last is a state monopoly. In addition, gold, silver, mercury, copper, lead, iron, marble, sulphur, gypsum, and alabaster abound in the mountains, more especially in Walachia; and coal, lignite, anthracite, ozokerite, and amber are known to exist. Mineral waters occur in several places, the most frequented spots being at Slănicŭ, and at Balţătescĭ in prov. Neamţu. The **manufacturing industry** is not very extensive, in spite of a specially favourable law passed in 1887. The principal establishments are petroleum refineries (chiefly at Ploescĭ, Galaţi, Brăila, and Bukarest), flour-mills, and saw-mills, with brick-works, potteries, distilleries, cloth factories, and tanneries. There is, however, considerable weaving of hemp, flax, and wool by the peasantry in their own houses. **Communications.**—In addition to the magnificent waterways of the Danube and its affluents, R. possesses some 3000–4000 m. of telegraphs, and nearly 2000 m. of railways, connecting with the Hungarian and the Russian systems. The principal ports for foreign trade are Sulina, Brăila, Galaţi, Giurgiu, and Constanţa, the last-named being on the Dobruja coast. There are good roads in most districts. The most striking features about the **commercial relations** of R. are the keen rivalry which exists between Great Britain and Germany for the supply of woollens and cottons, and the fact that nearly 70 per cent. of the total exports consist of cereals. The remainder of the exports are made up of fruits and vegetables, wine, animals, timber, hides, and leather. Fifty per cent. of the imports consist of textiles; the remainder of metals, hides, fruits and vegetables, pottery, timber, and drugs. Next after England and Germany the most trade is done with Austria, France, Belgium, Switzerland, and Italy. The imports are valued at an average of £11,000,000–£14,500,000 annually; the exports at about £11,000,000. The **monetary unit** is the leu = 1 franc, and divided into 100 bani. The metric system of **weights and measures** is in use. The **government** is that of an hereditary, constitutional monarchy; the sovereign being assisted by a council of 8 ministers, a senate of 120 (elected for eight years), and the House of Representatives, of 183 members (elected for four years). Both these last bodies are elected indirectly by the country districts, but directly by the electors of the large towns. The **army** embraces active forces, territorial forces, and the militia. All natives between the ages of twenty-one and forty-six are liable to serve either in the first (three years) or the second (five or four years) category. At the end of this short period each man belongs to the reserve up to his thirtieth year, and then to the militia up to his forty-sixth. The strength in time of peace is about 35,000 men; in time of war 116,000, not counting the militia. The **fleet** embraces 20–30 small vessels, manned by about 1800 men. The **population,** which numbers approximately 6,000,000, consists to the extent of 92 per cent. of Roumanians, a people of mixed race. One school of ethnologists regard them as descended from the ancient Dacians intermingled with Roman colonists, and influenced later by Slav blood; another school regard them as possessing a stronger Slav strain, and as having crossed the Danube from the Balkan penins. in the 13th century. Their language belongs to the Romance group of the Aryan families, but is strongly tinctured with Slav and other influences. In addition to the Roumanians in R., there are more than two and a half millions in Hungary and Transylvania, thickly massed in the Banat; a quarter of a million in Bukowina; one million in Bessarabia; and about a quarter of a million in Servia and Bulgaria—or more than ten millions in all. The Zinzars of the Pindus and Macedonia are closely allied to them in blood and language. The population of R. includes about 200,000 Jews and 200,000 gypsies. Nearly the whole of the R. are adherents of the Orthodox Greek Church, at the head of which are the two archbishops of Bukarest and Iaşi (Jassy), assisted by six bishops. **Education** is obligatory and free. There are two universities—at Bukarest and Iaşi. In addition to these two cities, of which Bukarest is the cap., the **chief towns** embrace nineteen with a population exceeding 10,000, and five with a population between 20,000 and 50,000. The third largest town is Galaţi (59,000), the seat of the Danubian Commission (see **Danube**). At the dawn of authentic **history** R. was occupied by the Dacians, a people of ancient Thracian blood. The Dacians were subdued by the Roman emperor Trajan in 105–106 A.D.; but a century and a half later, under the insistent pressure of the Goths and other barbarians, Aurelian abandoned the prov. of Dacia, and removed all the Roman colonists to the S. side of the Danube. The country was then successively overrun by the Huns, Avars, Slavs, Bulgarians, Hungarians, and Mongols (or Turks). In the 10th and 11th centuries several small principalities (banats) were formed, of which those towards the Theiss were subsequently conquered by the Hungarians. Those S. and E. of the mountains became consolidated in the 14th century into the two principalities of Moldavia and Walachia, of which the latter was made tributary to the Ottoman Turks in the end of the 14th, and the former in the beginning of the 16th century. The rulers of these semi-independent states were

mostly Greeks (called generically Phanariotes), nominated by the Turkish sultans. Moldavia and Walachia were gradually freed from the Turkish yoke in the end of the 18th and beginning of the 19th century, chiefly through the agency and assistance of Russia. In 1859 they declared their independence, and united themselves into the principality of R. In the Russo-Turkish war of 1877–78 R. allied herself to Russia; but on the conclusion of peace was deprived of Bessarabia, the Dobruja being given to her in exchange. In 1881 R. was declared a fully independent kingdom. See Samuelson, *Roumania Past and Present* (1882), and the map (1 : 288,000) of the Military Geographical Institute in Vienna (1867 onwards). [**J. T. B.**]

Roumel, Wad el, Algeria. See **Rummel, Wad el.**

Roumelia, name given before 1878 to that portion of Turkey in Europe corresponding to the ancient provs. of Thrace and Macedonia. After the Treaty of Berlin, 1878, the upper and middle valleys of the Maritsa and Tunja were separated from the Ottoman Empire and formed a self-governing prov. under the name of Eastern Roumelia (now united to Bulgaria); the other part was called Western Roumelia. See **Bulgaria.**

Roumois, former dist., France, Normandy, now included in deps. Eure and Seine-Inférieure; cap. Quillebeuf.

Roundhay, par., Eng., Yorkshire, W. Riding, on riv. Aire, dist. and 3½ m. NE. Leeds, PMT.O. P. <1000.

Round Head, cape, S. ct. Brit. New Guinea, in 147½° E.

Round Hill, mt., Eng., Cumberland, in the E. of the Penrith div., 15 m. E. by N. Penrith. Height, 2249 ft.

Round Hill, tp., New Zealand, South I., Wallace co. P. <1500.

Round Island, small isl., Fiji group, 48 m. W. of the SW. ct. of Vanua Levu. **Round Island Passage** is a channel leading through the Great Sea Reef NW. of this island, in 16° 36′ S., 177° 40′ E.

Round Lake, Canada, Ontario, 88 m. W. by N. Ottawa, drained E. by the riv. Bonnechère into the riv. Ottawa.

Round Mountain, gold-mining vil., U.S., California, Shasta co., 25 m. NE. Redding. P. <1500.

Round Oak, stn., Eng., Staffordshire. See **Brierley Hill.**

Round Pond, small lake, Newfoundland, in 48° 10′ N., 56° W.

Round Rock, vil., U.S., Texas, Williamson co., 17 m. NNE. Austin. P. <1500.

Round's Green, PM.O., Eng., near Birmingham, 1 m. from Oldbury.

Roundstone, tn., Ire., NW. co. Galway, bar. Ballynahinch, on R. Bay, 32 m. SW. by S. Westport; has copper ore. PMT.O. P. <500.

Roundtown, or **Terenure,** tn., Ire., co. Dublin, bar. Rathdown, 3 m. S. by W. Dublin. P. <1500.

Roundwood, tn., Ire., NE. co. and 9 m. NW. Wicklow, bar. Ballinacor North, PMT.O. P. <250.

Rounthwaite, stn., Canada, Manitoba, on the N. Pacific and Manitoba Rly., 120 m. W. by S. Winnipeg, 15 m. SSE. Brandon.

Rounton, East and **West,** two adjoining pars., Eng., Yorkshire, N. Riding, Richmond div., on the Wiske, 10½ m. SE. Darlington, with a stn. (**W. Rounton Gate**) on the NE. R. P. (of each) <250.

Rouphia, or **Alpheios,** riv., Greece, Peloponnesus, formed by the junction of two headstreams, one from the SE. distinguished as the Alpheios, and the other from the NE., the Rouphia. The Alpheios proper rises SW. of Tripolis and flows NW. and W. for about 45 m. The R., ancient *Ladon*, rises W. of Lake Phonia and flows W. and S. for 55 m. After the junction of the two branches the R. flows 28 m. and enters the Mediterranean between Pyrgos and Agoulinitza, N. of the Gulf of Arcadia, 45 m. S. Patras.

Rous, co., New South Wales, in the NE. corner.

Rousay, one of the Orkney Is., Scot., measuring 4 m. by 3 m., 5½ m. S. Westray; its shores on the W. are rocky and precipitous, elsewhere low and sloping. PM.O. P. 774; par., **Rousay and Egilshay** (comprising the islands of Rousay, Egilshay, and Wire), 13,754 ac., P. <1000.

Rousdon, PM.O., Eng., Devonshire. See **Roosdown.**

Roxburgh, par., Scot., Roxburghshire, 2½ m. SW. Kelso, on the l. bk. of the Teviot, and on the N. B. R.; remains of a splendid border castle built by the Northumbrian kings. James II. was killed here, 1460. PM.O. 7781 ac. P.<1000; parl. dist. P. 34,500.

Roxburghshire, co., Scot., on the English border, in the Tweed basin, excepting one parish, Liddesdale, which drains to the Solway Firth. Besides the Tweed, it is watered by its tribs. Gala, Leader, and Teviot, the last explaining the name **Teviotdale,** often given to R. The geological formations are greywacke in SW., with rounded grassy hills rising to over 1800 ft., succeeded by Old Red Sandstone strata in the centre of the county, with scaurs and narrow defiles; towards the Tweed the country is more level, with coal formations and fertile fields. The triple Eildons are an interesting porphyritic group rising to 1385 ft.; the Cheviot Range reach 2382 ft. in this county. Roxburghshire took its name from a royal castle, an early residence of the kings of Northumbria, demolished in the 16th century. The staple industries are agricultural (for statistics, see **Appendix,** pp. 10–12); but in Hawick, Jedburgh, and Kelso there are important manufactures of tweeds, blankets, &c., and hosiery. The county returns one member to Parliament. Area, 428,500 ac. P. (1891) 54,537.

Rufforth, par., Eng., Yorkshire, W. Riding, Thirsk and Malton div., 4½ m. W. York, 1½ m. S. Hessay stn., P.O. P. <250.

Rufiji, or **Lufiji,** riv., Ger. E. Africa, formed in about 8° 45′ S., 37° 15′ E., by the confluence of two headstreams, the Ulanga (*q.v.*) from the W. and NW., and the Luvegu from the SW., forms the Suguli Falls just below the confluence, flows NE. then E. into the Indian Ocean, forming a delta opposite Mafia I., crossed by 8° S.; the bar at Msàla (Zimba Uranga mouth) can be crossed at high water by vessels drawing nearly 6 ft.; and vessels drawing 2½ ft. can ascend to the Pangani Falls (37° 50′ E.), about 150 m. from mouth.

Rufisque, seapt. tn., French Senegal, 100 m. SSW. St. Louis, on the Atlantic Ocean, in the NE. of the Bay of Goree, in 14° 43′ N. The name is a corruption of **Rio Fresco,** or 'cool river.' The roadstead is bad, the bore is greatly felt. Market for earth-nuts and raw leather. Here the roads for Kayor, Baol, and the Serères dist. converge. P. 8000.

Rufu, or **Ruvu,** 'great water-course,' is a name given to several rivers of E. Africa. See **Kingani** and **Pangani.**

Rug, islets, Caroline Is. See **Hogolu.**

Rug, part of eccles. par., Wales, Merionethshire, 10 m. W. by N. Llangollen, close to Corwen stn. See **Corwen.**

Rugby, par. and market-tn., Eng., Warwickshire, on the Avon, R. div., 15 m. NE. Warwick, an important railway centre of the L. & NW. R., also with a stn. on the M. R., and on the route of the line of the M. S. & L. R. to London now under

construction. R. has a celebrated public school, founded in 1567 by Lawrence Sheriff, consisting of a fine quadrangle with cloister, and an elegant detached chapel, with about 500 scholars, 50 of whom are on the foundation, an endowment now producing over £5000 per annum; there is also, connected with the same, a lower school for imparting a commercial education. Market-days, M., Tu., and S. P. (1871) 8400; (1881) 9900; (1891) 11,300; parl. div. P. 49,700.

Rugby, settlement, U.S., N. Dakota, Pierce co., 115 m. NNE. Bismarck.

Rugby, tn., U.S., Tennessee, on the N. border of the Cumberland plateau, 50 m. NW. by W. Knoxville, founded in 1880 by Thomas Hughes, author of *Tom Brown's Schooldays*. P. <1500.

Rugeley (rūj'lī), tn. and par., Eng., Staffordshire, div. and 7 m. NW. Lichfield, on the Trent and Mersey Canal, and the riv. Trent, with two stns. (**R. Town** and **R. Trent Valley**) on the L. & NW. R.; iron-foundries, tanning; collieries. Market-days, Th. and S. 8449 ac. Tn. P. <4500; par. P. 6900.

Rügen, a very irregularly shaped isl., Prussia, prov. Pomerania, intersected by 54° 30′ N. and 13° 30′ E., separated from the mainland by the Strela Sund. The N. and E. of the island are composed of three penins.—Wittow in the N., Jasmund in the NE., and in the SE. a third in three sections (Granitz, Mönchgut, and Gross-Zicker), all consisting in their elevated parts mainly of chalk, and connected with one another, the SE. penin. also with the main body of the island, by isthmuses, two of them very narrow, wholly or mainly under 16 ft. in height. The Jasmund Penin. has the highest elevation (attaining in the interior 525 ft., at the Stubbenkammer on the NE. ct. in the conical peak of the Königsstuhl, 400 ft.), has the bays known as the Tromper Wiek and the Prorer Wiek on its NW. and S. respectively, and is separated from the main body of the island by the inlet called the Jasmund Bodden (entirely under 35 ft. in depth). The island, which has for its cap. Bergen, contains several remains of heathen times, when it was a holy island, and is in modern times a favourite German summer resort. It was taken possession of by the Danes in 1168, in 1327 was annexed to Pomerania, in 1648 became Swedish, and in 1815 Prussian, and now forms with the adjacent small island a circle of the govt. of Stralsund. Area, 373 sq. m. P. (1819) 30,400; (1891) 46,200. See Monograph by R. Credner, part v. of vol. vii. of *Forschungen zur deutschen Landes- und Volkskunde* (1893).

Rügenhafen, port, E. ct. of Gazelle Penin., Bismarck Archipelago, in 4° 37′ S., 152° 25′ E.

Rügenscher Bodden, a bay of the Baltic, Prussia, between the isls. of Rügen and Usedom.

Rügenwalde, tn., Prussia, prov. Pomerania, circle Schlawe, 37 m. ENE. Kolberg, on the Wipper; trade in smoked salmon and goose flesh. Its port is Rügenwaldermünde. P. 5300.

Rüggisberg, vil., Switzd., cant. and 8½ m. S. by W. Bern. P. <4000.

Rug Island, Pacific Ocean. See **Hogolu.**

Ruhanda, or **Ruanda,** dist., central Africa, in the Congo Free State and the German sphere of influence, to the W. of the Kagera R., crossed by 2° S.

Ruhe, Ger., 'rest;' *e.g.,* Karlsruhe, 'Charles's rest,' founded by Charles, margrave of Baden, 1715.

Ruhla, tn., Ger., duchy Saxe-Koburg-Gotha and Saxe-Weimar, in a beautiful situation, 25½ m. W. by S. Gotha. In the middle ages noted for its armour, later for its cutlery; since 1739 for its meerschaum and other pipes, and cigar mouthpieces; has iron-mines. Has two ferruginous springs and a bathing establishment, and is much resorted to in summer. Alt., at lower end, 1150 ft.; at upper end, 1475 ft. P. 5100 (2849 belonging to the Saxe-Koburg-Gotha portion, 2228 to the Saxe-Weimar portion).

Ruhland, tn., Prussia, in the extreme W. of prov. Silesia, circle Hoyerswerda, 28 m. N. by E. Dresden. P. <2000.

Ruhr, or **Roer,** riv., W. Prussia, r. bk. trib. of the Meuse, rises on the Belgian frontier, flows NE., N., NNW., and NW. through Montjoie, Juliers, and Limburg to the Meuse at Roermond. Length, 67 m.; area of basin, 1855 sq. m.

Ruhr, riv., in the W. of Prussia, provs. Westphalia and the Rhine, rises in the Rothhaar Mts., flows N. then W. to the Rhine at Ruhrort; it traverses and gives name to the second largest and the most productive **coalfield** in Germany, stretching about 60 m. WSW. to ENE. (partly on the l. bk. of the Rhine), with a breadth of 20–25 m. in the Rhine Prov. and Westphalia (beyond Unna). Total area in which the coal-measures come to the surface, 205 sq. m.; area within which coal is mined, 458 sq. m.; area within which the existence of coal-seams is proved by borings, 742 sq. m. Length, 144 m.; canalised from Witten, 47 m.

Ruhrort, tn., Prussia, Rhine Prov., circle Mülheim, on the r. bk. of the Rhine, at the mouth of the Ruhr, 12 m. W. Essen; has the largest river harbour in the kingdom (from the Ruhrort Canal to the Ruhr), which can be reached *viâ* Amsterdam or Rotterdam by vessels drawing 10 ft. average, and 6 ft. 6 in. at low water. Important trade in coal, unwrought iron, hardware, &c. P. (1816) <2000; (1871) 7700; (1890) 11,100.

Russian Empire, an extensive state which covers nearly 8,500,000 sq. m. in E. Europe and N. Asia, *i.e.*, one-sixth part of the land superficies of the globe, or about one twenty-third part of its total superficies, and has nearly 128,000,000 inhabitants, or about one-fourteenth of the population of the globe. It projects N. as far as 77° 2′ in Novaya Zemlya, and 77° 40′ in Siberia, while in the S. it reaches 38° 26′ in Armenia, 35° 0′ in the Transcaspian Terr., and 42° 30′ on the coasts of the Pacific. It advances W. as far as 18° 32′ in Poland, 20° 40′ in Lapland, and 29° 42′ on the Black Sea, while its eastern extremity reaches 191° E. long. in the Bering Strait. The S. frontier is continually being shifted southwards, and now runs across the Black Sea from the Kilia mouth of Danube to Batum, thence across the Caucasus Isthmus, having Asia Minor and Persia on the S.; it crosses the Caspian Sea, and further separates Russia from Persia (Khorassan) and Afghanistan, Bukhara and Khiva being now vassal states to Russia; it crosses the Pamirs, and then, running NE., has the Chinese provs. of E. Turkistan, Kulja, and Mongolia on the S. The Amur and its trib., the Usuri, separate Russia from Manchuria, while on the Pacific coast the frontier touches Korea. The **islands** of Russia, with the exception of **Novaya Zemlya,** are mere appendages to the mainland. The Aleutian Is. and Alaska were sold to the United States in 1867, and Kurile Archipelago was ceded to Japan in 1874. **Subdivisions.**—The Russian Empire consists of several parts, widely differing from each other by their physical features, historical destinies, and characters. Each of them is described under its separate heading, and their areas and population are given in the subjoined table. Of them, Finland is to a great extent an allied state, having its own finances, army, customs, and representative institutions; and Poland has still retained the name of kingdom. Of the Asiatic dominions, Caucasia is a separate lieutenancy, and the Transcaspian Terr., Turkistan, the governor-generalship of the Steppes, Siberia, with the Amur region and the isl. of Sakhalin, are separate administrative units.

Divisions.	Area sq. m.	Pop. (1889–92.)	Density per sq. m.
European Russia (48 govts., 2 provs.)	1,902,092	88,994,000	47
Poland (10 govts.)	49,157	8,486,000	173
Grand-duchy of Finland (10 govts.)	144,255	2,432,000	19
Russia in Europe	2,095,504	99,826,000	47
Northern Caucasia (3 provs. and govts.)	*87,497*	*3,082,000*	*32*
Transcaucasia (7 provs. and govts., 1 dist.)	*91,346*	*5,074,000*	*55*
CAUCASIA	180,843	8,156,000	46
Governor-Generalship of the Steppes (4 provs.)	*720,627*	*2,001,000*	*2*
Sea of Aral	*26,166*	..	..
Turkistan (4 provs.)	*409,114*	*3,412,000*	*8*
Transcaspian Territory	*214,237*	*277,000*	*1*
Caspian Sea	*102,381*	..	..
TOTAL, CENTRAL ASIAN DOMINIONS	1,548,825	5,860,000	4
SIBERIA, including SAKHALIN (6 govts., 2 provs., 1 dist.)	4,833,496	4,539,000	0.9
Total in Asia	6,563,164	18,555,000	3
Russian Empire	8,658,668	118,381,000	13

The censuses of the **population** have hitherto been taken at irregular periods, and no general census has been taken since 1858, the above figures being in most cases mere estimates. The growth of the population is pretty rapid, as seen from the following: (1722) 14,000,000; (1762) 19,000,000; (1796) 36,000,000; (1815) 45,000,000; (1835) 60,000,000; (1858) 74,000,000; (1895 estimated) 128,000,000. It consists of a great variety of nationalities, the numerical strengths of which may be represented as follows, in thousands, for a total population of 118,250,000:—

	European Russia.	Poland.	Finland.	Caucasia.	Central Asia.	Siberia.	Russian Empire.

Towns.—Only 10,505,700 persons in European Russia, 1,464,700 in Poland, 770,110 in Caucasia, 345,100 in Siberia, and 651,800 in Turkistan lived in towns in 1890. Only fourteen towns in European Russia and three in Asia have populations over 100,000—namely, St. Petersburg, Moscow, Warsaw, Odessa (all these above 300,000), Kharkov, Kiev, Riga, Łódź (Poland), Kazañ, Saratov, Kishinev, Vilna, Astrakhañ, and Samara in European Russia; and Tiflis, Tashkend, and Baku in Caucasia. There are, moreover, 28 towns having populations from 50,000 to 100,000 inhabitants (4 in Asia, and Helsingfors in Finland), 51 towns with 30,000 to 50,000 inhabitants (10 in Asia, and 1 in Finland), and 69 more towns with populations over 20,000 inhabitants (17 in Asia, and 2 in Finland).—The religion, occupations of the population, their agriculture, industries, &c., are treated under the separate headings of European Russia, Finland, Caucasia, Turkistan, Steppes, and Siberia. The exterior **trade** of the Russian Empire shows a steady increase in the exports, chiefly due to an increasing export of cereals and naphtha oils, while the imports steadily decrease, partly owing to the growth of home industry, but chiefly to a continuous rise of import duties:

Years.	Exports.	Imports.
	Paper roubles.	Paper roubles.
1872–76	381,199,000	471,643,000
1877–81	555,793,000	528,971,000
1882–86	574,025,000	506,879,000
1887–91	721,614,000	403,102,000
1892 (famine year)	489,410,000	403,880,000
1893	613,732,400	463,546,000

The great bulk of this trade crosses the western frontier (European Russia and N. Caucasia), the exports on the Asiatic frontier being only about 70,000,000 roubles (1889–92), and the imports about 44,000,000 roubles. In the trade with Europe, cereals make from 51 to 59 per cent. of the total value of the exports, and on an average year, such as 1891, Russia exports about 57,000,000 cwts. of wheat, 22,000,000 cwts. of rye, 15,000,000 cwts. of oats, and 15,000,000 cwts. of barley, which, together with some maize, flour, buckwheat, &c., makes a total of 120–130,000,000 cwts. Flax and hemp, oleagineous grains, timber and wooden goods, naphtha oils (19,134,000 cwt. in 1893), sugar, butter, eggs, wool, bristle, hair, feather, and furs are the chief exports; while the chief imports are raw cotton (£6,000,000–£8,500,000), raw metals (£2,500,000–£3,700,000), raw wool and woollen yarn (£2,500,000), machinery (about £2,500,000), tea (about £1,800,000), colours, coal, chemicals, and fish; textiles are only imported to the value of £600,000–£800,000. From Asia, Russia imports chiefly tea (£1,500,000–£1,800,000), some tissues, and

fruits; and it exports chiefly cottons, hardware, and variousmanufactured goods. The chief trade of the empire is with Germany, the United Kingdom, the United States, China, France, Austria-Hungary, and Persia. **Shipping.**—The ports of Russia are visited every year by about 10,000 ships (7,600,000 tons), out of which only about 1200 are under the Russian or the Finnish flag. The chief seaports are St. Petersburg, Libau, Riga, and Reval on the Baltic Sea; Odessa, Batum, Rostov, and Taganrog on the Black and Azov Seas; Archangel on the White Sea; Baku and Astrakhañ on the Caspian; Vladivostok and Nikolaievsk on the Pacific. In the coasting trade, the ports are entered by an average of 37,000 vessels (about 15,000,000 tons). **Inland Navigation.**—Very large amounts of corn, timber, and fuel-wood, metals, naphtha, salt, and other heavy goods are shipped on the rivers. A fleet of 1950 steamers (120,000 tons) ply for that purpose on the rivers of European Russia and Poland, and 150 in Siberia; besides, nearly 80,000 small vessels and 120,000 rafts are engaged every year in shipping 165,000,000 tons of various goods, nearly 200,000,000 roubles' worth. The main **railway lines** radiate from Moscow in six directions, as also from St. Petersburg to Warsaw, and along both coasts of the Gulf of Finland; while several parallel lines connect Libau and Riga with the fertile parts of the SE., and several strategic lines run along the SW. frontier. Caucasia is intersected by a railway from the Black Sea to the Caspian, but is not yet quite connected with European Russia, there being an interruption across the main chain. The Siberian Rly. has been built to Omsk, and is being built on the Pacific coast along the Usuri. The railways transport every year 49,000,000 passengers, and 72,000,000 tons of goods. As to length, see **Appendix.** The **finances** are in an unsatisfactory condition, and although the state's revenue, which has been nearly doubled since 1875, attained in 1894 £103,588,700, the expenditure is always by from £5,000,000 to upwards of £10,000,000 in excess of the revenue, and has to be covered by loans (see **Appendix**). **Army and Navy.**—Universal military service having been introduced in 1874, over 950,000 young men are now liable every year to service, and about 270,000 out of them are taken every year into the army, which has a peace-footing of 868,672 men and officers (10,384 in Finland), and is expected to attain 2,500,000 in case of war. A special feature of Russia's military organisation are the **Cossacks,** constituting 11 separate *voiskos* (Don, Kubañ, Terek, Astrakhañ, Orenburg, Ural, Siberia, Semiryechensk, Transbaikalia, Amur, and Usuri). All inhabitants of these territories are divided into three classes, of which the first is in active service, and the second on furlough with arms and horses, all equipment being supplied by each voisko. All Cossacks must supply 154,000 combatants in case of war. As to the strength of the navy, see **Appendix.**

Education.—Russia (exclusive of Finland) has nine universities (one in Poland and one in Siberia), and twenty-two high schools, with an aggregate of 18,500 students. In each chief town of the govts. and provs. there are one or several gymnasia, both for boys and girls. Primary education is extremely backward, so that not more than 2,150,000 boys and girls frequent the primary schools. The **administration of justice** was totally reformed by the law of 1864, but the benefits of this law (jury, justices of peace) have only partially been extended to both the Asiatic dominions of the empire and to Poland. Every year nearly 20,000 men, women, and children (the children following their parents) are transported to Siberia or to the penal colony of Sakhalin. Out of them only about 2000 are hard-labour convicts (about 650 for murder, there being no capital punishment in Russia for common law offences), and nearly 10,000 are transported by orders of the administration. **Government.**—Russia is an absolute hereditary monarchy, the whole legislative and executive power (apart from **Finland**) being vested in the Emperor, who nominates all officials. Most laws of importance are, however, discussed in the Council of the State, where the final decision still lies with the Emperor, and in the Committee of Ministers. To become binding a law must be promulgated by the Senate, which also represents the highest judicial court of appeal and cassation. The affairs of the church are governed by the synod, consisting of bishops nominated by the Emperor, and sitting in turns at St. Petersburg. The empire is divided into governments (*guberniya*) or provs. (*oblast*), the numbers of which in each division are given on p. 1321. Some of them are united into lieutenancies (Poland, Caucasia), or into general-governorships: Vilna, Kiev, and Moscow in European Russia, and Turkistan, Stepnoye (of the Steppes), Irkutsk, and Amur in the Asiatic dominions. In each govt. and prov. there is a governor, who represents the central authorities and boards of the different ministries. Each govt. and prov. is divided into 5 to 15 dists., a few of which in Asia (*okrug* or *otdyel*) are placed under separate military governors. St. Petersburg, Odessa, Kerch, Sebastopol, and Taganrog make separate townships. A wide system of **local self-government** had been granted by the laws of 1861–66, but it has been much curtailed since. The unit of local government for the peasants is the village community (*selskoye obshchestvo*, of which there are 107,493 in European Russia), or 'mir,' which allots its lands among the householders, assesses the taxes, and elects its own executive. Several communes form a canton (*volost*, 9543 in European Russia); and all householders of the canton elect their own elder (*starshina*), and their own peasant-tribunal (*volostnoi sud*), which pronounces its sentences according to the customary unwritten law. Affairs of greater importance are judged by the justices of the peace, elected in European Russia, and nominated by the crown elsewhere, but lately replaced by nominated district chiefs (*zemskiy nachalnik*). The provincial administration is in the hands of district and county councils (*zemstvos*), introduced in 1866 in 34 govts. of European Russia, but having had no further extension since. In both the district and the province *zemstvo*, there is an assembly of representatives, elected by all the peasant householders, the clergy in their capacity of landowners, and the nobility; the assembly (*zemskiye sobraniye*) nominates its own executive (*uprava*), and till 1892 it elected the justices of the peace. It assesses and levies its own taxes, and altogether is intrusted with all affairs of local police, roads, education, hygiene, insurance against fire, village post, &c., so far as they are not interfered with by the ministries. A similar organisation had been introduced in 1866 in the chief cities, but has been much curtailed since, and the new municipal law, lately introduced in the towns of Russia and Siberia, grants municipal institutions on a very limited scale. For military, judicial, and educational purposes, the empire is divided into a number of military, judicial, and educational districts.

European Russia is the chief div. of the Russian Empire. This embodies one-fourth part of its aggregate superficies, and about three-fourths of its population. Its frontiers are the Arctic Ocean (Barents Sea), with its wide gulf, the White Sea, on the N.; Finland, the Baltic Sea, Poland, Galicia, and Roumania on the W.; the Black Sea with the Sea of Azov, the Manych depression, and the Caspian Sea on the S.; and the Urals and the Ural R. on the E., the govts. of Perm and Orenburg partly extending on the eastern slope of the Urals. Within these limits European Russia has a length of nearly 1600 m. from N. to S., and nearly as much from W. to E. It is divided as follows into 48 govts. and 2 provs. (Bessarabia and Don Cossacks):—

Governments.	Area, sq. m.	Pop. in Thousands, 1890–94.	Density per sq. m.	Governments.	Area, sq. m.	Pop. in Thousands, 1890–94.	Density per sq. m.

Orenburg	73,816	1,406	20				
Penza	14,997	1,597	107				

The following subdivisions are also frequently in use:—*Northern govts.:* Archangelsk, with Kola Penin. and Vologda; *Lake district:* Olonets, St. Petersburg, Novgorod, and Pskov; *Baltic provs.:* Esthonia, Livonia, and Courland; *Lithuanian govts.:* Kovno, Vilna, Grodno; *White Russia:* Vitebsk, Smolensk, Minsk, partly Moghilev; *SW. govts.* (pop. chiefly Little Russians): Volhynia, Kiev, Podolia; *Little Russia proper:* Poltava, Chernigov, Kharkov, Voronezh, Ekaterinoslav; *Novorossia:* Bessarabia, Kherson, Ekaterinoslav, and continental part of Taurida; *Middle Russia:* Moscow, Orel, Tula, Kaluga, Kursk, Ryazañ, Tambov, Yaroslav, Kostroma, Vladimir; *Middle Volga:* Nizhniy Novgorod, Kazañ, Simbirsk, Penza, Saratov, Samara; *Lower Volga:* Astrakhañ; *SE. prov.:* Don; *E. Russia:* Vyatka, Perm, Ufa, Orenburg. **Surface.**—On the whole, European Russia is an undulating plain, 500–900 ft. high, deeply cut by ravines. Its central parts are occupied by the Central Plateau, which meets in the WSW. with the spurs of the Carpathians, and in the ESE. reaches the middle Urals. It attains 1100 ft. in the Valdai Heights, 1000 ft. in Kovno, Courland, and Kursk, and from 800–900 ft. elsewhere, taking a hilly aspect in its higher portions, and gently slopes both N. and S. In the NW. it is bordered by a broad depression, occupied by the Lakes Ladoga, Onega, Byelo-ozero, Lache, and thousands of smaller lakes, with a few hills about 900 ft. high

penetrating from Finland. This broad depression also spreads ENE., reaching the Timan ridge of the N. Urals; while in the NW. the land rises to a plateau 1000 ft. high in the Kola Penin. On the W. of the Central Plateau lies a wide depression, occupied by the marshes and forests of the Polyesiye. A third depression occurs in the E., where the middle Volga meets with the Oka and the Kama. On the S., the Central Plateau gently slopes to a level of 5–700 ft. in Poltava and Kherson, but soon rises again, making a low swelling which begins in Bessarabia and spreads eastwards, compelling the Dnieper and the Don to make their great bends towards the E., and assuming the name of Donets Hills in the SE., and of Obshchiy Syrt beyond the Volga. Finally, a fifth depression, the level of which is below the level of the ocean, spreads on the N. shore of the Caspian Sea. Nearly all the **chief rivers** of European Russia take origin in the NW. part of the above plateau, whence they flow with great windings towards the surrounding seas; their upper parts are so close to each other on a common level, that they could easily be connected together by canals. The chief rivers of European Russia are the Volga (2216 m.), which flows E. and SE. into the Caspian, receiving the large tribs. Oka and Kama, and a great number of smaller but navigable rivers; the Dnieper (1334 m.) and the Dniester (853 m.), both in the SW., flowing into the Black Sea; the Don (1153 m.), which enters the Sea of Azov, and approaches the Volga so closely, that goods are transported from the one river to the other on a railway 40 m. in length; the Western Dvina (622 m.), which flows NW. into the Gulf of Riga, and the Volkhov, which enters the Gulf of Finland; the Neva, by means of which the Lakes of Ladoga and Onega communicate with the Gulf of Finland; the northern Dvina (470 m.), which is formed by the junction of the Sukhona and Yug, and flows into the White Sea; while the Onega, also flowing into the White Sea, drains several lakes of the Lake District. The Urals give origin to the Pechora (983 m.), which flows into the Arctic Ocean, and the Ural (1490 m.), a trib. of the Caspian Sea. The Danube only touches the frontier by its Kilia mouth, and the Pruth flows along the SW. frontier. The **lakes** of European Russia cover an aggregate area of 25,800 sq. m., Lakes Ladoga (10,664 sq. m.) and Onega (5681 sq. m.) being among the largest in Europe, while the Caspian Sea covers 169,380 sq. m. **Geology.**—All geological formations are represented in European Russia. The Archæan and Huronian granites and gneisses appear in Finland, N. Russia, the Urals, and the Caucasus, and make the inner backbone of the ridge which crosses S. Russia. Cambrian clays, slates, and sandstones appear in Esthonia and St. Petersburg. Silurian rocks cover a large portion of N. Russia, but being partly concealed by subsequent deposits, they only appear on the surface in the NW. govts., the Timan ridge, on the W. slopes of the Urals, and in Kielce in Poland. Devonian limestones and sandstones are widely spread in the NW. as well as in the Urals, and they form the lower strata of the Central Plateau. Carboniferous deposits, partly covered with more recent formations, cover large spaces in middle, S., and SE. Russia, and coal-measures appear in the central govts. (Moscow basin) and the Donets Hills (which now yield the chief supply of Russian coal), the Urals, and Kielce in Poland. Permian and Triassic deposits are widely spread in the E. and on the middle Volga; while Jurassic clays, very much denuded, are of frequent occurrence in the central region. Cretaceous deposits, rich in phosphorites, cover wide spaces S. of the 55th degree of lat., and are overlaid further S. by a wide zone of Tertiary sands, sandstones, and limestones. Quaternary boulder clay, with erratic blocks from the N., covers the whole of middle and N. Russia as far as the 50° N. lat. in the W., while mighty layers of loess fringe the boulder clay further S. on the steppes of S. Russia. The **climate** of European Russia is much more uniform than might be expected. On a space which stretches over 26° of lat., the average yearly temps. only vary from 54° to 32° F. Everywhere the winter is very severe, Odessa on the Black Sea, and Ufa in S. Urals, having respectively the same winters as Königsberg (Prussia) and Mezeñ on the White Sea; frosts of 20° F. are met with everywhere, with the exception of the coasts of the Black Sea. The summer is also hot over the whole of the terr., and the thermometer rises to 86° even at Archangel. At the same time, the yearly amount of rain is comparatively small (from 14 in. in the S. and SE. to 25 in. near the shores of the Baltic, and only 5.7 in. at Astrakhañ), and the moisture of the air rapidly decreases towards the E. Terrible gales with snow are frequent by the end of the winter. The rivers remain frozen for an average of 190 days in the N., 100 to 145 days in middle Russia, and 75 to 115 days in the S. The **soil** offers great varieties. The most fertile portion is the 'black-earth' region, which covers nearly 150,000,000 acres (about 234,000 sq. m., or nearly twice the area of the British Isles) in the S.; this is rapidly becoming the most densely peopled part of European Russia. The steppes of the SE. are also very fertile, but often suffer from droughts. Next comes middle Russia, which is possessed of a clayey, rather unproductive, soil, and has considerable tracts of forest. The forest region, covered with deciduous forests in its southern division, and with thick coniferous forests towards the N., occupies nearly one-third of the terr., and treeless *tundras*, covered with moss and a few shrubs, occupy large areas on the shores of the Arctic Ocean. True deserts appear on the shores of the Caspian. The **population** of European Russia, which was only 65,500,000 in 1870, is now estimated at 96,000,000; the heavy death-rate (about 34 per 1000) and the emigration to N. Caucasia and Siberia (the latter having lately attained 100,000 to 150,000 persons in the year) being compensated by a high birth-rate (45 to 47 per 1000), due to early marriages among the peasants. The main constituents of the population are shown in the second table under Russian Empire, from which it will be seen that more than 80 per cent. of the population are Russians, embracing about 47,700,000 Great Russians in the middle, N., and SE., nearly 19,600,000 Little Russians, or Ukrainians, in the S. and SW., and nearly 4,900,000 White Russians, or Byelorusses, in the W. The Poles form the landed nobility and partly the artisan class in the Lithuanian provs., where the bulk of the population is Lithuanian. The Germans occupy the same position in the Baltic provs., where the bulk of the population are western Finns (Esthonians, Kurs, and Livonians). Among other Finnish stems, Karelians, Samoyedes, and Zyryans are found in the N.; the Volga Finns, among whom the Mordves and the Cheremisses are the most numerous, are rapidly losing their national characteristics; while the Permians and the Ugrians are rapidly merging in the Russians. The Turco-Tatars are represented by the Tatars in Kazañ and Astrakhañ, the Bashkirs on the slopes of the S. Urals, the Chuvashes, Meshcheryaks, and Tepters in the Volga provs., and the Kirghizes in Astrakhañ; their aggregate numbers do not exceed 4,000,000. The Jews are estimated at about 2,500,000 in Kovno, Vilna, Moghilev, Grodno, Volhynia, and Podolia, as also in Bessarabia and Kherson, thus making from 10 to 16 per cent. of the population of these govts. The provs. on the Black Sea have a varied population of German colonists, Roumanians, Bulgarians, Servians, Greeks, Karaite Jews, &c. The prevailing **religion** is the Greek Orthodox, to which all Russians, with the exception of a number of White Russians professing the Union, belong; however, a considerable number, probably one-fourth, belong to some of the many sects of Nonconformists (*raskolniks*), *i.e.*, either to the Old Believers (*starovyery* and *yedinovyertsy*), who have priests, or to one of the numerous varieties of the *bespopovtsy*, 'who accept no priests,' or rather elect themselves their own ministers, or the spiritualists (*dukhovnyie khristiyane*), who divide into a great number of branches, that of the Stundists having lately taken a great development in the S. The Poles and most Lithuanians are Catholics. The Esthonians and other western Finns, as also the Germans, are Protestants; while the Mohammedan religion is professed by the Tatars, the Bashkirs, and the Kirghizes, and partly by the Meshcheryaks. Shamanism is widely spread among the eastern Finns, whether Christianised or not; and Lamaite Buddhism is the religion of the Kalmucks. The population is divided into the **classes** of the Nobles, the Merchants, the Artizans, and the Peasants, each of which has different personal rights, and possesses different organs of self-administration. **Agriculture** is the chief occupation, even in the manufacturing regions, the industrial workers often returning to the culture of the soil in the summer. Most of the peasants, especially in middle Russia, own the land under the system of the village community, and the land owned by the communes has lately been rendered by law inalienable for ever. The distribution of the territory between the different owners appears as follows: 410,801,900 ac. are owned by the state (139,397,500 ac. unfit for cultivation), 19,891,000 ac. by the Imperial family, 373,310,500 ac. by the peasants (35,546,000 ac. unfit for cultivation), and 294,504,000 ac. in private ownership (35,116,000 unfit for cultivation). The distribution of land according to quality and mode of occupation was as follows in 1892:—

Nature of Land.	Total.	In Private Ownership.
	Acres.	Acres.
Arable	287,909,000	80,063,000
Orchards, meadow grazing .	174,959,000	68,628,000
Forests, &c.	425,521,000	110,697,000
Unfit for cultivation, roads, &c.	210,059,000	35,116,000
Total . . .	1,098,508,000	294,504,000

For further statistics, see **Appendix.** The grain crops vary very much from year to year (from 192,000,000 quarters in 1892 to 287,550,000 in 1893), and on the average southern Russia is visited every eleven to twelve years by droughts, which are usually followed by years of very good crops. Although the average crop (exclusive of seeds) is considered to give less than 486 lbs. of wheat and rye per head of population, nearly one-fifth of the total crop is exported every year—the exports of cereals having been 6,560,000 quarters in 1856–60, 23,700,000 quarters in 1876–83, and 38,900,000 quarters in 1888–1891. Flax and hemp, oil-seeds, sugar-beet, tobacco, and the

vine-tree in the S. are also extensively cultivated. **Cattle-breeding** is especially important in the E., S., and SW., there being 19,633,000 horses, 24,609,000 horned cattle, 44,465,000 sheep (9,500,000 of fine breeds), and 9,243,000 swine. **Fishing** in the lakes, and especially in the lower parts of the Volga, the Ural, and the Don, and in the Caspian Sea, as well as off the Murman coast of the Arctic Ocean, is an important source of income. **Hunting** still remains profitable in the N., especially in the Pechora region. The state of **mining** is seen from the following figures for all the empire, including Finland and Poland:—

	1880.	1892.
Gold, lbs.	95,410	101,277
Silver, ,,	25,595	32,105
Platinum, ,,	5,742	10,076
Lead, tons	1,146	825
Zinc, ,,	4,256	5,059
Copper, ,,	3,203	4,733
Pig iron, ,,	448,000	995,000
Iron, ,,	292,000	370,500
Steel, ,,	307,000	312,000
Coal, ,,	3,289,000	6,800,000
Naphtha, ,,	352,000	4,490,000
Salt, ,,	779,000	1,405,000

Gold is obtained (besides Siberia) in the Ural Mts. (400,000 to 450,000 ozs.); silver in the Altai, Semipalatinsk, Nerchinsk, and Caucasia; platinum in the Urals; copper chiefly in the Urals (about 2600 tons); mercury in S. Russia (about 700,000 lbs.); tin in Finland, and zinc in Poland; iron is obtained in the Urals, partly in Olonets, and in S. Russia, where Ekaterinoslav is now becoming an important centre of iron industries and machinery works. Of the salt extracted, 1,300,000 tons come from European Russia. The extraction of coal is on a steady increase, and had attained in 1892: Don region, 3,507,000; Poland, 2,837,000; Urals, 230,000; Moscow, 177,000; Altai, 19,000; Caucasus, 17,000; Sakhalin, 12,500 tons. Manganese ore comes entirely from Caucasia. The extraction of petroleum is entirely concentrated in Caucasia, near Baku; but promising wells have also been discovered on the E. shore of the Sea of Azov. **Manufactures** in Russia began to develop after the emancipation of the serfs in 1861; but, still, the total number of workmen employed in the industries, exclusive of mining, has not yet attained one million. The growth of manufactures in European Russia alone since 1861 appears as follows:—

Years.	Number of Manufactures.	Workers.	Yearly Production.	Average Production per Worker.
			Roubles.	Roubles.
1861	14,060	559,533	295,560,000	528
1870	18,892	463,093	452,660,000	977
1882	56,905	954,970	1,126,033,000	1187
1891	102,571	860,476	1,108,779,000	1081

The chief industries (in European Russia and Poland) are: cottons (233,700,000 roubles, in 1885–91 307,500,000 roubles, with the dyeing and printing mills), which has its centres in the govts. of Vladimir, Moscow, Piotrków, and St. Petersburg, and partly in Kostroma, Tver, Esthonia, and Yaroslav; next come the steam flour-mills (156,800,000 roubles), which have lately taken a great extension, especially in the govts. on the Volga (Perm, Saratov, Samara, Yaroslav), as also in the grain exporting govts. of the S., and at Warsaw. The iron industries (33,900,000 roubles), especially the manufacture of rails and railway plant, are steadily increasing in the Ural govts. (Perm, Ufa, Orenburg), in S. Russia (Ekaterinoslav), St. Petersburg, Orel, and Piotrków in Poland. Woollen cloth mills (72,700,000 roubles) and sugar-works in SW. Russia and Poland (85,500,000 roubles), distilleries (64,700,000 roubles), machinery works (59,500,000 roubles), and leather works (37,300,000 roubles) are the next in importance. The geographical distribution of industries is very unequal, one-half of the aggregate manufactures of European Russia and Poland being grouped in the four govts. of Moscow (producing about 20 per cent. of the total value), St. Petersburg (about 13 per cent.), Vladimir (less than 10 per cent.), and Piotrków (less than 9 per cent.); eight govts. only (Warsaw, Kherson, Livonia, Kiev, Kostroma, Tver, Perm, and Yaroslav) show a production of from about 2 to 5 per cent. of the total value; twelve have a yearly production of from 1 to 2 per cent. On the other hand, a great variety of **cottage industries** are widely spread all over Russia and Caucasia; and far from showing a decrease, they are steadily developing. No less than 8,000,000 persons are engaged in these industries in European Russia and Caucasia, and their yearly production far exceeds the aggregate production of the manufactures, as it attains at the lowest estimates 1,800,000,000 roubles. Nearly all that is consumed by the peasants, and a great deal of what is consumed by the wealthier classes (some silks, furniture, toys, cutlery, drawing instruments, hardware, and every variety of wooden goods) is manufactured in the villages during the long winter months, in many places in great perfection. For information concerning trade, railways, navigation, instruction, and administration, see the section on **Russian Empire** above.

Russian Mountains, a range of the Kuenlun system trending from WSW. to ENE., in about lat. 36°–37° N., long. 82°–85½° E.

Rutland, isl., Indian Ocean, in the Andaman Archipelago, to the S. of Great Andaman. Length, N. to S., 11 m.; breadth, 5–5½ m.; area, 45 sq. m.

Rutland, inland co., Eng., in the Wash basin, consisting of two parts separated by the Gwash (or Wash), a trib. of the Welland, which separates this county from Northamptonshire—the southern being pastoral valleys, and the northern a plateau. Round Oakham is the fertile vale of Catmos, with some fine tracts of woodland. Geologically, this county consists of Liassic and Oolitic strata, with limestone containing iron. N. of Stamford are some important stone quarries. Formerly the local forests were used for smelting the iron. Iron ore is dug at Cottesmore near Oakham. For agricultural statistics, see **Appendix,** pp. 7–9. Railway communication by the G. N., L. & NW., and M. Rlys. Oakham Castle (time of Henry II.) is remarkable for its Norman hall. R. was made a county by Henry III., and before 1885 returned two members to Parliament, and since, one. It is in the Midland circuit, and constitutes a deanery in the diocese of Peterborough. Area, 97,273 ac. P. (1891) 20,700. See **England,** table.

Ryazañ, govt., middle Russia, having Moscow and Tula on W., Vladimir on N., and Tambov on E. and S. Surface a plateau, 700 ft. high, deeply cut, W. to E., by the valley of the Oka, the Pronya, the Tsna, and numerous smaller tribs. and ravines. Soil very fertile, especially in SE., where the so-called 'ante-steppe' region, covered with black earth and patches of forest, begins. Coal, iron ores, limestone, grindstone, potters' clay, and peat are worked. Good forests in N. Climate somewhat warmer than at Moscow (average yearly temp. at R., 41°). Population Great Russian, with about 7000 Tatars, 1500 Poles, and less than 1000 Jews, and some Russified Meshcheryaks. Over one-half of the terr. is under corn-crops, and corn is largely exported; cattle-breeding suffers from want of meadows. A variety of domestic trades are carried on in the N.; manufactures are in progress. Intersected N. to S. by the Moscow Rly. leading to the SE. steppes, and from W. to E. by main trunk Riga–Samara–Siberia Rly., both showing a very lively traffic. Divided into twelve dists.: Ryazañ, Dankov, Egorievsk, Kasimov, Mikhailov, Pronsk, Ranenburg, Ryazhsk (important railway junction), Sapozhok, Skopin, Spassk, and Zaraisk. Many large villages having 4000 to 8000 inhabitants—Muraevnya, Dyedinovo, Lovtsy, Ukolovo, and many others. Area, 16,255 sq. m. P. (1882) 1,713,600; (1890) 1,928,600.

Ryazañ, cap. of above govt., 119 m. by rail SE. of Moscow, on Trubezh, 1 m. above its junction with Oka; badly built, and often destroyed by conflagrations; trade in corn; important railway centre. P. (almost stationary) 30,170.

Ryazhsk, dist. tn., Russia, govt. and 70 m. by rail S. Ryazañ, very important junction of railways Moscow to Rostov, and Riga to Samara; trade in corn; surrounded by populous villages. P.<5000.

Rybachly (Tsyp Navolok), penin., Russia, Arctic Ocean, on Murman coast, 69° 34′ N., 32° 47′ E. (Cape Gordyeev).

Rybinsk, dist. tn., Russia, govt. and 54 m. NW. Yaroslavl, on r. bk. of Volga, connected by railway with Bologoye stn. on St. Petersburg–Moscow Rly. (186 m.). Being situated on r. bk. Volga, opposite the mouth of Sheksna, and near to the mouth of Mologa—both connected by the Tikhvinsk and Mariinsk systems of canals with the Neva—it is the port of St. Petersburg on the Volga; from 5000 to 7000 vessels, coming up the Volga with corn, timber, &c., stop here and partly are discharged—over 180,000 tons of goods being sent by rail to Bologoye—or are shipped, up the two systems of canals, to St. Petersburg. Nearly 100,000 workers come here together during the period of navigation. Permanent population increasing (1883) 18,900; (1891) 29,000.

Rybnik, tn., Prussia, prov. Silesia, 15 m. E. Ratibor, circle R.; coal is mined here. P.<5000.

Ryburgh, Great and **Little,** two adjoining pars., Eng., Norfolk. Great R., NW. div., on the Wensum, 19 m. WSW. Cromer, with a stn. (**Ryburgh**) on the G. E. R., PMT.O., P. <750; Little R. P.<250.

Rydaholm, vil., Sweden, prov. and 53 m. S. Jönköping. P. (comm.)<4000.

Rydal ('rye valley') **and Longhrigg,** par., Eng., Westmorland, in the W. of the Appleby div., at the E. extremity of **Rydal Water,** 2 m. N. of the head of Windermere, 5½ m. NW. by N. Windermere stn.; 4862 ac. P.<500. See **Rothay.**

Rydal, stn., New South Wales, Cook co., on the G. W. R., on Solitary Creek, 75 m. NW. by W. Sydney (111 m. by rail), in 33° 29′ S. and 150° 3′ E. P.<1500.

Rydal Fell, mt., Eng., Westmorland, in the W. of the Appleby div., 2 m. NW. Rydal. Height, 2003 ft.

Ryde, mun. bor. (since 1868) and par., Eng., Hampshire, on N. ct. of Isle of Wight, in the diocese of Winchester. It is mainly a watering-place and summer resort, with pier for the steamers for Southampton and Portsmouth. Tn. P. (1801)<1500; (1871) 11,300; (1891) 11,000.

Ryde, or **Kissing Point,** stn., New South Wales, Cumberland co., 12 m. by rail NW. Sydney, in 33° 51′ S. and 151° 7′ E.; has large orange orchards. P.<4000.

Ryders Hill, Eng., in the S. of Devonshire, 16½ m. W. by N. Torquay. Height, 1691 ft.

Rye, mun. bor. (by prescription), seapt., and market-tn., Eng., Sussex, Rye div., 10 m. NE. Hastings, in the diocese of Chichester, on the Rother, on SE. R. Trade diminished, as the harbour has got silted up; still exports wool, corn, timber, and hops. R. was a Cinque Port, the Ypres tower being a survival of the ancient fortifications. Parl. and mun. bor. P. (1891)<4000; parl. div. P. 57,100.

Rye, riv., Eng., Yorkshire, N. Riding, rising in Smilesworth Moor, on the N. border of the Thirsk and Malton div., flowing SE. partly through and partly along the borders of the Thirsk and Malton and the Whitby divs., joining the Derwent on the r. bk. at Wykeham, about 4 m. above Malton.

Ryslinge, vil., Denmark, Fyen, 12 m. SSE. Odense. Mean rfall. 25.87 in. P.<2000.

Rysome, vil., Eng., Yorkshire, E. Riding, 2 m. NE. Patrington.

Ryssby, vil., Sweden, prov. and 9½ m. N. Kalmar. P. (comm.)<4000.

Ryssel, tn., France. See **Lille.**

Ryston, par., Eng., Norfolk, SW. div., 11½ m. S. King's Lynn, 1 m. N. by E. of its stn. on the G. E. R. P.<250; eccles. par. (**R with Roxham and Fordham**) P.<500.

Ryswyk, or **Ryswyck,** tn., Holland. See **Rijswijk.**

Ryther with Ossendyke, par., Eng., Yorkshire, W. Riding, Barkston Ash div., on the Wharfe, 8½ m. SSW. York, 2½ m. E. by S. Ulleskelf stn. P.<500; eccles. par. (**R. with Lead**) P.<500.

Ryton, par., Eng., Salop, Oswestry div., 6 m. S. Shrewsbury, 1 m. E. Dorrington stn. P.<250.

Ryton, par., Eng., Yorkshire, N. Riding, on riv. Rye, dist. and 3 m. NE. Malton. P.<250.

Ryton and **Ryton Woodside,** two adjoining pars., Eng., Durham. Ryton, Chester-le-Street div., on the r. bk. of the Tyne, 6 m. W. Newcastle, on the NE. R. and N. B. R.; has coal-mines and large iron-works. PMT.O. Tn. (Ryton) P. 5600; par. (Ryton) P.<3500; Ryton Woodside, P.<1500.

Ryton on Dunsmore, par., Eng., Warwickshire, Nuneaton div., 4½ m. SE. Coventry, 2 m. SW. Brandon and Wolston stn., P.O. P.<500.

Ryukyu, kuni or old prov., Japan, now in Okinawa ken.

Rzeszów, tn., Austria, crownland Galicia, cap. dist. R., on riv. Wislok, 70 m. E. Bochnia; manufactures cloth and linen. P. 12,000.

Rzhev, dist. tn., Russia, govt. and 70 m. SW. Tver, 92 m. from Ostashkovo railway stn., on both banks of Volga; hemp-yarn mills; important river-port. P. 30,400.

Rzhishchev, tn., Russia, govt. and 58 m. SE. Kiev, near r. bk. Dnieper; sugar-works, distilleries; river-port for shipping corn, salt, and sugar. P. 5200.

S

Saadani, seapt., German E. Africa, in about 6° 3′ S. Saadani is the terminus of the caravan route into the interior. The town was occupied by the Germans in 1890. P.<2000.

Saal, or **Saal im Pommern,** vil., Prussia, prov. Pomerania, on the E. shore of the Saaler Bodden (a lagoon which receives the Recknitz), circle Franzburg, 24 m. W. Stralsund. P.<2000.

Saalbach, small riv., Ger., Baden, flows NW. into the Rhine, a few miles above Spires; not navigable.

Saale, riv., Ger., rises on the N. side of the Fichtelgebirge, in the NE. of Bavaria, and winds N. through Thuringia, Prussian Saxony, and Anhalt, past Rudolstadt, Jena, Merseburg, and Halle into the Elbe in Prussian Saxony, which it enters midway between Magdeburg and the confluence of the Mulde; canalised from Naumburg, 112 m. Length, 210 m.

Saale, Fränkische (Franconian), riv., Ger., in the N. of Bavaria, flows SW. into the Main, which it enters about 19 m. NW. by W. Würzburg; navigable.

Saaler Bodden, ct. lake, Prussia and Mecklenburg-Schwerin, receiving at its head the Recknitz, separated from the Baltic by a narrow strip of land connecting the Darss Penin. with the mainland, communicating on the E. with the Barther Bodden; navigable by vessels of about 6 ft. draught.

Saalfeld, tn., Ger., duchy Saxe-Meiningen, on the l. bk. of the Saale R., 33 m. NE. by N. Koburg, cap. circle Saalfeld. Manufactures of wire-work, dyeing, &c.; has ochre and iron-mines (formerly also gold, silver, and copper). Saalfeld was probably founded 800, as a border fortress against the Sorbs (Wends); later it was an imperial residence and free city. In 1680 was cap. of a duchy which was united to Koburg in 1735, and to Meiningen in 1826. P. (1834)<5000; (1890) 9800.

Saalfeld, tn., Prussia, prov. E. Prussia, circle Mohrungen, 22 m. SSE. Elbing. P.<3000.

Saalfelden, comm., Austria, Salzburg, dist. Zell am See, 26 m. SSW. Salzburg. P.<5000.

Saalkreis, circle, Prussia, prov. Saxony, govt. Merseburg, almost entirely E. of the Saale, cap. Halle; contains the coal-field of Wettin.

Saane, riv., Switzd. See **Sarine.**

Saanen, vil., Switzd., in the Bernese Oberland, on the Saane (Sarine), 25 m. SW. Thun. Alt. 3325 ft. P.<4000.

Saanich, long picturesque inlet in the SE. of Vancouver I., NW. of Victoria, opening N.

Saar, tn., Austria, Moravia, dist. Neustadtl, 19 m. NE. Iglau. P.<3000.

Saar, French **Sarre,** riv., Ger., rises in Lorraine and flows N. into the Rhine Prov. of Prussia, and enters the Moselle a few miles above Trèves; navigable from Sarrlouis, 45 m.; canalised to Saargemünd, 29 m. higher up, whence the **Saar Canal** runs S. to join the Marne-Rhine Canal. Canal, 40 m. long and 5½ ft. deep, and made in 1867; is principally used for carrying coal from the Saar coal-basin into France and Lorraine. Length, 84 m.

Saaralben, tn., Ger., Alsace-Lorraine, circle Forbach, on the Saar R., 40 m. E. by S. Metz, 7½ m. S. by W. Saargemünd. P.<3000.

Saarbrücken, tn., Prussia, in the extreme S. of the Rhine Prov., on the l. bk. of the Saar, 39 m. SSE. Trèves, cap. circle Saarbrücken; centre of the Saarbrücken coalfields, 22 m. long by 8 m. wide; has manufactures of door and window fasteners, and iron-founding. Trade in coal, ironwares, wines, &c. The battlefield of Spichern (August 6, 1870) is close by. P. (1816, with St. Johann) 9500; (1890, exclusive of St. Johann) 13,500; comm. P. 13,800; (including St. Johann) P. 28,400.

Saarburg, tn., Ger., Alsace-Lorraine, cap. circle Saarburg, on the Saar R., 33 m. W. by N. Strassburg. P. 5400.

Saarburg, tn., Prussia, Rhine Prov., on riv. Saar, 11 m. SSW. Trèves, cap. circle Saarburg. P. <3000.

Saardam, a name sometimes improperly used for **Zaandam,** Holland.

Saargemünd, in French **Sarreguemines,** tn., Ger., Alsace-Lorraine, cap. circle Saargemünd, on l. bk. of the Saar, 40 m. E. Metz; considerable manufactures of stoneware, silk, plush, velvet, &c. P. (1867) 6100; (1890) 12,200; comm. P. 13,100.

Saarlouis, tn. and fortress, Prussia, Rhine Prov., on the Saar, 31 m. S. Trier (Trèves), 13 m. NW. by W. Saarbrücken, cap. circle Saarlouis; manufactures leather, &c. Almost immediately outside the fortifications (erected by Vauban in 1680–85) lie the villages of Roden, Fraulautern, Lisdorf, and Beaumarais. Birthplace of Marshal Ney (1769). Annexed to Prussia in 1815. P. (1816) 4700; (1890) 6800.

Saarn, vil., Prussia, Rhine Prov., circle Mülheim, on riv. Ruhr, 6½ m. SW. by W. Essen. P. <5000.

Saar Union, tn., Ger., Alsace-Lorraine, circle Zabern, on the Saar R., 30 m. W. Wörth, 11½ m. S. Saargemünd; manufactures hats and ropes. P. <4000.

Saarwellingen, tn., Prussia, Rhine Prov., govt. Trier (Trèves), circle and 7 m. NE. Saarlouis. P. <3000.

Saas, Saas im Grund, or **Im Grund,** vil., Switzd., cant. Grisons, 13 m. ENE. Chur, in the Prättigau. Above Saas is the village Fée, a favourite tourist resort. Near the town is the pass of Monte Moro, alt. 9390 ft., which leads to Macugnaga. Before the Simplon route was open, this was the general route between Vaud and Italy. P. <2000.

Saati, or **Sahati,** vil., E. Africa, Eritrea, 16 m. W. Massaua, with which it is connected by rail.

Saatzig, circle, Prussia, prov. Pomerania, govt. Stettin, on the Ihna.

Saaz, or **Zatec,** tn., Austria, Bohemia, dist. S., on riv. Eger, 30 m. E. by N. Karlsbad. Important hop-gardens, said to produce the best hops in the world. Saaz was a fortress of the Hussites in the 15th century; was unsuccessfully besieged by the Germans in 1419. Alt. 765 ft. P. 13,200.

Saba, tn., Arabia. See **Marib.**

Saba, Dutch isl., W. Indies, Leeward Is., in 17° 40′ N., 63° 15′ W. P. 2000.

Saba, islets, mouth of Red Sea. Same as **The Brothers.**

Šabac (shabats), tn., Servia, cap. prov. Šabac, on the Save, 37 m. W. by S. Belgrade. P. 9700.

Sabadell, comm., Spain, Catalonia, prov. and 11 m. NNW. Barcelona; manufactures cotton and woollen goods. The town is called 'The Manchester of Catalonia.' P. 19,600.

Saba'ki, riv., Brit. E. Africa, called in its upper course the Athi, flows first SE. from the Kikuyu plateau, then E. mostly through arid wastes covered with dense, often thorny, scrub, and enters the Indian Ocean in 3° 10′ S., a few miles to the N. of the Malindi; entirely unnavigable.

Sabalgarh, tn., Central India, Gwalior state, 30 m. SE. Karauli, and 8 m. SE. r. bk. Chambal. P. 6100; Hindus, 5100.

Sabana, Rio, estuary, Colombia, Isthmus of Panama, runs N. and S. to Darien Harbour behind the Gulf of San Miguel.

Sabanacamaguey, an archipelago on the N. ct. of Cuba, in 79°–81° W.

Sabana del Palmar, comm., isl. Porto Rico, 18 m. SSW. San Juan, on r. bk. of riv. Toa. P. 6600.

Sabana Grande, isl. and comm., Porto Rico, S. ct., 71 m. SW. by W. San Juan, in 67° W. P. 9600.

Sabanalarga ('great savannah'), tn., Colombia, dep. Bolivar, 40 m. ENE. Cartagena. P. (with dist.) 10,000.

Sabaneta, cape, in the extreme NW. of Brit. Guiana, in about 8° 42′ N., 60° 7′ W.

Sabaneta, cape, isl. of Haiti. See **Punta Sabaneta.**

Sabang, vil., Malacca (Straits Settlements), 20 m. N. Malacca.

Sabanilla, seapt. tn., Colombia, Bolivar, 60 m. NE. Cartagena. Sabanilla is the principal export port of the republic; has an open roadstead (with two lighthouses, visible respectively 15 and 14 m.), but partly sheltered by a narrow penin. stretching about 2 m. W., at the end of which stands Puerto Colombia. P. <2000.

Sabanilla del Encomendador, comm., Cuba, 89 m. E. by S. Havana. P. 8900.

Sabanja, the ancient *Sophon,* tn., Asia Minor, vilayet Constantinople, sanjak and 18½ m. ESE. Ismid, on S. side of **Sabanja Lake** (10 m. long by 4½ m. wide). P. 3–4000.

Sabara, tn., Brazil, Minas Geraes, in 19° 49′ S., 44° 0′ W., 46 m. NW. Ouro Preto; gold is mined here. Alt. 2280 ft.; annual rfall. (25 yrs.), 64.45 in. P. 5000.

Sabari, Seberi, Severi, or **Savari,** riv., India, rises in the Eastern Ghats, and joins the Godávari in 17° 35′ N. and 81° 18′ E.

Sabarmati, riv., India, flowing SSW. through Gujarat into the head of the Gulf of Cambay.

Sabba, vil., Malay Penin., in the S. of Perak, on the Bernam R., in about 3° 46′ N., 100° 59′ E.

Sabbânîn, vil., Palestine, 32° 34′ N., 34° 52′ E., 9½ m. NE. by E. of the ancient Cæsarea.

Sabbia, Val, valley, Italy, E. Lombardy, the Italian part of the mountain basin of the Chiese (W. of Lake Garda).

Sabbioncello, mountainous penin., Austria, Dalmatia, crossed at N. end by 43° N., separated from the mainland by the Gulf of Narenta, and from Curzola and Meleda Is. by the channels of the same names as the islands. Length, 43 m.; breadth, 2½–5 m.; has a lighthouse (on Cape Gomena), visible 11 m.

Sabbioneta, tn., Italy, Lombardy, prov. Mantua, 13 m. NNE. Parma. P. <2000.

Sabden, vil., Eng., Lancashire, div. and 3½ m. SE. Clitheroe, PMT.O.

Sabetha, city, U.S., Kansas, Nemaha co., 60 m. W. by N. St. Joseph (Mo.) by rail. P. <1500.

Sabi, riv., S. Africa, flows S. through Manika-land, then E. through Gaza-land, entering the Indian Ocean in about 21° S. Bar at mouth 5 ft. deep at low tide; tide ascends 30 m.

Sabians, not to be confounded with Sabæans, religious sect, Asiatic Turkey, Mesopotamia, on the lower Euphrates and in the Persian valley of Karun; are gnostic Christians. Their headquarters are at the village of Suk-esh-Shiok, 215 m. SSE. Bagdad.

Sabina, vil., U.S., Ohio, Clinton co., 50 m. SW. Columbus. P. <1500.

Sabinal, Cayo (**Key**), Cuba I., to the N. of the port Nuevitas. Length, 22 m.; breadth, 9½ m.

Sabinas, tn., Mexico, Coahuila, 150 m. N. by W. Monterey, on the most important coalfield of the state; iron also occurs near. P. <2000.

Sabine, par. (co.), U.S., Louisiana, W. frontier, S. of 32° N.

Sabine, co., U.S., Texas, on the Sabine R. (E. frontier), N. of 31° N.

Sabine Island, Greenland. See **Pendulum Islands.**

Sabine Lake, U.S. See **Sabine River.**

Sabine Pass, short riv., U.S., between Louisiana and Texas, forming the outlet of Sabine Lake.

Sabine Pass, or **Sabine City,** vil., U.S., Texas, Jefferson co., 88 m. E. Houston, on the outlet of Sabine Lake. P. <1500.

Sabine River, U.S., rises in the NE. of Texas, forms part of the boundary between Louisiana and Texas, and flowing through Sabine Lake enters the Gulf of Mexico through the head of Sabine Bay, an inlet of the Gulf of Mexico, 30 m. long by 1 to 7 or 8 m. broad, at the mouth of which is a bar with 6 or 8 ft. of water. Lighthouse in 29° 43′ N., visible 15 m.

Sabiote, comm., Spain, Andalusia, prov. and 35 m. NE. Jaën, dist. Ubeda. P. <5000.

Sabis, riv., France. See **Sambre.**

Sable, French, 'sand;' *e.g.,* Sablon, Sablières, La Sablonière.

Sable, Cape, Canada, Nova Scotia, in the extreme S., at the S. end of an island which takes its name from it.

Sable, Cape, U.S., the most southerly point of the mainland of Florida.

Sable Island, isl., Canada, Nova Scotia, 20 m. long, 1–2 m. broad, on the Atlantic Ocean, in 43° 54′–58′ N., crossed by 60° W.; has an establishment for the relief of shipwrecked mariners.

Sable Island, isl., W. Indies, 1 m. from the W. point of Antigua.

Sable River, post-vil., Canada, Ontario, Bruce co., on Lake Huron, 52 m. W. by N. Collingwood. P. <1500.

Sables d'Olonne, Les, seapt., France, dep. Vendée, on the W. ct., 38 m. NW. La Rochelle, cap arr.; has sardine fisheries, and canning and shipbuilding; also oyster beds. The port is situated on a badly-sheltered roadstead; has a fine beach, frequented for sea-bathing; a lighthouse (Barges d'Olonne), visible 14 m. P. 9900.

Sable-sur-Sarthe, tn., France, dep. Sarthe, arr. La Flèche, 26 m. SE. by E. Laval; anthracite is found here; important quarries of black marble, and marble works. P. 5300.

Saccarappa, vil., U.S., Maine, Cumberland co., 4 m. NW. by W. Portland. P. <1500.

Saccarello, Monte, mt., Italy, Piedmont, in the Maritime Alps, 18 m. N. by W. San Remo. Alt. 7228 ft.

Sac City, U.S., Iowa, cap. co., 72 m. E. by S. Sioux City. P. <1500.

Sacconago, tn., Italy, Lombardy, prov. and 20 m. NW. Milan. P. <3000.

Sacconnex, Grand and **Petit,** two vils., Switzd., immediately adjoining Geneva on the N.

Sacedon, small vil., Spain, the name of which is sometimes applied to the neighbouring La Isabela. See **Isabela, La.**

Sachem's Head, cape, U.S., Connecticut, New Haven co., in 72° 41′ W.

Sachigo, Lake, Canada, NW. Terrs., crossed by 54° 10′ N., 93° 40′ W., drained NE. by the Sachigo R. into the Severn; a Hudson Bay Company's post upon its E. side.

Sachsa, tn., Prussia, prov. Saxony, circle and 13 m. NW. by W. Nordhausen. P. <2000.

Sachseln, vil., Switzd., cant. Unterwalden, 2 m. S. Sarnen, on the E. side of the Sarner-see. The church, containing the tomb of the hermit Nicolas de Flue, died 1487, attracts many pilgrims. P. <2000.

Sachsen, kgd. See **Saxony.**

Sachsen Bay, German New Guinea, in the W. of Huon Gulf, in 7° 15′ S.

Sachsenburg, tn., Austria, Carinthia, dist. Spittal, 49 m. WNW. Klagenfurt; iron and antimony are mined here. P. <2000.

Sachu, Sachou, Shachau, Saitu, Tunghwan-hsien, or **Tengwan,** tn. and oasis, China, in the NW. of prov. Kansu, NW. of the Nan-shan range, in 40° 8′ N., 94° 56′ E. The oasis, irrigated by the Danga-gol (Dan-chai or Tan-bo), and one of the most fertile in central Asia, extends about 15 m. N. to S., and 12 m. E. to W. Alt. 5225 ft. P. (including oasis) 20,000.

Sachuest Point, cape, U.S., Rhode Island, in the S. of New Port co., in 71° 15′ W.

Sacierges, vil., France. See **Sassierges-St.-Martin.**

Sacile, tn., Italy, Venetia, prov. Udine, 23 m. NE. by N. Treviso. P. <3000.

Sacket (or **Sacket's**) **Harbor,** vil., U.S., New York, Jefferson co., on Lake Ontario, 40 m. NE. by N. Oswego. The harbour comprises the outer and inner harbour, the latter having sufficient depth for large vessels to within two fathoms of the shore. In the village are Madison barracks, built 1816–19, containing one regiment of U.S. infantry. P. <1500.

Säckingen, tn., Ger., gd.-duchy of Baden, circle Waldshut, on r. bk. of the Rhine R., 16 m. E. Basel (Switzd.); manufactures silk ribbons; has a mineral spring and baths. P. <4000.

Sackville, seapt. tn., Canada, New Brunswick, Westmorland co., 95 m. ENE. St. John, near the head of Cumberland Basin. P. <5000.

Sackville, vil., Canada, Nova Scotia, co. and 12 m. from Halifax. P. <1500.

Saco, city, U.S., Maine, York co., on the l. bk. of the riv. Saco, 14 m. SW. by S. Portland, opposite Biddeford, with which it is connected by four bridges; has a splendid beach, and considerable coasting trade. Manufactures include cotton goods, machinery, and shipbuilding, &c. P. 6100.

Saco, riv., U.S., rises in the White Mts., New Hampshire, flows E. and SE. through Maine, and falls into the Atlantic below Biddeford. Length about 160 m. The navigation is impeded by falls, which afford water-power for numerous mills.

Sacombe, par., Eng., Hertfordshire, Hitchin div., 4½ m. N. by E. Hertford, 3½ m. N. by W. Ware stn. P. 250.

Sacramento, vil., Brazil, Minas Geraes, in 19° 48′ S., 42° 9′ W.

Sacramento, city, U.S., California, Sacramento co., on a wide plain, on l. bk. of Sacramento R., 73 m. NE. San Francisco; manufactures pottery, flour, furniture, and woollens. The railway repair and car shops of the Pacific Rly. employ 1000–1500 hands. It has regular communication by steamers with San Francisco, Marysville, and various points on the Sacramento R. Sacramento was founded in 1839, and then called New Helvetia. Mean temp. (37 yrs.), yr. 60.2° F., Jan. 46.6°, July 73.0°; rfall., yr. 19.80 in., May–Oct. 1.79 in. P. (1850) 6800; (1870) 16,300; (1880) 21,400; (1890) 26,400.

Sacramento, riv., U.S., California, rises in the Sierra Nevada, near 42° 40′ N., 120½° W., flows SSE. between those mountains and the Coast Range, and in 38° 10′ N. unites with San Joachim from the S., then flows into the Bay of San Francisco; navigable 50 m. in high water, and by small vessels to Red Bluff, 320 m. Length, 500 m.

Sacramento, Pampas del, an immense densely forest-clad plain on both sides of the Ucayali, but mainly on the W., dep. Loreto, Peru, extending from the mouth of the river to about 9° S.

Sacratif, cape, S. ct. of Spain, prov. Granada, in 3° 29′ W.

Sacriston, eccles. par., Eng., Durham, Mid div., 3½ m. NW. by N. Durham, 2 m. ENE. Witton Gilbert stn., PMT.O. P. 5300.

Sacro, Monte, mt., Italy, in S. of Campania, in 40° 13′ N., 15° 22′ E. Alt. 5590 ft.

Sacupana, tn., S. America, Venezuela, Delta terr., on S. bank of Orinoco, 120 m. S. of the SW. point of the isl. of Trinidad.

Sada, comm., Spain, Galicia, prov. and 6 m. ESE. Corunna, dist. Betanzos; has fisheries. P. 6300.

Sadagóra, tn., Austria, crownland Bukowina, dist. and 4½ m. N. by E. Czernowitz. P. <5000.

Sadberge, par., Eng., Durham, SE. div., 4 m. ENE. Darlington, 1½ m. N. Middleton in Teesdale stn., PM.O. P. <500.

Saddell and Skipness, par., Scot., Argyllshire, on E. side of Kintyre; 46,872 ac. P. <1500.

Saddington, par., Eng., Leicestershire, Harborough div., 9 m. SE. by S. Leicester, 2½ m. WSW. Kibworth stn., P.O. P. <250.

Saddle, isl. group, China. See **Hangchow Bay.**

Saddle, isl., Lower Burma, in the Mergui Archipelago, 3 m. W. the isthmus of Kra, immediately S. of 10° N.

Saddle, The, mt., Scot., on the border of Inverness-shire and Ross-shire, 13½ m. N. by W. of the head of Loch Arkaig. Alt. 3317 ft.

Saddleback, mt., Eng., Cumberland, Penrith div., 4½ m. NE. by E. Keswick. Height, 2847 ft.

Saddleback, mt., U.S., Maine, Franklin co., 52 m. NW. Augusta.

Saddle Head, or **Gubroenacoragh,** cape, Ire., N. ct. Achill I., co. Mayo.

Saddle Island, Pacific. See **Valua.**

Saddle Mountain, Canada, Quebec, on the frontier of Maine (U.S.), in 71° W.

Saddlewood, vil., Eng., Gloucestershire, Hawkesbury par., 6 m. SW. Tetbury.

Saddleworth, par., Eng., cos. Lancashire and Yorkshire, W. Riding, Colne Valley div., 11 m. SW. by W. Huddersfield, 5 m. E. Oldham, with a stn. (**Saddleworth** for **Dobcross**) on the L. & NW. R.; manufacture of woollens. The par., which is intersected by the Huddersfield Canal, consists chiefly of hills and moorlands. Area, 18,797 ac. P. 22,500.

Saddleworth, tp., S. Australia, Light co., 58 m. N. by E. Adelaide, on the Great Northern Line. P. <1500.

Saddle Yoke, mt., Scot., Dumfriesshire, par. and 6 m. NE. Moffat. Alt. 2412 ft.

Sadek, tn., Cochin-China, near r. bk. of Anterior or Superior arm of the Mekong, 70 m. WSW. Saigon.

Sadfe, tn., Upper Egypt, prov. and 19 m. SE. Siut, on the l. bk. of the Nile. P. <4000.

Sádhaurá, municip., Brit. India, Punjab, dist. and 26 m. E. Ambála; has an annual Mohammedan fair, attended by about 20,000 persons. Manufactures coarse cloth. P. 10,400; Hindus, 3900; Moham. 5800.

Sadikábád, vil., India, Baháwalpur, 100 m. E. Jacobábád.

Sadika-Banza, vil., W. Africa, Congo Free State, near the r. bk. of the Congo, in 5° 36′ S., 13° 38′ E.

Sadina, tn., Bulgaria, prov. Razgrad, 30 m. SE. by S. Rustchuk. P. <3000.

Sadiola, vil., French Sudan, Bambuk, 42 m. SW. Medina; has rich gold-mines.

Sadiyá, vil., Brit. India, Assam, dist. Lakhimpur, on the r. bk. of the Brahmaputra, here subject to such great changes as to threaten the destruction of the village, 46 m. NE. by E. Dibrugarh. Sadiyá is the NE. frontier outpost of India, and hence a place of political importance. Alt. about 400 ft. P. <5000.

Sado, isl., Japan, off the W. ct. of Honshiu, 25 m. W. Niigata. It formed a kuni or old prov., but is now in Niigata ken; gold mined in the NW. of the island.

Sado, riv., in the S. of Portugal, flows N. then NW. into the Bay of Setubal (St. Ives).

Sadon, vil., Brit. India, Upper Burma, in the Kashin Hills. A mule-track has recently been opened to this place from Waingmaw, l. bk. of Iráwadi.

Sadong, riv., in the SW. of Saráwak, flows N. into the China

Sea, which it enters in about 110° 45′ E.; navigable for large vessels in its lower course, but with the navigation obstructed by a bar at the mouth, over which there is only 7 ft. at dead low water.

Sadong, vil., Saráwak, on Sadong R.; has government coal-mines.

Sadonsk, lead and silver mines, Russia, N. Caucasus, prov. Terek, WSW. Vladikavkaz, 24 m. from Alaghir silver-works.

Sadowa, vil., Austria, Bohemia, dist. and 8½ m. NW. Königgrätz; scene of a great victory of the Prussians over the Austrians, 1866. P. <2000.

Sadowa Wisznia, tn., Austria, crownland Galicia, dist. Mosciska, on the Wisznia (trib. San), 30 m. W. by S. Lemberg. P. <5000.

Sadras, or **Satranja-Patana,** tn., Brit. India, Madras, Chengalpat dist., 43 m. S. Madras. A Dutch settlement was founded here, 1647. P. <5000.

Sadska, tn., Austria, Bohemia, dist. Podĕbrad, 25 m. E. by N. Prague; has a mineral spring and bathing establishment. P. <4000.

Sadullápur, vil., Brit. India, Bengal, Maldah dist.; has a large religious trading fair in March. Sadullápur is held in great veneration by the Hindus as a burning ghát and bathing-place. P. <5000.

Sæby, tn., Denmark. See **Säby.**

Saegerstown, bor., U.S., Pennsylvania, Crawford co., on French Creek, 28 m. S. by W. Erie. P. <1500.

Saegersville, vil., U.S., Pennsylvania, Lehigh co., 29 m. NE. by N. Reading. P. <1500.

Sael, Anglo-Saxon, 'the willow.' See *Salh.*

Sæpinum, vil., Italy. See **Sepino.**

Safah, Es, volcanic mass, Syrian desert, 18½ m. SE. Damascus. Its cones are 2950–3600 ft. above the level of the sea, and 1300–1970 ft. above the surrounding country.

Safaid Koh, mt. range, Afghanistan. See **Safed Koh.**

Safata Harbour, on the S. ct. of Upolu I., Samoan group, S. Pacific, in about 13° 56′ S., 171° 47′ W.

Safed, tn., Palestine, 32° 58′ N., 35° 29′ E., 13 m. N. by W. Tiberias, on a mountain cleft by a ravine. Safed is the seat of a noted Jewish school. In the time of the crusaders an important fortress. A terrible earthquake in 1837 destroyed 4000 Jews. P. 4000, mainly Jews, who are attracted here by certain prophecies which proclaim that this will be the birthplace of the future Messiah.

Safed Koh, Safid Koh, Sefid Koh, Safaid Koh, Súfed Koh, or **White Mountains,** range of mts., Afghanistan, stretching for about 100 m. E. and W. to the S. of the Kabul R. The highest peak is **Sikaram** or **Sitaram,** in lat. 34° 2′ 21″ N., long. 69° 56′ 35″ E. Alt. 15,600 ft. See *Proc. R. G. S.,* 1879, p. 629.

Safeh, Es, oasis, eastern Sudan. See **Es-Safi.**

Safe Harbour, vil., U.S., Pennsylvania, Lancaster co., on l. bk. of the Susquehanna R., 36 m. SE. Harrisburg. P. <1500.

Safety, Isles of. See **Salut, Îles du.**

Safety Cove, Canada, Brit. Columbia. See **Oatsolls.**

Saffelaere, comm., Belgium, prov. E. Flanders, arr. Ghent. P. <4000.

Safi, Asfi, or **Azfi,** seapt., W. ct. Morocco, in 32° 19′ N., 106 m. WNW. Morocco. Surrounded by walls, ditches, and a ruined citadel, and built at the bottom of a ravine. Anchorage in bay from ½ m. to 2 m. from shore, open to the WSW., and very dangerous; vessels load and discharge by lighters. The exports are valued at less than £200,000, the imports at half that sum. In the vicinity is the 'House of the Seven Brothers,' a shrine venerated alike by Jews and Moors. Excessively hot in summer. P. 3–10,000.

Saffron Hill Liberty, Hatton Garden, Ely Rents, and **Ely Place,** par., Eng., co. London, in Holborn union. P. <5000.

Saffron Walden, mun. bor. (since the 14th century), par. and market-tn., Eng., Essex, Saffron Walden div., 24 m. NNW. Chelmsford, in the diocese of St. Albans, on a branch of the G. E. R., near the Cam. A centre of agricultural industry. The name refers to a time when the saffron crocus was cultivated here (Walden=Wealden). The town has a museum and a good library; also a training-college for schoolmistresses. Remains of a Norman castle. Market-days, Tu. and S. Mun. bor. and par. 7502 ac., P. (1801) 3200; (1851) 5900; (1871) 6060; (1891) 6100; parl. div. P. (1891) 47,400.

Saffuriye, Palestine. See **Sefuriye.**

Safi, Es-, oasis, eastern Sudan. See **Es-Safi.**

Säfsnäs, vil., Sweden, prov. Kopparberg, 50 m. SW. Falun. P. (comm.) <4000.

Säfvar, vil., Sweden, prov. Vesterbotten, 10 m. NE. Umeå; scene of a Russian victory over the Swedes, 1809. P. (comm.) <4000.

Säfvenäs, harb., Sweden. See **Skellefteå.**

Saga, tn., Japan, Kiushiu, 40 m. NNE. Nagasaki. P. 29,500.

Saga, vil., Upper Burma, in the Shan state of Thaton, 100 m. SSE. Mandalay.

Sagadahoc, co., U.S., Maine, on the coast, crossed in the W. by 70° W., contains the mouths of the Kennebec and the Androscoggin Rivs.

Sagain, or **Sagaing** (census), tn., Upper Burma, on the Irâwadi, 10 m. SW. by W. Mandalay, cap. dist. Sagain. P. 9900; Buddhists, 8600.

Sagais, Turkish stem in S. Siberia, dists. Minusinsk and Kuznetsk, on upper Abakan and Tom. Number about 8000.

Sagala, mission station, Brit. E. Africa, in about 3° 30′ S., 38° 24′ E.

Sagallo, seapt. vil., E. Africa, French colony of Obok, on the N. ct. of the Bay of Tajurra, 37 m. SW. Obok; is the starting-point of caravans for Shoa. The roadstead is almost open.

Sagami, kuni or old prov., Japan, now included in Kanagawa ken. It includes the S. penin. on the W. side of the entrance to the Bay of Tokyo, terminating in Cape Tsurugi (Tsurugisaki).

Sagan, tn., Prussia, prov. Silesia, cap. circle Sagan, on the r. bk. of the Bober, 34 m. W. Glogau. The principality of Sagan, created 1428, belonged for a short time to the great General Wallenstein. P. (1816) <5000; (1890) 12,400.

Saganing, mts., Russia, Transcaucasia, begin in prov. Kars and run SE., assuming different names (Balehak, Alaghöz Mts., &c.), and reach 9369 and 9227 ft. in Kumry and Chomargdagh respectively, and 13,436 ft. in Mount Alaghöz.

Saganoseki, seapt. tn., Japan, in the NE. of Kiushiu I. P. 5400.

Ságar, or **Saugor** (census), isl., Brit. India, Bengal, in the Sundarbans, at mouth of the Húglí R. In 1864 a cyclone visited the island, when a storm wave 11 ft. high swept over it, destroying more than two-thirds of the population. The island is very sparsely inhabited. Has lighthouse, in 21° 39′ N., visible 15 m.

Ságar, or **Saugor** (census), tn., Brit. India, Central Provs., cap. dist., 90 m. ENE. Bhopál, on a fine lake of the same name; terminus of a branch line from Bina on the Indian Midland Rly. (through Central India, Bhopál to Jhansi, &c.); has a fort commanding the whole city; a barrack for Europeans; cantonment on NE. In 1867 the swamp to the NE. was converted into a large garden, with ornamental water. Ságar was formerly the entrepôt of the salt trade with Rájputána. Alt. 1940 ft. P. 44,700; Hindus, 33,500; Moham. 9000.

Ságar, municip., India, Mysore, 87 m. N. by E. Mangalore; has a trade in areca-nuts. P. (1881) <3000.

Ságarband Defile, pass, Brit. Afghanistan, across the N. end of the Takatu Mts., about 20 m. NNE. Quetta, now traversed by the railway through the Nari Pass.

Ságargarh, or **Sagargad** (census), health resort, Brit. India, Bombay, Kolába dist., 19 m. S. Bombay. Alt. 1357 ft.

Sagasig, tn., Egypt. See **Zagazig.**

Sagastyr, isl., Siberia, at the mouth of the Lena, seat in 1882–83 of the International polar station, 73° 22′ 48″ N., 126° 35′ E. Mean temp. (2 yrs.), yr. 1° F., Feb. –36.4°, July 40.8°.

Sageium, tn., France. See **Ponts-de-Cé.**

Sagetown, vil., U.S., Illinois, Henderson co., 83 m. by rail SW. Chicago. P. <1500.

Sage Valley, U.S., Nevada, White Pine co., 240 m. E. Carson City, to the S. of Steptoe Valley.

Saggart, par. and tn., Ire., co. and 8 m. SW. by W. Dublin, bar. Newcastle, 4½ m. from Clondalkin stn., P.O. Par. 4453 ac., P. <1000; tn. P. <250.

Saghalin. See **Sakhalin.**

Sag Harbor, vil. and port of entry, U.S., New York, Suffolk co., at the E. point of Long I., Gardiner's Bay, 94 m. E. by N. Brooklyn; tourist resort; chief industries, whaling and fishing. P. <2000.

Sagiet-el-Hamra ('the red ravine'), riv., W. ct. of Africa, enters the Atlantic Ocean about 28 m. SW. Cape Juby, in 27° 38′ N.

Saginaw, city, U.S., Michigan, cap. Siganaw co., on both banks of the Saginaw R., 12 m. SSW. Bay City; has saw and several other lumber mills, boiler and machine works, and various other factories. P. (1850) <1000; (1870) 7500; (1880) 10,500; (1890, consolidated with E. Saginaw) 52,300.

Saginaw, riv., U.S., Michigan, in the E. Formed by the confluence of the Tittabawassee and Shiawassee, it flows NNE. past Saginaw and Bay City to the head of **Saginaw Bay,** an inlet on the W. side of Lake Huron, 30 m. across, containing many islands, and has valuable fisheries. Most of the lumber trade of the Huron region passes through Saginaw Bay; navigable for steamers of 10 ft. draught for 24 m. out of a total of 34 m.

Sagium, tn., France. See **Sées.**

Sagne, La, vil., Switzd., cant. and 7 m. NW. by W. Neuchâtel. P. <2000.

Sagone, small port, Corsica, arr. and 14 m. N. Ajaccio, at head of Gulf of Sagone. The port offers excellent anchorage;

exports coal and wood. The neighbouring beach is frequented for sea-bathing. Sagone, which was an ancient episcopal city prior to the transference of the see to Vico, is of Roman origin.

Sagone, Gulf of, W. ct. of Corsica, in 42° 2′–8′ N., between the Pointe de Carghese on the N. and Cape Fano on the S.

Sagra, La, mountain mass, Spain, in the NE. of the prov. of Granada, a little S. of 38° N., to the E. of the headwater of the Guadalquivir. From different sides of it proceed various streams belonging to the basins of the Guadalquivir and Segura; has silver and tin mines. Tetico, its highest point, is 7870 ft. high.

Sagra di San Michele, ancient and celebrated abbey, Piedmont, on the summit of Mount Pirchiriano, 17 m. WNW. Turin; founded at the close of the 10th century. Alt. 3110 ft.

Sagres, decayed tn. and fort, in the extreme SW. of Portugal, prov. Algarve (dist. Faro), 4 m. SE. Cape St. Vincent. The fort, which is protected from W. and N. winds, and receives its name from *Promontorium Sacrum*, was founded in 1416, and first called *Terrena Raval*, and later *Villa do Infante*, by Henry the Navigator. Hence he despatched his vessels of discovery. Burnt down by Drake, 1597, and afterwards destroyed by an earthquake. P. <2000.

Sagu, tn., Upper Burma, dist. Minbu. P. 7500.

Saguache, co., U.S., Colorado, crossed by 38° N. and 106° W., with very pure beds of brown hematite at the base of the Sangre de Cristo Mts., in the E. of the county.

Saguache, Sawatch, Sierra Madre, or **National Range,** mts., U.S., Colorado, parallel with and about 16 m. W. Park range. The range, which stretches N. and S. by E. for about 80 m., has several peaks over 14,000 ft. in height, and terminates N. in the Mount of the Holy Cross. Alt. 14,176 ft.

Sagua de Tánamo, comm., Cuba, prov. and 64 m. NNE. Santiago de Cuba. P. 3500.

Sagua la Grande, comm., Cuba, 152 m. E. by S. Havana; has a lighthouse, visible 9 m. P. 18,300 (about two-thirds white, the remainder mainly 'coloured'; about 500 Chinese).

Saguenay, co., Canada, embracing the whole of the prov. of Quebec N. of the riv. St. Lawrence and E. of 70° W., together with a small area in the S., W. of that meridian.

Saguenay River, Canada, Quebec, drains the waters of Lake St. John and flows ESE. into the riv. St. Lawrence, 48° 9′ N. The **Little Saguenay River** enters it on the r. bk. 25 m. from its mouth.

Sagunto, formerly **Murviedro** (from the Latin *Muri veteres*, 'the old walls'), fortified tn., Spain, prov. and 17 m. NNE. Valencia, on the Palencia, cap. Sagunto dist. Its present name is its ancient one (*Saguntum*) revived in Spanish form. P. 6500.

Sahagun, tn., Spain, prov. and 35 m. SE. Leon; ruins of a vast Benedictine monastery, where several kings of Leon ended their days as monks. P. (comm.) <3000.

Sahama, mt., Andes. See **Sajama.**

Saham Toney, par., Eng., Norfolk, SW. div., 21 m. SE. by E. King's Lynn, 1½ m. NW. by W. Watton stn., P.O. (**Saham Tony**); 4063 ac. P. <1500.

Sahaptins, Indian tribe. See **Nez Perces.**

Sahara, largest desert of the earth, extending through 50° of long. and 15° of lat. across the whole width of northern Africa, from the Atlantic to the Red Sea. The soil consists of a great variety of rocks, and almost all geological ages, with the exception of the Triassic and Jurassic periods, are represented. A number of mountain groups (Ahaggar, Asben, Tibesti Mts.), partly of volcanic origin, rise above the widely extending plateaux and plains. Depressions below sea-level are much less frequent than was formerly supposed, and occur only in the Libyan Deserts (Sivah, Araj, Birket-el-Kerun), and in southern Algiers (Shotts). Generally, the alt. of the desert varies from 700 to 2000 ft., the western terrs. being lower (El Juf, alt. 400 ft.) than the central and eastern regions. The climate is very hot, but on the whole healthy. In spite of the very scanty rainfall (central parts no rain whatever) the underground water-supply is considerable, the desert being studded by many fertile oases (*e.g.*, Sivah, Aujila, Fezzan, Ghadames, Ghat, Tirat, Tafilet, Kufra, Kawar, Bilma, Asben) and wadis, characterised by date-palms, olive-trees, and wheat and barley growths. The worst parts of the desert are the so-called Hammadas, stony plateaux devoid of water and vegetation. The only perennial river which forces its way through the desert is the Nile (*q.v.*). The Sahara is very sparsely peopled by various Semitic and Hamitic tribes (Tuareg, Tibbu, &c.), the majority leading a nomadic life. A number of important caravan routes cross the Sahara, connecting the Mediterranean coast-belt with the Sudan. The most important of these are the following:–From Morocco *viâ* Arawan and Mabruk to Timbuktu; from Tripoli *viâ* Ghadames, Ghat, and Asben to Kano; from Tripoli *viâ* Murzuk and Kawar to Lake Chad; from Bengazi *viâ* Aujila and Kufra to Wadai. Salt is the most important yield of the Sahara (salt deposits of Bilma and Taudeni); it is exported in large quantities to the Sudan. Many parts of the Sahara are still unexplored. Area, 3,500,000 sq. m. (Behm and Wagner). [**H. G. S.**]

Saháranpur, city, Brit. India, NW. Provs., cap. dist. Saháranpur, 58 m. SE. by E. Ambála, in a low situation; has a stn. on the Sind, Punjab, and Delhi Rly. and the Oudh and Rohilkhand Rly. Saháranpur has considerable trade, and is the headquarters of the Jumna Canal Establishment; a large horse-fair is held in the spring. Has government botanical gardens. P. 63,200; Moham. 34,200; Hindus, 26,500.

Saháspur, or **Sahíspur** (census), tn., Brit. India, NW. Provs., dist. Bijnaur, 55 m. E. Mecrut; manufactures superior cotton cloth in pieces. P. 6400; Moham. 5300; Hindus, 1100.

Saigon, Annamite **Gia-Dinh-Thanh,** chief seapt. of Lower Cochin-China, cap. of French Indo-China, on r. bk. of riv. Saigon (*q.v.*), 34 m. from the sea, connected by rail with Mitho, on the Mekong. The neighbouring large market-town of Sholon (Cholon or Cholen), on both banks of the Chinese Arroyo [**Saigon River**], is practically a suburb of Saigon. Before Saigon was taken by the French, 1859, it was the Annamite cap. of Lower Cochin-China, and consisted of an inner town, surrounded by fortifications and a circle of suburbs. Since it became a French town it has been converted into one of the handsomest cities of the East, with large boulevards and spacious streets and squares; cathedral, arsenal, and docks, including government dry and floating docks, this last with maximum draught of water at entrance of 20 ft. The chief exports and imports are those of Cochin-China. Annual value of imports about two millions sterling; of exports, nearly three millions. Trade chiefly with Singapore. Mean temp. (6 yrs., 1874–79), yr. 81.0° F., Jan. 77.5°, July 81.5°; mean rfall. (7 yrs.), 82.96 in. P. 50,000.

Saigon River, or **Kang-le,** riv., French Cochin-China, flows SSE. and SE. and enters the China Sea by the Kwa Soirap, which is regarded as one of the mouths of the Donnai, so that the Saigon R. is a trib. of this river, joining it a few miles below the town of Saigon. At Saigon it has a width of 1300 ft., and a depth of more than 30 ft., with a rise of the tide amounting to

13 ft., which enables vessels of the largest size to ascend so far. An artificial channel, known as the Chinese Arroyo, has connected the river at Saigon with the eastern Vaico (another, more westerly, influent of the Kwa Soirap) since early in the 19th century, and this stream again is connected artificially with the western Vaico and the Mekong at Mitho.

Saijo, tn., Japan, on the NW. ct. of Shikoku, 134 m. WSW. Kobe; near it the chief antimony mine of Japan (Ichinokawa).

Saikaido, one of the nine great divs. of Japan, comprising the isl. of Kiushiu, and those of Iki-shima, Tsu-shima, and the Riukiu (Luchu) group of islands.

Sailughem, mts., central Asia. See **Altai.**

Saima, a large lake of S. Finland, whose name is also extended over a large system of lakes, reaching as far N. as the Susmenselkä range. Its E. branch is the Pielis-järvi, which discharges its waters into the Pyhäselkä and Orihvesi. A new canal brings to it also the waters from Höytiänen Lake. The W. branch of the Saima system is formed by the Kalla-vesi, with its outer inlets (Onki- and Poro-vesi), whose waters are discharged by the broad river (*fjärden*) known as the Nildiä, and a system of smaller lakes, into the Hauki- and Enon-vesi. The E. and W. branches are connected by the Orivirta-, the Pihlaja-, and the Puru-vesi, which flow into the southern Saima, or Saima proper. This lake has its outlet in the Wuoken, which flows into Lake Ladoga, forming the renowned Imatra rapids (140 ft. wide; fall, 114 ft. on a length of 4 m.). Several canals connect together the lakes of the Saima system, while the **Saima Canal** (with locks) establishes a direct communication between Saima proper (in the E. of Willmanstrand) with the Viborg Bay in the Gulf of Finland. Navigated by steamers in all directions. Area of Saima proper, 680 sq. m.; alt. 256 ft.

St. Albans, episcopal city, mun. bor. (since Edward VI.), par., and market-tn., Eng., Hertfordshire, St. Albans or Mid div., 21 m. NNW. London, with diocese of St. Albans, near the Ver (hence the ancient name *Verulam*), trib. of the Colne, on the M. R. and branches of G. N. and L. & NW. Rlys. No important manufactures; straw-plait, shoe factories, &c. The Roman *Verulamium* was a 'municipium,' well fortified, when London was but a commercial port. Two battles during the Wars of the Roses took place here. The ancient abbey (now a cathedral church), originally built on a much larger scale than Canterbury, was consecrated in 1115, and is a famous specimen of Norman architecture. The abbey (recently restored) is 550 ft. long, and the Gothic nave is the longest in existence. The Clarence Park, 8¾ ac., and the Clarence Park recreation grounds, 16½ ac., were given to the corporation by Sir J. Blundell Maple in 1894. The present diocese was constituted in 1877, and includes the whole of Herts and Essex, with parts of Cambridgeshire, Kent, and Bedfordshire; P. (1891) 1,006,700; revenue, £3100. St. Albans returned two members to Parliament till 1852. Mean rfall. (Gorhambury, alt. 425 ft., 1866–80), yr. 29.6 in. Market-days, W. and S. Mun. bor. P. (1801) 3000; (1851) 7000; (1871) 8300; city P. (1891) 12,900; parl. div. P. 53,300.

St. Andrews, parl. and royal burgh, watering-place, seapt. tn., and par., Scot., Fifeshire, on St. Andrews Bay, 15 m. SE. Dundee, 45 m. NE. Edinburgh, on the N. B. R.; noted in Scottish history. It was founded in the 8th century by a Pictish king, was made a royal burgh about 1140, and an archbishopric in 1472. The ruins of the castle are situated on a rocky promontory overhanging the sea; founded in 1200, but rebuilt nearly two centuries later, and again in 1558. Here James III. was born; Cardinal Beaton was murdered in 1546; and James VI. took refuge after the Gowrie conspiracy; it was bombarded by the French, and Knox taken prisoner in 1547. Near the cliff is a monument in memory of George Wishart (1545) and other martyrs. The ancient square tower of St. Regulus, within the precincts of the cathedral, was erected in the middle of the 11th century. The cathedral, commenced about 1160, was not finished till 1318. Its demolition began in the time of Knox (1559), but the ruins are now carefully preserved. There are remains of the ruined chapel of the Black Friars. The university is the oldest in Scotland, founded 1411. It consists of two colleges; St. Mary's (founded 1537), which is the divinity hall; and the united colleges of St. Salvator's and St. Leonard's (amalgamated in 1747), for arts and medicine. The University library has over 117,000 vols., and receives an allowance of £630 per annum in lieu of the former right to a copy of every book published in the kingdom. St. Leonard's buildings are now used as a college for ladies. Madras College, founded by the Rev. Dr. Andrew Bell (died 1832), is a school of secondary education, including classes on the Madras system, imported by its founder from India. Average number of pupils about 200. St. Andrews has long been the headquarters of golfing in Scotland, and the manufacture of golf-clubs and balls is its principal special industry. The fishing industries employ a considerable number of persons. Coal is mined in the neighbourhood. The inner harbour is 9 ft. deep over sill at ordinary high water; the outer harbour is 9 ft. deep at high water, dry at low water. During the 15th and 16th centuries St. Andrews was one of the chief seaports N. of the Forth. After a period of decay the town has during the 19th century made considerable advance, and is now one of the most fashionable resorts in Scotland. The **St. Andrews District** of parl. burghs (St. Andrews, Crail, Cupar, Anstruther Easter, Anstruther Wester, Kilrenny, and Pittenweem) returns one member. Market-day, M. Par. 11,482 ac., P. (1801) 2500; (1891) 8000; burgh and tn. P. 6900; parl. dist. P. 18,900.

St. Arvans, par., Eng., Monmouthshire, S. div., on the r. bk. of the Wye, 2 m. NNW. Chepstow, PMT.O. P. <750; eccles. par. (**St. A. with Penterry**) P. <750.

St. Arvans Grange, par., Eng., Monmouthshire, S. div., on the Wye, 2 m. N. by W. Chepstow. P. <250.

St. Asaph, Welsh **Llanelwy,** par. and contributory parl. bor. (**Flint**), Wales, Flintshire and Denbighshire, on an eminence between the Clwyd and Elwy Rivs., 5 m. N. by W. Denbigh, on the L. & NW. R. The see is said to have been founded by Kentigern about 560, but it is from his successor, St. Asaph, that the town and diocese are named. The present cathedral dates chiefly from the close of the 15th century, though parts of the first stone building, erected in the 13th century, still remain. The restoration of the cathedral was begun under the late Sir Gilbert Scott. In front is a monument to Bishop Morgan and his coadjutors in the translation of the Bible into Welsh (15th century). PMT.O. Market-day, F.; cattle sales last Thursday in month. Par. 11,346 ac., P. <3500; parl. bor. P. <2000.

St. Athan, par., Wales, Glamorganshire, S. div., 1½ m. from the S. ct., 12 m. WSW. Cardiff, 4 m. SSE. Cowbridge stn., with a stn. (**St. A. Road**) on the Taff Vale Rly., P.O. P. <500.

St. Athanase, or **Iberville,** formerly **Christieville,** tn., Canada, Quebec, cap. Iberville co., on the r. bk. of the riv. Richelieu, and a railway, 21 m. SE. Montreal. P. <2000.

St. Athan Road, stn., Wales, Glamorganshire, on the G. W. R. See **St. Athan.**

St. Auban, vil., France, dep. Alpes-Maritimes, arr. Grasse, 29 m. WNW. Nice, picturesquely situated at the height of 3640 ft. P. <2000.

St. Aubert, tn., France, dep. Nord, arr. and 9 m. E. by N. Cambrai. P. <3000.

St. Aubin, tn., Eng., Channel Is., on S. ct. of Jersey, 4 m. W. St. Helier, on the Jersey Rly. The tidal barbour is 17–18 ft. deep at spring tides, dry at low water; has firm sands, and excellent facilities for bathing. The bay is one of the largest and most picturesque in Jersey. Near the town is **St. Aubin's Castle,** fortified. PMT.O. (**St. Aubin's**).

St. Aubin-d'Aubigné, tn., France, dep. Ille-et-Vilaine, arr. and 11 m. N. by E. Rennes. P. <2000.

St. Aubin-du-Cormier, tn., France, dep. Ille-et-Vilaine, 17 m. NE. Rennes, arr. and 11 m. SW. by W. Fougères; has a ferruginous spring. Scene of a famous battle between the French and Bretons, 1488. P. <2000.

St. Aubin-sur-Mer, tn., France, dep. Calvados, arr. and 10 m. N. Caen, on the English Channel; has oyster-beds, and a fine beach much frequented. P. <2000.

St. Audrie's, eccles. par., Eng., Somerset, in ancient par. of West Quantoxhead. P. <250.

St. Augustin de Quebec, vil., Canada, Quebec, Portneuf co., 14 m. WSW. Quebec. P. <1500.

St. Augustine, vil., Cape Colony, dist. Griqua-land East, 115 m. ESE. Aliwal North.

St. Augustine, city, U.S., Florida, St. John's co., about 2 m. from the coast, 35 m. S. by E. of the mouth of St. John's R., on a low peninsula, opposite which is Anastasia I., separated from it by Matanzas Sound, which forms a large and secure harbour, though there is only about 10 ft. of water on the bar at high water. Manufacture of 'palmetto straw.' The climate is similar to that of Italy and the S. of France, and the town is a favourite resort for invalids. St. A. is the oldest city in the U.S., founded by Menendez, 1565; twenty-one years later it was destroyed by Sir Francis Drake. The streets are narrow and crooked. The only building material formerly used was the coquina rock, a conglomerate of shells quarried on Anastasia I., on which is a lighthouse, in 29° 53′ N., visible 19 m. The principal building is the old Spanish castle of St. Mark, now called Fort Marion. It is of coquina, is well preserved, and will accommodate 1000 men. Two modern hotels are magnificently built in an old Spanish style of architecture. P. <5000.

St. Augustine Bay, in the SW. of Madagascar, crossed by the Tropic of Capricorn.

St. Augustine's, or **Eastern,** parl. div., in the E. of Kent, Eng. It includes the parl. bors. of Canterbury, Dover, and Folkestone. P. 68,000.

St. Austell, par. and market-tn., Eng., Cornwall, St. Austell div., 10 m. SSW. Bodmin, on the G. W. R.; some manufactures. There are important china-clay works and tin-mines near, and large quantities of china stone are quarried. About 2 m. NE. of the town is the Carclaze mine, a deep pit about 1 m. in circumference, of unknown antiquity; it was formerly worked for tin, but now yields china-clay. The church, one of the finest in Cornwall, has a handsome perpendicular tower. Alt. 300 ft. Mean annual rfall. (1866–80), 49.90 in. Market-day, F. Par. 12,213 ac., P. 11,400; tn. P. <4500; parl. div. (St. Austell, or Mid) P. 49,624.

St. Austell Bay, Eng., Cornwall, near St. Austell town.

St. Cyprien, vil., France, dep. Dordogne, near the r. bk. of the Dordogne, 28 m. SE. by S. Périgueux, arr. and 9 m. W. by S. Sarlat. Two miles to the SE., near the river, is the mineral spring of Panassow. P. <2000.

St. Cyprien, suburb of Toulouse, France.

St. Cyprien des Attafs, tn., Algeria, prov. and 85 m. WSW. Algiers. P. <3000.

St. Cyr, tn., France, dep. Seine-et-Oise, arr. and 2½ m. W. Versailles; has a famous military school, founded by Napoleon I. The buildings are in great part those of the educational establishment, founded 1686 by Louis XIV., at the instance of Madame de Maintenon, who was buried in the chapel here. P. <3000.

St. Cyr, vil., France, dep. Var, arr. and 12 m. WNW. Toulon, E. of the Bay of Ciotat, on the shore of which, known as the *Plage des Leques*, are the ruins of the Gallo-Greek city *Taurentum* or *Taurois*, one of the most important ports on the Ligurian coast in ancient times. This town, prosperous for more than ten centuries, was destroyed by the Saracens about 700 A.D. P. <2000.

St. Cyres, stn., Eng., Devonshire, on the L. & SW. R., 5 m. NW. Exeter. See **Newton St. Cyres.**

St. Cyrus, par., Scot., Kincardineshire, on the E. ct., 5 m. NNE. Montrose, on the N. B. R., P.O.; 8249 ac. P. <1500.

St. David, vil., Canada. See **River David.**

St. David, vil., Oceania. See **Mapia.**

St. David, vil., W. Indies, on SE. ct. of Grenada I.

St. Davids, vil., Canada, Ontario, Lincoln co., 5 m. from Clifton. P. <1500.

St. Davids, seapt. vil., Scot., Fife, on S. ct., on Inverkeithing Bay, 3 m. NNE. South Queensferry, 1½ m. E. by S. Inverkeithing stn., P.O.

St. David's, the ancient *Menevia*, episcopal city and par., South Wales, co. Pembroke, near its W. extremity, on the Allan, 1 m. from its mouth on the N. side of St. Bride Bay, 14½ m. WNW. Haverfordwest. The tidal harbour is 16–18 ft. deep at quayside at ordinary spring tides high water, and 2 ft. at low water. It has a cathedral and bishop's palace. The diocese comprises the cos. Pembroke, Carmarthen, and Cardigan, nearly the whole of Brecon, most part of Radnorshire, and part of Glamorgan. The town owes its name to St. David, who

founded the see, and died here about 601. The present cathedral was erected at various periods from the 12th to the 16th centuries. The restoration, commenced in 1846, was completed a few years ago. Near the cathedral are the remains of the old Episcopal Palace and St. Mary's College. PMT.O. 11,244 ac. P.<2000.

St. Davids Head, the westernmost point of Wales, on the W. ct. of Pembrokeshire, in 51° 54′ N., 5° 19′ W.

St. Day, eccles. par. and vil., Eng., Cornwall, Camborne div., 6 m. W. by S. Truro, 1½ m. SE. Scorrier Gate stn.; has tin-mines. PMT.O. P.<2500.

St. Decuman's, par., Eng., Somerset, Wellington div., 15 m. NW. Taunton, 1 m. SW. Watchet stn. P.<3500.

St. Denis, vil., Canada, Quebec, St. Hyacinthe co., on the riv. Richelieu, 28 m. NE. Montreal. P.<1500.

St. Denis, tn., France, dep. Seine, on the Seine, cap. arr., 5½ m. N. Notre Dame, Paris, 2 m. from the city wall, with a fort on the E., and protected by a line of fortifications along the N.; manufactures extensive and varied. Seat of a large national educational establishment for the daughters of members of the Legion of Honour, founded by Napoleon I. The church, now canonical, formerly abbatical, dedicated to St. Denis, was for twelve centuries the burial-place of the kings of France, and contains several magnificent royal tombs, notably those of Dagobert, Louis XII., and Anne of Brittany, Henri II., and Catherine de Médicis, and Philibert Delorme's mausoleum of Francis I. During the Revolution the tombs and other objects of art were removed, pillaged, or destroyed, and the royal dust thrown to the winds. The red banner, or *oriflamme*, of St. Denis became the banner of the French kings. The plain of St. Denis was the scene, 1567, of a sanguinary battle, when the Constable of Montmorency perished on the field. P. 49,300.

St. Denis, tn., cap. isl. of Réunion, on the N. ct. The town is built on a gently rising slope, and the interior is like a park, crossed by parallel avenues. Each house is surrounded by a garden. It contains the governor's palace, cathedral, natural history museum, botanic garden. The roadstead is bad, and is exposed to the E. and SE., and constantly menaced by cyclones. Mean annual temp. (3 yrs., 1883–85), yr. 74.5° F., Feb. 79.1°, Aug. 69.7°. P. 30,600.

St. Denis du Sig, or **Le Sig,** comm., Algeria, on the r. bk. of the Wad Sig, arr. and 28 m. SE. by E. Oran, where this stream issues on the plains from the gorges which confine its upper course, and where a reservoir has been formed by an embankment 335 ft. long and 90 ft. high; 13½ m. higher up is the still larger reservoir of the Grand Cheurfas (Shörfas). Tobacco and cotton are cultivated. P. 10,300.

Saintes, the ancient Gallic *Mediolanum,* later *Santones,* tn., France, dep. Charente-Inférieure, on the l. bk. of the Charente, 17 m. W. by N. Cognac, cap. arr. Principal industries, manufacture of agricultural implements and leather-dressing; small port; has a museum of antiquities, and a cathedral. Here are also a few arches and benches of the amphitheatre and the triumphal arch of Germanicus under the Romans. Saintes was one of the most flourishing cities of *Aquitania.* The Capitol was made a citadel in the Middle Ages, and was destroyed by Charles d'Alençon, 1330. The bishopric was suppressed during the Revolution, 1790. Saintes was the birthplace of Guillotin, died 1814, who introduced the instrument of execution which bears his name; and here Bernard Palissy, the potter, passed the greater part of his life. P. 18,500.

Saintes, Îles des, two small isls., French W. Indies, to the S. of Guadeloupe. The roadstead, between the two islands and the islet Cabrit, is safe and commodious.

Ste. Savine, western suburb of Troyes, France, dep. Aube; manufactures needles and hosiery. P. 5100.

Ste. Sevère, vil., France, dep. Indre, 28 m. WNW. Montluçon, arr. and 8 m. SE. by S. La Châtre. P. <2000.

Saintes-Maries-de-la-Mer, vil., France, dep. Bouches-du-Rhône, on the Gulf des Saintes-Maries-de-la-Mer, arr. and 18 m. SW. by S. Arles; has sea-bathing and salt-works. The fortified church, of the 12th century, is one of the most interesting in Provence, and attracts pilgrims from all the S. of France. Tradition states that the holy women who ministered to Jesus Christ, three of whom were called Mary, landed on an island which then existed here, and that with them were Lazarus and Mary Magdalene. P. <2000.

Ste. Solange, vil., France, dep. Cher, arr. and 9 m. ENE. Bourges. The chapel is much frequented as a place of pilgrimage. P. <2000.

Sainte Suzanne, tn., isl. of Réunion, on the N. ct. P. (with comm.) 6400.

Ste. Terre, tn., France, dep. Gironde, arr. and 9 m. SE. Libourne, on r. bk. of the Dordogne; small port. P. <2000.

St. Étienne, vil., France, dep. Alpes-Maritimes, 42 m. NNW. Nice, arr. Puget-Théniers; lead and copper are mined here. P. <2000.

St. Étienne, arr., comm., and tn. of France, dep. Loire, cap. dep., on the Furens, a small affluent and 6 m. from the r. bk. of the Loire, 32 m. SW. Lyon, with which it is connected by rail. It was about 1535 that the manufacture of arms was commenced; that of ribbons followed soon after, introduced from St. Chamond. St. Étienne is one of the principal manufacturing centres of France; the three principal branches of industry are (1) ribbon-making (silk and velvet ribbons, trimmings, &c.)—this industry employs 60,000 workmen, and the products reach an annual value of £4,000,000; (2) the metallurgic industry, *i.e.*, manufacture of fire-arms, military rifles, cannons, naval and railway materials, mining plant, foundries, manufacture of copper-wares, edge-tools, and hardware; (3) the extraction of coal. In addition to the above, there are important manufactures of chemicals, pasteboard, paper, indiarubber, *sabots*, chocolate, lamps, and distilling, printing, rope-making, &c. The town has schools for mining, design, and industrial art; museums of antiquities, natural history, and industries, artillery, pictures, and libraries. The first French railway (from St. Étienne to Andrézieux) was opened 1st October 1828, and soon extended to Roanne. Birthplace of the learned Claude Fauriel, died 1844; of Jules Janin, novelist and critic, died 1874; and of Garnier, the explorer, died 1873. Alt. 1770 ft. P. (1800) 17,000; (1850) 50,000; (1891) 133,400.

St. Gall, Ger. **Sankt-Gallen,** cant., in NE. Switzd., bounded E. by the cant. Grisons, the Austrian prov. of Vorarlberg (Tirol), N. by the Lake of Constance and cant. Thurgau, W. by the cants. Zürich, Glarus, and Schwiz, and S. by the cant. Grisons. It wholly surrounds the cant. Appenzell. Surface diversified; has fertile valleys in the N., and is mountainous in the S. Mount Sentis, near its centre, is 8215 ft. above the sea. Principal rivers, the Rhine, which in part forms the E. boundary, the Thur, Sitter, Seez, and Linth. The canton possesses parts of the coasts of the Lakes of Constance, Zürich, and Wallenstatt. Cattle-rearing is the principal branch of rural industry. Forests are extensive in the S. The only minerals worked are iron and coal; peat is also obtained; mineral springs, which are numerous, comprise the baths of Pfäffers. Manufactures chiefly muslins and embroidery; carries on also cotton spinning, weaving, and printing; chief industrial centre, Wattwil. Principal towns, St. Gall (the cap.), Alstätten, Tablat, and Wattwil. See **Switzerland,** table.

St. Gall, tn., Switzd., cap. cant. St. Gall, in a valley, on the Steinach, 19 m. SSE. Constance. St. Gall is the centre of manufactures of muslin and embroidery; also bleaching, spinning, and tanning are carried on. Has a rococo cathedral, and a library with over 1400 MSS., a collection of seals and armour, and museums of natural history, ethnography, and painting. The town owes its origin to the famous monastery founded at the end of the 7th century in honour of Gallus, a Scoto-Irish monk, who spread Christianity in this region in the first half of that century. The school established here was, during several centuries, the most celebrated in Europe. In 1204 the abbot received the title of Prince of the Holy Roman Empire; in 1798 the abbey was deprived of all temporal power, and abolished in 1805. Alt. 2150 ft. Annual rfall. (17 yrs.), 52.71 in. P. 27,800.

St. Germaine, vil., Canada. See **Lake Etchemin.**

St. Germaine-en-Laye, tn., France, dep. Seine-et-Oise, on the l. bk. of the Seine, 11½ m. W. by N. Notre Dame, Paris, arr. Versailles; manufactures chemicals, billiard-tables, and chocolate. St. Germain-en-Laye is a very favourite resort of Parisians; its noted castle was founded in the 12th century, and in great part built in 1539–48; was occupied by James II. of England, who died here in 1701. It now contains a Gallo-Roman museum. A second castle was built by Henri IV., but abandoned by Louis XIV., and destroyed much later. There remains now only one wing, in which M. Thiers died, 1877. Birthplace of Louis XIV. P. 12,300. The **Forêt-de-St.-Germain** occupies the greater part of the surface enclosed by a loop of the Seine to the N.

St. Germain-Laval, comm., France, dep. Loire, arr. and 15 m. S. by W. Roanne. P.<2000.

St. Gothard, German **Sankt Gotthard,** group of mountains in the Lepontine Alps, between the Swiss cants. of Uri, Valais, Ticino (Tessin), and Grisons; lat. 46° 33′ N., long. 8° 35′ E. The several peaks of the St. Gothard, which are all above the snow-line, vary in height from 8750 ft. to 10,900 ft. Within a short space from the hospice the rivs. Rhine, Rhone, Reuss, and Ticino have their sources. The **Pass of St. Gothard** is one of the best and most frequented routes across the Alps. The excellent carriage road was completed in 1832; it is kept in the best repair, and at the summit of the pass (6870 ft.), 5 m. N. Airolo, is the hospice, a commodious station for travellers. A railway under the St. Gothard was completed in 1882, and has had an important effect on the commerce between Italy and Switzerland and Germany. On the N. slope is the celebrated **Devil's Bridge** across the Reuss. This was the scene of several combats between the French and Russians in 1799. See **Alps,** PASSES, **III.** (5), and **Italy,** Commerce.

St. Govan's (or **Gowan's**) **Head,** cape, Wales, in the extreme S. of Pembrokeshire. In a ravine is St. Govan's Chapel, with a stone altar and seat, supposed to date from the 13th century.

St. Gregoire, vil., Canada, Quebec, Iberville co., 23 m. SE. by E. Montreal. P.<1500.

St. Gregoire le Grand, vil., Canada. See **Mount Johnson.**

St. Gregory's Sound, Ire., SW. co. Galway, between Inishmore and Inishmaan Is., 2 m. wide.

St. Guilhem-le-Désert, tn., France, dep. Hérault, arr. and 19 m. NW. Montpellier, in the fine gorges of St. Guilhem, on r. bk. of the Hérault. The town is in a very curious region, and, after Puy-en-Velay, the site is the most extraordinary in Languedoc. P. (comm.)<2000.

St. Guillaume d'Upton, vil., Canada, Quebec, Drummond co., 33 m. SSW. Three Rivers. P.<1500.

St. Héaud, vil., France, dep. Loire, arr. and 7 m. N. by W. St. Étienne. P.<2000.

St. Helen, settlement, U.S., Michigan, co. Roscommon, 63 m. NNW. Bay City. Alt. 1158 ft. (R.R.).

St. Helen, vil., U.S., Oregon, Columbia co., on the l. bk. of the Columbia R., 24 m. N. by W. Portland. P.<1500.

St. Helena, isl. in the S. Atlantic Ocean, in 15° 54′–16° 1′ S. and 5° 38′–47′ W., 1160 m. W. the coast of Africa, 1700 m. from Cape Town; its cliffs, hollowed by the rain, rise to a height of 1970 ft., and are surrounded by a sort of submarine ledge 2–2½ m. broad, covered by 330–660 ft. of water. Traces of an ancient crater still exist on the S. coast round Sandy Bay. Around this crater a semi-crater forms an amphitheatre, of which the ridge is formed by the highest peaks in the island, the Pic de Diane being 2700 ft., and the Flagstaff 2270 ft. high. Five-sixths of the island have been rendered bare of all herbs by the wild goats. Whale-fishing and the growing of potatoes are the chief occupations. Trade, declining, under £30,000 annually. The cap. of the island is Jamestown, a second-class imperial coaling station, on the NW. coast. No docks; 12 fathoms of water available for vessels entering port. In the interior is Longwood, where Napoleon I. lived from 1815 until his death in 1821. His body was buried close by, but in 1840 was transported to Paris. The island was discovered in 1502 by the Portuguese navigator João da Nova; from 1651 to 1834 it was owned by the East India Company, but is now a Crown colony, governed by a civil administrator and an executive council. The decadence of the island is due to the opening of the Suez Canal, by which route most of the vessels now go which formerly went by the Cape of Good Hope. The climate is mild and agreeable. Mean temp. (16 yrs., 1856–62), yr. 71.3° F., Feb. 74.6°, Aug. 67.9°. Length, 10⅛ m.; breadth, 8½ m.; area, 47 sq. m. P. (1891, exclusive of the military) 3900.

St. Helena, bay, Cape Colony, W. ct., in about 32½° S.; open to NW. winds.

St. Helena, isl., Queensland, in Moreton Bay; used as a penal settlement. P.<1500.

St. Jean-du-Pin, vil., France, dep. Gard, arr. and 1 m. W. Alais; coal, iron, pyrites, zinc, and lead are mined here. P. <2000.

St. Jean-en-Royans, vil., France, dep. Drôme, 25 m. WSW. Grenoble, arr. Valence. P. <2000.

St. Jean-in-Eremo, comm., Belgium, prov. E. Flanders, arr. Eecloo. P. <4000.

St. Jean-Pied-de-Port, vil., France, dep. Basses-Pyrénées, 26 m. SE. by S. Bayonne, at the foot of the pass of Roncevalles, arr. Mauleon. P. <2000.

St. Jean Port Joli, vil., Canada, Quebec, L'Islet co., on the r. bk. of riv. St. Lawrence, 54 m. ENE. Quebec. P. <1500.

St. Jean-Soleymieux, vil., France, dep. Loire, arr. Montbrison, 17 m. WNW. St. Étienne. P. <2000.

St. Jeoire, vil., France, dep. Haute-Savoie, 16 m. E. by S. Geneva, arr. and 5 m. NNE. Bonneville. P. <2000.

St. Jerome, tn., Canada, Quebec, cap. Terrebonne co., on the riv. Du Nord and a railway, 28 m. NW. Montreal. P. <3000.

St. Joachim, vil., Canada, Quebec, Montmorency co., on the l. bk. of the riv. St. Lawrence, 26 m. NE. Quebec. P. <1500.

St. John, co., Canada, New Brunswick, extending 75 m. along the Bay of Fundy.

St. John, seapt. city, Canada, New Brunswick, cap. co., on the S. ct., at the mouth of St. John R., 66 m. by rail SE. by S. Fredericton; the harbour is deep, and open for navigation all the year round. Good anchorage in 47½ ft. deep at entrance in ordinary spring tides at high water, 21 ft. at low water; depth alongside quays, 44–56 ft. at high water, 17½–29½ at low water. Great fishing centre, and seat of lumber trade. Manufactures cotton goods, steam and locomotive engines, agricultural implements, railway plant, leather, boots and shoes, &c. Is the E. terminus of the C. P. R. and of the Shore Line, and is a stn. of the Intercolonial Rly. Largest ship-owning port in Canada. St. J. was originally settled by the French. Since 1889 it includes Portland, formerly a separate town to the N., and it is now the sixth city of the Dominion in point of population. Mean temp. (15 yrs.), yr. 40.4° F., Jan. 18.5°, Aug. 60.3°; mean rfall. (19 yrs., 1869–88), 40.74 in.; snowfall, 96.7 in. P. (1881, including Portland) 41,400; (1891) 39,200.

St. John, large lake, Canada, Quebec, drained E. into the St. Lawrence by the Saguenay R.

St. John, settlement, Canada, Quebec, Chicoutimi co., on the S. side of Lake St. John, 121 m. NNW. Quebec.

St. John, riv., Canada, Quebec, Gaspé co., flows E. into Gaspé Bay (Gulf of St. Lawrence). See also **Richelieu,** riv.

St. John, isl., Danish W. Indies, in the Virgin group, 2½ m. E. St. Thomas I.; has a village, **Cruz Bay.** Length, 10 m.; breadth, 2½ m.; area, 21 sq. m. P. (1880) 945.

St. John, par., Eng., Cornwall, Bodmin div., on the Hamoaze, 4 m. W. by S. Plymouth, P.O. P. <250.

St. John, cape, Newfoundland, E. ct., in 50° 1′ N., 55° 29′ W.

St. John, small isl., Newfoundland, off the W. ct., in 50° 50′ N.

St. John, riv., N. America, known in its upper course as the Walloostook, forms the boundary between the U.S. (in W. of Maine) and Canada (Quebec) for about 40 m., then flows NE. through Maine, then forms the N. boundary of Maine for about 75 m. Below this it flows first S. then SE. in Canadian terr. (New Brunswick). Shortly after entering Canada it forms the Grand Falls, a perpendicular leap of 75 ft., 225 m. above its mouth. About 150 m. from its source it receives on l. bk. the St. Francis. Navigable for large vessels to Fredericton (80 m.), and at high water to Woodstock, 75 m. higher up; for small steamers to the Grand Falls. The navigation is free to the U.S. Length, 550 m.

St. John, cape, E. end of Staten I., Tierra del Fuego.

St. John, vil., U.S., Illinois, Perry co., 3 m. by rail N. Du Quoin; coal is mined here, and salt-making is carried on. P. <1500.

St. John, tn., W. Indies, on NW. ct. of Antigua I.; a great part of the town was destroyed by the same earthquake which also destroyed Pointe-à-Pitre, 1843. P. 8500.

St. John, tn., W. Indies, on SE. ct. of Nevis.

St. John, tn. and isl. belonging to the Danes, to the E. of St. Thomas, in the Virgin group, W. Indies.

St. John, Meads of, dist., Scot., Elginshire, in the W., on the banks of the Findhorn, 3 m. SW. Forres.

St. Johnbaptist, par., Ire., co. Tipperary, bars. Middlethird and Slievardagh, contains part of Cashel town; 5616ac. P. <4000.

St. John Baptist, par. (co.), U.S., Louisiana, in the SE., crossed by 30° N., 90½° W., traversed by the Mississippi.

St. John Lee, par., Eng., Northumberland, on the Tyne, near Hexham; formed part of the quondam county palatine of Hexhamshire (*q.v.*).

St. John Point, cape, Ire., on SW. ct. of co. Donegal, on the N. side of Donegal Bay, with a lighthouse, in 54° 34′ N., 28° 8′ W., visible 14 m.

St. John's, vil., Isle of Man, 3 m. ESE. Peel, on the Isle of Man Rly. and the Manx Northern Rly., PMT.O.

St. John's, dist., Newfoundland, in NE. of Avalon Penin.

St. Johns, fortified seapt. city, cap. Newfoundland, Avalon Penin., on the E. ct., in 47° 35′ N. St. J. is the nearest seaport of N. America to Europe, being 1680 nautical miles from Cape Clear, 2030 m. from Liverpool, or 1000 m. nearer than New York. The harbour is quite landlocked; width of entrance by Chain Rock, 300 ft.; 48 ft. deep at ordinary high water, 42 ft. at low water. Chief trade is in fish and seal oils. The town stands on a slope overlooking the harbour, the highest site occupied by the Roman Catholic cathedral, its finest building. The Anglican cathedral was burnt to the ground in July 1892, when the city, for the fourth time, was in great part destroyed by fire. Mean temp. (15 yrs.), yr. 40.9° F., Feb. 23.6°, Aug. 60.5°; mean rfall. (16 yrs., 1872–88), 40.74 in.; snowfall, 121.64 in. P. (1881) 31,100; (1891) 25,700.

St. Johns, vil., S. Australia, Light co., 42 m. NNE. Adelaide, 5 m. SSE. Kapunda. P.<1500.

St. Johns, vil., U.S., Arizona, cap. Apache co., 175 m. S. by W. from the NE. corner of the terr. P.<1500.

St. Johns, co., U.S., Florida, on the E. ct., crossed in the N. by 30° N.

St. John's, riv., U.S., Florida, rises in a marsh in Brevard co., flows N. then E. to the Atlantic, about 15 m. E. Jacksonville; it passes through Lake George and several other lakes, and for nearly two-thirds of its course is nowhere less than 1 m. in breadth. It has 12 ft. of water on the bar; steamers ply regularly to Enterprise, 250 m. Length, 350 m.

St. John's, vil., U.S., Michigan, Clinton co., 53 m. SW. Bay City, 18 m. N. Lansing. P.<4000.

St. Johns, settlement, U.S., N. Dakota, Rolette co., 110 m. W. Pembina.

St. Johns, vil., U.S., Oregon, Multnomah co., on Willamette R., 5 m. N. Portland. P.<1500.

St. Johnsbury, tn., U.S., Vermont, Caledonia co., on the Passumpsic R., 29 m. ENE. Montpelier; contains Fairbanks Standard Scale Factory, said to be the largest factory of the kind in the world. P. 6600.

St. John's Chapel, PMT.O., Eng., Durham, Barnard Castle div., on the r. bk. of the Wear, 16½ m. S. by W. Hexham, 7½ m. W. by S. Stanhope stn.

St. Lawrence, post-tn., Queensland, Murchison co., 80 m. S. by E. Mackay. P. <1500.

St. Lawrence, an important riv. of North America, forming in its upper reaches part of the N. boundary of the U.S., but for the most part confined to the Canadian Dominion, issues from Lake Ontario at Kingston, where the name begins to be applied to the river, though the remotest source of the highest feeder of its basin, the St. Louis, which enters the W. end of Lake Superior, is in the NE. of Minnesota, U.S., in about 47° 50′ N., 92° 5′ W. Passing through the chain of great lakes on leaving Lake Ontario, it flows NE., first through the beautiful dist. known as the Thousand Isles, from the number of islands large and small (in all about 1500) which here vary its course, and then forms the wide expanses called Lakes St. Francis (just after quitting the U.S. boundary), St. Louis (just above Montreal I.), and St. Peter (a little above Three Rivers, between Montreal and Quebec). Below Quebec it forms a broad estuary, and it enters the Gulf of St. Lawrence by a mouth 26 m. wide, between Point des Monts (Saguenay) and the Gaspe Penin. Length from Lake Ontario to the Gulf 760 m., to the W. point of Anticosti 1034 m. The height of Lake Ontario above sea-level is 246.6 ft., of which the river descends 206.75 ft. in the 348 m. above Montreal. Below Montreal, accordingly, the total fall is about 40 ft., or about 1 ft. in 10 m., a rate presenting no difficulty for navigation; and since the construction of a ship-canal, 27½ ft. deep, through Lake St. Peter, the largest merchant vessels afloat have been able to reach that city in summer. In the stretches above Montreal the fall of the river-bed takes place in a succession of rapids, to avoid which canals have been constructed. These are in the ascending order the Lachine Canal, 8½ m. long, with 5 locks, and a rise of 45 ft.; Beauharnois Canal, 11¼ m. long, with 9 locks, and a rise of 82½ ft.; Cornwall Canal, 11 m. long, with 6 locks, and a rise of 48 ft.; Farran's Point Canal, ¾ m. long, with 1 lock, and a rise of 4 ft.; Rapide Plat, 4 m. long, with 2 locks, and a rise of 11½ ft.; and Galops Canal, 7⅞ m. long, with 3 locks, and a rise of 15¾ ft. At present the greatest available depth on these canals is 12 ft., but improvements are now in progress with a view to securing a depth of 14 ft. throughout, and in 1894 a convention at Ottawa passed resolutions in favour of increasing the depth to 21 ft. throughout. During the winter, navigation is wholly stopped by ice. The basin of the St. Lawrence is estimated to contain 297,000 sq. m., of which 95,000 are covered with the waters of the great lakes.

St. Lawrence, large isl., U.S., Alaska, in Bering Sea, in 63°–64° N. and 169°–172° W.; inhabited by a few Eskimo. Length, 95 m.; breadth, about 35 m.; alt. 492 ft.

St. Lawrence, co., U.S., New York, on the St. Lawrence R., crossed by 75° W.

St. Lawrence, settlement, U.S., S. Dakota, Hand co., 70 m. E. by N. Pierre.

St. Lawrence, par., Wales, Pembrokeshire, on the Cleddan, 6½ m. S. by W. Fishguard. P. <250; eccles. par. (**St. L. with St. Edrins**) P. <500.

St. Lawrence, Gulf of, a large inlet of the Atlantic, North America, between 46° and 52° N., 58° and 67° W., surrounded by the British colonial terrs. of Lower Canada, New Brunswick, Cape Breton, and Newfoundland. The last two mostly shut it off on the E. from the ocean, with which it communicates by three passages, the most N. being the Strait of Belle Isle, and the S. the Gut of Canso. Average length and breadth, 280 m. each. On its W. side are the Bays of Chaleur and Miramichi, and the estuary of the St. Lawrence R. It contains Anticosti, Prince Edward, the Magdalen, and many other islands. Its fisheries are highly important.

St. Louis, riv., U.S., Minnesota, in the NE., issues from Dead Fish Lake, and flows SW. and then ESE. into the head of Lake Superior.

St. Louis, co., U.S., Missouri, in the angle between the Mississippi on the E., and the Missouri on the N.

St. Louis, city, U.S., Missouri, cap. St. L. co., on the r. bk. of the Mississippi, 18 m. below the confluence of the Missouri, and 40 m. below that of the Illinois. The city is built on three terraces, rising 20, 150, and 200 ft. above high water, with a river frontage of 19 m. It is remarkably well built, and has many handsome public buildings and parks; the largest of the latter, Forest Park, covers an area of 1370 ac. Shaw's Garden (330 ac.) includes the Botanical Gardens. The city of East St. L., on the opposite bank of the river, is connected by the Great Eads's Bridge, still the lowest across the Mississippi. It consists of three spans, the central one being 520 ft., and the side ones each 500 ft. It is in two stories; the lower, a railway, runs into a tunnel, 4800 ft. long, below the city. The Merchant's Bridge, 2½ m., higher up the Mississippi, was built in 1889–90; length, 2240 ft. The city of St. L., on the best available site near the confluence of two great rivers, the one in pre-railway days the best means of communication between N. and S., the other between E. and W., was from the first an important centre of trade, and its advantages in this respect were enormously increased when the construction of the Eads's bridge made it the greatest railway centre in the Mississippi valley. The principal industries are flour-milling (more than 2,000,000 barrels being produced annually), meat-packing, and iron manufactures in all branches. It has also great trade in cotton, lumber, wool, sugar, live-stock, &c. Other leading industries are carriages, waggons, furniture, clothing, tanning, brewing, and paints. A special local clay enables St. L. to manufacture exceptionally good bricks, which are despatched in great quantity to New York city, New Orleans, Duluth, Seattle, and other remote points. St. L. is a port of delivery in the dist. of New Orleans, and a port of entry. There is ample provision for elementary and higher education—two universities, St. Louis, a Jesuit institution, founded 1829, and Washington University, incorporated 1853. The latter has over 100 professors and teachers, with an average of more than 14,000 students; it has medical and law schools, and several libraries. A fur trading-post was established by the French (Laclede) in 1764, but the growth of the city has taken place since about 1830. Alt. (Union Depôt) 431 ft. (city engineer); signal station, 568 ft. (U.S. Signal Office). Mean temp. (15 yrs.), yr. 55.6° F., Jan. 31.1°, July 78.4°; rfall. (40 yrs.), 40.69 in. P. (1799) <1500; (1830) 5900; (1850) 77,800; (1870) 310,900; (1880) 350,500; (1890) 451,770.

St. Louis-du-Rhône, or **Port St. Louis,** tn., France, dep. Bouches-du-Rhône, 22 m. SSE. Arles, on l. bk. and 4½ m. from the mouth of the Rhone, connected with the Gulf of Fos by a navigable canal (2½ m.); was made the port of Arles in 1870. The danger of the silting up of the Gulf of Fos by W. winds and current was, in a great measure, obviated in 1893 by the artificial opening of a new mouth of the Rhone, the 'Grau de Roustan,' which carries to the W., *i.e.*, to the opposite side of the delta, the muddy waters of the main stream. P. <2000.

St. Louis-du-Sénégal (in Wolof **Ndar**), tn., W. ct. of Africa, cap. the colony of French Senegal. The town is built on a sandy island in the Senegal R., 11 m. N. its mouth in the Atlantic, hardly above the level of the highest tides; was frequently inundated until the quays were raised. A bridge of boats, 2130 ft. long, unites St. L. with the suburbs of Sor and Briétville. Has considerable trade in textiles, arms, rice, and building materials. The town is supplied with water by means of an aqueduct 18½ m. long. Port. The river mouth is obstructed by a bar, with a mean depth of about 14–21 ft. at high, 7–14 ft. at low water. Seat of Protestant and Roman Catholic missions; has a lighthouse, in 16° 1′ N., 16° 31′ W., visible 6 m. Mean temp. (5 yrs., 1873–78), yr. 76° F., Jan. 70.3°, Aug. 82°; mean rfall. (17 yrs.), 16.1 in. P. 20,000; with the suburbs, 54,000.

St. Lucia, isl., W. Indies, the most northerly of the Brit. Windward Is., about five-sixth of the area of Anglesey. From about 1640 to 1803 its possession was constantly disputed between the French and English, but since 1803, when it was taken from the French, it has been uninterruptedly in British hands, their retention of it having been confirmed at the peace of 1814. Its cap., Castries, on W. ct., has one of the best harbours in the W. Indies (quay with depth of 27 ft. alongside at low water), and hence has been chosen as the chief coaling-station for the Brit. W. Indies, and is being strongly fortified. Principal products of the island, sugar, logwood, cacao, tobacco. Annual value of exports (exclusive of bunker coal) about £150,000. Area, 243 sq. m. P. (1891) 42,200.

St. Lucia Bay, Borneo. See **Sibuco Bay.**

St. Malo, tn., France, dep. Ille-et-Vilaine, on the N. ct.; at the mouth of the Rance, 23 m. SW. by W. Granville, cap. arr. St. M. is fortified, and is a great trading and fishing port. It is separated from the English Channel by the Sillon, and connected by a second port (St. Servan) with the mouth of the Rance. Has a dock 21 ft. 8 in. deep over sill at ordinary spring tides, 18 ft. 4 in. at ordinary neap tides; the tidal harbour is 33 ft. deep at high water, dry at low water. Potatoes, buckwheat, barley, butter, eggs, blackberries, essence of chestnut,

and mistletoe are shipped from the two ports. The imports embrace coal, timber, and iron. Manufactures lace, and has naval workshops. Is frequented for sea-bathing. A thick wall of the 15th century still exists, flanked by towers, and fortified. Has an ancient cathedral, and a natural history museum. The destruction of the town was attempted by the English in 1693, 1695, and 1758. Birthplace of Jacques Cartier, the discoverer of Canada (died 1554); Dugnay Trouin, the sailor (died 1736); Mahé de la Bourdonnais (died 1765); the physicist De la Mettrie (died 1751); the savant Maupertuis (died 1759); the authors Lamennais (died 1854) and Châteaubriand (died 1848). St. Omer, comm. and fortified tn. of France, defended by Fort Notre Dame, dep. Pas-de-Calais, cap. arr. and 21 m. S. by W. Dunkirk, 22 m. SE. Calais, on the Aa, at the mouth of the canal of Neuf-Fossée, and on the railway from Arras and Lille to Calais; has salt and sugar refining, distilleries, oil and soap works, and manufactures pipes. Since the 13th century St. Omer has had important manufactures of cloth. In the 7th century St. Omer was a village called *Sithiu*, in which St. Omer founded three monasteries, one of which was made the cathedral (12th to 15th century), containing works of art of the Middle Ages and Renaissance. St. Omer was taken by Louis XIV. in 1677. During the first revolution it was called *Morin la Montagne*; birthplace of the Abbé Segur; near it are extensive marshes, whence great quantities of turf are extracted. P. 21,700.

St. Paul, vil., U.S., Indiana, Decatur co., 11 m. NW. Greensburg; has limestone quarries. P. <1500.

St. Paul, city, U.S., Minnesota, Ramsey co., on the l. bk. of the Mississippi, in 44° 57′ N., E. and adjoining Minneapolis, the centres of the two towns being 10 m. apart. It has rapidly risen to the position of a great commercial city, having been first settled and named by a French priest, Gaultier, who there erected a log-hut in 1841. The town incorporation was made in 1849, when 840 whites and Indians were counted as frequenting the site. The first survey was made in 1855. It owes its rise first of all to its being at the head of continuous navigation on the Mississippi (*q.v.*), though its prosperity now depends mainly on its great railway facilities, which have made it the great distributing centre for the great agricultural region of the northern Mississippi basin and the Red River valley. It also carries on various manufactures on a large scale—chiefly those connected with the preparation of agricultural produce for distant markets, and the supply of the necessaries of an agricultural population. Its site is a natural amphitheatre, composed of a series of terraces rising above the river. Alt. 702 ft. (R.R.); signal station, 801 ft. Mean temp. (15 yrs.), yr. 44.0° F., Jan. 12.0°, July 71.8°; mean rfall. (11 yrs.), 29.76 in. P. (1850) <1500; (1860) 10,400; (1870) 20,800; (1880) 41,500; (1890) 133,156.

St. Peters Bay, Canada, Nova Scotia, on SE. of Cape Breton I., connected by **St. Peters Canal** (½ m. long, 18 ft. deep on sill at lowest water, extreme rise and fall of tide 4 ft.) with Bras d'Or Lake, the large irregular sea-inlet in the interior of Cape Breton.

St. Peters Bay, narrow inlet, Canada, Prince Edward Island, on the N. ct. of King's co.

St. Petersburg, a govt. of NW. Russia, at the head of the Gulf of Finland, has Finland and Olonets on N., Esthonia and Livonia on W., and Novgorod and Pskov on E. and S.; hilly on Finland border, flat and marshy elsewhere, with the exception of a plateau in the S. having 300 to 550 ft. alt. (Duderhof Hills). Silurian and Devonian rocks, covered with the bottom-moraine of Scandinavian and Finnish ice-sleet. Touches for 130 m. the Gulf of Finland, which has the Bays of Kronstadt, Koporiye, Luga, and Narva; Lake Ladoga in the E. Chief rivers, Neva, Luga, and Narva, which enter the Gulf of Finland, and Volkhov, Syas, and Svir, tribs. of Lake Ladoga, connected by canals with tribs. of the Volga. The population (apart from the cap.) is mostly Russian, but contains 15 per cent. Finns, nearly 2 per cent. Germans, and 0.5 per cent. Esthonians. Some agriculture and cattle-breeding. Large manufactures (cottons, silks, paper, ironware, and machinery) in the dists. of St. Petersburg, Tsarskoye Selo, and Yamburg. Divided into eight dists.: St. Petersburg, Gdov, Luga, Novaya, Ladoga, Peterhof, Schlüsselburg, and Yamburg, all small towns. The towns Gachina, Narva, Oranienbaum, and Pavlovsk, and the villages Okhta, Kolpino, Pulkovo, and Krasnoye Selo are suburban towns. Kronstadt and the capital form separate governorships. Area, 20,760 sq. m. P. (1890) 1,688,200.

St. Petersburg, cap. of the Russian Empire, situated at the head of the Gulf of Finland, at the mouth of the Neva, which flows from Lake Ladoga, attains a width of 400–650 yds., and a depth of 59 ft., and discharges 1,750,000 cubic ft. per second. Before entering the Gulf of Finland the Neva divides into several branches, and forms several islands—the Vasilievskiy Ostrov, between the Great and the Little Neva, the Peterburgskiy Ostrov, between the Little Neva and the Great Nevka, which subdivides in its turn into Little and Middle Nevkas and the Karpovka, forming the islands Elagin, Krestovskiy, Kamennyi, and Aptekarskiy. Smaller branches of the Great and Little Nevas form the islands Petrovskiy, Golodai, and several smaller ones. A new canal, 22 ft. deep, which permits ships to avoid the shallow bar at the mouth of the Neva, has been dug out in the S. of the Neva's main branch, now forming to Gutuiev I.; it has a good harbour for fifty large ships. The channels or rivs. Moika and Fontanka have been canalised, and the canals Catherine, Ligovskiy, and Obvodnyi run through or round St. Petersburg, partly as channels for allowing lighter vessels to circulate in town, and partly for taking the surplus of water which accumulates in the Neva, under the western gales, and has caused widespread inundations. The Neva freezes for an average of 147 days every year, to which several more days must be added when it carries the ice from Lake Ladoga. The climate of St. P. is very variable, moist, and unhealthy, sharp frosts being followed by thaw, and changes of 35° F. taking place in 24 hours. The average temps. are: yr. 38.6° F., Jan. 15.4°, July 64.0°; yearly rfall., 18.8 in.; yearly number of rainy and snowy days, 151; average relative humidity, 81. The bulk of St. P. is on the l. bk. of the Neva, which is confined by a granite embankment bordered by palaces. The centre of the city is the Admiralty, close by which stand the Winter Palace, the art galleries of the Hermitage, the buildings of the general

staff, the cathedral of St. Isaak, the statue of Peter I., and the Senate, and from which radiate three main thoroughfares intersected by three girdles of canals. The Vasilievskiy I. has the Exchange, the academies of art and science with its observatory (59° 56′ 0″ N., 30° 19′ 40″ E.), the university, the philological, navy, and mining high schools, and the central meteorological observatory. The Peterburgskiy I. has the fortress of St. Peter and Paul, which contains the mint and a cathedral where the emperors and the imperial family are buried. The Apothecaries I. has a beautiful botanical garden; and the other islands, as well as the suburbs of Novaya Derevnya, Polustrovo, Kusheleva, &c., are occupied by parks, gardens, and villas (*dachis*), to which the population of the cap. repairs in the summer. The r. bk. of the Neva is occupied by 'the Viborg Side,' which contains the medical academy, large hospitals, and various dependencies of the artillery administration, and the vils. Great and Little Okhta; while the promontory of the l. bk., formed by a bend of the Neva, is occupied by all sorts of storehouses and timber yards. St. P. is very well provided with scientific and educational institutions, as well as art galleries and museums, and is the seat of very many scientific and art societies. Its public library is only second to the British Museum and the Bibliothèque Nationale; and there are besides very valuable libraries at the academy of science, the university, the musical conservatory, the hydrographical department, and in all scientific societies; the same with museums of art, natural science, and technics. St. P. and its neighbourhoods are the seat of many industries, the annual production of which is valued at £14,400,000, textiles, paper, sugar, leather, tobacco, copper, iron goods and machinery, gum wares, and clothing being among the most important. For external trade St. P. is the chief port of Russia, Cronstadt and St. P. being visited every year by over 2000 ships, and 700 ships for coasting trade. The exports attain from £8–9,000,000, and the imports have nearly the same value. Four main lines of railways radiate from St. P.: along the N. ct. of the Gulf of Finland, with branches all over Finland; on the S. ct. of the same gulf to Baltischport; SW. to Riga and Warsaw; and SE. to Moscow and upper Volga. Three other railways connect the cap. with Lake Ladoga and the suburban towns. St. P. has its municipal institutions, much hampered, however, by the Governor-General and the Prefect of Police (yearly income about £600,000). It is at the same time the cap. of the govt. and of the dist. of St. P. Several fine imperial palaces and parks are scattered in the SW. of the cap.: Tsarskoye Selo, Peterhof, Pavlovsk, Oranienbaum. Pulkovo, on a hill 5 m. S. of the cap., is the seat of a well-known observatory. The population contains 10 per cent. of Protestants, chiefly Germans and Finns, 3 per cent. of Roman Catholics, and 2 per cent. of Jews, the remainder belonging to the Greek Orthodox Church. Area 21,195 ac., out of which 1330 ac. are under water. P. (1737) 70,000; (1800) 220,208; (1869) 667,026; (1892, with suburbs) 1,035,439.

St. Petersburg, seapt., U.S., Florida, Hillsboro co., on W. side of Tampa Bay (Gulf of Mexico), in 27° 47′ N.; connected by rail with the phosphate area of the state. Safe anchorage. Vessels drawing 15–18 ft. can reach and lie alongside the wharf at mean tides.

St. Petersburg, bor., U.S., Pennsylvania, Clarion co., 51 m. NNE. Pittsburg; has oil wells and natural gas. Mean temp. (15 yrs.), yr. 38.7° F., Feb. 16.5°, July 63.7°. P. <1500.

St. Pie, vil., Canada, Quebec, Bagot co., on the riv. Noire, 33 m. E. Montreal. P. <1500.

St. Pierre, isl., Atlantic, one of a group belonging to France off the S. ct. of Newfoundland, in 56° 6′-23′ W., frequented as a cod-fishing station; several submarine cables which cross the Atlantic touch here. The town, also called **St. P.,** has been partly burnt down three times—in 1865, 1867, and 1879. The tidal harbour is 15½ ft. deep at entrance, 18 ft. deep alongside quays at high water ordinary spring tides, 9½ ft. at low water. The roadstead, 2 m. long, affords excellent anchorage in 7–15 fathoms; 15½ ft. of water on bar at ordinary spring tides high water. P. <3000; in the fishing season, 15,000. The colony of **St. Pierre et Miquelon** was recognised as belonging to France in the treaty of Paris in 1763, and although several times taken by the British since, has always been restored after a short interval. Area of colony, 81 sq. m. P. (census, Nov. 1887) 5900.

St. Pierre, vil., Canada, Quebec, Montmagny co., on the Rivière du Sud, 32 m. E. by N. Quebec. P. <1500.

St. Thomas, or **São Thomé,** isl., Portuguese W. Africa, on the Gulf of Guinea, in 0° 2′–0° 30′ N., is of volcanic origin, and characterised by deep narrow valleys, which, traversed by many torrents, descend to the coast. The heat is tempered by the equatorial ocean-current, and the island has more rain than the neighbouring mainland. The island is covered by luxurious vegetation; chief products, sugar-cane, coffee, cacao, and vanilla. The highest point is the Pico de São Thomé, alt. 7028 ft. The cap., Cidade de São Thomé, on the NE. ct., has a small, well-sheltered port. The island was discovered by the Portuguese, 1470; suffered much at the hands of the Dutch, English, and French. Length, 32 m.; breadth, 21 m.; area, 359 sq. m. P. 18,300.

St. Thomas, quarter of Jamaica, W. Indies, Surrey co., cap. Morant. P. 36,000.

St. Thomas, Danish isl., W. Indies, one of the Virgin group, in 18° 20′ N., crossed in the W. by 65° W. Mean temp. (11 yrs., 1870–82), yr. 77.5° F., Jan. 78.4°, July 75.0°.

St. Thomas Head, cape, Eng., Somerset, 3 m. N. Weston-super-Mare.

St. Thomas in the Cliffe, small tn. and par., Eng., Sussex, an E. suburb of Lewes. P. <2000.

St. Thomas' Mount, tn., Brit. India, Madras, Chengalpat dist., 7½ m. SW. government house, Madras, is an important military station, with exceptionally good health. The 'Mount' is 220 ft. high, and overlooks the cantonment. On the summit is an old Portuguese church, on the spot where, in 1547, the Portuguese discovered the celebrated Mount Cross, whose date is probably about the 8th century. P. 13,100; Hindus, 9600.

St. Trond, or **St. Trouyden,** Flemish **Sint Truyden,** comm., Belgium, prov. Limbourg, 11 m. E. Tirlemont, 21 m. NW. by W. Liège, arr. Hasselt; manufactures hats and lace. The town was founded in 655, and a Benedictine abbey was founded here at the beginning of the 8th century, whose abbé was a prince of the empire; it was devastated by the Comte de la Marck in 1486, and suppressed at the end of the 18th century. The town was burnt by the Normans in 882 and 891, and by the Bishop of Liège in 1084. Charles le Téméraire, duke of Burgundy, destroyed the fortifications in 1467, and the Prince of Orange completely devastated it in 1568. It was occupied by the French in, 1672, 1676, 1746, 1792, and 1794. P. 13,900.

St. Tropez, tn., France, dep. Var, on the S. side of the Gulf of St. Tropez, 13 m. SSW. Fréjus, arr. Draguignan; has a small trading and fishing port exposed to the mistral, and has seabathing. Birthplace of General Allard, who organised the Sikhs against the English in 1839. P. <4000. **Cape St. Tropez** is 3 m. to the E. The **Gulf of St. Tropez** is between Cape des Issambres on the NNE., and Cape St. Pierre to the SSW., is 2½ m. wide at mouth, and has a basin with an area of about 8 sq. m.

St. Vaast-de-la-Hougue, seapt., France, dep. Manche, on the N. ct., 16 m. E. by S. Cherbourg, arr. Valognes; has a fishing-port on the coast of Tatihou, a fortified island about 1 m. E., where also is a zoological laboratory connected with the museum of Paris. P. <3000.

St. Valentin, vil., Canada, Quebec, St. John's co., on the l. bk. of the Richelieu, 32 m. SSE. Montreal. P. <1500.

St. Valery-en-Caux, seapt., France, dep. Seine-Inférieure, on the NW. ct., 17 m. W. by S. Dieppe, arr. Yvetot; has a fishing-port; sea-bathing. P. <4000.

St. Valery-sur-Somme, seapt., France, dep. Somme, on the Somme, 31 m. NE. by E. Dieppe, arr. Abbeville; has a fishing-port, which flourished in the 9th century. Hence William of Normandy finally set sail for the conquest of England in 1066. Has a chapel which attracts many pilgrims. Sea-bathing. The canal to Abbeville is 16 ft. deep at the sea end at spring tides, 9.4 ft. at neap tides. P. <4000.

St. Valier, vil., Canada, Quebec, Bellechasse co., on the r. bk. of the riv. St. Lawrence, 21 m. ENE. Quebec. P. <1500.

St. Vallier, vil., France, dep. Alpes-Maritimes, arr. Grasse, 13 m. NW. Cannes. P. <2000.

St. Vallier, tn., France, dep. Drôme, on the l. bk. of the Rhone, 24 m. S. Vienne, 9 m. N. Tournon, arr. Valence; manufactures porcelain, pottery, silk stuffs, &c. P. <4000.

St. Vallier, vil., France, dep. Vosges, arr. Mirecourt, 15 m. NNW. Espinal; has a mineral spring similar to that at Contrexéville. P. (comm.) <2000.

St. Varent, vil., France, dep. Deux-Sèvres, on the Thouaret, 44 m. SSE. Angers, arr. and 12 m. E. by N. Bressuire. P. <2000.

St. Vaulry, vil., France, dep. Creuse, 43 m. W. by S. Montluçon, arr. and 7 m. WNW. Guéret. P. <2000.

St. Veep, par., Eng., Cornwall, div. and 8½ m. SSE. Bodmin, on the l. bk. of the riv. Fowey. P. <500.

St. Victor-la-Coste, vil., France, dep. Gard, arr. Uzès, 12 m. NW. Avignon; coal and lignite are mined here. P. <2000.

St. Vigeans, par., Scot., Forfarshire, 1½ m. N. by W. and containing burgh of Arbroath; 12,731 ac. P. 15,700.

St. Vincent, cap. Argentine Republic, near the SE. point of Tierra del Fuego.

St. Vincent, Portuguese **São Vicente,** one of the Cape Verde Is., in NW. of group; arid and unfruitful, but possessing a magnificent harbour, on which account it is a frequent calling-place for steamers. Connected by submarine cables with Madeira and Lisbon, Pernambuco (Brazil), and Bathurst (Gambia, W. Africa). Area, 80 sq. m.

St. Vincent, vil., Italy, Piedmont, prov. Turin, 16 m. E. Aosta; copper and pyrites are mined here; has mineral waters, with a small establishment. P. <2000; comm. P. <3000.

St. Vincent, riv., Madagascar. See **Mangoka.**

St. Vincent, cape, in extreme SW. of Portugal, in 37° 1′ 15″ N.; strong sea-current. Celebrated for two naval battles, one in 1797, in which the English defeated the Spanish fleet, and

the other in 1833, when the squadron of Dom Miguel, the Portuguese usurper, was destroyed by Admiral Charles Napier.

St. Vincent, one of the Windward Is., W. Indies, 28 m. SSW. St. Lucia, 100 m. W. Barbados; is traversed N. to S. by a volcanic chain of mountains, of which the principal summits are La Soufrière, crowned by a double crater, alt. 3705 ft., and the Grand Bonhomme, alt. 3280 ft. About one-third of the island is under cultivation, and there are few morasses; the climate is considered one of the healthiest in the Antilles. The principal exports are sugar, molasses, rum, cacao, arrowroot, and spices. Total value of trade, steadily declining, about one quarter of a million sterling. The cap. of the island is Kingston, which has an open roadstead. St. Vincent is administered by a governor and a council of eight members. In 1797 the English transferred the native Caribs and mixed Negro-Carib pop. to Roatan I. Mean annual rfall. (6 yrs.), 78.17 in. Length, N. to S., 15½ m.; breadth, 10½ m.; area, 147 sq. m. P. (1889) 47,700, of which seven-eighths are negroes and coloured.

St. Vincent, Gulf of, gulf, S. Australia, to the E. of Yorke's Penin., crossed by 1° 38′ E.

St. Vincent de Paul, vil., Canada, Quebec, Laval co., 9 m. NNW. Montreal. P. <1500.

St. Vincent Island, U.S., Florida, off the SW. ct. of Franklin co., 85° 5′–13′ W.

St. Vivien, vil., France, dep. Gironde, arr. Lesparre, 22 m. NW. Pauillac; has a small port, 3 m. from the Gironde, with which it is connected by a channel. P. <2000.

St. Wenceslas, vil., Canada, Quebec, Nicolet co., 4 m. from Aston, 20 m. from Three Rivers. P. <1500.

St. Wenn, par., Eng., Cornwall, St. Austell div., 6½ m. W. by S. Bodmin, 2½ m. N. Victoria stn.; 4695 ac. P. <500.

St. Weonards (wün′ardz), par., Eng., Herefordshire, div. and 6½ m. W. Ross, PMT.O.; 4561 ac. P. <750.

St. Werburgh Hoo, par., Eng., Kent, Hoo dist.; 4491 ac. P. <1500.

St. Williams, or **Walsingham,** vil., Canada, Ontario, Norfolk co., on Lake Erie, 17 m. from Simcoe. P. <1500.

St. Winnow, par., Eng., Cornwall, div. and 6½ m. SSE. Bodmin, on the l. bk. of the riv. Fowey, 1½ m. SSE. Lostwithiel stn.; 6247 ac. P. <1500; eccles. par. (**St. Winnow with St. Nectan**) P. <1500.

St. Woollos, par., Eng., Monmouthshire, 1½ m. NNW. Newport, and partly included in the parl. bor. of Newport. P. 31,500.

St. Yorre, vil., France, dep. Allier, arr. Palisse, 4 m. SSE. Vichy, and 27 m. NE. Clermont-Ferrand, on r. bk. of the Allier; has a thermal establishment. Alt. 902 ft. P. (comm.) <2000.

St. Yrieix, tn., France, dep. Haute-Vienne, 22 m. S. Limoges (*q.v.*), cap. arr. St. Yrieix; has important deposits of kaolin and red titanium, used in the manufacture of porcelain. P. <4000.

St. Zachaire, tn., France, dep. Var, arr. Brignoles, 18 m. ENE. Marseilles; manufactures pottery; lignite and marble obtained here. P. <2000.

St. Zenon, vil., Canada. See **Piopolis.**

St. Zenon, or **St. Louis de Mantawa,** vil., Canada, Quebec, co. and 57 m. from Joliette. P. <1500.

Saiwan, tn., China, prov. Kwangtung, 15 m. S. by E. Canton.

Sajama, or **Sahama,** peak of the Bolivian Andes, eastern Cordillera, just N. of 18° S. Alt. estimated at 21,000 ft.

Sajo, riv., Hungary, r. bk. trib. of the Tisza or Theiss, rises in co. Gömör, on the mountains of Tatra, and flows E. and S. then SE., and enters the Tisza 16 m. SE. Miskolcz, which it has passed. Receives, l. bk., the Hernad, a longer river than the Sajo. Length, 106 m.; not navigable. The upper part of its valley is one of the most important iron-mining dists. of Hungary.

Sajó Szent Péter, comm., Hungary, co. Borsó, 43 m. SW. by S. Kaschau. P. <4000.

Sajteny, comm., Hungary, co. Csnád, dist. Nagy-Lak. P. <5000.

Saka, tn., Abyssinia, 220 m. WSW. Ankober, in 8° 12′ N., 36° 42′ E.; is an important market, especially for coffee. Alt. 5800 ft. P. 12,000.

Sakade, seapt. tn., Japan. See **Saka-ide.**

Sakai, seapt., Japan, on the N. ct. of the SW. penin. of Honshiu, 120 m. WNW. Kobe. Mean temp. (6 yrs., 1881–86), yr. 56.6° F., Feb. 37.6°, Aug. 78.8°; rfall. (4 yrs.), 75.70 in. P. <5000.

Sakai, seapt. tn., Japan, Honshiu, 15 m. SSW. Ozaka, on the E. side of Izumi Bay. P. 46,000.

Sakai, tn., Japan, 90 m. N. by E. Kyoto, on the NW. ct. of Honshiu, in Fukui ken.

Sakai, or **Orang-Sakey** (Malayan, 'dependent'), a tribe inhabiting the interior of the Malay Penin., in the states of Perak, Selangor, and Pahang, and the princips. of Kedak, Patani, and Kelantan, presenting affinities with the Negritos.

Saka-ide, or **Sakade,** seapt. tn., Japan, Ehime ken, about the middle of the N. ct. of the isl. of Shikoku (on Inland Sea). P. 6500.

Sakalavas, tribes in the lower plains of the W. ct. of Madagascar, really belonging to different tribes subdued by the Hovas in the beginning of the 19th century; a blending of the Negro and Malay types, the former predominating. P. about 500,000.

Sakamodi, vil., Algeria, prov. and 24 m. SE. Algiers; zinc, lead, and similar metals are mined here. P. <2000.

Sakaria, the ancient *Sangarius*, riv., Asia Minor, rises to the E. of Kutaia (Kyutiaia), flows E., N., W., and finally NE. into the Black Sea, which it enters in about 30° 20′ E.; large portions of its course are still unsurveyed. It receives from the E. the Angora R. (Engüri-chai).

Sákar Pathár, sanitarium, Brit. India, Bombay, Poona dist., 4 m. S. Lonauli stn.; is fairly wooded. Alt. 3000 ft.

Sakata, seapt. tn., Japan, 90 m. NE. by N. Niigata. P. 18,800.

Sakau Reef, between Yasawa and Yandua, Fiji Is., crossed by 16° 48′ S., 178° 0′ E.

Saken, isl., Pacific. See **Katiu.**

Sakeswar, mt., Brit. India, Punjab, Sháhpur dist., in 32° 33′ N., 71° 58′ E.; is the highest peak in the Salt Range, and has a sanitarium on the summit. The climate is believed to be well adapted for Europeans. Alt. 5010 ft.

Sakhalin (Japanese **Karafuto**), narrow isl., Russia, N. Pacific, separated from the mainland by the narrow strait Tatar, or Mamia Rinso, 45° 57′–54° 24′ 30″ N., and 141° 30′–144° 50′ E. Till Mamia Rinso's journey, made in the first years of this century, it was long considered as an appendage to the mainland; was taken possession of by the Russians in 1854, and finally, in its S. part, in 1867. Length 620 m. from N. to S., and width from 20 to 90 m. Sakhalin has the Sea of Okhotsk in the E., and is separated by La Peyrouse Strait from Japan (Matsmai). It has at its S. extremity a large bay, Aniva, and Patience Bay (**Zaliv Terpyeniya**) on E. ct. The interior is filled with forest-clothed mountains 3000 to 4000 ft. high, separated by marshy valleys, of which only the valley of the two Tyms, flowing NE. and S., are fit for agriculture. Climate wet and cold, the average temps. being: at Due, yr. 33°, Jan. 3°, Aug. 61°; at Kusunai, yr. 38°, Jan. 13°, Aug. 66°; and at Muraviovskiy Port, yr. 35°, Jan. 7°, Aug. 60°. Great cold is experienced, even in summer, in consequence of ice coming from the Sea of Okhotsk, and packed along the E. ct., along which the cold Kuro-shiwo sea-current flows. Miocene coal along the W. ct., especially at Due; it is extracted by hard-labour convicts and exiles, of whom several thousands are brought every year, to be settled after their release; these latter cultivate a few orchards and small patches of cornfields. Chief settlements at Due, seaport of difficult access on W. ct., where the convict prisons are; Kusunai, also on the W. ct. in S. part of the island; Port Muraviov in Aniva Bay; and a few embryonic villages in Tym valley, E. of Due. Besides the Russian convicts there are about 2500 Ainus, and about 2000 Gilyaks and Tunguses. Area, 29,336 sq. m. P. (1890) 19,650.

Salak, volcano, E. Indies, in the W. of Java, 40 m. S. Batavia. Alt. 7265 ft.

Salakhora, or **Salahora,** vil., Turkey in Europe, N. shore Gulf of Arta, vilayet and 45 m. S. Yanina, of which it is now the principal port.

Salamá, vil., Central America, Guatemala, 45 m. N. by E. Guatemala. P. 10,600.

Salama, tn., Siam, Malay Penin., 14 m. from the W. ct., in about 5° 15′ N.

Salamanca, tn., Chile, prov. Coquimbo, 18½ m. SE. Illapel, on r. bk. of Rio de Choapa. P. <3000.

Salamanca, isl., Colombia, forming part of the delta of the Rio Magdalena; 25 m. long.

Salamanca, tn., Mexico, state of and 30 m. S. Guanajuato; manufactures cotton goods. P. 10,000.

Salamanca, the ancient *Salmantica,* or *Elmantica,* tn., Spain, cap. prov. Salamanca, on the riv. Tormes, 67 m. SW. Valladolid; manufactures pottery, and has tanyards. A Roman bridge still exists here, and the town is surrounded by old walls. Among the principal edifices are the old cathedral, in the Byzantine style, of the 12th century; the new cathedral, built 1513 to 1733; the university, which had 10,000 students in the 12th century; a library, with 60,000 volumes; and the Colegio Viejo, containing the provincial museum. Salamanca was a town of some importance when Hannibal took it from the Vettones, 222 B.C. The Goths, who took it from the Arabs, and gave it up to Alphonse the Great in 1055, retook and destroyed it. Salamanca played an important part in the Peninsular War. The battle of Salamanca, in which Wellington defeated the French under Marmont on the 22nd of July 1812, was fought on the heights of Arapiles, 4 m. SE. of the city. Alt. 2670 ft. Mean temp. (15 yrs.), yr. 54.4° F., Jan. 39.6°, Aug. 72.2°; mean annual rfall. (12 yrs.), 8.11 in. P. 22,200.

Salamanca, vil., U.S., New York, Cattaraugus co., 50 m. S. by E. Buffalo; has an active trade in lumber. P. <4000.

Salamina, tn., Colombia, S. dep. Antioquia, 115 m. NW. Bogotá, 50 m. S. by E. Medellin; salt is mined here. Alt. 5945 ft. P. (including dist.) 10,000.

Salamis, or **Hagios Sergios,** site of ruins, Asiatic Turkey, Cyprus, 7 m. NNW. Famagusta; was formerly an important port on the E. ct., founded by the Achæans.

Salamis, Koluri, or **Kuluri,** isl., Greece, prov. Attica and Bœotia, in the Gulf of Ægina, 10 m. W. Athens. Shape irregular; surface mountainous, wooded in some parts; and on the coast, wheat, wine, and olives are grown. It has several villages and convents, one a great resort of many pilgrims, and the modern town Koluri, its cap., on its W. side. On the N. side are the arsenal and chief naval station of Greece. In the channel between it and the mainland the Greeks, under Themistocles, gained a naval victory over the Persians, B.C. 480. Solon and Euripides were natives of Salamis. Area, 36 sq. m. Tn. P. <4000; demos P. (1889) 6254.

Salang, riv., Celebes, flowing SSW. into the Strait of Macassar.

Salang, or **Junkseylon Island,** isl., Siam, Malay Penin., from which it is separated by a strait of nearly 2 m. wide, covered by mountains, off the W. ct., crossed by 8° N.; tin-mining, or rather quarrying for tin ore carried on by Chinese. Length, N. to S., 28 m., by 11 m. broad; area, 294 sq. m. P. 12,000.

Salango Island, isl., S. America, off the W. ct., in about 1° 35′ S.

Salaparuta, comm., Sicily, prov. Trapani, 15½ m. S. Alcamo. P. <5000.

Salar, Grande, plain, Chile, prov. Tarapaca, 50 m. SSE. Iquique; deposits of saltpetre and salt. Length, N. to S., 25 m., by 6 m. broad.

Salar, Sal'aris, or **Salors,** Turki tribe, China, in the NW., prov. Kansu, along the r. bk. of the upper Hwang-ho.

Salar del Carmen, nitrate-mining vil., Chile, prov. and 10 m. (22 m. by rail) E. Antofagasta. Alt. 1700 ft.

Salas, comm., Spain, Asturias, prov. and 21 m. W. Oviedo, dist. Belmonte. P. 16,400.

Salasa, comm., Philippine Is., Luzon I., prov. Pangasinán, 112 m. NNW. Manila. P. 5800.

Salatan, cape, the most southerly point of Borneo, in the S., in 4° S.

Salatiga, tn. and one of the principal sanitaria of Java, E. Indies, 22 m. SSE. Samarang. Alt. 1885 ft. P. <2000.

Salaverri, coast vil., Peru, dep. Libertad, on the coast, in about 8° 10′ S., close to Trujillo, with which and also Ascope it is connected by rail; exposed roadstead; interior are rather rich gold-mines.

Salavina, tn., Argentine Republic, Santiago del Estero, 176 m. SE. by S. Tucuman. P. <2000.

Salawat Pass, pass, across the main chain of the Caucasus, Daghestan, in 41° 24′ N., 47° 13′ E. Alt. 9283 ft. (*Proc. R. G. S.,* 1891, map, p. 380).

Salawati, Salvati, or **Salwatti,** group of isls. at NW. extremity of New Guinea, belonging to the Sultan of Tidore, consists of the two large isls. Salavati and Batante, and several small islands, between 0° 35′–1° 30′ S. and 128° 50′–131° 8′ E.; cap. Samate. The coast is inhabited by Mohammedan Malays, and the interior by savage Papuans. Area of entire group, 700 sq. m. P. 3–4000.

Salaya, port, Brit. India, Bombay, 9 m. N. Khambhália, of which town it is the port; has an excellent harbour, perfectly sheltered, and with two entrances. P. <5000.

Salem, vil., U.S., Iowa, Henry co., 28 m. W. by N. Burlington; seat of Whittier college. P. <1500.

Salem, vil., U.S., Maine, Franklin co., near Saddleback Mt., 45 m. NW. by N. Augusta. P. <1500.

Salem, city, U.S., at the head of an inlet on coast of Massachusetts, cap. Essex co., 15 m. NE. by N. Boston. The harbour is safe, but not of sufficient depth for large vessels. There is a large coasting trade. Manufactures cotton, leather, &c. Salem is distinguished for its literary and charitable institutions, public library of 32,000 volumes, the Essex Institute (historical) library of 65,000 volumes, the Peabody Academy of Science, with a museum including that of the East India Marine Society, 1799. Salem is the headquarters of the American Association for the Advancement of Science. Next to Plymouth, it is the oldest town in New England. It was first settled by Roger Conant, 1626; John Endicott followed with a new charter in 1628. It was the scene of the witchcraft trials in 1692, and of the great jail delivery in 1693 which ended the delusion; it was also famous for its early commercial enterprise. Birthplace of Hawthorne, Prescott, and Bowditch. P. (1850) 20,300; (1870) 24,000; (1880) 27,600; (1890) 30,800.

Salem, city, U.S., Missouri, cap. Dent co., 98 m. SW. St. Louis. P. <1500.

Salisbury, lake, central Africa, in about 1½° N., 34° E., seen from the top of Mount Elgon, but not yet visited by Europeans. (*Proc. R. G. S.*, 1891, map., p. 248.)

Salisbury, or **New Sarum,** episcopal city, parl. and (since 1227) mun. bor., Eng., Wiltshire, 81 m. WSW. London, on the Avon, at its confluence with three tribs., on the G. W. and SW. Rlys. The plan is laid out in rectangular plots, with spacious market-place in the centre planted with trees. The cathedral, built on the hill fortress of *Old Sarum,* 2 m. off, was removed in 1220. The present tower with its lofty spire, 404 ft., is admired for its proportions, and the building as a whole (473 ft. long), surrounded by a beautiful close (area, ½ sq. m.), is the finest in England. *Sarum* was a Roman town, and has many antiquities. The Blackmore Museum here is noted for its collection of prehistoric remains from both worlds. Other objects of interest are the Poultry Cross, with six arches, built in 1330; the bishop's palace, the deanery. There are several important educational establishments, and many charities. The diocese includes the whole of Dorset and the greater part of Wiltshire, with parts of Berkshire, Devon, Hampshire, and Somerset; P. (1891) 370,000. Since 1885, Salisbury has returned only one member to Parliament. Market-days, Tu. and S. Alt. 180 ft. Mean rfall. (1866–80), yr. 34.3 in. Mun. bor. or city P. (1801) 7700; (1851) 11,700; (1871) 12,900; (1891) 15,500; parl. bor. P. (1891) 17,400.

Salisbury, par., Queensland. See **Port Douglas.**

Salisbury, tp., S. Australia, Adelaide co., 12 m. N. Adelaide, on the Great Northern Line. St. Kilda Beach, 7 m. to the E., is a seaside resort. P. <1500.

Sallyford, electoral div., Ire., Queen's co., dist. Emo.

Sally Gap, a defile, Ire., in the N. of co. Wicklow, 9 m. SW. by W. Bray. Alt. about 1500 ft.

Sallymount, electoral div., Ire., co. Mayo, dist. Ballina.

Salmantica, tn., Spain. See **Salamanca.**

Salmári, tn., Brit. India, Bengal, dist. Rangpur, on r. bk. Brahmaputra, 56 m. S. by E. Kuch Behar. P.<5000.

Salmas, fertile plain, Persian Armenia (Azerbaijan), on NW. side of Lake Urumia.

Salmedina, small isl., Spain, prov. Cadiz, at the mouth of the Guadalquivir, 15 m. WNW. Jerez de la Frontera.

Salmon, riv., Canada, New Brunswick, rises in Kent co., and flows SW. into Grand Lake.

Salmon, riv., Canada, Nova Scotia, Colchester co., flows SW. into Cobequid Bay.

Salmon, riv., Canada, Quebec, rises near the frontier of Maine (U.S.), and flows NW. to the riv. St. Francis.

Salmon, riv., Newfoundland, flows S. into Fortune Bay, about 55¾° W.

Salmon, riv., U.S., Connecticut, rises in Tolland co., and flows S. to the Connecticut R. at E. Haddam.

Salmon, riv., U.S., Idaho, rises in Salmon River Mts., Alturos co., and in the Rocky Mts., Lemhi co., by two branches which flow N. by W. and unite some miles above Salmon City. The river then flows NW. into Snake R., 50 m. above Lewiston. Length, 425 m.

Salmon. 1. River, U.S., New York, in the NE., trib. of the St. Lawrence, which it joins on the r. bk. in about 74° 35′ W. **2.** River in the same state, flows E. into the Lake Ontario, about 20 m. E. by N. Oswego; 14 m. above the mouth are falls at Orwell, where, after 2 m. of rapids, the river makes an almost perpendicular leap of 107 ft. between rock precipices.

Salmon Arm, stn., Canada, prov. Brit. Columbia, on the C. P. R., about 119° 22′ W., 1166 m. by rail W. Winnipeg, 316 m. E. Vancouver.

Salmonby, par., Eng., Lincolnshire, S. Lindsey div., 10 m. S. Louth, 5 m. NE. Horncastle stn. P.<250.

Salmon City, vil., U.S., Idaho, cap. Lemhi co., 140 m. W. by N. from the NE. corner of the state. P.<1500.

Salmon Falls, vil., U.S., New Hampshire, Stafford co., on Salmon Falls R., 35 m. E. by N. Concord. P.<1500.

Salmonier, tn., Newfoundland, on St. Mary's Bay, 49 m. from St. John's. P.<1500.

Salmon Leap, fall on riv. Liffey, Ire., co. Kildare, near Leixlip.

Salmon Point, cape, Canada, Ontario, on Lake Ontario, in 77° 14′ W.

Salmonville, vil., Canada, Ontario, Peel co., 29 m. W. by N. Toronto, on a railway. P.<1500.

Salmünster, tn., Prussia, prov. Hesse-Nassau, 32 m. ENE. Frankfurt. P.<2000.

Salò, tn., Italy, Lombardy, prov. and 15 m. ENE. Brescia, on W. shore of Lake Garda; has a Gothic cathedral. P.<4000.

Salobreña, comm., Spain, Andalusia, prov. and 31 m. S. Granada, dist. Motril. P.<4000.

Salon, tn., France, dep. Bouches-du-Rhône, arr. and 20 m. WNW. Aix; manufactures olive-oil and soap; trade in almonds for confectionery. P. 6300.

Salona, ancient tn., Austria. See **Spalato.**

Salona, Greece. See **Amphissa.**

Salonica (Turkish **Selanik,** Slavonic **Saloniki**), the ancient *Thessalonica* or *Therma,* tn., Turkey in Europe, cap. prov. Salonica, at the head of the Gulf of Salonica, 13 m. ENE. of the mouth of the Vardar. Salonica, second only to Constantinople in importance, is one of the two heads of the great railway which traverses central Europe, passing Belgrade, Budapest, and Vienna, and of which Paris is the terminus. Its roadstead is one of the deepest and safest on the Ægean Sea, and has a quay 5905 ft. long; but vessels discharge in the roadstead by means of lighters. The town is extremely unhealthy, but is furnished with water-works, tramways, &c. A proposal for constructing a commercial harbour here was under consideration in 1894. The town is overlooked by the ancient citadel of *Heptapyrgion,* or 'the seven towers.' Here is a government cigarette factory, besides steam flour-mills, soap and brick factories, brewery, and cotton-mills; carpet-making is also carried on; antimony and chrome ore mined near. Salonica was a Roman colony in the third century B.C.; it is celebrated as a scene of the preaching of St. Paul. Constantine rebuilt the town, but the Iconoclasts, after pillaging, put it to fire and sword. In 551, 597, 676, 678, 685–87 it was besieged by the Servians; in 996 the Byzantines were here defeated by the Macedonian King Samuil. It was sacked by the Saracens in 904, who carried off 22,000 of the people; in 1207 besieged by the Bulgarian King Kalojan, but never taken from the Byzantines till 1222, when it was taken by Prince Theodore of Epirus, and in 1325 by the younger Andronicus; again besieged by the Servians in 1349, but first taken from the Greeks by the Turks in 1429. A dreadful fire which occurred in 1890 destroyed the new quarters and the cathedral of St. Sophia, built by Justinian, and used by the Turks as a mosque like other old Christian churches. An old Roman triumphal arch crossing the ancient *Via Egnatia* still exists (another destroyed in 1867). P. 121,600, of whom 60,600 Jews (who regard themselves as of Spanish origin, dating from 1571, and speak a corrupt Spanish among themselves), including 5000 Moham. (Deunmés), 25,000 Turks, 14,000 Greeks, 11,000 Slavs, 6000 Muhajirs (refugees), 3300 Franks, 1700 Zinzars and Albanians. Count Vizković furnished the same figures, but said there were 72,000 Jews, only 20,600 Turks, Muhajirs, and Negroes.

Salonica, Guif of, in the NW. of the Ægean Sea, between Thessaly on the W., Macedonia on the NW., and Chalcidice on the E., is formed of two distinct parts, one of which is very wide, and lies SE. and NW., the other, which is narrow, lies SW. and NE.

Saloniki, Turkey in Europe. See **Salonica.**

Salop, co., Eng. See **Shropshire.**

Salses, or **Salces,** tn., France, dep. Pyrénées-Orientales, arr. and 11 m. N. by E. Perpignan. P.<3000.

Salsette Island, isl., Brit. India, off the W. ct., N. of Bombay I., connected with the mainland by roads and railways; has many Buddhist rock-cut temples and monasteries; the great Keneri cave belongs mainly to the beginning of the 5th century. The English captured it from the Maráthás in December 1774, and it was formally annexed to the East India Company's dominions in 1782 by the treaty of Salbái.

Salsipuedes, Punta, cape, Central America, Costa Rica, on the SW. ct. of the penin., W. of Dulce Gulf.

Salso, ancient *Himera,* riv., Sicily, rises in E. of prov.

Palermo, flows S., and enters the Mediterranean at Licata. Length, 89 m.; area of basin, 765 sq. m.; mean discharge, 600 cubic ft. per second.

Salsomaggiore, comm., Italy, Emilia, prov. and 17 m. W. Parma; has brine-springs, mineral waters impregnated with iodine, and petroleum wells, and is now entirely lighted by natural gas. P. 5700.

Salsvand, or **Sals,** lake, Norway, prov. Trondhjem, separated from the Folden Fjord by an isthmus ½ m. long.

Salt, tn., Palestine. See **Es Salt.**

Salt, riv., U.S., Missouri, in the NE., r. bk. trib. of the Mississippi, which it joins about 39° 25′ N.

Salt, North and **South,** two bars., Ire., in the NE. of co. Kildare.

Salta, prov., Argentine Republic, in the extreme NW.; it is backed by plateaux of the Andes, nearly 20,000 ft. high; the country inclines SE., with the rivs. Bermejo, Juramento (the upper Salado), and Teuco. The principal agricultural products are lucerne, sugar-cane, maize, wheat, oats, potatoes, the vine, and other fruits. Chief exports, cattle and horses, also tanned leather, cheese, and wool. Salta has considerable mineral wealth, as yet unworked, including gold, silver, copper, china-clay, coal, asphalt, and petroleum. Mineral springs are utilised at Rosario and El Paraiso. Common salt is obtained in Salinas Grandes, in the N. A railway from Tucuman to Jujuy crosses the prov. Area of prov. nearly 50,000 sq. m. The population is officially estimated at 145,000 (1889), not including the Indians of the Chaco.

Salta, tn. and stn., Argentine Republic, cap. state Salta, 145 m. N. by W. Tucuman; founded in 1582 by Hernando de Lerma; seat of a bishop. Meteorological observatory in 24° 45′ 40″ N., 65° 23′ 45″ W. Alt. 3944 ft. Mean temp. (7 yrs., 1873–76, 1879–82), yr. 63.8° F., Jan. 71.8°, July 53.3°; annual rfall. 22.6 in., April–Sept. 1.6 in. P. 20,000.

Saltaire, vil., Eng., Yorkshire, W. Riding, Shipley div. and par., 3½ m. NW. by N. Bradford, on the riv. Aire, and the M. R.; built about 1850 by Mr. (afterwards Sir Titus) Salt for the accommodation of the population dependent on his great alpaca works, established here about fourteen years after he had introduced the industry into England. Population not separately returned in the census, being included in that of the parish of Shipley.

Salt and Enson, par., Eng., co. and 3½ m. NE. Stafford, with a stn. (**Salt**) on the G. N. R., P.O. (**Salt**). P. <500.

Saltash, par., mun. bor. (since the time of William I.), market-tn., and port, Eng., Cornwall, Bodmin div., on the r. bk. of the riv. Tamar, 4 m. NW. Plymouth, with stns. (**St. Budeaux** for **Saltash**) on L. & SW. R., and (**Saltash** for **Callington**) on the G. W. R., which is here carried across the Tamar by the Royal Albert Bridge, a magnificent structure of nineteen arches. Saltash was formerly a place of importance, represented in Parliament until 1832; it has an active coasting trade. Market-day, S. Alt. 150 ft. Mean annual rfall. (1866–80), 53.87 in. P. <3000.

Saltburn, vil., Scot., Ross-shire, on the NW. shore of Cromarty Firth, 4 m. WNW. Cromarty, 1½ m. ENE. Invergordon stn.

Saltburn-by-the-Sea, eccles. par., tn., and watering-place, Eng., Yorkshire, N. Riding, Cleveland div., on the coast, 10½ m. E. Middlesbrough, with a stn. (**Saltburn**) on the NE. R. The sands extend about 8 m. along the coast. P. <2500.

Saltby, par., Eng., Leicestershire, Melton div., 8 m. NE. by E. Melton Mowbray, 3 m. ENE. Waltham on the Wold stn. P. <500. See **Sproxton.**

Saltcoats, settlement, Canada, dist. Assiniboia, on the C. P. R., 205 m. W. Portage-la-Prairie.

Saltcoats ('salt cots'), fishing tn., Scot., N. Ayrshire, on the W. ct., 1 m. SE. Ardrossan, on the G. & SW. R. and C. R.; owes its origin and name to the settlement of a few salt-boilers here at an early date. Salt-making was carried on on a considerable scale from the end of the 17th to the beginning of the 19th century. Greatly frequented as a health resort, having a fine shore for sea-bathing. P. 5900.

Salt Creek, city, U.S., Utah. See **Nephi.**

Saltee Islands, Ire., about 3 m. off S. ct. of co. Wexford, in 6° 36′ W.; the larger of the two islands lies about 15 m. E. Hook Head, and is 1 m. long. **Saltees Light-Ship,** Ire., 4½ m. further S.

Saltenfjord, fjord, Norway, prov. Tromsö, crossed by 67° 15′ N., runs inland by the **Skjerstadfjord,** with which it is connected by narrow channels, where it forms the famous **Saltström** rapid.

Salt Lake, Great, U.S. See **Great Salt Lake.**

Salt Lake City, U.S., cap. Utah, Salt Lake co., in 40° 46′ N., 112° 6′ W., 776 m. E. by N. San Francisco, by the old emigrant route, on a branch line of the Pacific Rly. Large flocks of sheep and herds of cattle are reared; and with a view of being a self-sustaining colony, beetroot is grown for the manufacture of sugar, woollen factories have been built, besides grist-mills, cutlery, and pottery manufactories. Owing to the scarcity of rain, great attention is paid to artificial irrigation, by means of reservoirs of snow, which accumulates in the gorges of the mountains and yields never-failing streams during the summer. The city is 4 m. long, by 3 m. in breadth; the streets are at right angles, 132 ft. wide, with a stream of clear water on each side. The city has 75 m. of street railroad; it contains the university of Utah and other public buildings. The Mormon tabernacle contains a large organ, second only to that of Boston, and will seat 8000 to 9000 people. There are churches of various other bodies. This settlement was formed in 1847 by the 'Mormons' or 'Latter Day Saints' under Brigham Young, the successor of Joseph Smith, after their expulsion from the city of Nauvoo, Illinois, and the murder of their prophet, Joseph Smith, and his brother in the gaol of Carthage. Alt. 4350 ft. Mean temp. (10¾ yrs., 1874–84), yr. 51.3° F., Jan. 28.7°, July 76.3°; (20 yrs.), yr. 51.7° F., Jan. 27.6°, July 76.1°; rfall., yr. 16.85 in., June–Sept. 2.98 in. P. (1870) 12,900; (1880) 20,800; (1890) 44,800.

Saltley, eccles. par., an E. suburb of Birmingham, Warwickshire, Eng., in the E. div., with a stn. on the M. R. P. 9300.

Saltmarsh, par., Eng., Herefordshire, in Bromyard union. P. <250.

Saltmarsh, par., Eng., Yorkshire, E. Riding, Howdenshire div., on the Ouse, 2½ m. E. Goole, 1½ m. SW. of its stn. (**Saltmarshe**) on the NE. R. P. <250.

Saltmills, tnld., Ire., SW. co. Wexford, bar. Shelburne, 12 m. E. by S. Waterford, on Bannow Harbour, P.O. P. <250.

Saltney, vil., Eng., Cheshire, partly in Flint, included in the parl. bor. of and 2 m. SW. Chester, on the G. W. R., PMT.O. See **Lache with Saltney.**

Saltney, par., Wales, Flintshire, 2 m. SW. Chester, on the L. & NW. R., with a stn. (**Saltney Ferry**), Mold Junction. Saltney has an important coasting trade, and is an outlet for the central districts of Wales. It has iron and railway works, and an anchor foundry. PMT.O., and P.O. (**Saltney Ferry**). P. <3000. See **Lache with Saltney.**

Salto, tn., Argentine Republic, prov. and 107 m. WNW. Buenos Aires, cap. dist. P. 5000.

Salto, tn., Mexico, state of and 80 m. N. by W. Zacatecas.

Salto, or **Salto Oriental,** tn. and port, Uruguay, at the lower end of the rapids on the Uruguay R., the limit of navigation for coasters and river steamers, 63 m. N. Paysandu, 287 m. by river from Buenos Aires, cap. dep. Salto; amethysts and agates are found in the neighbourhood. P. estimated at 13,000.

Salton, par., Eng., Yorkshire, N. Riding, Whitby div., on the Dove, 10½ m. NNE. York, 5½ m. WSW. Pickering, 3 m. NE. by N. Slingsby stn., P.O. P. <250.

Saltpond, or **Akemfo,** coast vil., W. Africa, Gold Coast Colony, in 1° W., 18 m. ENE. Cape Coast Castle.

Saltport, place with wharves and jetties, founded by the Manchester Ship Canal Co., near the junction of the riv. Weaver with the canal in Cheshire, Eng.

Salt Range, group of mts., India, in 32° 30′ N., 33° 20′ E., stretching from W. to E.; highest peak 2500 ft. above the sea. This famous range commences in Chel (alt. 3700 ft.), formed by the convergence of three spurs from the Jehlam R., and runs thence due W. in two parallel ridges, culminating in Sakeswar (alt. 5010 ft.). Between these lies a fertile tableland, with Kallar Kahár Lake, right across the Sind Sagar Doáb (separating the Doáb into two divisions), till it reaches the Indus. There, leaving at Kálabágh a narrow channel for the river to pass through, it crosses the Trans-Indus region, till it meets at right angles the Suláiman Range, which runs from N. to S. The beds of salt from which the range is named are solid rock, on the slopes of the tableland, and are the largest known deposits in the world, and practically inexhaustible. The salt is mined at the Mayo mines, Kheura, Warcha, and at Kálabágh. Brown lignite coal of inferior quality is found at Kálabágh, and between Jalápur and Pind Dádan Khán. Other valuable minerals occur.

Salt River, U.S., Kansas, rises in NW. of Trego co., and flows E. to Smoky Hill R.; some miles below Salina, Saline co. Length, 250 m.

Salt River, U.S., Kentucky, rises in Mercer co., flows N. then W. to Ohio R. at West Point; navigable by boats 150 m.

Saltsa, vil., Turkey in Europe, prov. and 24 m. NE. by E. Skutari.

Saltsburg, bor., U.S., Pennsylvania, Indiana co., on Kiskiminetas R., 30 m. E. Pittsburg. P. <1500.

Salt Spring Island, Canada, Brit. Columbia, Vancouver I., in Maple Bay, 60 m. from Victoria; has warm springs.

Salt Springs, settlement, Canada. See **Mount Thom.**

Salt Springs, vil., U.S., Missouri, Saline co., 8 m. W. Marshall; has saline springs. P. <1500.

Saltström, rapid, Norway. See **Saltenfjord.**

Salt Sulphur Springs, vil., in SE. of W. Virginia, Monroe co., 70 m. SE. Charleston; is a pleasant watering-place, encircled by mountains, and much resorted to by invalids. P. < 1500.

Saltville, vil., U.S., Virginia, Washington co., 99 m. E. by N. of SW. corner of the state. Alt. 1724 ft. (R.R.). P. <1500.

Salt Way, Roman road, Eng., from the coast of Hampshire to Old Droitwich, Worcestershire.

Saltwood, par., Eng., Kent, partly in Hythe bor., P.O. P. <750.

Salu, seapt., comm., Spain, Catalonia, prov., dist., and 7 m. WSW. Tarragona, is the port for the town Reus, 4½ m. to the N. P. 8000.

Saluafata, harb., on the N. ct. of Upolu I., Samoan group, S. Pacific, in about 13° 53′ S., 171° 35′ W.

Saluda, riv., U.S., S. Carolina, rises in the Saluda Mts. (on the border of N. Carolina), and flows SSE. then E. till it unites with the Broad R. to form the Congaree at Columbia.

Saludeccio, tn., Italy, Emilia, prov. Forli, 14 m. SSE. Rimini. P. <4000.

Saluggia, vil., Italy, Piedmont, prov. Novara, 20 m. WSW. Vercelli. P. <3000.

Salum, riv., W. ct. of Africa, in French Senegal, S. of Cape Verde, enters the Atlantic by an immense delta of three branches between 13° 50′ and 13° 42′ N.; navigable for 100 m.

Salumbar, tn., India, Rájputána, 120 m. NE. by E. Ahmadábád; has a wall and hills with a fort on the N. P. (1881) 5600.

Sálúr, tn., Brit. India, Madras, dist. and 60 m. N. by W. Vizagapatam. P. 12,900; Hindus, 12,500.

Salurn, vil., Austria, Tirol, 13 m. N. by E. Trent. P. <2000.

Salut, Îles du, small group of isls., French Guiana, 31 m. NW. Cayenne; they are three in number, St. Joseph, Île Royale, and Île du Diable; here is a safe roadstead, and a lighthouse; seat of the convict establishment. On Île Royale is an immense hospital, with lighthouse; climate healthy.

Salux, vil., Switzd., cant. Grisons, 15 m. S. by E. Chur, in Oberhalbstein.

Saluzzo, tn., Italy, Piedmont, prov. and 18 m. N. by W. Cuneo. Saluzzo possesses many ancient buildings, among which are a cathedral (1480–1511) with a lateral bell-tower 210 ft. high, and a communal palace, dated 1462. The town was for 314 years the cap. of the Marquisate of Saluzzo, but was united to the French crown as a fief of Dauphiné in 1529; in 1601 Henri IV. ceded it to Savoy in exchange for Brescia, Gex, Bugey, and Val Romez. Birthplace of the poet Silvio Pellico (1789–1854), and of the printer Bodoni (1740–1813). Alt. 1130–1310 ft. P. 9700.

Saluzzola, tn., Italy, Piedmont, prov. Novara, 18 m. NW. by W. Vercelli.

Salvada, tn., Portugal, Alemtejo, dist. and 7½ m. SE. Beja. P. <4000.

Salvada, mts., Spain. See **Cantabrian Mountains.**

Salvador, tn., Argentine Republic, prov. and 14 m. NE. San Juan. P. <2000.

Salvador (republic 'del Salvador', the old Cuscatlan, 'Land of hamacs,' or 'moving land'), a rectangle on the Pacific slopes of the Cordillera (13°–15° N., 87°–91° W.), between Guatemala (W. riv. Paza, Lake de Guija), Honduras (N. rivs. Sumpul and Torola-Lempa; E. rivs. Pescado, Goascoran), and the Pacific (S. 200 m.), being the smallest of the Central American States (about 190 m. long and 50 m. wide), less than one-tenth of Great Britain. A volcanic zone, stretching from Guatemala to Fonseca Bay, and containing peaks rising to upwards of 7000 ft. (San Vicente-Chicontepec, SE. of Lake Ilopango, 7870 ft.), has built up a plateau (about 1600–3200 ft. high, 30 m. wide) where the system of the riv. Lempa (186 m.) circulates. This river is navigable for a long distance (100 m.) inland. The rocks of Salvador are volcanic (trachytic porphyries and recent lava), covered with their decomposed products (yellow and grey clays), ashes, and scoriæ. There is still great volcanic activity (*ausoles infiernillos*, geysers, mud volcanoes, and lakes). Frequent and terrible earthquakes (San Salvador seven times destroyed). The coast is gradually rising. Silver, antimony, mercury, iron, lead, tin, copper, zinc, coal (La Palma, Cabañas) are all worked. Numerous thermal springs. Salvador is between the 79°–82° isotherms. Rains are moderate on the slopes along the Pacific (May–June, and July–Sept., *veranillo de San Juan;* dry season, with N. winds, Oct.–April), N. winds (*terrales*, Feb.–March) and S. winds (*vendavales*) are stormy or even cyclonic (*chubascos*), on the coast. Mean temp. of the volcanic region, 69°–79° N. In the Lempa valley the climate is hotter and unhealthy. Tropical forests, rich in timber, resins, gums, and medicinal plants, cover the Pacific lands (with some littoral savannas, *sacate*). The Balsam tree (*Myrospermum salvatorense*, known as the Balsam of Peru, whence it was exported in colonial times) gives name to the coast between Acajutla and Libertad (*Costa del Balsamo*). [See **Guatemala.**] In the 16th century Salvador was peopled by Indians known as the Nahua Pipil ('children'); but almost the entire population is now *ladina*, that is, Spanish-speaking and partly of Spanish descent, principally settled in the volcanic fertile regions (littoral is very unhealthy). Lands derived from volcanic rocks are of exceeding fertility, sugar-cane, coffee, cacao, tropical fruits, agave, being abundantly produced. The feeding plant is the maize. Manufactures of cigars (Cojutepeque) and some domestic industries (*rebosos*). A railway goes from the port of Acajutla up to the volcanic plateau branching to the principal towns, and is intended to meet the projected Mexico-Panama line. Acajutla (an open roadstead dangerously exposed on the W. and S.) is the most important port in the N. of Salvador. La Libertad is the central port; Conendin and La Union, the chief in the S. (in Fonseca Bay, well protected). Exports coffee, tobacco, medicinal plants, rice, beans, silver, gold, *rebosos;* imports manufactured articles of food, dress, furniture. (See **Appendix.**) Cap. San Salvador. The Spaniards first entered Salvador in 1524. In 1821 Salvador, united to Guatemala, became independent of Spain, and from 1824 to 1853 was one of the five federated republics of Central America. P. (1778) 117,400; (1886) 650,000; (1892) 800,000. [**J. B. E.**]

Salvages, or **Selvagens,** group of rocky islets in the Atlantic Ocean, 171–178 m. S. Madeira, of which island they are dependencies, in 30°–30° 9′ W., 15° 59′–16° 6′ W.

Salwin, riv., Indo-China, the source of which is unknown; it is generally, and with great probability, identified with the Lu-kiang, which is crossed in about 25° N., 99° E., by the road from Tali-fu (Yünnan) to Bhámo; and this again is identified by some with the Giama-nu-chu, which issues from two lakes in E. Tibet, S. of 32° N., in 96° 15′–30′ E.; others again believing that this may be the headwater of the Iráwadi. After leaving China it flows S. through the Burmese Shan states, and then forms the E. boundary of Karennee and Lower Burma to its confluence with the Thaung-yin (17° 50′ N.). It is here a broad rapid stream, between high mountains, which southward approach, forming narrow gorges. Below the mouth of the Thaung-yin, and 100 m. from the sea, are the great rapids, where during the rains the violence of the current is so great that logs of timber are dashed to pieces. Other rapids occur lower, and numerous islands. Below the confluence of the Yunz-a-lin, on r. bk., it traverses a more open country. At Maulmain the Salwín divides into two branches, one N. the other E. of Bilu-Gywon I. The N. branch is now unnavigable by reason of sandbanks, but the E. or S. branch, which enters the sea at Amherst, where it is 7 m. wide, is navigable, though with difficulty, for the largest vessels to Maulmain. Immense quantities of teak are floated down by the Salwín from the forests of the interior. See map, *Geog. Jour.*, iv. p. 96.

Salza, riv., Austria, N. Styria, rises at foot of Trasien Berg, and flows W. past Mariazell into the Enns. Length about 70 m.

Salza, vil., Ger., gd.-duchy Saxe-Weimar, on the l. bk. of the Ilm R., 14 m. NE. by E. Weimar. P. <3000.

Salzach, riv., Austria, rises in the Hohetauern, Salzburg, flows E. along the northern base of those mountains, then N. past Salzburg, to the Inn, forming for the last 33 m. of its course part of the boundary between Bavaria and Upper Austria; navigable from Hallein, 45 m.

Salzano, vil., Italy, Venetia, prov. and 12 m. WNW. Venice. P. <3000; comm. P. <4000.

Salzbrunn, Ober-, vil., Prussia, Silesia, circle Waldenburg, 45 m. SW. by W. Breslau; much frequented mineral baths (water bottled for export); coal-mines, and manufactures of porcelain and glass. Alt. 1290 ft. P. <4000. **Neu-Salzbrunn,** a vil. to the S., P. <2000. **Nieder-Salzbrunn,** a vil. to the N., P. <2000.

Salzburg, crownland, Austria, surrounded by Lower Austria, Styria, Carinthia, Tirol, and Bavaria. Except a small portion in the extreme N., next Bavaria, it is a mountainous region, made up for the most part of the Salzburg Alps (Hochkönig, 9640 ft.), Tännengebirge (7966 ft.), Dachstein (9830 ft.), and Tauern (Grossvenediger, 12,050 ft.; Wiesbachhorn, 11,740 ft.). The principal stream is the Salzach (its upper valley known as the Pintzgau), which flows E. and N. The climate is continental, and subject to great alternations [see **Austria**]. Nearly 40 per cent. of the surface is given over to pasturage, and nearly as much is covered with forests. Oats, rye, clover, and hay are the chief crops; cattle-breeding the chief occupation. Horses are also reared. Salt, gold, iron, and copper are extracted; the duchy is also rich in marble, peat, and gypsum. The little industry there is is mostly concentrated at Salzburg (*q.v.*), the cap. Other towns, Hallein, St. Johann, Zell, and the famous spas of Gastein and St. Wolfgang. The crownland formed till 1849 a duchy, carved in 1803 out of the territories of the former powerful elector-archbishop of Salzburg. Area, 2761 sq. m. P. (1890) 174,000, nearly all of German race, and Roman Catholics by religion.

Salzburg, tn., Austria, cap. crownland Salzburg, on the Salzach, 73 m. ESE. Munich, 85 m. ENE. Innsbruck; has a cathedral, a lyceum with library, and an episcopal seminary. The Mirabell Palace was an episcopal residence until 1864. Birthplace of Mozart. Alt. 1378 ft. Mean annual temp. (15 yrs.), yr. 46.8° F., Jan. 28.3°, July 65.2°; mean annual rfall. (30 yrs.), 45.59 in. P. 27,200.

Salzburg, Hungary. See **Vizakna.**

Salzderhelden, tn., Prussia, prov. Hanover, circle and 2½ m. SE. Einbeck; has salt-works. P. <2000.

Salzdetfurt, tn., Prussia, prov. Hanover, 7 m. SSE. Hildesheim; has salt-works and a bathing establishment. P. <2000.

Salze, Gross-, vil., Prussia, govt. and 9 m. SSE. Magdeburg, circle Kalbe, with the frequented brine baths of Elmen, and the brine springs supplying the salt-works of Schönebeck. Bed of rock-salt at a depth of 1525 ft.

Salzgitter, tn., Prussia, prov. Hanover, 20 m. ESE. Hildesheim; has salt-works at Liebenhalle. P. <2000.

Salzhemmendorf, or **Hemmendorf,** tn., Prussia, prov. Hanover, circle and 10½ m. ESE. Hameln; mineral springs and bathing establishment. P. <2000.

Salziger See, former lake, Prussia, prov. Saxony, with slightly salt water, 10 m. W. Halle, 4 m. long by 1 m. across; had an underground connection with the Mansfeld copper-mines, in consequence of which it was, in 1894, drained dry by the mine-pumping works.

Salzkammergut ('salt domain'), one of the most beautiful regions of the Austrian Alps, comprising the whole of the lake region of the Traun basin, in the SW. of the crownland of Upper Austria, along with small adjacent parts of Salzburg and Styria, though the name is sometimes applied in a more restricted sense to the salt-yielding portion of this area, namely, the dist. lying N. of the Dachstein, embraced by the SW. loop of the frontier of Upper Austria, along with a small portion of Styria (Alt-Aussee, Grundel-see). The lakes in the N. are Irr- or Zeller-see, Mond-see, Atter- or Kammer-see (the largest, 15.9 sq. m.), Gmunden- (or Traun) see; further S. Fuschel-see and Aber- (or St. Wolfgang) see; and still further S. Hallstätter-see, and to the E. of it Alt-Aussee (the highest, alt. 2325 ft.), and Grundel-see. The three salt-deposits now worked, all of which belong, like the other salt-deposits of the Austrian Alps, to the Upper Trias, are at Hallstätt (worked even by the Celts), Aussee, and Ischl. The salt is produced mainly from brine, partly (at Hallstätt and Aussee) in the form of rock-salt. A large part of the brine is pumped down the Traun valley to Ebensee, where is the largest salt-boiling establishment. Total annual production of salt about 80,000 tons. See **Alps,** SUBDIVISIONS, **III. B. 1.**

Salzkotten, tn., Prussia, prov. Westphalia, 46 m. NW. by W. Kassel, 7½ m. WSW. Paderborn; has salt-works. P. <3000.

Salzschlirf, vil., Prussia, prov. Hesse-Nassau, circle and 9½ m. NW. Fulda; salt-baths. P. <2000.

Salzuflen, tn., Ger., princip. Lippe (Detmold), 17 m. SSW. Minden, 5½ m. SE. Herford; salt-baths. P. <5000.

Salzungen, tn., Ger., duchy Saxe-Meiningen, on the Werra R., 12 m. S. by W. Eisenach; has salt-mines, and is the centre of the salt trade in Thuringia; salt-baths. P. <5000.

Salzwedel, tn., Prussia, prov. Saxony, 48 m. NE. by N. Brunswick, on the (navigable) Jeetze, where it is joined by the Dumme, cap. circle Salzwedel; manufactures damask cloth and chemicals, and has bleachworks; hops are cultivated here. P. (1816) 5600; (1890) 8900 (including **Perver**).

Sama, vil., on the N. frontier of Chile, prov. Tacna, on the riv. Sama, 120 m. ESE. Mollendo.

Samána, tn., India, Punjab, in the native state of Patiála. P. 10,000; Hindus, 2800; Moham. 6900.

Samana, Bahia de, bay, 40 m. long, 10–12 m. wide, in the E. of the isl. of Haiti.

Samana, Cape, at the mouth of the Bay of Samana, in 19° 15′ N., 69° 5′ W.

Samana, Punta, cape, Turkey in Europe, on the Adriatic, in 40° 48′ N., with a lighthouse.

Samanco, bay, Peru, dep. Ancachs, on the coast, in about 9° 15′ S.

Samannud, tn., Lower Egypt. See **Semenud.**

Samar, one of the Philippine Is. (the most NE. of the Visayas), formed by a mountainous insular connection (with the ranges of Curao, Matuginao, Palapa), between the Surigao highlands (Dinagat, Siargao, Mindanao Is.) and the SE. extremity of Luzon (Albay-Buensan); cap. Catbalogan.

Samara, riv. See **Somma.**

Samara, govt., SE. Russia, on l. bk. of lower Volga, has Kazañ on N., Simbirsk and Saratov on W., Ufa and Orenburg on E., and Astrakhañ on S. Deeply cut plateaux in the N., which take the aspect of ranges of hills (Kinel, Sokolii, Sok, Zhegulevy Mts.), reach 1000 ft. and compel the Volga to make its characteristic bend to the E. (Samarskaya Luka). Low and flat steppes in the S. Carboniferous, Zechstein, Triassic, and Cretaceous limestones and marls in N.; Tertiary in S., covered with Post-Tertiary loess, black earth, and lacustrine deposits. The Volga flows for 550 m. along its W. border, receiving the Great Cheremshan, Sok, and Samara, as well as many smaller tribs. Altogether, rapidly desiccating. Forests in N., and fertile prairies in S. Climate severe. Average temp. at Samara, yr. 39°, Jan. 9.3°, July 70.4°; yearly rfall. (18 yrs.), 15.6 in., May–Nov. 11 in. The population, rapidly increased during this century by immigration, consists chiefly of Great Russians, Mordvinians (10 per cent.), Chuvashes (75,000), Tatars (120,000), and Bashkirs (85,000). German colonists—Anabaptists, Moravians, Mennonites, &c.—especially in dists. Novo-Uzeñ and Nikolayevsk. Agriculture carried on everywhere, and grain exported in large quantities. It suffers, however, periodically from draughts, which have lately several times resulted in famines; has oil-yielding plants, tobacco; mustard also cultivated; considerable cattle-breeding. Manufactures on increase—flour-mills, woollen cloth, distilleries. Very active trade, and shipping. Divided into seven dists.: Samara, Bugulma, Buguruslan, Buzuluk, Nikolayevsk, Novo-Uzeñ, and Stavropol. Several villages, Pokrovskaya Sloboda, Ekaterinenstadt, Glushitsa and Alexandrov Gai are populous towns. Area, 58,321 sq. m. P. (1853) 1,388,500; (1882) 2,224,100; (1890) 2,665,300.

Samara, city, Russia, cap. of above govt., on l. bk. of Volga, at the mouth of Samara R., 560 m. by rail SE. of Moscow (*viâ* Ryazhsk, on Ryazañ Rly.). The Trans-Siberian Rly. to Chelyabinsk and Omsk, and a railway to Orenburg, radiate from Samara, near which the Volga is spanned by a grand iron bridge. Samara is a great centre for trade with the Kirghiz Steppe and lower Volga, and is rapidly increasing. P. (1869) 34,500; (1879) 63,400; (1891) 100,300.

Samara, rivs., Russia. **1.** Govts. Kharkov and Ekaterinoslav, l. bk. trib. Dnieper; length, 150 m.; very populous valley. **2.** Left bank trib. middle Volga, rises in S. Urals, flows WNW., receiving Tok and Kinel from right, Bazuluk from left; waters govt. Samara; length, 340 m.

Samara, or **Imam-Samara,** tn., Turkey in Asia, vilayet, sanjak, and 65 m. NW. by N. Bagdad, on the l. bk. of the Tigris. Mean temp. (15 yrs.), yr. 38.3° F., Jan. 6.9°, July 68.2°. P. (Moham.) 2500.

Samarahan, riv., Saráwak, in the residency of Saráwak, connected by a navigable arm with the riv. Saráwak to the W. *Proc. R. G. S.,* 1881, p. 195.

Samaral, native name of Dinner I., Brit. New Guinea; centre of a growing trade with Cooktown, Queensland.

Samarang, tn., Java, on the N. ct., in about 110° 28″ E., 55 m. N. Jokjokarta; is one of the trading centres of the island. Exports sugar, coffee, tobacco, and indigo. Has no port; vessels anchor 1 m. from the shore. During the W. monsoons the sea here is almost impassable. P. 69,000.

Samarès, stn. and bay, Eng., Channel Is., on S. ct. of Jersey, on the Jersey Eastern Rly., 2 m. SE. St. Helier, PMT.O.

Samaria, place named in O. and N. T. See **Sebustieh.**

Samarinda, tn., near the E. ct. Dutch Borneo, in the kgd. of Kutei, on the Mahakkam, a little above the head of the delta of that river. Samarinda is the chief commercial emporium of the kingdom. Coal is mined at Pelarang, 5½ m. distant. The population consists mostly of Bugis from Celebes, the remainder are Chinese and Malays. P. 10,000.

Samarkand, prov., Russian Turkistan, has the Russian provs. Syr-daria and Fergana on the N., Bukhara on the W., the independent Afghan khanates, as also Karategin and Darwaz in the S., the Pamirs on the E.; includes the terr. which formerly was known as Zerafshan dist., *i.e.,* the rich valley of the Zerafshan, which flows W. from the Alai snow-clad peaks in a wide, well-watered, and irrigated valley, thickly peopled by Sarts and Tajiks, with about 15,000 Russians. From 1,800,000 to 2,300,000 quarters of various cereals are grown every year. Extensive vineyards yield about 60,000 tons of grapes, one-tenth of which is used for wine. The cotton plantations yield no less than 520,000 cwts. of raw cotton, to a great extent of American sorts, of which part is cleaned in sixteen factories, and over 80,000 cwt. exported to Russia. The gardens are a special feature of the region, which exports to Russia over 100,000 cwt. of dry fruit; silkworm culture, yielding about 5200 cwt. of silk cocoons. All sorts of domestic industries (cottons, silks, leather, saddlery, &c.) are carried on in the villages and towns. The cap. of the prov. is now connected by a railway with Bukhara, Merv, and the Caspian Sea, and the railway is being continued to Tashkent and Andijan. Divided into four dists.: Samarkand, Jizak, Katta-kurgan, and Khojent. Area, 26,627 sq. m. P. (1892) about 750,000.

Samarkand, tn., Russian Turkistan, cap. of above prov., near the l. bk. of the Zerafshan, 230 m. SW. Tashkend, connected by railway with Bukhara (155 m.) and Uzun-ada, on the Caspian Sea (891 m.). Occupies the seat of *Maskanda,* a city of the times of Alexander the Great. Taken by the Arabs in 643, it became the residence of the Samanides in the 9th to the 11th century, and when Jengiz-khan besieged it in 1219 it is said to have had 110,000 armed men to defend it. Later on, residence of Timur; ruined afterwards by subsequent invasions. The old citadel of Timur and a number of remarkable mosques and medresse, as well as the tomb of Timur, still testify to the past glory of Samarkand. It is now a very animated city, where a brisk trade is carried on with Bukhara, Russia, and other parts of Turkistan. The Russians have built in the W. of the old city their own town, with broad regular streets, adorned with trees, and well irrigated. P. (1834) 8–9000; (1890) 33,900.

Sámarlakota, tn., Brit. India. See **Chámarlakóta.**

Samarovo, or **Samarovskoye,** vil., W. Siberia, govt. and 355 m. NNE. Tobolsk, on r. bk. Irtysh, near its junction with Ob; inundated by the river in summer; fishing; trade in cedar nuts. P. <2000.

Samasata, vil. with rly. stn., India, Baháwalpur, 60 m. S. Múltán.

Samassi, comm., Italy, Sardinia, on the Samassi, prov. and 21 m. NW. by N. Cagliari. P. <3000. The **Samassi R.** flows S. into a lagoon N. of the Gulf of Cagliari.

Samau, mountainous isl., E. Indies, off the SW. ct. of Timor, cut on the E. ct. by a deep bay which divides it into two portions joined by an isthmus; chief village Kurong, on the N. ct. Area about 160 sq. m. P. 2–3000.

Samava, or **Semava,** tn., Turkey in Asia, vilayet and 145 m. SSE. Bagdad, sanjak Hille. P. 4000 (mainly Shiahs).

Samavodeni, market-tn., Bulgaria, circle Trnova. P. <3000.

Sambalpur, tn., Brit. India, Central Provs., cap. dist. Sambalpur, on the l. bk. of the Mahánadí, 140 m. NW. by W. Cuttack. The town has been much improved; has ruins of a fort to the NW. Alt. 451 ft. Mean rfall., yr. 61.7 in., June–Sept. 54.6 in. P. 14,600; Hindus, 12,200.

Sambar, Cape, Dutch Borneo, in the extreme SW.

Sambas, tn., Dutch Borneo, 70 m. W. by S. Kuching; trade in opium. P. 10,000.

Sambas, riv., E. Indies, on the W. ct. of Borneo, flows into the China Sea by a wide mouth, blocked in part by a bar, between 1° 8′ and 1° 12′ N. Length, 90 m.

Sambatikila, tn., French Sudan, Samory states, about 540 m. SSE. Bakel, and 110 m. SE. Kankan.

Sambhal, municip., Brit. India, NW. Provs., dist. Moradábád, 60 m. SE. by E. Meerut, in a cultivated and well-wooded plain; chief manufacture, refined sugar. P. 37,200; Moham. 23,500; Hindus, 13,300.

Sámbhar, large salt lake, India, Rájputána, in states of Jaipur and Jodhpur, between 26° 52′ and 27° 2′ N., and 74° 57′ and 75° 16′ E.; is shallow, with no outlet. Supplies nearly all the chief salt marts of Punjab, NW. Provs., and Central India. It was owned and worked jointly by the Jaipur and Jodhpur governments until 1870, when the British Government took it over. When full it is 20 m. long, 3 to 10 m. broad, and from 1 to 4 ft. deep. The waters evaporate from October to June; in very hot summers the water is only 1 m. long by ½ m. broad.

Sámbhar, tn., India, Rájputána, 37 m. W. Jaipur, at the E. end of Lake Sámbhar. P. (1881) 5600.

Sambiase, comm., Italy, Calabrie, prov. and 18 m. W. by N. Catanzaro; has sulphur springs. P. 8600.

Sambiliung, tn., E. Indies, Borneo, SE. Prov., cap. sultanate Sambiliung, 185 m. NNE. Samarinda, 28 m. from the E. ct. of the island. P. <4000.

Samborombon, Ensenada de, bay, Argentine Republic, on

the E. ct. of Buenos Aires prov., is a large lateral opening of the Rio de la Plata running inland for a distance of 27 m.

Sambourn, par., Eng., Warwickshire, Stratford-on-Avon div., 8½ m. SE. Bromsgrove, 1 m. NW. Coughton stn. P. <500.

Sambov, Great and **Small,** vils., Russia, govt. and 80 m. SE. Chernigov, dist. and 13 m. from Konotop. P. 5000.

Sambre, ancient *Sabis*, riv. of France and Belgium, rises in the French dep. Aisne, SW. Avesnes, flows ENE. between the basins of the Scheldt and Oise, and through the Belgian provs. Hainaut and Namur, and joins the Maas at Namur; total course, 100 m. Affluents, the Helpe, Heure, and Orneau. It is navigable for barges the greater part of its course. In Belgium the Sambre communicates by canals with the Senne and Scheldt, and in France with the Oise. Under Napoleon I. Sambre-et-Meuse was a dep. watered by those rivers, and now forming the prov. Namur, with a part of Belgian Luxembourg. Length 118 m., of which 53 m. are in France; area of basin, 1028 sq. m.; discharge, 460 cubic ft. per second.

Sambro, vil., Canada, Nova Scotia, Halifax co., on the S. ct., 10 m. S. Halifax, 4 m. NW. **Cape Sambro.** P. <1500.

Sambrook, eccles. par., Eng., Salop, div. and 4 m. NW. by N. Newport, 15⅞ m. ENE. Shrewsbury, P.O. P. <500.

Sambu, small riv., Colombia, dep. Panama, flows NNE. then W. to the Pacific. Length about 90 m.

Sambu, vil., W. Africa, Upper Guinea, in about 9° 28′ N., 0° 22′ E.

Sambuca, comm., Sicily, prov. Girgenti, 35 m. SSW. Palermo. P. 9400.

Sambuca Pistojese, comm., Italy, Tuscany, prov. Florence, circle and 13⅓ m. NNE. Pistoja. P. <5000.

Sambue, vil., Ger. E. Africa, Usaramo, 67 m. SW. by W. Dar-es-Salaam.

Samburu, or **Sambuni,** co., in the Galla region, E. Africa, in about 2° 50′–3° 45′ N., 37°–38° E. **Lake Samburu,** or **Shambara,** which is marked conjecturally in Joseph Thomson's *Through Masai-land*, is a lake about 100 m. long, crossed in the S. by 3° N., and in the E. by 37° E.

Sam-chao, tn., China, prov. Kwangtung, on the l. bk. of Si-kiang, 25 m. SW. by W. Canton.

Samden-kansa, Samtyn-kansyr, or **Nin-chen-Tangla,** chain of mts., Tibet, S. and E. Lake Tengri-Nor, in about 30°–31° N., 90°–92° E., trending NE. Two passes have been traversed by travellers, the Dam-Margan-la from Lhasa to Lake Tengri, and the Shangshung-la (E. of Tengri-Nor), on the highroad by which the Mongol pilgrim caravans go to the holy city.

Samer, vil., France, dep. Pas-de-Calais, arr. and 9 m. SE. Boulogne. P. <2000.

Sameswari, riv., Brit. India, Assam, in the Gáro Hills, rises near Turá, flows E. then S. into the Kanks R.; has extensive coal-beds on both banks.

Samfara, Sudan. See **Zamfara.**

Samhar, or **Mudun,** coast dist. of Africa, on the Red Sea, between Massaua and the coast ranges of Abyssinia.

Samland, dist., Prussia, prov. E. Prussia, between the Baltic and Kurisches Haff on the N., and the Frisches Haff and riv. Pregel on the S.; rich in amber.

Samlesbury (samz'beri), par., Eng., Lancashire, included in the parl. bor. and 3½ m. E. Preston; 4379 ac. P. <1000.

Samnan, Persia. See **Semnan.**

Samo, dist., French Senegal, Rivières du Sud, forms the peninsula which closes the estuary of the Melakore on the S., and bounds the English possessions of Sierra Leone on the S.

Samoa, group of volcanic islands in the middle of the Pacific, stretch from NW. to SE., between 13⅓° and 14½° S., and between 168° and 173° W., about 400 m. NE. of Fiji, and 2600 m. from Sydney, in Australia. They number 10 islands besides rocks and islets, four of which—Savaii, Upolu, Tutuila, and Manua—are of considerable size. The area of the group is about 9150 sq. m. The principal islands are, for the most part, surrounded by barrier reefs; but there is a splendid harbour at Pangopango (Tutuila), and good anchorage at Apia (Upolu). The surface is mountainous, reaching 4300 ft., and forming in many places steep descents to the sea. The mountains are well timbered, and the islands well watered. The climate is fairly good, ranging (daily) between 80° and 93° F., the heat being greatly tempered by trade-winds. Between November and April is the rainy season, when hurricanes of destructive violence sometimes occur (*e.g.*, March 1889). There are several extinct volcanoes, and volcanic activity has not yet died out. Earthquake tremors are frequent. Fruits (coco-nut, banana, pine-apple, guava, mango, lime, orange, &c.), sugar, cotton, coffee, yams, bread-fruit, sweet potatoes, maize, melons, &c., are the principal vegetable products. The exports consist almost entirely of copra, but amount to less than £40,000 annually. The imports about double the exports in value. The people, who are Christians, number about 35,000 in all. There is the keenest rivalry between the Germans, the British, and the Americans; but nominally the supreme authority is vested in a native king. The Samoans are of the Polynesian race, this group being regarded as the focus whence that race has spread over the Pacific. The Samoa Is. were first described by Bougainville, who visited them in 1768, and gave them the name of **Navigators Is.,** which is now but little used. The English novelist R. L. Stevenson lived on Upolu, and died there in 1894. See G. A. Turner in *Scot. Geog. Mag.*, 1889, pp. 235, &c., with map (1: 840,000).

Samoa Hafen, port, Ger. New Guinea, in 7° 0′ S., 147° 4′ E.

Samoëns, vil., France, dep. Haute-Savoie, arr. Bonneville, 30 m. ESE. Geneva; has mineral springs. P. <2000.

Samoilovka, vil., Russia, govt. and 105 m. WSW. Saratov, on Tersa R.; entrepôt for corn trade. P. 11,300.

Samori's (or **Samory's**) **Empire,** W. Africa. See **Wasulu.**

Samos, tn., Greece, on the E. ct. of Cephalonia I. P. (comm.) <5000.

Samos, isl., Greek Archipelago, about two-thirds the size of Anglesey, off the W. ct. of Asia Minor, on the S. side of the Gulf of Scala-Nuova, 45 m. W. Smyrna. The valleys between the mountains are exceedingly fertile, and produce wood, carob-beans, cereals, mastic, olive-oil, &c., and good wine is made in the neighbourhood of Vathy. The island abounds in mines of zinc and argentiferous lead, and has also ochre, iron ore, load-stone, emery, and fine white marble. The ports are Vathy, Tigani, and Karlovasi. Exports amount approximately to £200,000. Samos is a self-governing principality, under the suzerainty of the Porte, and administered by a prince of the Sultan's nomination, assisted by four elective senators. Peopled by the Ionians, and forming part of the Ionian confederation, Samos passed successively into the power of the Persians, Athenians, Lacedæmonians, and Romans. The ancient town of Samos, now Tigani, on SE. ct., was famous for its wealth in all the neighbouring dists. The existing ruins consist of part of the walls, the theatre, aqueduct, and the foundations of the Temple of Juno. Later, Samos passed into the hands of the Turks, and was one of the first to take part in the War of Independence, 1821; self-government was granted to the island, 1832. Climate dry and bracing. Length, E. to W., 27 m.; greatest breadth, 10 m.; estimated area about 190 sq. m. P. (1828) 27,100; (1879) 37,700; (about 1890) 48,500; nearly all Orthodox Greeks (Cuinet).

Samos, comm., Spain, Galicia, prov. and 24 m. SSE. Lugo, dist. Sarria. P. 6900.

Samosata, Turkey in Asia. See **Samsat.**

Samothrace (properly **Samothraki**), isl. belonging to Turkey, vilayet Jezairi-Bahri-Sefid, in the NE. of the Ægean Sea, 24 m. from the coast of Macedonia, about one-fourth of the size of Anglesey. The main part of the island is formed by Mount Phengari (alt. 5400 ft.); no port or landing-place. The cap., Khora, is in the middle of the island. At the ancient town of Samothrace, on the N. ct., ancient monuments and the famous Niké Apteros have been discovered. The island was celebrated in early times as being the seat of the mysterious cult of the Kabeiri. In the 14th and 15th centuries it was held by the Genoese, and was taken by Mohammed II., 1462; was devastated by the Turks in the War of Independence, 1821. Length, 18½ m.; breadth, 8½ m.; area, 68 sq. m. P. 4600, almost entirely Greeks (Cuinet).

Samotschin, tn., Prussia, prov. Posen, 37 m. W. by S. Bromberg. P. <3000.

Samovodeni, tn., Bulgaria, on the l. bk. of the Jantra, prov. and 5 m. NW. by N. Trnova. P. <3000.

Samoyedes, Ural-Altaic tribe, occupying a wide terr. in Siberia, on the Ob, Yenisei, and their tribs., from the Altais to Arctic Ocean. Since they have been driven by Turkish immigrants from the S. from their former abodes in the Altai they are dying out. Divided into two branches—one in N. Siberia (Yurak, Tavgi, and Ostyak Samoyedes) who may number about 11,000; and the southern Somoyedes (including the Kamasins, Kaibals, Motors, Beltires, Karagases, and Ob Samoyedes), who represent now but very small stems (150 to 700 souls), living on the tribs. of the upper Yenisei, the Beltires and the Ob Samoyedes only attaining respectively 3100 and 6500 souls. Their total numbers are estimated at 22,000.

Sampanmangio, the northernmost point of Brit. N. Borneo, in 116° 45′ E.

Sampeyre, tn., Italy, Piedmont, prov. Turin, on the Varaita, 15 m. W. by S. Saluzzo; white marble is quarried here. P. <3000.

Sandwich, tn., Canada, Ontario, Essex co., on the l. bk. of the riv. Detroit, 3 m. SW. Windsor. P.<1500.

Sandwich, mun. bor. (since time of Edward III.), till 1885 also a parl. bor., Cinque port, market-tn., and decayed seapt., Eng., Kent, Thanet div., 4 m. N. Deal, in the diocese of Canterbury, near the mouth of the Stour, with stn. on branch of SE. R. Anciently a most important port; from the time of William I. to that of Richard II. the chief naval port; has declined in consequence of the silting up of its harbour. The town quay can still be reached, however, at high water ordinary springs by vessels drawing 12 ft. Exports hops, malt, timber, and corn. The town has many curious remains of the Middle Ages. Considerable portions of its ancient walls still survive, now forming a promenade. A short distance off are the ruins of the old Roman fortress of *Rutupiæ*, now Richborough. Market-days, W. and each alternate M. P. (1891)<3000.

Sandwich, manufacturing city, U.S., Illinois, Dekalb co., 55 m. W. by S. Chicago. P.<3000.

Sandwich, tn., U.S., Massachusetts, Barnstable co., 24 m. ENE. New Bedford; manufactures glass. Alt. 13 ft. (R.R.). P.<2000.

Sandwich Harbour, called by the Portuguese **Porto d'Ilheo,** by the natives **Anixab,** inlet, W. Africa, Great Namaqua-land, just S. of the Tropic of Capricorn. Fisheries. Formerly termination of the Khuisib Wadi, which is now separated from the coast here by sand-dunes 150 ft. high.

Sandwich Island, New Hebrides. See **Vate.**

Sandwich Island, Bismarck Archipelago, crossed by 3° 0′ S., 150° 50′ E.

Sandwich Islands, or **Hawaiian Archipelago,** a group in the E. Pacific, consisting of eight larger—Hawaii, Maui, Oahu, Kauai, Molokai, Lauai, Kahulaui, and Niihau—and four smaller ones, stretches NW. to SE. between 18½°–22½° N. and 154½°–160½° W., a little more than 2000 m. from the W. ct. of Mexico. The islands are of volcanic origin, and contain volcanoes, active and extinct, of gigantic size (see **Hawaii, Maui,** &c.). Nearly all the islands are in part surrounded by reefs, and all are mountainous. The climate is agreeable, the average yearly temp. being 74.5° F., with summer mean of 78°, and winter mean of 72.5°. Rainfall about 50 in., but the E. islands get less than those in the W. During nine months of the year the NE. trade-winds blow. Leprosy is the most notorious of the native diseases (see **Molokai**); but smallpox, measles, and other diseases introduced by white visitors have at times scourged the islands. The higher slopes of the mountains are generally wooded, the lower afford grass for cattle. Chief industries, growing sugar, rice, and coffee, besides bananas, and other tropical fruit and vegetables (taro, &c.). Commerce is almost confined to the one good port of the group, Honolulu (*q.v.*), and amounts to nearly four millions sterling, the exports, chiefly sugar, to the United States, with rice, hides, wool, tallow, &c., constituting about two-thirds of the total. The imports consist of textiles, provisions, timber, machinery, metals, spirits, &c. The islands are touched at by vessels plying between America and Australia, and were formerly much resorted to by whalers. Of the population only 40,000 in all are of Polynesian descent, with Tahitian affinities in speech and former religion. The largest sections of the remainder of the population are of Chinese, Japanese, and Portuguese descent. The Chinese in 1866 numbered 1200, and by July 1893 had increased to upwards of 15,500. Their occupations are various, but they are not generally found as plantation labourers. Portuguese from Madeira and the Azores have immigrated into the islands since 1878 and worked on the

plantations, and now they number above 12,000; but latterly they have been declining, being ousted by the still cheaper labour of the Japanese, whose numbers have increased from 116 in 1884, to nearly 21,000 in July 1893. The more influential positions are held in a large measure by Americans, English, and Germans. The islands were ruled by a king or queen, assisted by two representative houses; but in 1893 the sovereign was deposed and a republic constituted. The group, of which the native name is Hawaii, was rediscovered by Captain Cook in 1778, and he was killed by the natives in the year following. At the present time the foreign influence of greatest weight in the Sandwich Islands is that of the United States, which indeed exercises a virtual, though not an actual, protectorate over them. Total area, 6600 sq. m. P. of entire group 90,000. See *Scot. Geog. Mag.*, 1893, pp. 8, &c.

Sandwick, par., Scot., Orkney Is., on W. ct. of Pomona, 5 m. N. Stromness, P.O. · Alt. 80 ft. Mean annual rfall. (1866–80), 37.79 in. 11,827 ac. P. (including part of Mainland I.) <1500.

San Francisco, city and seapt., U.S., California, situated at the NE. end of a penin. 6–7 m. wide separating San F. Bay from the Pacific Ocean; connected by ferry-boat with Oakland, on E. side of the bay. The city is regularly laid out, with broad streets which cross each other at right angles. In the residential portion the buildings are of wood; in the business portion, of stone and brick. San F. is the terminus of the S. Pacific Rly. Regular lines of ocean steamers run to Japan, Australia, Panama, Mexico, Victoria, and ports in Oregon and California, and light steamers to various ports in the bay. Its harbour has 4500 ft. of sea-wall, with a depth alongside of 22–28 ft., besides numerous piers; average fall and rise of tide, 5½ ft. There is a dry dock 483 ft. long, with a depth on sill of 22.8 ft., besides two floating docks and a hydraulic dock. San F. was settled in 1776 as a Spanish military station and a Franciscan mission. It made little progress until the gold discoveries of 1848. Since then its growth has been most rapid. Manufactures include iron, glass, woollen goods, cable and wire, flour, mining machinery, cordage, sugar, &c. Besides its vast mining interests, a great traffic has grown up in grain and fruit. San F. ranks third among all the ports of the Union in the total value of its foreign commerce, which amounts to about £50,000,000. The principal exports are wheat and flour, tinned salmon and fruits, barley, timber, wine and brandy, quicksilver, &c. Many mines of gold, silver, quicksilver, coal, and various other mineral deposits, as well as vineyards, farms, and ranches throughout the whole of the western region of the U.S., are owned here. The most important educational institutions near San F. are the university of California at Berkeley (*q.v.*), and the Leland Stanford university at Palo Alto. In the city are numerous public and special schools, various medical colleges, charitable institutions and hospitals, and several libraries. The Golden Gate Park, W. of the city, covers more than 1000 ac. The Laurel Hill and Odd Fellows cemeteries are fine. The inhabitants of San F. include many nationalities, amongst which are about 18,000 Chinese, who occupy a separate quarter. Mean temp. (29 yrs.), yr. 55.6° F., Jan. 49.7°, Aug. 58.5°; annual rfall. 24.08 in. P. (1846) 600; (1848) 1000; (1852) 34,900; (1870) 149,500; (1880) 234,000; (1890) 299,000.

San Francisco, bay, U.S., California, is the finest bay on the Pacific coast, between 37° 48′ and 38° 10′ N., 122° and 122° 30′ W., connected with the Pacific Ocean by a strait, the Golden Gate, 1 m. wide. It extends SSW. for about 40 m., and is 12 m. across in its widest part, separated from the Pacific by a penin. 6–15 m. wide, on the N. extremity of which is the city of San F. The shores of the Golden Gate are bold and rocky, rising on the N. to nearly 200 ft.; on the S. the hills are sand-covered, 300–400 ft. high. The bar has a depth of 30 ft. of water at low tide; within it is much deeper. There are several islands, including Alcatraz, 4 m. from the entrance, Angel, and Yerba Buena, or Goat I. The entrance is defended by fortifications on Alcatraz I. and Fort Point, S. of the Golden Gate. The bay is connected N. by a strait, 3 m. wide, with San Pablo Bay, about 10 m. across, and nearly circular, and this again is connected E. by Carquinez Strait, 1 m. wide, with Suisun Bay, 8 m. long, and 4 m. wide. Both these bays are deep, but Carquinez Strait has only 16 ft. of water at low tide.

San Francisco de la Aguada, vil., isl. Porto Rico, W. ct., 68 m. W. by S. San Juan. P.<2000.

San José del Cabo, comm., Mexico, Lower California, on the S. ct., 85 m. SSE. La Paz, in about 23° 2′ N. P.<4000.

San José de los Ramos, comm., Cuba, prov. and 56 m. ESE. Matanzas. P. 9000.

San José Ignacio, cape, Uruguay, on the Atlantic, in 34° 51′ S., 54° 38′ W.; has a lighthouse.

San José Peninsula, another name of Valdes Penin., Argentine Republic.

Sánjú, tn., Eastern Turkistan, 103 m. SE. Yarkand, on the Sánjú or Sarikia R., which flows N. from the **Sánjú Pass,** the route of the Indian caravans, Kuenluen Mts. Sánjú in 37° 13′ N., 78° 27′ E.; Sánjú Pass in about 36° 42′ N., 78° 21′ E. Alt. of Sánjú, 6070 ft.; of the Pass, 16,700 ft. (*Jour. R. G. S.,* 1878, pp. 180–81, map, p. 173). P. (with oasis) 35,000.

San Juan, cape, W. ct. of Africa, to the N. of Bay of Corisco, in 1° 10′ N.

San Juan, tn., Argentine Republic, cap. prov. San Juan, 95 m. N. Mendoza; residence of the Bishop of Cuyo. Alt. 2172 ft. Mean annual rfall. (6 yrs.), 2.85 in., April–Sept. 0.4 in.

San Juan, prov., Argentine Republic, nearly three-fourths of the size of England, separated from Chile on the W. by the Andes, from the Cerro del Cobre in the N. to Aconcagua in the S. (about 28½°–32½° S.). [**Andes, E.**] The country is partly mountainous and partly covered by waterless, frequently sandy, plains. Besides the main chain of the Andes, the sub-Andean chains of the Sierra del Tontal, Sierra de la Huerta (6600 ft.), and others diversify the surface. In the extreme SE. sandy plains occupy an area of 965 sq. m., and here also lies the large lagoon of Huanacache. The principal rivers are the San Juan, the Jachal, and the Bermejo, all flowing S. or SE. The country is rich in minerals, but mining industry is not greatly developed; gold, silver, and copper are mined, and deposits of coal have been found. The mineral springs, chiefly sulphureous, are used in the baths at Laja, at Pismanta, and at Florida, near San Juan. The dry climate is against the cultivation of the soil, excepting near the rivers, where artificial irrigation is used, and where maize, wheat, lucerne, fruits, and grapes are grown. The wine of this prov. is esteemed. Agriculture is the chief industry. The prov. has only one railway, from San Juan to Mendoza, 45 m. long. Length of prov., N. to S., 370 m.; area, 36,649 sq. m. Estimated P. (1889) 102,400.

San Juan, riv., Central America, republic Nicaragua, forming the outlet of the Lake of Nicaragua into the Caribbean Sea, which it enters at the port of San Juan, in 10° 54′ N. Course eastward. Length about 100 m. Its current is gentle, but in its lower course impeded by short rapids. Near the coast it sends off several branches, the chief being the Colorado, which is of importance in connection with the scheme for uniting the Atlantic and Pacific Oceans by a ship-canal. See **Nicaragua.**

San Juan, riv., Colombia, Cauca, flows W., S., and again W., entering the Pacific by a delta just N. of 4° N.

San Juan, vil., Colombia, terr. Caqueta, on the Atabapo, 440 m. E. by S. Bogotá.

San Juan, vil., in the S. of Paraguay, on the Panama, in 55° 57′ W.

San Juan, fortified tn., cap. isl. of Porto Rico, N. ct., in 66° 4′ W.; lighthouse. San Juan is the chief port of the island, and one of the best in the W. Indies, but its only communication with the sea is by a winding and difficult channel. The basin of the port is prolonged W. by a long natural dike, at the end of which is the town. Anchorage very good. Mean temp. (12 yrs., 1874–85), yr. 80.7° F., Feb. 76.3°, Aug. 83.5°; annual rfall. (9 yrs.), 56 in. P. 26,400.

San Juan, vil., Spain, Murcia, prov. and in the vicinity of Alicante. P. (comm.)<4000.

San Lorenzo de la Muga, or **Muga,** tn., Spain, Catalonia, prov. and 24 m. N. Gerona; is an important strategic point, the scene of several battles during the wars of the Revolution. The old walls are in a good state of preservation. P. <2000.

Sanlúcar, comm., Spain, prov. and 11 m. W. Seville. The neighbouring dist., the Arabian *Aljarafe,* produces olives, fruit, and the vine. P. <5000.

Sanlúcar de Barrameda, the Roman *Ebora,* seapt., Spain, prov. Cadiz, at the mouth of the Guadalquivir, l. bk.; has saltworks; exports wine, salt, oranges. Sanlúcar de Barrameda is a summer residence and sea-bathing resort of the inhabitants of Seville, Xeres, and Cadiz. Under the Arabs it was the shipping port for the valley of the Guadalquivir. Magellan set out from here on his voyage round the world, 1519. P. 22,700.

Sanlúcar de Guadiana, comm., Spain, prov. and 33 m. NW. by W. Huelva, on the l. bk. of the Guadiana; has a ferruginous mineral spring and baths. P. <2000

San Lucas Cabo, cape, Mexico, Lower California, on the S. ct., in about 22° 52′ N.

San Lucido, tn. and small port, Italy, Calabrie, prov. Cozenza, 4½ m. S. Paola, on the Tyrrhenian Sea. P. <3000.

San Luis, prov., in the middle of the Argentine Republic, between Mendoza (W.) and the S. half of Córdoba (E.), about three-fifths of the size of England. The country is mountainous (Sierra de San Luis up to 6500 ft.) in the N., and flat and arid in the S., where are pampas. The principal streams are the Rio Quinto (see **Córdoba**) and the Desaguadero, which separates the provs. San Luis and Mendoza. Agriculture is carried on by the aid of irrigation; chief products, maize, lucerne, and wheat. The chief industry is the working of gold and copper mines, which abound in the sierra. There exist also plumbago, sulphur, iron pyrites, lead, copper, salt, porcelain clay, and galena. Gold-washings exist, notably at Carolina, Los Cerritos, Blancos, Cañada Honda, Tierras Negras, Arenilla, Paso del Rey, and Carpa. In the vicinity of San Francisco and Rincon gold is found among the copper deposits. The prov. is traversed by the Andean and the Pacific Rlys. The two towns are San Luis (the cap.) and Villa Mercedes. Length, N. to S., 95 m.; breadth, 102–134 m.; area, 29,313 sq. m. P. (1888) 76,500.

San Luis, tn., Argentine Republic, cap. state San Luis, 145 m. E. by S. Mendoza, founded 1597. Alt. 2490 ft. Mean annual temp. (3½ yrs., 1874–77), yr. 61.7° F., Jan. 76.5°, July 48.6°; mean rfall., yr. 22.9 in., April-Sept. 3.5 in.

Santa Cruz, or **Queen Charlotte Islands,** group of isls., Melanesia, stretching SSE. and NNW., in the outer part of the New Hebrides, as far N. as the Solomon Is., between 8° 32′ and 11° 40′ S., and 165° 38′–168° 0′ E. The group is of volcanic formation, one of the islets, Tinakula or Tenakoro, is always in eruption. The group contains seven principal islands: Motuiti or Kennedy, Duff or Wilson, Tenakoro or Tinakula, Indeni or Santa Cruz, Lord Howe, Tapua, and Vanikoro or La Pérouse, all mountainous, reaching 3300 ft. Round the islands in the SE., besides the coast reefs, are large barrier reefs, but near other islands the reefs are rare; climate moist. The NW. monsoons, which prevail from November to April, bring rain and storms. The Melanesian is the prevailing type, but is largely mixed with the Polynesian race. Mendana discovered the Santa Cruz group in 1595, and died here; it was visited about two centuries later by Carteret, who called it the Queen Charlotte Is.; in 1788 La Pérouse was wrecked off Vanikoro. On islands of this group Bishop Patteson and Commodore Goodenough were murdered, the former in 1871, the latter in 1875. Total area, 360 sq. m. Estimated P. 5000.

Santa Cruz, vil., Mexico, state of Guanajuato, 12½ m. WNW. Celaya. P. 7200.

Santa Cruz, city and port, U.S., California, cap. co., on Monterey Bay, 60 m. S. by E. San Francisco; is a summer resort. P. 5600.

Santa Cruz, isl., U.S., California, 34° N., 18 m. off the coast.

Santa Cruz, or **Ste. Croix,** Danish isl., W. Indies, off the SE. of Porto Rico, crossed by 65° W. The principal ports are Frederikstadt (P. <4000) and Christianstad, the cap. (P. <5000). The highest point is 1010 ft. high. Discovered by Columbus on his second voyage, Santa Cruz was first occupied by the Spanish, then by English adventurers and French buccaneers. The island was ceded by France to the Danish West India Company by the treaty of 1733, but was occupied by the English from 1807 to 1815; English is the language still used here. Length 23 to 25 m., by 6 m. across the widest part; area, 84 sq. m. Mean temp. (9 yrs., 1877–85), yr. 80.9° F., Feb. 77.9°, Aug. 83.8°; mean annual rfall. (22 yrs.), 44.60 in. P. (1880) 18,400.

Santa Fé, prov., Argentine Republic, about the size of England, bounded N. by govt. of Chaco, S. by Buenos Aires, E. by the Paraná R., cap. Santa Fé. This prov., which is an extension of the Gran Chaco, is flat, and has several brackish lagoons, and a few rivers (Salado, Carcaraña, &c.) rising in the mountains to the W.; soil very fertile, generally composed of a rich black earth 1 to 4 ft. in depth; chief industries, agriculture and cattle-breeding; principal vegetable products, wheat, maize, and flax. It is to this prov. that the immense increase of the wheat area of the Republic since about 1880 chiefly belongs; no minerals. Rosario is the chief port; of less importance are Santa Fé, San Lorenzo, San Geronimo, and Helvecia. The prov. has a good network of railways; immigration is active, especially of Italians. In this prov. are settled (10 m. from Palacios, between Rosario and Buenos Aires) the Jews whom Baron Hirsch brought from Russia in 1893–94. See **Argentine Republic,** table.

Santa Fé, tn., Argentine Republic, cap. state Santa Fé, on the r. bk. of the Paraná, 255 m. NW. by N. Buenos Aires. Principal industries, cultivation of fruit-trees, cattle-breeding, and wood-clearing; seat of a Jesuit college; the principal edifice, the Cabildo, served for the reunion of the Constitutional Congress of 1852, and the Convention of 1860; its port is Colastiné. P. 15,100.

Santa Fé, comm., Mexico, state of and 10 m. WSW. Mexico. P. <3000.

Santa Fe, city, U.S., cap. of New Mexico and of Santa Fe co., 196 m. SE. by E. from the NW. corner of the terr. Santa Fe is a Roman Catholic archiepiscopal see, and the headquarters of the military dist. Within the town is Fort Marcy. Santa Fe was formerly a populous Indian pueblo; has been the cap. of New Mexico since 1640, and its trade is now promoted by railway connection with the E. and S. by means of the Atchison, Topeka, and Santa Fe Rivs., and with the N. by the Denver and Rio Grande Rivs. Alt. 6937 ft. (R.R.); alt. signal station, 6862 ft. (U.S. Signal Office). Mean temp. (33 yrs.), yr. 49.6° F., Jan. 28.3°, July 70.4°; rfall., yr. 14.69 in., July–Aug. 5.58 in. P. 6200.

Santa Fé, comm., Spain, Andalusia, prov. and 6 m. W. Granada. The town was built in 80 days by the army of Queen Isabella, after the famous siege of Granada, 1491. Was partly destroyed by an earthquake, 1806. P. 5100.

Santa Marta, seapt. tn., Colombia, Magdalena, 110 m. NE. by E. Cartagena, on the coast, in about 74° 10′ W.; has a fine cathedral. The Morro fortress has a small fixed light. Santa Marta is called 'the pearl of America,' from the beauty of its surroundings; but its climate is very hot, and unhealthy during part of the year. Suffered from an earthquake, 1834. An old Spanish colony, founded in 1525, it was frequently besieged, pillaged, and destroyed by the buccaneers and by Indians during the 16th and 17th centuries; *e.g.*, by Drake in 1596. P. 2000; (including dist.) 8000.

Santa Marta, tn., Spain, Estremadura, prov. and 26 m. SE. Badajoz. P.<4000.

Santa Marta, Cienaga de, lagoon, Colombia, on E. shore of the delta of the Magdalena, with which it is connected by several bayous or caños. The Boca de Cienaga connects the brackish warm waters of the lagoon with the Caribbean Sea. The lagoon, dotted with islets, is 22 m. long, by 15 m. broad; area, 309 sq. m.

Santa Marta, Sierra Nevada de, mt. group, Colombia, state of Magdalena, near the Caribbean Sea, which washes its N. cliffs. Almost entirely isolated from the Colombian Andes, it is surrounded by the delta and marshy plains of the lower Magdalena on the W. and S., and separated on the E. from the Sierra de Perija (on the W. of Lake Maracaibo) by the valleys of the Rio Cesar and Rio Hacha. Its crest is in two ridges enclosing an almond-shaped valley, at the height of about 14,000 ft. Alt. 17,400 ft. (Simons). The group extends N. and S. about 110 m., and E. and W. 120 m. See *Proc. R. G. S.* (1879), p. 689, with map; and (1881) pp. 705–723, with map; W. Sievers, *Reise in der Sierra Nevada de Santa Marta*, Leipzig (1887).

Santa Monica, city and watering-place, U.S., California, on a beautiful sea-beach, in 34° N., co. and 14 m. W. by S. Los Angeles. The harbour is entirely unprotected from the sea; 28 ft. deep alongside at low water; is a tourist resort. Mean temp. (6 yrs.), yr. 63.5° F., Jan. 53.6°, July 71.7°; rfall. (8 yrs.), 15.47 in., May–Oct. only 1.36 in. P.<2000.

Santa Monica, range of mts., U.S., California, E. and W., N. of Santa Monica Bay.

Sant' Ampoglio, Capo di, cape, Italy, in the NW., about 8 m. E. of the French frontier.

Santana, vil., Colombia. See **Santa Ana.**

Santander, dep., Colombia, NE. frontier, cap. Bucaramanga.

Santander, or **Rio de Jimenez,** riv., Mexico, state of Tamaulipas, is formed by several streams from the E. slope of the Sierra Madre, and flows E. with a N. loop and enters the Gulf of Mexico, at the Barra de Santander or Soto la Marina, a little S. of 24° N.

Santander, the Roman *Portus Blendium*, city, Spain, Old Castille, cap. prov. Santander, 47 m. WNW. Bilbao; seat of an archbishop. The city is divided into two parts, the upper and the lower town. In the former is the cathedral, in the Pointed Style. The lower town is more modern, and contains the principal streets and port. A new quay has been constructed in deep water, so that vessels of any tonnage can load and unload; also a dry dock, 434½ ft. long, and 57½ ft. wide at entrance. Moreover, a morass beside the estuary has been drained and laid out with harbour works and warehouse sites; 34.4 ft. deep in passage to piers at ordinary spring tides high water, 18 ft. low water. Depth of water alongside piers at low water ordinary spring tides, nil to 9.8 ft. Manufactures tobacco, cigars, paper, &c. Imports amount to two and a half millions sterling. The exports—flour, wine, and food stuffs—amount to about one and a half million sterling. Nearly one-half of the aggregate trade is carried on with the Spanish colonies and S. America. England has one-sixth, and France about the same. The climate is a sort of perpetual spring. One mile away, on the N. ct., is Sardinero, frequented in the summer by the people of Madrid for sea-bathing. Mean temp. (15 yrs.), yr. 57.2° F., Jan. 48.4°, Aug. 67.4°. P. 41,800.

Santiago (in proper Portuguese spelling **São Thiago**), the most important of the Cape Verde Is., in SE. of the group. Contains the cap., Villa Praia. Area, 49 sq. m.

Santiago, or **Santiago de Chile,** the cap. city of Chile, and cap. prov. Santiago, on the Mapocho, an affluent of the Maipo, 60 m. ESE. Valparaiso, with which it has been connected by rail since 1863; lat. of new observatory 33° 26′ 42″ S., long. 70° 41′ 34″ W. It is situated amidst a group of hills in a large and fertile plain, the rock of Santa Lucia, which rises up in the middle of the town, now forming a charming park. The Mapocho, which traverses the town from E. to W., though an insignificant stream in summer, was formerly turbulent and at times even dangerous in winter, but its canalisation was taken in hand some years ago. Houses mostly of one storey, but substantially built, in wide streets, on account of the frequency of earthquakes, from which nearly all the public buildings bear marks of injury. In the central square (*Plaza Mayor*) are the cathedral (archiepiscopal see), the palace of government, prison, court-house, and a large fountain, whence the city is mostly supplied with water. Santiago is also the seat of a university, a special school of medicine, military school, institute of agriculture, and national institute, a mint, &c. Convents are numerous and splendid; but one Jesuits' college has been converted into a national college, and another is used for the public printing-office and library, the latter comprising many thousand volumes and curious MSS. On Dec. 8, 1883, the church of La Compania was burned by accident, when 2000 persons, mostly females, perished. Santiago was founded in 1541 by Pedro de Valdivia, and first named Santiago de la Nueva Estremadura, in honour of the patron saint of Spain and the prov. that gave birth to the founder. Alt. (principal square), 1840 ft. Mean temp. (21 yrs., 1860–81), yr. 58.1° F., Jan. 68.7°, July 47.8°; rfall. (19 yrs.), 14.1 in. P. (1874) 148,000; (1885) 189,300.

Santiago, or **Santiago de Cuba,** seapt., Cuba, S. ct., in 75° 52′ W. The port is in a bay 7½–8 m. long, a splendid basin, with many creeks, connected with the sea by a narrow (525 ft.) but deep channel. The town, at its NE. extremity built on mountainous slopes, is one of the finest W. Indian cities, but is extremely hot. Exports sugar, cacao, coffee, bananas and other fruits, &c., tobacco and cigars, and rapidly increasing quantities of excellent iron ore, as well as manganese, from neighbouring mines in the Sierra Maestra; all shipped mainly to the United States. Mean temp. (3 yrs., 1881–83), yr. 79.1° F., Feb. 74.1°, Aug. 83.1°. P. 59,600.

Santiago, or **Veragua,** tn., Colombia, state of and 102 m. SW. by W. Panama; mineral springs and baths; gold-mines. P. 6000.

Santiago, riv., in the N. of Ecuador, flows NW. then N. by a wide estuary into the Pacific Ocean, in 79° W. At its mouth the port of Bolivar, with 18 ft. of water on bar, and 20 m. of deep water above. Rich deposits of gold in the valleys of its tribs., the Cachabi, Cayápas, &c.

Santiago, riv., in the S. of Ecuador and N. of Peru, formed by the union of the rivs. Zamora and Bomboiza, flows SE. and enters the Amazon a little above the Pongo de Manseriche.

Santiago, tn., isl. of Haiti, on the Rio Yaqui, republic and 85 m. NW. by N. town of Santo Domingo. P. 8000.

Santiago, tn., Mexico, state of and 11 m. ESE. Mexico.

Santiago, vil., Paraguay, 135 m. SSE. Asuncion.

Santiago, vil., Peru, dep. Libertad, on the coast, in about 7° 58′ S. P. 5000.

Santiago, tn. and port, Philippine Is., Luzon, 183 m. NNW. Manila, near the W. ct. P. 5100.

Santiago, in full **Santiago de Compostela,** city, Spain, Galicia, prov. and 33 m. S. by W. Corunna; seat of an archbishop, and of the university of Santiago, founded 1532. The cathedral, begun 1082, is in the form of a Latin cross; near it are the cloisters of the old Benedictine convent of St. Martin, and a large hostel, founded for pilgrims. The town has been built around a chapel, afterwards made the cathedral, on the site popularly believed to be the grave of the apostle St. James. For several centuries it was the most frequented place of pilgrimage of W. Europe. Manufactures rosaries and medallions, &c., of silver. Alt. 863 ft. Mean temp. (15 yrs.), yr. 55.3° F., Jan. 46.2°, Aug. 67.1°; mean annual rfall. (14 yrs.), 67.5 in. P. 24,300.

Santiago de Atitlan, tn., Guatemala. See **Atitlan.**

Santiago de la Espada, comm., Spain, Andalusia, prov. and 73 m. NE. Jaën; iron, copper, lead, lignite, &c., mined. P. 5500.

Santiago de las Vegas, tn., Cuba, 12 m. S. Havana. P. 12,100.

Santiago del Estero, prov., Argentine Republic, between 26° 15′–30° 12′ S. and 61° 40′–65° 10′ W., bounded NE. and E. by the terr. of Chaco, SE. and E. by Santa Fé. The prov. forms a plain gently inclining NW. to SE., following the course of its two rivers, the Juramento or Salado, and the Saladillo or Dulce, and of which the SW. part is occupied by a marshy depression, called the Salinas Grandes. Chief crops grown are lucerne, sugar-cane, vine, wheat, maize, cotton, and tobacco, with fruits (oranges and carob beans); but cattle-breeding is the principal employment. Climate hot and dry. Area, 39,521 sq. m. The population is officially estimated at (1889) 209,000.

Santiago del Estero, tn. and stn., Argentine Republic, cap. prov. Santiago del Estero, 88 m. SE. by S. Tucuman; seat of a national college, founded 1553, and of a cathedral. Alt. 702 ft. Annual rfall. 19.2 in., April–Sept. 3.5 in. P. 10,000.

Santo Domingo, tn., isl. of Haiti, cap. and chief seaport republic Santo Domingo, on the S. ct., in 69° 51′ W. The town is surrounded by fortifications, and has a cathedral and university, founded 1730. Seat of an archbishop. The roadstead, exposed to S. winds, is visited by hurricanes; steam-packets anchor ½ m. down the bay. Gold is mined in the vicinity. Santo Domingo, founded by the Spaniards in 1496, was the first town built by Europeans in America. P. 13,700.

Santo Domingo, vil., Paraguay, 73 m. E. by N. Asuncion.

Santo Domingo, or **Dominican Republic,** republic, W. Indies, embracing the greater (E.) portion of the isl. of **Haiti** (*q.v.*), under which name a sufficient account will be found of its physical features and history. Coffee, cacao, and sugar, with some tobacco, are the principal products; the cultivation of these, with sugar-factories, cattle-rearing, and timber-cutting, constitute the chief occupations. The imports (cottons, hardware, pottery, foods, &c.) and the exports (coffee, sugar, cacao, rum, honey, mahogany, lance-wood, tobacco) together amount to but little more than one million sterling annually—three-fifths for exports. A short railway connects Samana with La Vega. The cap. is Santo Domingo; other towns are Santiago, La Vega, and the seaports Puerto Plata and Samana. The metrical system of weights and measures is supplanting the native measures. The money in use is mostly that of Spain, U.S., Mexico, and France. The government is vested in a president, chosen for four years by universal suffrage, and in a national assembly of twenty-two members, chosen by direct vote, each for two years. The president appoints a cabinet of (usually six) ministers. The republic, which is divided into six provs. and five maritime dists., has an area of some 20,000 sq. m., and a population (1888) of 610,000. The people are descended from Spanish and Negro immigrants, and are mostly Roman Catholics. Primary education is gratuitous and compulsory.

Santorin (corruption of Italian *Sant' Irênê*, the patron saint of Thessalonica), since the Middle Ages the usual name of the Greek island, called in ancient times and now again officially **Thêra,** volcanic isl., in the Ægean Sea, one of the Cyclades, in 36° 20′-28′ N., just W. of 25⅓° E., forming, with the isl. of Thêrasia and the islet of Aspronêsi, to the W., an interrupted ring, the crater of the volcano, in the middle of which have arisen, through eruptions within historic times, the three Kaimenê islets (Palara-, Nea-, and Mekra-Kaimenê), which have been enlarged by eruptions since 1866. Alt. (Mount Saint Elias), 1915 ft. Area, 29 sq. m. (Wisotzki); 32 sq m. (Strelbitsky).

Santos, seapt., Brazil, prov. and 35 m. SE. São Paulo, with which it is connected by a line of railway ascending the Sierra do Mar to the height of 2500 ft. with the assistance of a cable. The town is very pretty, but yellow fever and smallpox are chronic, in spite of recent sanitary improvements. Santos is the chief outlet of the southern part of the coffee region of Brazil, and has developed of late years with great rapidity, coffee being now exported, mainly to the United States, to the annual value of £4,500,000. In 1887 there used to be only 15 to 20 vessels alongside the wharves at once; in 1893 there were 150 to 200 generally in port together. A second railway to São Paulo was in process of construction in 1893, and a proposal was under consideration for extensively enlarging the wharf accommodation, besides the main channel to the ocean. After Rio de Janeiro, Santos receives the most European immigrants, chiefly Portuguese, Galicians (Gallegos), Italians, and Russian Jews. The official name, Cidade Andradina, has never been used. Mean rfall. (15 yrs.), 98.5 in. P. 15,000. The **Mangues de Santos,** a marshy dist., covered with water at high tide, is 15 sq. m. in extent.

São Francisco, formerly **São Romão,** or **Manga,** tn., Brazil, state of Minas Geraes, 295 m. NNW. Ouro Preto, on l. bk. of São Francisco R., in 16° 20′ S. P. (municip.) 10,000.

São Francisco (so called because discovered on that saint's day in 1501), riv., Brazil, rises in the Sierra da Canastra, in 20° 20′ S., in S. of state Minas Geraes, and flows N. with a slight inclination E. to 10° S., then turns ENE., curves again, and enters the Atlantic in 11° 30′ S. Its principal tribs. are, on the r. bk. the Velhas, Verde Grande, and Remedios or Verde; l. bk., the Paracatu, Urucupa, Carunhanha, Correntes, Grande (*q.v.*), Flores, and Moxoto. Has nearly 200 m. of cataracts and rapids between the magnificent falls of Paulo Affonso (two leaps, respectively 6 and 5 ft.), about 190 m. from the coast, and the town of Joazeiro. Above this latter point the only serious impediment to navigation up to the rapids of Pirapora, in 17° 20′ S., occurs at the rapids of Santa Anna or Sobradinho, in 11° 35′ S. Large boats 50 ft. long and 9 ft. beam ascend as high as Januaria in 15½° S. Total length, 1800 m.; basin 710 m. long, by 560 m. broad.

São Francisco, seapt., on the E. ct. of Brazil, Santa Catharina, at the N. end of the isl. of **São Francisco,** in 26° 18′ S. P. <2000.

São Gabriel, vil., Brazil, Amazonas, on l. bk. Rio Negro, about 55 m. WNW. Manaos.

São Miguel e Almas, tn., Brazil, state of Minas Geraes, 124 m. NNE. Ouro Preto, on l. bk. of the Ocanhas. P. (comm.) 6800.

Saona, isl., 13 m. long by 3 m. broad, to the S. of the E. end of the republic of Santo Domingo, W. Indies.

Saône, the ancient *Arar*, riv., France, rises in dep. Vosges, flows S. to Corre, where navigation begins, and receives the Canal de l'Est, which connects it with the Meuse and Moselle; then it flows SSW., passes Gray, and at Heuilly receives the Marne Canal, and enters the plain of Burgundy, where it is connected with the Rhone and Rhine Canal and the Burgundy Canal. At Verdun it is joined by the Doubs (which is rather more than 100 m. longer than the portion of the Saône above the confluence), and then again turns due S., flows past Châlon, where the Canal du Centre branches off uniting it to the Loire, crosses the wide plains of Macon, and finally enters the Rhone at Lyons. Total length 300 m., of which 232 m. are navigable; area of basin, 8295 sq. m.; discharge, at low water 780 cubic ft. per second, at normal height 8830 cubic ft. per second.

Saône, Haute-, dep., E. France, traversed N. to SW. by Saône R., formed in 1790 out of Franche-Comté (chiefly the Baillage d'Amont, with a small part of Montbéliard), divided into three arrs.: Vesoul (cap.), Gray, and Lure. Surface mainly a plateau intersected by valleys, lowest (605 ft.) in the SW., at the confluence of the Saône with the Ognon, rising gently towards the E. and NE. to about Lure and Luxeuil, then more rapidly to the Vosges on the NE. frontier, highest point Ballon de Servance (3970 ft.), NNE. Champagney; the plateau region, of which the mean elevation is 820–985 ft., is characterised by numerous depressions or 'sinks,' and the general absence of surface streams, the water sinking through and forming subterranean streams, which issue as springs in the valleys. The dep. belongs to the basin of the Rhone, by the Saône (*q.v.*), of which the principal tribs. in the dep. are (l. bk.) Coney, Lanterne, Durgeon, and Ognon, the last forming part of the southern boundary; a small dist. around Héricourt, in the SE., is drained to the Doubs. As regards geological structure, granite predominates in the Vosges, flanked by Lower Carboniferous beds, while the plateau consists chiefly of Jurassic limestone, but all periods are represented. Forests cover about one-third of the surface. Climate mild throughout the greater part, more severe in the NE. The principal cereals are wheat and oats, then rye; less than 2 per cent. of the surface is under the vine (Charlez, Gy, &c.), and the production per acre is only about half the average for France; tobacco is cultivated around Vesoul; market-gardens are numerous about Navenne. Coal is the principal mineral (Ronchamps, Gouhenans, &c.); argentiferous copper (Passavant), manganese (Faucogney), a little iron. Textile manufactures take the lead; cotton spinning (Fougerolles, Héricourt, &c.), weaving (Faucogney, Fresse, &c.), druggets (Saint-Loup, &c.); metallurgical industries include blast-furnaces (Saveux, Loulans-les-Forges, &c.), the manufacture of steel and various kinds of hardware. Area, 1775 sq. m. P. (1891) 268,300. See **France,** table.

Saône-et-Loire, dep., E. France, traversed N. to S. by the Saône (partly on frontier of Ain), and S. to NW. by the Loire (chiefly on frontier of Allier); formed in 1790 out of parts of Burgundy (Autunois, Brionnais, Charolais, Châlonnais, and Mâconnais), divided into five arrs.: Macon (cap.), Charolles, Autun, Châlon-sur-Saône, Louhans. Surface generally mountainous or hilly, with the exception of the plain of Saône in the E. The Morvan dist. in the NW., with well-wooded hills, separated by winding gorges, and interspersed with meadows, rises on the frontier of Nièvre, to the culminating point of the dep., Haut Folin (2960 ft.); in the SW. are the mountains of Charolais, with rich pasture-lands, rising in Mont de la Chapelle St. Cyr to 2540 ft., and SE. the Mâconnais Mts. (a continuation of the Beaujolais Mts. of Rhône), with Mère Bottier (2495 ft.) on the S. frontier. The plain of the Saône attains its greatest width about Châlon; the N. part is known as the Bresse Châlonnaise, and the central as the Bresse Louhannaise. The dep. is divided almost equally between the basins of the Saône and Loire, a very small dist. in the extreme NW. being drained to the Seine; the Saône receives on r. bk. Dheune and Grosne, l. bk. Doubs and Seille; the Loire receives, r. bk., Arconne and Arroux. The Saône and Loire are navigable; the Canal du Centre connects the Loire and its lateral canal with the Saône. Jurassic and Lias formations predominate in the centre, Tertiary in the E., granitic rocks in the W. and NW., with outcrops in the SE.; Permian strata cross the dep. NE. and SW., and Carboniferous occur towards the W. Forests cover nearly one-fifth of the surface (Charolles, Autun, Louhan). Climate subject to extremes; healthy, except in the Bresse. The principal cereal is wheat, then oats and maize; the vine occupies about 3½ per cent. of the area (Châlon, Macon), and the production per acre is above the average. Coal is extensively worked (Creuzot, St. Berain, Montceaux-les-Mines, &c.), iron (Epinac, &c.); other minerals are lead, slates, asphalt. Metallurgical industries, of which Creuzot is the chief centre, are exceedingly important, including sheet-iron, rails, locomotives, &c.; iron-foundries (Châlon, Autun, Macon, &c.); textile manufactures are limited. Area, 3331 sq. m. P. (1891) 619,500. See **France,** table.

Saoner, tn., Brit. India, Central Provs., dist. and 22 m. NW. Nagpur; manufactures cotton-cloth; has a large ruined fort. P. 5600; Hindus, 5200.

São Nicolão, or **São Nicolau,** one of the Cape Verde Is., in 16° 35′ N., 24° 15′ W.; dry and sterile, and said to be unhealthy.

São Nicolão, riv., Portuguese W. Africa, Angola, rises on the W. slope of the Serra Tama, and flows W. to the coast, into the Atlantic in about 14° 20′ S., after a course of about 80 m.

São Paulo, one of the S. littoral states of Brazil, between the upper Paraná (N. and W.), riv. Paranapanema – Itarary (S.), and the sea (E., 300 m. of coast). A narrow zone (*Beira Mar*) between the edge of the plateau (Serras do Mar – Paranapiacaba) and the sea. From the coast highlands (2000 ft. NE.–4000 ft. SW.) to the interior (Serra Acima) the plateau forms an inclined plane (3000–2000 ft. high) through which run, NW., many parallel rivers (Tiété, the principal and most central). The W. half of the plateau is almost unknown. The NE. is mountainous, with branches of Serra Mantiqueira (S. Occidental), Morro do Lopo (the highest point, 5460 ft.). All the sea slopes and littoral islands are covered with forests; on the plateau, forests (*Araucaria*) and *campos*. Coffee is the important culture (one to two millions of bags of 1 cwt. per year; 1887, three millions), sugar-cane, cotton, tobacco, wine (São Paulo, Tiété, Mogy, Sorocaba, Cunha), gold and silver (Sorocaba, Apiahy), lead (Iporanga, Apiahy), iron (Ipanema, Paubaté, Caçapava, Tatuhy, Itapetininga, Barreiros), coal (Tatuhy, upper Tiété). Great industrial activity. The *Paulistas* were the most energetic explorers of the interior, traversing during the 16th and 17th centuries the whole continent to the Amazon and the Andes. São Paulo is still the most progressive of all Brazilian states. The climate is temperate and very healthy for S. Europeans. Three important colonial centres: Cannas, Cascalho, Ribeirão Preto (great Italian immigration). Santos is a very good port. Harbours between the islands (São Sebastião, Victoria, &c.) and the mainland. See **Brazil.** [**J. B. R.**]

São Paulo, the largest and, commercially and industrially, the most active and enterprising town in Brazil, cap. of state São Paulo, 35 m. NW. Santos, situated on a high but not altogether healthy plain, being too near the marshes of the Tiété, which flows past the town on the N. Owes its origin to a Jesuit college, founded here about 1560, and now constituting the government buildings. Alt. 2393 ft. Mean temp. (5 yrs., 1879–83), yr. 64.0° F., Jan. 70.9°, July 56.7°; mean annual rfall. (5 yrs.), 58.8 in. P. 100,000 (Reclus).

Saragossa, in Spanish **Zaragoza,** the ancient *Cæsarea Augusta,* tn., Spain, cap. prov. Saragossa and of the old kgd. of Aragon, on r. bk. of the Ebro, at the confluence of the small Huerva, 160 m. W. Barcelona. The cathedral is celebrated all over Spain for its sanctuary, which attracts numerous pilgrims. The university was founded, 1474. Saragossa has a leaning clock tower, 275 ft. high, and a bridge of 7 arches, 820 ft. long, dating from the 15th century, which connects the suburb Altabas, on opposite bank of the Ebro, with the city. Among its other educational establishments are an episcopal seminary, academy of the fine arts, with a museum containing pictures by Titian, Dominican, and Salvator Rosa; an economical society; a considerable public library and a botanic garden. Its manufactures of silks, woollens, and leather have greatly declined, but it has still a considerable trade in agricultural produce by the Ebro. Saragossa is very ancient, and numerous vestiges of Roman remains attest its former importance. Scene of an ever memorable siege sustained 1808–1809 against the French under Marshal Lannes; the heroism of the defenders being greatly fired by the 'Maid of Saragossa,' sung of by Southey and Byron. Saragossa, the *Salduba* of the Cantabrians, was destroyed in 45 B.C. by Julius Cæsar; was taken by the Vandals, 409; in 475 by the Visigoths; and in 715 by the Moors, who in 1017 made it the cap. of the kingdom *Saragostha.* Conquered by Alfonso I., 1118, it became one of the principal towns of Christian Spain. In 1317 the ancient bishopric of Saragossa was made an archbishopric. After the union of Aragon and Castille, Saragossa rapidly declined. Alt. 655 ft. Mean temp. (15 yrs.), yr. 59.1° F., Jan. 42.2°, July 77.8°. P. (1860) 67,400; (1887) 92,400.

Saratoga Springs, vil., U.S., New York, Saratoga co., 26 m. N. by W. Troy. Saratoga is a noted watering-place, containing 28 mineral springs within an area of about ½ m., and is visited in the summer months by many thousands of persons. Large quantities of the water are exported. Near it the British troops, under General Burgoyne, surrendered to the American General Gates, 1777. P. (1850) 4700; (1870) 8500; (1880) 8400; (1890) 12,000.

Saratov, govt. of SE. Russia, on r. bk. of lower Volga, has Penza and Simbirsk on N., Samara and Astrakhañ on E., and Don Cossacks, Voronezh, and Tambov on W. It occupies the E. part of the central plateau of Russia, 700–900 ft. high, which slopes gently towards the steppe region in the S., and falls abruptly towards the Volga, where it is much cut by ravines. All formations, from the Carboniferous in the N. to the Miocene in the S., are represented; well watered, especially in N. The Volga flows along its E. border for 500 m., receiving, besides the Sura, but small tribs.; the Medvyeditsa, Khoper, and Ilovlya, tribs. of the Don, in the W. Good forests in the N., but great want of them in the S. Climate severe, the average temps. being: Saratov, yr. 41.5° F., Jan. 12°, July 72°; Tsaritsyn, yr. 44.4° F., Jan. 13°, July 75°. Soil very fertile, but the crops occasionally suffer from droughts. Population chiefly Great Russians (75 per cent.), Little Russians (7 per cent.), Germans (7 per cent.), Mordvinians (6 per cent.), and Tatars (3 per cent.); also about 11,000 Chuvashes, some Meshcheryaks and Poles. Corn grown extensively for export; oil-yielding plants, including mustard, sunflower, and linseed. Good gardening. Manufactures only now beginning to be developed; flour-mills, woollen cloth, tanneries, oils, machinery, and iron. Brisk trade in agricultural produce, and active navigation. Divided into ten dists.: Saratov, Atkarsk, Balashov, Kamyshin, Khvalynsk, Kuznetsk, Petrovsk, Serdobsk, Tsaritsyn, and Volsk. Many large villages, Sarepta, Dubovka, Samoilovka, Koloyar, &c. Area, 32,624 sq. m. P. (1882) 2,113,100; (1890) 2,427,600.

Saratov, city, SE. Russia, cap. of above govt., on r. bk. of Volga, 532 m. by rail SE. of Moscow, picturesquely and well built on high hills which slope to the Volga; has a museum, a fine-art gallery, and more than the usual educational institutions. A large village, Pokrovskaya, 25,000 inhabitants, situated on the opposite side of the river, forms its suburb. Saratov is becoming an important centre for flour-mills, distilleries, oil-works, and tobacco factories. Considerable trade in corn, oil, hides, wool, woollen cloth, fruit, fish, kerosene-oil, &c., coming from the S. and shipped up the Volga or sent westwards, as well as in manufactured goods imported from central Russia. P. (1830) 49,660; (1859) 69,660; (1882) 112,430; (1893) 123,230.

Saráwak, terr., in the W. of Borneo, extending from about lat. 0° 50′–3° 40′ N. Subject to a rájah of British family, and now under British protection. It is largely mountainous or hilly, but has extensive level tracts on and near the coast. Principal rivers in the order from NE. to SW., the Bintulu, Oya, Rejang (the largest of all), Batang Lupar, Sadong, Samarahan, and Saráwak. Its principal vegetable products are sago, grown chiefly in the N., gutta-percha and other jungle produce obtained chiefly in the middle section, gambier and pepper, all largely exported, above all sago, Saráwak having the largest export of sago in the world. The southern division, the residency of Saráwak proper, is rich in minerals, exporting a large amount of antimony and quicksilver obtained from the hilly country about the headwaters of the Saráwak R. The climate is said to be healthy for Europeans, notwithstanding a rainfall of 160–200 in. a year. *Proc. R. G. S.*, 1880, pp. 193–205, map, p. 256 (about 1 : 3,650,000), with an inset of the residency of Saráwak (about 1 : 940,000).

Saráwak, tn., cap. of the rájahship. See **Kuching.**

Saráwak, riv., in the SW. of Saráwak, flows NE. then N. through the residency of Saráwak, with two entrances, the Moratabas entrance having its mouth in 1° 39′ N., and 110° 30′ E., the safer of the two, and that generally used; and the Santubong entrance, having its mouth in 1° 42′ N., 110° 19′ E.

Sardhána, tn., Brit. India, NW. Provs., dist. and 10 m. NW. by N. Meerut. P. 12,100; Hindus, 5400; Moham. 5300.

Sardinia, Italian **Sardegna,** next to Sicily the largest and most important island of the Mediterranean, about one-fifth larger than Wales, situated S. of Corsica, from which it is separated by the Strait of Bonifacio, 115 m. SW. the nearest point of the Italian Penin., between 38° 51′ 50″ and 41° 15′ 42″ N., 8° 3′ 39″ and 9° 50′ 30″ E. Length, 164 m.; average breadth, 61 m. Divided into two provs., Cagliari (S. half) and Sassari (N. half); cap. Cagliari. Surface generally mountainous; Mount Gennargentu, near its centre, is 6365 ft. above the sea. Chief rivers the Tirso, Coghinas or Mannu, Flumendosa, and Samassi. The finest and most fertile valley is that of Campidano, stretching from the Gulf of Cagliari in the S., NW. to the Gulf of Oristano. Coast much indented, and forms excellent harbours; that of Cagliari is one of the best in the Mediterranean. There are numerous small islands near its shores; the chief are Asinara off the NW., St. Pietro and Sant' Antioco off the SW., Maddalena, Caprera, and Razzoli off the NE. points. Climate very variable [**Cagliari, Sassari**]; snow lies on the highest mountain for six or seven months in the year; long droughts frequently occur in summer, when many districts are rendered extremely unhealthy on account of malaria. On the average of the three years 1890–92, about half the area (mainly in the S. half of the island) showed a death-rate due to malaria of more than 4 per 1000. Under the amelioration laws of 1882 and 1886, upwards of 7000 ac. have been drained in the marshes of Sanluri (about the middle of the Campidano). One-third of the superficies is occupied by barren and stony deserts. There are extensive forests of the oak, pine, cork, and chestnut trees. Wheat is by far the most important cereal, occupying four times the area of barley, the next; but agricultural operations are conducted in the rudest manner, although in ancient times the island was considered one of the granaries of Rome. The cultivation of the vine is increasing in importance, now extending over about three times the area occupied by it on the average of the five years 1870–74; olive-oil is of inferior quality. Near Milis, 12 m. NNE. Oristano, excellent oranges grow, and cotton thrives near Cagliari in the S. Tobacco and salt are a royal monopoly; the salt-pans of the prov. of Cagliari (near the towns of Cagliari and Carloforte) being the most valuable in the kingdom. Domestic animals are small, and of inferior breeds; the moufflon, a species of sheep, is supposed to be indigenous. Deer, wild boars, and foxes abound, and the skins of hares, rabbits, martens, and foxes are exported. Tunny, anchovy, and coral fisheries are important, but conducted chiefly by foreigners. The island has been celebrated since ancient times for its wealth in minerals. Zinc, lead, silver, manganese,

antimony, and iron ore are all mined to a considerable extent, and to a smaller extent coal. The mines are nearly all in the S. of the island (S. of 39° 30′). The chief mining centre is Iglesias, amongst the mountains, W. of the Campidano. Others (Villacidro, Fluminimaggiore, Gonnesa, &c.) occur in the neighbourhood; others NE. of Cagliari (Sinnai); others in the E. in the lower valley of the Flumendosa (Muravera, &c.). The only important mining centre in the N. is at Sassari, where zinc ore is largely produced. Granite is quarried near Sassari and Alghero. The mines of Sardinia were first worked in the time of the Phœnicians, and their working was continued by the Carthaginians and Romans. After the fall of the Western Roman Empire they were abandoned till the 11th century, from which time till about the close of the 15th century they were worked by the Pisans, Genoese, and Aragonese. After the discovery of America their production declined, and they fell into complete neglect, which continued till the union of the island with Piedmont, and their working was not carried on actively till after the introduction of railways. A railway starting from Cagliari runs first NW. through the Campidano, with a branch to Iglesias, then N. to near Ozieri, whence one branch runs NW. to Sassari and Porto Torres, another NE. to Terranova, Pausania, and Cape Figari. Sardinia was colonised by the Carthaginians, from whom it was taken by the Romans after the third Punic war (146 B.C.). On the fall of the Western Empire, it came successively under the power of the Vandals, Goths, and Moors. In the 11th century it came into the possession of Pisa, and at the end of the 12th century it was held by the Genoese, and afterwards by the kings of Aragon till 1713. In 1720 it was acquired by Savoy in exchange for Sicily. It was the only portion of the Sardinian dominions which was left in the power of the sovereign during the usurpation of the French from 1798 to 1814. See **Italy,** table.

Sargasso Sea, part of the N. Atlantic Ocean, remarkable for its abundance of floating plants, chiefly species, or, according to some botanists, varieties of *Sargassum*, or gulf-weed. The occurrence of this weed was first noticed by Columbus on his first voyage of discovery (1492), who records that his whole course was through masses of these weeds from the 16th of September to the discovery of Guanahani on October 12th. The area within which its occurrence is most frequent, and to which accordingly the name Sargasso Sea may be confined, is an ellipse with its long axis E. and W., about 40°–75° W., its short axis about 20°–35° N., the area round which the current of the N. Atlantic rotates. See *Petermann's Mitteil.*, 1891, pp. 129, &c., and plate 10.

Sarny-bwch, cape, Wales, Merionethshire, in 52° 37′ N.

Saroa, dist., on the S. ct. of Brit. New Guinea, in about 147½°–147¾° E.

Saron, vil., Cape Colony, dist. Tulbagh, 63 m. NE. by W. Cape Town; magnesian limestone near, suitable for hydraulic cement. Alt. 590 ft. Annual rfall. (6 yrs.), 22.17 in. P. <1500.

Saron, plain, Palestine. See **Sharon.**

Saron, P.O., Wales, Carmarthenshire, 3 m. SW. Llandyssil.

Sârona, vil., Palestine. *Lasharon* in the O. T., 32° 43′ N., 35° 28′ E., 7 m. SW. Tiberias.

Saronno, tn., Italy, Lombardy, prov. Como, 14 m. NW. by N. Milan; manufactures maccaroons, supplied to all parts of Italy. P. 5900.

Sáros, co., Hungary, N. frontier, Galicia, crossed by 17° E.; cap. Eperjes.

Saros, or **Xeros, Gulf of,** bay in the Ægean Sea, Turkey in Europe, between Thrace and the penin. of Gallipoli, opposite the isl. of Samothrace; is 18½ m. wide at mouth, 37 m. long.

Sáros Patak, tn., Hungary, co. Zemplen, 32 m. SE. by S. Kaschau; produces Tokay wine. P. 6400.

Sarpan, isl., Pacific. See **Rota.**

Sarpsborg, tn. and port, Norway, prov. Smaalenene, on the Glommen R., 17 m. NW. Fredrikshald; can be reached by vessels drawing nearly 21 ft. of water. P. <4000.

Sarpsfos, waterfall, Norway. See **Glommen,** riv.

Sarpy, co., U.S., Nebraska, in the E., between the Missouri on the E., and the Plotte on the W. and S.

Sarrabus, dist., in the SE. of Sardinia; rich in silver, which is mined in a zone about 20 m. in length running W. from Muravera; malarious.

Sarrance, vil., France, dep. Basses-Pyrénées, arr. and 9 m. S. Oloron. To the N. is a thermal establishment called Bains d'Escot; has an old church, frequented by pilgrims. P. <2000.

Sarrat, or **Sarratt,** par. Eng., Hertfordshire, Watford div., 8½ m. SW. by W. St. Albans, 2½ m. NNW. Rickmansworth stn., PMT.O. P. <750.

Sarraz, La, small tn., Switzd., cant. Vaud, 10 m. SW. by S. Yverdun. Alt. 1675 ft. P. <2000.

Sarre, par., Eng., Kent, Isle of Thanet div., 6½ m. WSW. Margate, 2 m. NE. Grove Ferry stn. P. <250. See **St. Nicholas at Wade.**

Sarre, riv., Ger. See **Saar.**

Sarreaus, comm., Spain, Galicia, prov. and 18½ m. SE. Orense. P. <4000.

Sarreguemines. See **Saargemünd.**

Sarria, comm., Spain, Catalonia, prov. and 2½ m. NNW. Barcelona, of which it is a suburb. P. <5000.

Sarria, comm., Spain, prov. and 19 m. SSE. Lugo. P. 11,500.

Sarroch, comm., Sardinia, on the Gulf of Cagliari, prov. and 12 m. SSW. Cagliari. P. <2000.

Sarrola, vil., Corsica, arr. and 10 m. NE. by N. Ajaccio. P. <2000.

Sarrus, vil., France, dep. Cantal, arr. and 7 m. S. St. Flour; has a small thermal establishment. P. <2000.

Sársa, tn., Brit. India, Bombay, dist. and 28 m. E. by S. Kaira. P. (1872) 5200.

Sarsaganj, vil., Brit. India, NW. Provs., Máinpuri dist., 6 m. N. Bhadan stn. P. (1881) 5800.

Sarsana, vil., Lower Egypt, prov. Menufiye, 2 m. from l. bk. of the Bayuriye Canal. P. <4000.

Sarsáwa, tn., Brit. India, NW. Provs., dist. and 10 m. WNW. Saháranpur, 47 m. SE. by E. Ambála. P. <4000.

Sarsden, par., Eng., Oxfordshire, Banbury div., 10½ m. WNW. Woodstock, 3 m. SW. by S. Chipping Norton. P. < 250; eccles. par. (**Sarsden with Churchill**) P. <750.

Sarsfield, post-tn., Victoria, Dargo co., 43 m. NE. by E. Sale; has large quarries. P. <1500.

Sarsina, vil., Italy, Emilia, prov. Forli, 15½ m. SSW. Cesena; has sulphureous and saline mineral springs. Seat of a bishopric created in the 4th century; the cathedral dates from the 7th century. Birthplace of the Latin comic poet Plautus. P. <2000; comm. P. <4000.

Sars-la-Buissière, comm., Belgium, prov. Hainaut, arr. Thuin, 11½ m. WSW. Charleroi. P. <2000.

Sars-Poteries, tn., France, dep. Nord, 21 m. S. by E. Mons, arr. and 5 m. NE. by E. Avesnes. P. <3000.

Sarstedt, tn., Prussia, prov. and 10 m. SSE. Hanover. P. <3000.

Sarstoon, small riv., Central America, flowing E. into the Caribbean Sea, forming S. frontier of Brit. Honduras (*q.v.*).

Sart, the ancient *Sardis,* vil. and ruins, Asia Minor, vilayet Aidin, 35 m. ESE. Manissa. The temple of Cybele is the finest ruin. To the N., near Lake Gyges, are several ancient tombs, one said to be that of Alyattes, king of Lydia.

Sarteano, tn., Italy, Tuscany, prov. Siena, 5 m. WSW. Chiusi; has an acidulated mineral spring. In the vicinity is an Etruscan necropolis. P. <5000.

Sartène, tn., Corsica, 25 m. SSE. Ajaccio, cap. arr.; manufactures good wine. This comm. is the richest in the island in megalithic monuments. P. <4000.

Sart Fell, hill, Isle of Man, in the W., 6 m. N. Peel. Alt. 1560 ft.

Sarthe, dep., NW. France, traversed N. to SW. by Sarthe R., formed in 1790 out of parts of Maine and Anjou, with a small dist. of Perche; divided into four arrs.: Le Mans (cap.), Mamers, La Flèche, and St. Calais. Surface diversified, and picturesque; highest in N., Forêt de Perseigne (1115 ft.), lowest (65 ft.) in SW., at the points of exit of the Sarthe and the Loir. In the NW. the Coëvrons, locally known as the Alpes Mancelles, a rugged forest-covered range, formed of granite and allied rocks, rise to 985 ft. in the forest of Sillé; the Loir valley is in some places bordered by steep cliffs of tuff, but in general the surface is undulating, and the geological formations are mainly Mesozoic and Tertiary. The dep. belongs entirely to the basin of the Loire by the Maine, which receives the Sarthe and Loir outside the dep.; principal affluents of Sarthe, r. bk. Orthe and Vègre, l. bk. Brienne, Orne, and Huisne; the Loir flows E. to W. in the S., receiving the Aune and other small tribs.; both the Sarthe and Loir are navigable, the former to Le Mans, the latter to La Chartre. The soil is in general exceedingly fertile, the least fertile portion being a tract between the Loir and Sarthe. Forests cover about one-eighth of the dep. (Bercé, Perseigne, Vibraye, Sillé-le-Guillaume, &c.). Climate mild and humid, healthy [**Le Mans**]. Agriculture is the leading industry; wheat is the principal cereal, then barley; the vine occupies nearly 1½ per cent. of the surface (Bazouges, Chateau-du-Loir, Homme, &c.), but the production per acre is only about two-thirds the average for France; hemp covers here one-eighth of the total area under this crop in France. Fowls and geese are reared in large numbers, especially about La Flèche. Coal is mined to a limited extent (Sablé, Solesmes, &c.). Metallurgical industries include copper and bell-founding (Le Mans), metallic plates (Connerré), machinery; the hemp and linen manufactures for which the dep. was formerly noted have declined, but are still carried on in many communes. Area, 2412 sq. m. P. (1891) 429,700. See **France,** table.

Sarthe, riv., France, rises 8 m. NNW. Mortagne, at an alt. of 820–1010 ft., and flows SSW. past Alençon and Le Mans, and after meeting the Loir and the Mayenne enters the Loire below Angers. Length, 175 m.; area of basin, 5020 sq. m.; discharge, 1800–32,000 cubic ft. per second. Navigable to Le Mans, 82 m.

Sarthol ('gold country'), mountainous region, Tibet, E. of prov. Khorsum, and NE. of the upper valley of the Indus; rich in gold.

Sartilly, vil., France, dep. Manche, arr. Avranches, 9 m. SE. Granville. P. <2000.

Sartirana, comm., Italy, Lombardy, prov. Pavia, 18 m. SE. by S. Vercelli. P. <5000.

Sart-lez-Spa, vil., Belgium, prov. Liège, arr. Verviers, 3½ m. NE. Spa; has mineral springs. P. (comm.) <3000.

Sartorö, group of isls., Norway, off the W. ct., 10 m. W. Bergen, 20 m. long N. to S., consists of Store ('great') Sartorö, 14 m. long by 5 m. wide, area 69 sq. m.; and Lille ('little') Sartorö, 3 m. long by 2½ m. broad, area 6 sq. m.

Sartrouville, tn., France, dep. Seine-et-Oise, arr. Versailles, on the r. bk. of the Seine, 10½ m. NW. Notre Dame, Paris. P. <2000.

Sarué, or **Sarawi,** vil., Lower Egypt, prov. Dakahliye, on r. bk. of the Nile. P. <3000.

Sarum, New, Eng. See **Salisbury.**

Sarum, Old, an extinct city and bor., now a par., Eng., the *Sorbiodunum* of the Romans, Wiltshire, the site of which was on a hill 2 m. N. Salisbury. Under the Saxons it was still of importance. It was a bishop's see from 1072 to 1220. A few traces of walls, ramparts, and of its castle and cathedral remain. The inhabitants of Old Sarum deserted it for New Sarum (Salisbury) in consequence of the scarcity of water. They began to remove in the time of Richard I., and the old town was totally deserted in the time of Henry VII. P. <250.

Sarur, group of vils., E. Africa, country of the Somalis, about 18 m. from the E. ct., in about 4° 57′ N., 47° 50′ E.

Sarurpur, tn., Brit. India, NW. Provs., dist. Meerut, 30 m. N. Delhi. P. 5300; Hindus, 4800.

Sarus, riv., Asia Minor. See **Selhun.**

Sarvasiddhi, tn., Brit. India, Madras, dist. and 34 m. WSW. Vizagapatam.

Sarvistan, tn., Persia, prov. Fars, 55 m. SE. by E. Shiraz. P. <5000.

Sarviz, riv., Hungary, rises in the Bakony forest, flows S. and joins an arm of the Danube at Baja. Its upper part forms a portion of the Sarviz Canal, which is 37 m. long. Length, 60 m.

Sarwár, tn., India, Rájputána, 38 m. SE. Ajmere. P. (1881) 5400.

Sarya, vil., Turkey in Europe. See **Litokhoron.**

Sarykol, line of high valleys, Pamirs (*q.v.*).

Sary-kul, a name sometimes given improperly to Lake Zorkul, Pamirs. See **Victoria Lake.**

Sary-pul, vil., Afghanistan. See **Sir-i-pul.**

Sary-su, riv., Russian Central Asia, in E. part of Akmolinsk; rises in hills NW. of Lake Balkhash, flows SW., and is lost in Famine Steppe before reaching Lake Aral. Length about 500 m.

Sary-yassy Mountains, Turkistan, being the S. ridge of E. Tian Shan system, run SW. to NE. for about 150 m., containing Khan Tengri (24,000 ft.) and the Muz-art Pass, and are continued under different names for another 250 m. NE., between the Tekes and Kunges (tribs. of Ili) and the tribs. of Tarim.

Sarzana, tn., Italy, Liguria, prov. Genoa, 7½ m. WNW. Carrara; seat of a bishop. The cathedral dates from the 14th century. Birthplace of Pope Nicholas V. P. 5700.

Sarzeau, tn., France, dep. Morbihan, arr. and 8½ m. S. Vannes; has a small port on the bay of Sucinio; salt-works and oyster-beds. Two miles SE. are ruins of the castle of Sucinio, one of the principal feudal fortresses of Brittany, founded 1250. Birthplace of Le Sage, author of *Gil Blas.* P. <2000.

Sarzedas, tn., Portugal, dist. Castello Branco. P. <4000.

Sasaram, tn., Brit. India. See **Sásseram.**

Sasau, riv., Austria. See **Sazawa.**

Sasau, or **Sazawa,** tn., Austria, Bohemia, dist. and 18½ m. NSW. Kuttenberg; has a mineral spring and baths. P. <2000.

Sasayama, tn., Japan, isl. Honshiu, prov. Tamba, 31 m. W. Kyoto. P. 5900.

Sasbach, vil., Ger., gd.-duchy and 17 m. SW. Baden. Turenne was killed here, 1675. P. <2000.

Sascut, vil., Roumania, prov. Putna, 70 m. SSW. Yassy, with large sugar-factory. P. <3000.

Saseho, tn., Japan, Kiushiu, 25 m. N. by W. Nagasaki. P. <5000.

Saseno, isl., Greece, in the Adriatic, to the N. of the Bay of Valona, in 40½° N.

Saser Pass, pass across the Himálayas, about 65 m. N. Leh, on the winter route to the Karakoram Pass. Alt. 17,820 ft. (*Jour. R. G. S.*, 1878, p. 177).

Saskat'chewan, provincial dist., in the NW. Terrs. of Canada, about twice the size of England and Wales, lying N. of Assiniboia and western Manitoba, and E. of Alberta, bounded on the E. by Lake Winnipeg (N. end) and the Nelson R. (the W. branch of that river to the W. of Ross I.), traversed from W. to E. by the N. Saskatchewan R., which unites about the middle of the dist. with the S. Saskatchewan, the whole of the remaining course of the combined river being included in the dist. In the W. the N. Saskatchewan R. is joined by the Battle R. Surface hilly in places in the S. (Pasquia Hills in the E., Eagle, Thickwood, and Blackfoot Hills in the W.), in the N. generally low and studded with numerous lakes (Herb, Reed, Pine Island, Montreal, Dore, Waterhen Lakes, and on N. frontier Lac la Ronge and Lac la Plonge). At present very sparsely settled. Chief settlements, Prince Albert, on the N. Saskatchewan, about 35 m. above its confluence with the S. Saskatchewan, and Battleford, at the confluence of the N. Saskatchewan and Battle R. A branch of the C. P. R. already runs N. to Prince Albert, and a branch from this is being made from Saskatoon, on the S. Saskatchewan, to Battleford. P. (1891) 11,200. See **North-West Territories.**

Saskatchewan, settlement, Canada, dist. Saskatchewan, on the S. Saskatchewan R., 69 m. SW. by S. Prince Albert.

Saskatchewan ('swift current'), riv., Canada, NW. Terr., rises in the Rocky Mts., near 115° W., by two principal heads, one in 49° N., the other in 53° 30′ N. These branches flow generally E. to their junction in about 53° 20′ N., 105° W., whence the river has a tortuous course to its mouth in Lake Winnipeg. It is navigable thence and along its N. branch to Fort Edmonton. It gives name to a wide dist. The climate of the valley of the Saskatchewan is very healthy, though the cold is severe in winter. Coal and iron of the best quality exist in several places, the former discovered by Dr. Hector in 1860. Total length, 1660 m.; area of basin, 131,810 sq. m.

Saskatchewan, Little, riv., Canada, Manitoba, issues from Portage Bay (Lake Manitoba), traverses Lake St. Martin, and flows into the middle of Lake Winnipeg (W. side).

Saskatoon, settlement, Canada, dist. Saskatchewan, on the S. Saskatchewan R., 78 m. SW. by S. Prince Albert.

Sa-song-sao, tn., Siam, on the Bangpakong, 40 m. E. by S. Bangkok.

Sasovo, vil., Russia, govt. and 108 m. N. Tambov, on Tsna R., 10 m. above its junction with Oka. P. 5900.

Sassa, comm., Italy, Abruzzi e Molise, prov. and 5½ m. W. Aquila, 36 m. ESE. Terni. P. <2000.

Sassafras, post-tn., Tasmania, Devon co., in 41° 14′ S., 146° 32′ E. P. <1500.

Sassak, inhabitants of Lombok I., E. Indies.

Sassano, comm., Italy, prov. Salerno, 3 m. SE. Diano. P. <5000.

Sassari, tn., in the NW. of Sardinia, cap. prov. Sassari 8 m. S. of the Gulf of Asinara; seat of a university; has a cathedral. From 1294 to 1323 Sassari was an independent republic, but had at last to submit to the Pisans. Pillaged by the French, 1527. Alt. 718 ft. Mean temp. (15 yrs.), yr. 60.9° F., Jan. 49.4°, July 77.0°; mean rfall. (1876–80, 1883–91), yr. 24.0 in., June–Aug. 1.5 in. P. 36,300. See **Italy,** table, and **Sardinia.**

Sassella, vil., Italy, Lombardy, prov. and 2 m. W. Sondrio; its vines are renowned. The chapel is resorted to by pilgrims. P. <2000.

Sassello, tn., Italy, Liguria, prov. Genoa, 12½ m. N. Savona. P. <3000.

Sassen, dist., Prussia, prov. E. Prussia, in the SW., stretching from W. to E. for about 35 m.

Sassenage, tn., France, dep. Isère, on the Isère, arr. and 4 m. WNW. Grenoble; manufactures cheeses; has curious gorges and cascades, called the 'Cuves de Sassenage.' Tourist resort for Dauphiné. P. <2000.

Sásserám, or **Sassarám** (census), tn., Brit. India, Bengal, dist. Sháhábád, 88 m. SW. by W. Patna, 10 m. from the Son. P. 22,700; Hindus, 13,100; Moham. 9600.

Sassierges-St.-Martin, or **Sacierges,** vil., France, dep. Indre, arr. and 18 m. SE. Blanc, 3½ m. NNW. St. Benoît-du-Sault; iron-mines and deposits of manganese in the vicinity. P. <2000.

Sassin, tn., Hungary. See **Sasvar.**

Sass Maor, mt., Austria, Tirol, 35 m. NE. Trent. Alt. 9225 ft.

Sassnitz, vil. and small port, Prussia, Pomerania, on E. ct. of Rügen I., 11 m. NE. Bergen; has fisheries; much frequented for sea-bathing. P. <2000.

Sasso, name in Italian geographical nomenclature signifying 'rock' (*saxum*); *e.g.*, Gran Sasso d' Italia.

Sasso di Campo, or **Cima Rosella,** Alpine mt., on the Italian frontier of the Tirol, 16 m. NW. Belluno. Alt. 10,035 ft.

Sassoferrato, tn., Italy, The Marches, prov. Ancona, 32 m. NE. Perugia. In the vicinity are the remains of the ancient Umbrian town *Sentinum,* where the Romans defeated the united forces of the Samnites, Etruscans, and Umbrians, 295 B.C. P. <3000. Birthplace of the painter Sassoferrato (1685).

Saulnot, vil., France, dep. Haute-Saône, arr. Lure, 13 m. SW. Belfort; has salt-works and iron-mines. P. (comm.) <2000.

Sault, tn., France, dep. Vaucluse, arr. Carpentras, 32 m. E. Orange; manufactures cheese; has a magnesian sulphureous spring and bathing establishment. P. <2000.

Sault au Cochon, river-port, Canada, Quebec, Saguenay co., on the l. bk. of the riv. St. Lawrence, in 69° 5′ W., near the mouth of the river of the same name. P. <1500.

Sault Ste. Marie, tn. and port of entry, Canada, Ontario, in the E. div. of Algoma dist., on the short river (Ste. Marie or St. Mary's) connecting Lake Superior with Lake Huron, at the foot of the rapids (French *sault*), to which the town owes its name, 622 m. by rail W. Montreal, by a branch line of the C. P. R., forming the shortest route between Montreal and Minneapolis and St. Paul, U.S.A., now connected with Sault Ste. Marie in Michigan, U.S., by a railway bridge connecting the C. P. R. with the so-called 'Soo line.' P. <3000. See **Sault Ste. Marie,** rapid.

Sault Ste. Marie (sū sēnt ma'ri), rapid, N. America, at the upper end of the river between Lakes Superior and Huron, the fall of water being 22 ft. in ¾ m.; a ship canal around the rapids on the U.S. side, with a depth of 17 ft. (now being increased to 21 ft.), was completed in 1855. In the year of its opening the total amount of registered tonnage that passed through it was little over 100,000 tons; in twenty years this had increased to upwards of 1,000,000 tons, and in 1890 to above 9,000,000 tons. A canal on the Canadian side, 22 ft. deep, with one lock, 900 ft. long by 90 ft. wide, was opened in 1895.

Sault Ste. Marie, city, U.S., Michigan, cap. Chippewa co.; summer resort. P. 5800. See **Sault Ste. Marie** (Canada) and **Sault Ste. Marie,** rapid.

Sault St. Louis, vil., Canada. See **Caughnawaga.**

Saulx, riv., France, rises at Germay, dep. Haute-Marne, flows NW., and joins the Ornain some 10 m. NW. Bar-ie-Duc, and enters the Marne below Vitry-le-François after a course of 78–79 m. Area of basin, 920 sq. m.

Saulx, vil., France, dep. Haute-Saône, arr. Lure, 35 m. NNE. Besançon, 8 m. NE. Vesoul. P. <2000.

Saulxures, tn., France, dep. Vosges, on the Moselotte, 23 m. N. by W. Belfort, arr. and 10 m. SE. by E. Remiremont; manufactures cheese; iron mined. P. <2000.

Saulzais-le-Potier, vil., France, dep. Cher, arr. St. Amand-Mont-Rond, 19 m. N. by W. Montluçon. P. <2000.

Saulzoir, tn., France, dep. Nord, arr. Cambrai, 9 m. SSW. Valenciennes. P. <3000.

Saumur, tn., France, dep. Maine-et-Loire, on the l. bk. of the Loire, cap. arr., 27 m. SE. by E. Angers; seat of a celebrated cavalry school, founded 1768. Manufactures tin-plates, tin-ware, &c. Saumur has given its name to a white wine produced in the vicinity, on the l. bk. slopes of the Loire. The parish church of Nôtre Dame de Nantilly is a pilgrim resort,

and has some splendid tapestry. Saumur was the centre of the Reformation in Anjou; its governor, Duplessis-Mornay, here founded an academy in 1593, which was for a century the intellectual centre of French Protestantism. The revocation of the Edict of Nantes reduced the population by one-half, and the commerce to almost nothing. Birthplace of Madame Dacier (died 1720). P. 14,900.

Saumurois, ancient div. of Anjou, France, now included in dep. Maine-et-Loire.

Saundatti, tn., Brit. India, Bombay, dist. Belgáum, 23 m. NNE. Dhárwár; about 2 m. S. are ruins of the hill fort Parasgarh. A large Hindu fair in honour of the goddess Yellamma is held twice a year 5½ m. to the NW. P. 8900; Hindus, 7800.

Savage Island, Burma, Bay of Bengal, at the entrance to Akyab Harbour, with a light, in 20° 5′ N., 92° 54′ E., visible 17 m.

Savage Islands, several groups of islets, Brit. N. America, on N. side of Hudson Strait.

Savage Islands, a group in the Pacific Ocean, in 19° S. and 169° W. The principal, 30 m. in circuit, is densely wooded. Discovered by Cook, 1774.

Savaii, the westernmost and largest isl. of the Samoan group, crossed by 13½° S., 172½° W., has two high chains of mountains of volcanic origin, trending E. and W., and covered with fine forests. Mean alt. 3940-4260 ft. The island is well watered; coasts generally rocky, and little indented; no port. Length, 45 m.; breadth, 30 m.; area, 659 sq. m.

Savalan-dagh, range of mts. stretching E. and W. in the NW. of Persia, N. of 38° N.; Savalan-dagh peak (extinct volcano), 15,792 ft.; Kosha-dagh, 10,332 ft. (Curzon).

Sávál, tn., India, Bombay Presidency, state of and 20 m. N. by E. Baroda. P. (1881) 6300.

Savandrúg, fort, India, Mysore, Bangalore dist., in 12° 55′ N., 77° 21′ E. Savandrúg is a precipitous isolated rocky hill, with a base 8 m. in circuit. The fort was captured by a British army under Lord Cornwallis, 1791. Alt. 4024 ft.

Savanna, city, U.S., Illinois, Carroll co., on l. bk. of Mississippi R., 38 m. SE. Dubuque (Iowa). P. <4000.

Savannah, city, U.S., Georgia, cap. Chatham co., on S. shore of estuary of Savannah R., 110 m. SSE. Augusta. It is built on a sandy plain 40 ft. above the river, its streets cross at right angles, and at every second street there is a public square, generally ornamented with trees. The entrance to the harbour over the bar is 1 m. wide. Depth on bar (Tybee Roads) at ordinary high water 26 ft., at low water 19 ft.; length of quayage and wharfage, 6 m. Vessels drawing 24 ft. can reach the quay. The adjacent marshy lands, formerly rice-fields, have been drained. The chief defences of the river are Fort Pulaski, on Cockspur I., at the mouth, and Fort Oglethorpe (formerly Fort Jackson), on the r. bk. of the river. The chief business is in cotton, Savannah ranking as the second cotton port in the U.S. The trade in turpentine and lumber is also considerable. Near to the town is the beautiful cemetery of Bonaventure. Mean temp. (24 yrs.), yr. 66.5° F., Jan. 51.0°, July 82.0°; annual rfall. (24 yrs.), 51.75 in. P. (1850) 15,300; (1870) 28,200; (1880) 30,700; (1890) 43,200.

Savannah, riv., U.S., between Georgia and S. Carolina, is formed by the confluence of the Tugalo and Kiowee, 100 m. above Augusta, flows SE. to the Atlantic at Tybee Sound, in 32° N.; navigable to Augusta for steamers. Length, 450 m.

Savannah, tn., U.S., Missouri, Andrew co., 15 m. N. St. Joseph. P. <1000.

Savio, riv., Italy, in the E., rises in the Etruscan Apennines, and flows N., past Cesena, into the Adriatic Sea, which it enters about 10 m. SE. of Ravenna.

Sávitri, riv., Brit. India, Bombay, rises on the W. declivity of the Mahábaleshwar Range, flows into the Arabian Sea at Bánkot; navigable for craft drawing 7 ft. to Mhar, 36 m. Length, 50 m.

Savo, isl., Oceania, Solomon group, E. of Florida, and N. of Guadalcanar; has an area of 23 sq. m. Highest point, 1970 ft.

Savoch, eccles. par., Scot., Aberdeenshire, Ellon, New and Old Deer, and Tarves pars. P. <2000.

Savognin, vil., Switzd., cant. Grisons, 17½ m. S. by E. Chur in Ober-Halbstein. Alt. (Schweiningen) 3980 ft. P. <2000.

Savoie, dep., E. France, formed in 1860 out of the old Italian duchy of Savoy (Savoie, Haute-Savoie, La Tarentaise, and Le Maurienne); divided into four arrs. (corresponding generally to the old provs.): Chambéry (cap.), Albertville, Moutiers, and St. Jean-de-Maurienne. The dep. belongs to the region of the Alps, and is highly mountainous. It is divided into two unequal parts, NW. and S., by the Isère; in the former, the geological formations are similar to those of the Jura; in the latter, calcareous formations alternate with granite, gneiss, schists, &c. The S. div. contains the great Vanoise group on the line of water-parting between the Isère and Arc, with several summits rising to over 9845 ft., culminating in Point Aiguille (12,670 ft.), and with numerous glaciers; connected mountain groups are the Grand Pelvoz, N. of Modane, also with glaciers, and the Mont Pourri (12,430 ft.), to the N. The summits of the main water-parting, forming the frontier with Italy, are here slightly lower (see **Alps**). NW. of the Isère the mountains are of less elevation; highest point (8745 ft.) in the Aravis Range, between the Arly and Fier; in this div. are Lakes Bourget and Aiguebelette; lowest point in dep. at confluence of Guiers with Rhone. The dep. is drained entirely to the Rhone, which forms the W. boundary for about 30 m. (between the confluence of the Fier and of the Guiers), mainly by the Isère, which traverses the dep. from E. to W., receiving r. bk. Arly, l. bk. Doron ('torrent') of Bozel, and Arc. Below Albertville the Isère is confined within artificial banks to protect the surrounding country from inundation. Climate on the whole cold, but varying much owing to differences of elevation. Wheat is the leading cereal, then rye and maize; the vine covers about 2 per cent. of the surface (chiefly on the southern slopes in Maurienne to a height of 2600 ft.), but the production per acre is less than half the average for France; tobacco (Aiguebelle, Chamoux, &c.); mulberry and cider apples, limited; the dep. is noted for cheese. Coal is mined in small quantity. Area, 2389 sq. m. P. (1891) 263,300. See **France,** table.

Savoie, Haute-, dep., E. France, on the frontier of Italy and Switzd., S. of Lake Leman, formed in 1860 out of three provs. of the ancient duchy of Savoy (Genevois, Chablais, and Faucigny); divided into four arrs.: Annecy (cap.), Bonneville, Thonon, and St. Julien. Surface exceedingly mountainous, the dep. including Mont Blanc (15,780 ft.), with several other mountains in the same group rising to over 13,125 ft., elsewhere few summits exceed 9845 ft.; lowest point (820 ft.) at the confluence of the Fier with the Rhone. In the W. and NW. the general elevation is under 1640 ft., and this is the most fertile region; in the central (N. and S.) belt the altitude is between 1640–4920 ft.; here cereals are cultivated, orchard fruits flourish up to 3610 ft., and there is excellent pasture; in the higher eastern part the pastoral industry predominates, but the hardier cereals and root-crops are grown. The dep. is drained entirely to the Rhone, which winds round the northern half from E. to W., but only touches the dep. on the W., where it forms the frontier for about 20 m. with Ain; its principal tribs. are the Arve, Drahse, Usses, and Fier; to the basin of the last belongs Lake Annecy. As regards geological structure, Cretaceous and Jurassic formations predominate throughout the greater part; granite, gneiss, &c., in the Mont Blanc group. Forests cover about one-fourth of the surface (Sapennais, Combe-Noir, Tronc, Samsens, &c.). Climate varies with alt., rigorous in the higher parts. The principal cereal is wheat, grown chiefly in the N. and W., then oats; the vine occupies nearly 2 per cent. of the surface (W. and NW.), production per acre slightly above the average; tobacco (Annecy Alby), apples for cider. Manufactures very limited, chiefly textile; watch and clock-making is carried on in various places. Area, 1775 sq. m. P. (1891) 268,300. See **France,** table.

Savona, seapt. city, Italy, Liguria, prov. and 22 m. W. by S. Genoa; manufactures machinery, cloth, firearms, pottery, chemicals, and has iron and steel foundries. The port has 16–26 ft. of water at quays, new harbour, 25 ft. at entrance to new harbour. Its cathedral dates from the 17th century. Savona was for a long time a rival of Genoa, and the Genoese having seized it, destroyed the port. The King of Sardinia took it in 1746. Birthplace of the popes Sixtus IV. (died 1484) and Julius II. (died 1515). P. 23,500.

Savonas, stn., Canada, prov. Brit. Columbia, on the C. P. R., about 121° W., 1256 m. by rail W. Winnipeg, 226 m. E. Vancouver.

Savoy, terr., Europe, on the W. or French side of the Alps, S. of the Lake of Geneva, forming, since 1860, the two French deps. Savoie and Haute-Savoie. In the Roman era Savoy formed part of the vast terr. of the Allobroges; the greater part of the country was ceded to Burgundy in 470. At the beginning of the 12th century the local counts of Maurienne became counts of Savoy, and gradually increased their power until they had built up a powerful state. Soon after the middle of the 16th century the sovereigns of Savoy transferred their seat of government to Turin. In 1713 Victor Amadeus II. obtained Sicily also, with a royal title, by the treaty of Utrecht. Having exchanged Sicily for Sardinia, he was recognised by Europe as king of Sardinia. At the French Revolution, Savoy was declared to be the French dep. of Mont Blanc, but the Congress of Vienna (1815) restored it to Sardinia. In 1860 Victor Emmanuel, then king of Italy, ceded Savoy, the cradle of his dynasty, to France in recompense for the assistance afforded by Napoleon III. to the Italians in recovering Lombardy from the Austrians.

Saxe-Altenburg, Duchy of, state of central Germany, in the old dist. of Saxony, separated into two nearly equal portions by the princip. of Gera, situated between 50° 42′ and 51° 6′ N., 11° 20′ and 12° 40′ E., and enclosed by the terrs. of Prussia, the kgd. of Saxony, and the states of Saxe-Weimar, Saxe-Meiningen, and Schwarzburg-Rudolstadt; surface covered by ramifications of the Erzgebirge Mts. in the W., and watered by the Saale, Roda, and Orla. Area 511 sq. m. P. (1890) 171,000. See **German Empire,** table.

Saxe-Koburg-Gotha, Duchy of, state of central Germany, in the old dist. of Saxony, cap. Gotha. It is divided into the two provs. of Koburg, situated between Bavaria and Saxe-Meiningen, and Gotha, surrounded by Prussian Saxony, Schwarzburg, Saxe-Weimar, and a detached piece of Hesse-Nassau. Surface mountainous, with fertile valleys. Principal rivers, the Nessa, Gera, Saale, and Itz. Chief industries, agriculture and cattle-rearing. The manufactures of Gotha are very varied. Education is in an advanced state. Prince Albert of England (Prince Consort) was born near Koburg, August 26, 1819. Total area, 756 sq. m. P. (1890) 207,000. See **German Empire,** table.

Saxelby, par., Eng., Leicestershire, 4 m. NW. Melton Mowbray. P. <250.

Saxe-Meiningen, Duchy of, state of central Germany, cap. Meiningen, chiefly situated between 50° 10′ and 50° 50′ N., 10° 10′ and 11° 40′ E., having on the S. Bavaria; elsewhere surrounded by the dominion of Saxe-Weimar, Koburg-Gotha, Schwarzburg-Sondershausen, Saxe-Altenburg, and Reuss, except some detached dists. amongst the other Saxon duchies. The surface is covered with the Thuringian Forest mountains. The riv. Werra traverses the duchy, which is fertile; but very little corn is raised. Mining is actively pursued; iron, copper, coal, alum, vitriol, marble, and salt are obtained. Manufactures comprise hardwares, linen and woollen fabrics. Area 953 sq. m. P. (1890) 224,000. See **German Empire,** table.

Saxe-Weimar, Grand Duchy of, state of central Germany, and the largest of the Saxon princips., consisting of three principal detached portions of terr.: (1) the princip. of Weimar; (2) that of Eisenach; (3) the circle of Neustadt, and several small terrs. included in other states, enclosed by the states of Bavaria, the other Saxon duchies, Reuss and Schwarzburg-Rudolstadt, and the provs. of Prussian Saxony and Hesse-Nassau. Surface mountainous in the W., watered by the Werra and its affluents; more level in the centre and E., and traversed by the Ilm, Saale, and affluents of the Elster. Corn, flax, hemp, hops, wine, timber, iron, salt, coal, and fullers' earth are the principal products, with fine wool, which is exported to England. Cattle and swine are numerous, and in the W. especially form the principal sources of wealth. Manufactures comprise linen and woollen fabrics, glass and earthenwares; and the transit trade is important. Jena is the seat of a university, and public schools are numerous; Weimar is celebrated for its literary and scientific institutions. Principal towns, Weimar, Eisenach, Apolda, Jena, Neustadt, and Weida. Area 1388 sq. m. P. (1890) 326,000. See **German Empire,** table.

Saxham, Great and **Little,** two adjoining pars., Eng., Suffolk, the former 5 m. SW. Bury St. Edmunds, with a stn. (**Saxham**) on the G. E. R., P.O. (**Great Saxham**). P. (of each) <250.

Saxon Switzerland, the name applied to the mountainous part of the kgd. Saxony, SE. Dresden; it is very picturesque, but nowhere exceeds 2000 ft. alt.

Saxony, German **Sachsen,** a kgd. of the German Empire extending from the NW. frontier of Bohemia to the Prussian provs. of Silesia and Saxony and the Thuringian states; divided into the four dists. (*Kreishauptmannschaften*) of Zwickau, Dresden, Leipzig, and Bautzen; cap. Dresden. Total area about three-fourths of that of Wales, but with a good deal more than twice the population, this kingdom being one of the most populous regions in the world, and the part of the German Empire that for more than half a century has exhibited the most rapid rate of increase.

Population in thousands, and mean increase per cent. per annum.

	1815.	1830.	1840.	1875.	1890.
Population .	1178	1402	1711	2760	3503
Increase . .	...	1.17	2.01	1.38	1.60

By far the greater part of the surface consists of mountains or highlands, which merge so gradually in the plains that no precise boundary-line can be drawn, though the towns of Zwickau and Chemnitz, and a line curving gently northward, drawn from Chemnitz to Dresden, may be held as marking the limit fairly well W. of the Elbe, which divides the country into two unequal sections, while Dresden, Königsbrück, Kamenz, and Bautzen may be taken as marking a similar limit E. of the Elbe. The tract E. of the Elbe forms the Saxon portion of Lusatia, the highland section of which consists mainly of a granite plateau with basalts, on which rise, between Bischofswerda and Löbau, two not inconsiderable mountain ridges (highest point the Falkenberg near Neukirch, 1990 ft. in the southern ridge). W. of the Elbe the chief mountains are the frontier range of the Erzgebirge (*q.v.;* highest point in Saxony the Fichtelberg, 3980 ft.), at the W. end of which, on the Saxon side, lies the bleak Voigtland, while at its E. end the Elbe breaks through the remarkable sandstone mountains known as the Saxon Switzerland (*q.v.*). The chief **river** is the Elbe (*q.v.*), an important waterway, and most of the other rivers belong to this basin; chief trib. in S. the Mulde; in the W., formed by the union of the Zwickauer and Freiberger Mulde, the latter receiving the Zschopau or Zschopauer Mulde. Among other rivers of the same basin are the Schwarze and Weisse Elster, the latter a trib. of the Saale, and the Spree, a trib. of the Havel. The Neisse, a trib. of the Oder, also has its origin in Saxony. The **climate** is generally severe in the mountains, but milder in the valleys.

Notwithstanding the extent of the highlands, the proportion of arable and garden land in the kingdom amounts to nearly 55 per cent., being highest in the dists. round Leipzig, Bautzen, and Zittau, where it amounts to about 75 per cent., least round Auerbach in the Voigtland (less than 25 per cent.). The chief cereals are oats and rye. Beetroot and flax are also cultivated. Horse-rearing is an important industry. Excellent wool is obtained from the Saxon sheep. In the 18th century 'electoral' wool (from the present kingdom) had a reputation surpassing all others. The **forests** of Saxony, which cover about 28 per cent. of the surface, chiefly on the higher slopes of the Erzgebirge and throughout Lusatia, both on the hills and in the plains, have a European reputation. They consist chiefly of pines and firs, but include also foliage trees in the NW. Woodcocks and

bustards are occasionally to be met with. Fish abound in the rivers, and a pearl-fishery is still carried on in the Weisse Elster.

The **mineral wealth** of Saxony, however, is what has long given this region its chief economic importance, in the present century through the stimulus which its mineral fuel gives to manufactures. The mining industries of Saxony have been vigorous since the 12th century, since which time silver-lead has been extracted at Freiberg. Tin is mined at Altenberg (near the frontier due S. of Dresden), and it is from Saxony that the art of tin-plating was originally introduced into the United Kingdom (S. Wales). Iron is mined at Scharzenberg, cobalt at Marienberg. The principal coalfields are that between Zwickau and Chemnitz in the W. (chief mining centres Zwickau and Lugau), and that of the Plauenscher Grund, near Dresden. Lignite is mined at Grimma, near Leipzig, as well as at Bautzen and Zittau, in Lusatia. Peat is worked in the Erzgebirge. Fine clay is obtained near Meissen, the place where porcelain was first manufactured in Europe. Topazes are found in the Erzgebirge. Mineral springs are numerous—at Elster, Berggiesshübel, Augustusbad, Schandau, Tharandt, Hohenstein, Wolkenstein (86° F.), Lausigk, Grünthal, &c.

The **manufactures** of Saxony are among the most important in the world. They are chiefly pursued in the W., in the neighbourhood of the principal coalfield, the chief centres being Chemnitz and Zwickau. The most important branch is the textile industry, especially the manufacture of cottons at Chemnitz; but linens, woollens (including flannel), hosiery, and jute (at Zittau, &c.) manufactures are all carried on to a large extent. Hosiery is made in all the towns along the base of the Erzgebirge, still to a large extent domestically, though factories are more and more gaining the upper hand. Machinery is largely made at Zwickau and Chemnitz; stone- and earthenware at the same places, as well as at Bautzen and Meissen, the last of which has the Royal 'Dresden' porcelain factory. Among other manufactures are those of glass (Dresden, Radeberg, Bischofswerda, and Karlsfeld), toys, and other wooden wares in the Erzgebirge, and musical instruments in the Voigtland.

The **people** are chiefly Germans and Germanised Slavonians, but there are still about 50,000 Slavonic-speaking Wends in Upper Lusatia. **Education** is as widely diffused and as advanced as in any part of Germany. The university of Leipzig is the second largest in the empire. At Dresden there is an important polytechnical institute, at Freiberg a mining academy, and at Tharandt a school of forestry.

The history of the various regions bearing the name of Saxony, or a cognate name, is too complicated to be briefly summarised. The margraviate of Meissen was acquired in 1127 by Konrad of Wettin, the ancestor of the still reigning house, and may be looked upon as the nucleus of the kingdom. In the 15th century the present prov. of Saxony belonged in the N. (Altmark) to Brandenburg, the remainder chiefly to the archbishopric of Magdeburg, the bishopric of Halberstadt, the county of Mansfeld, and in the S. to the duchy of Saxony, which then included not only the margraviate of Meissen but also a large part of Thuringia. In 1485 two duchies were created by a partition of the terrs. between two brothers, Albert and Ernest, the founders of the Albertine and Ernestine lines; the former receiving the margraviate of Meissen, with the duchy of Saxony proper to the N. (including Wittenberg), and a tract to the N. of Thuringia, W. of the Saale, the latter the Thuringian states. The Albertine branch retained the electoral dignity, and afterwards acquired the title of king, when one of the electors was chosen king of Poland. By the arrangements of the Congress of Vienna (1814–15), after the fall of Napoleon, the Albertine branch lost to Prussia its N. terr., including Wittenberg, as well as the terr. W. of the Saale, but retained the kingly title. See **German Empire,** table.

Saxony, prov., Prussia, the least compact of all the provs. It lies between Hanover on the W. and Brandenburg on the E. and N. of the Thuringian states and the kingdom of Saxony, but is nearly bisected by the duchy of Anhalt and part of Brunswick, the N. section, moreover, surrounding detached portions of Brunswick and Anhalt, the S. section the lower lordships of the two Schwarzburg principalities, while outlying portions of the prov. lie further S., and circles Schleussingen and Ziegenrück in the Thuringian Forest. Total area more than a fourth larger than Wales. The whole prov. is traversed by the Elbe, which forms part of the NE. frontier, and is there joined by the Havel, which forms part of the E. frontier, and in the latitude of the town of Brandenburg is connected with the Elbe by the Plaue Canal. The S. section is also traversed by several important tribs. of the Elbe—the Saale (with its tribs. the Unstrut, Pleisse, and Weisse Elster), the Mulde, and the Schwarze Elster. The Werra partly traverses, partly bounds, the SW. corner of the prov., and the N. section contains the upper part of the Aller, also belonging to the Weser basin. The cap. is Magdeburg, on the Elbe; the prov. is divided into the three govts. (*Regierungsbezirke*) of Magdeburg, Merseburg, and Erfurt. The larger half of the prov. belongs to the German lowland, and is well known for its extensive moors—on the left of the Elbe the Drömling, on the Aller, and the Halberstädter Bruch (moor), and on the right the Zeiner Bruch. The Harz Mts. enter on the SW. side; to these belong the highest mountain, the Brocken (3745 ft.), the Rosstrappe, the Auer Mt., with the Joseph's cave (1900 ft.), and the Mansfeld. South of the Harz is the broad valley of the Helme (the Goldene Aue or 'golden meadow'). A part of the Thuringian Forest with the Finster Mt. (3040 ft.) also belongs to the prov. The **lakes** are the small Arend-see in the N. and the still smaller Süsser-see in the S. See also **Salziger See.** The average annual temp. is about 40° F. Annual rfall. on the Harz 56 in., in the lowland 15–20 in. Apart from the moorlands, the soil is very fertile, especially between Magdeburg and Erfurt; about 60 per cent. of the prov. is arable land. The prov. is the chief seat of the cultivation of sugar-beet, and the manufacture of sugar in the German Empire. Other products are cereals, hops, chicory, vines, tobacco. In the mountainous parts there are large forests with plenty of game. On the Elbe there are still, here and there, some beavers to be found. Cattle and sheep rearing are of considerable importance in the prov. The N. portion of the prov. is mainly covered by Quaternary drift, succeeded on the S. by small patches of Tertiary and larger areas of Cretaceous age. The geology of the S. portion is too complicated for description; the Trias is the series most largely developed. At the foot of the Harz there is Zechstein. The mineral treasures are of the greatest importance. Brown coal (lignite) is mined at Weissenfels, Kalbe, Aschersleben, true coal at Wettin, rock-salt and other salts in enormous quantity at Stassfurt (*q.v.*), Erfurt, Schönebeck, Dürrenberg, Halle. At Mansfeld there are also argentiferous copper ores. Iron ores, nickel, alum, marble, clay, and sulphur also occur. Metal and other industries are consequently extensive, especially the manufacture of woollen cloth, chemicals (Stassfurt), cigars, earthenware, manufacture of guns (Suhl), linen, starch, leather, cornbrandy (Nordhausen), machines, besides sugar as already mentioned. There is a dockyard at Buckau (Magdeburg). There is a university at Halle. Since the migration of nations the prov. has been inhabited by Saxons, who were Christianised by Charlemagne and Henry I. The northern part of the prov., 'Altmark,' already belonged to Brandenburg in 1415; in 1648 Magdeburg, Halberstadt, and Mansfeld were added. In 1803 Erfurt, Eichsfeld, and Mühlhausen were added to the Brandenburg (now Prussian) terr., and the prov. attained its present dimensions in 1815. See **German Empire,** table, and **Saxony,** kingdom (History).

Sayan Mountains, an extensive system of mountains on the frontier between E. Siberia and NW. Mongolia, 90°–106° E. Great confusion prevails still as to the structure of the whole system, and many different mountain ridges are comprised under this general denomination. As a rule, the name of Sayans is applied to the border ridge of the High Plateau of E. Asia in NW. Mongolia, *i.e.*, W. of the Yenisei, where it appears as a continuation of the Sailughem ridge of the **Altai.** The name of Erghik-Targak Taiga is given both to its further continuation in a NE. direction between the Us and the upper Yenisei (Bei-khem), and to the slopes of the High Plateau towards the Uda, Iya, and Oka Rivs.; while the name of Sayan reappears again in the border ridge of the High Plateau from Lake Kosogol to Lake Baikal, which might be considered as the Sayan proper until it receives a separate name. In this last part, which is best known, the Sayan Mts. rise gently above the plateau and slope abruptly northwards; their peaks, consisting of granites and metamorphic slates, are generally rounded, and attain 11,450 ft. in the snow-clad Munku-Sardyk, and from 7000–9000 ft. elsewhere, joining the 9000 ft. high Khamaraban at the SW. extremity of Lake Baikal. A wide belt of alpine regions, consisting of several parallel, yet unnamed, ridges fringes the Sayans on the N., the Oya ridge in the basin of the Yenisei, and the Tunka, Kitoi, and Byelaya Alps

in the basin of the Angara. Volcanic rocks and ejections of lava are widely spread in the Sayan border ridge.

Scarborough, parl. and mun. bor., par. and market-tn., Eng., Yorkshire, N. Riding, 37 m. NE. York, in the diocese of York, on the coast, with terminal station of three branches of NE. R. Built on a fine bay with castle-rock on N. and 'Oliver's Mount' behind, and a bridge 75 ft. high over a picturesque gorge, this 'Queen of the Watering-Places' has long been favoured by tourists, attracted by its sands as well as by the scenery. The castle, once a Norman keep, then a royal fortress, gave name to the town, *Scaur-burg,* 'fort on the rock.' The tidal harbour (1732–1850), with lighthouse and floating dock, is enclosed by three piers. There is besides 'a promenade pier,' quayage of harbour 4050 ft.; depth 13 ft. at high water ordinary springs, at low water dry; floating-dock 90 ft. long. Besides the cliff bridge (414 ft. long), there is a viaduct spanning the ravine. There are a market-hall, an extensive aquarium, a museum, &c. Industries, fisheries, coasting-trade, jet-manufacture. About 2½ m. SE. of the town is Cornelian Bay, so called on account of the cornelians found here along with jaspers, moss-agates, &c., on the beach. P. mun. bor. (1801) 6700; (1851) 12,900; (1871) 24,300; (1891) 33,800.

Scarborough, seapt. tn., W. Indies, on the SE. ct. of Tobago I. No bar, but in a bay well sheltered from prevailing winds; depth available in port, 6–10 fathoms. P.<2000.

Scarcies, two rivs., W. ct. of Africa, rise near the S. frontier of Futa Jallon, and flow SW., almost parallel to each other, into the Atlantic by a common estuary, in 8° 50′–56′ N. The Great Scarcies, the most northerly, is 155 m. long; the Little Scarcies, in spite of its name, is much longer.

Schaffen, comm., Belgium, prov. Brabant, arr. and 19 m. ENE. Louvain. P.<3000.

Schaffhausen, in French **Schaffhouse,** cant., Switzd., in the N., on r. bk. of the Rhine, surrounded by the gd.-duchy of Baden, excepting a portion of the S. frontier, is divided into three parts, one principal part, and two isolated portions, one to the E. facing Thurgau on the opposite bank of the Rhine, the other to the SW., nearly surrounded by Zürich. The canton is traversed SW. to NE. by the Jura Mts. The fertile dist., called the Klettgau, 1300–1650 ft. in alt., lies to the SW.; highest point, the Hohe Randen, is 3000 ft. in alt. Forests, vineyards, orchards, and corn-fields occupy most of the surface. Cattle-breeding is a principal industry; important fisheries in the Rhine, especially of salmon. The water of the Rhine is used as a motive power; manufactures of machinery, agricultural implements, iron-founding, household utensils, surgical instruments, ribbons, cotton and woollen goods, chemicals, carriages, and guns. The

inhabitants speak German, and are mostly Protestants. The government is a representative democracy; legislative power is confided to a council, with direct referendum, elected by the people, one member for every 500 persons; executive power is in the hands of a council of five. Public education is very advanced; it is obligatory and gratuitous. The Roman road to Ratisbon passed through the Klettgau to Schaffhausen (*Scaphusa*), which derives its name from the vessels which landed here. In 1501 Schaffhausen was admitted into the Swiss Confederation, and made a canton in 1798. During the Thirty Years' War the Imperial and Protestant troops did an immense amount of damage here. See **Switzerland,** table.

Schaffhausen, tn., Switzd., cap. cant. Schaffhausen, 14 m. NNW. Winterthur; manufactures silk and cotton goods, wrought steel wares, files, iron wire, railway requisites, furniture, earthenware, tiles, and tobacco. The famous falls of the Rhine, 1 m. above, are used for industrial purposes. The town, which preserves the characteristics of the Middle Ages, is overlooked by the curious fortress of Unoth, or Munoth, dating from the 15th and 16th centuries. Schaffhausen was made an imperial free city in the 12th century; it has a cathedral, the oldest church in Switzd., built 1104. Birthplace of the historian Johannes von Müller (1752–1809). Alt. 1330 ft. Annual rfall. (12 yrs.), 39.96 in. P. 12,400.

Schafstedt, tn., Prussia, prov. Saxony, 11 m. SW. Halle, circle Merseburg. P. <3000.

Scheideck, or **Scheidegg, Great** (or **Hasli-**), pass, Switzd., cant. Bern, between the valley of Grindelwald and the Haslithal, N. of the Wetterhorn. Alt. 6434 ft.

Scheideck, Little (or **Wengern**), important pass (6788 ft. high), between the Grindelwald valley and the valley of Lauterbrunnen, S. of the Wengern Alp.

Scheidt, vil., Prussia, in S. of Rhine Prov., govt. Trier (Trèves), circle Saarbrücken. P. <3000.

Scheldt, Flemish **Schelde,** French **Escaut,** ancient *Scaldis*, riv., France and Belgium, rises in the French dep. Aisne, flows mostly NE. through the dep. Nord, passing Cambrai and the Belgian provs. Hainaut and E. Flanders, to Antwerp, where it turns NW. and enters the North Sea in the Dutch prov. Zeeland. Formerly it entered the sea by two mouths, the E. and W. Scheldt, which enclosed the two isls. of Beveland and Walcheren, but since these islands have been connected with each other and the mainland by railway embankments, the northern channel, though still bearing the name of East Scheldt (Ooster-Schelde), is no longer a mouth of the river, which enters the sea only by the southern channel or so-called West Scheldt (Wester-Schelde) Hond (Hont, or Honte). Total course 270 m., navigable 210 m. (to Cambrai), and for large sea-going ships to Antwerp (*q.v.*). In its lower part it traverses a flat country, and its banks are fenced by dykes. Affluents, the Scarpe, Lys, and Durme from the W., Dender and Rupel from the E. It is connected by canals with the Somme, Seine, Loire, and the principal cities and towns of Belgium.

Scheles, vil., Austria, Bohemia, 21 m. N. Pilsen. P. <2000.

Schellingsfelde, suburb of Danzig. P. <3000.

Schemnitz, Hungarian **Selmecz-és-Bélabánya** (that is, Schemnitz and Dilln, Dilln or Bélabánya lying about 3 m. NE. of Schemnitz proper, but included in same municip.), free city, Hungary, co. Hont, 66 m. N. Budapest, picturesquely situated in a mountain hollow about 10 m. E. and S. of the Gran; it lies amidst a mass of trachyte—such as ores of the precious metals, as well as of lead and copper, are associated with throughout Hungary—and owes its importance to its having been for centuries the chief seat of silver-mining in the region. The town existed as early as the 8th century, and its mining rights are mentioned as already old about the middle of the 13th century. The silver-mines are almost entirely in the hands of the state; the production has of late years declined. Gold and iron are also mined to a smaller extent. Among its remains of an earlier period are ruins of a 13th century castle. The town now possesses an Academy of Mines, and an Academy of Forestry, as well as a College of Piarists. To the N. are the thermal springs of Vihnye, and still further N. those of Szkleno. Alt. 1950 ft. P. (1869) 14,000; (1890) 15,300.

Schenectady (sken-ek'ta-di), city, U.S., New York, cap. Schenectady co., on the Mohawk and the Erie Canal, 16 m. WNW. Troy. Seat of Union College, founded 1785, and contains a state armoury. Manufactures include large locomotive and agricultural works, the Edison electric works, &c. One of the oldest settlements in the state, founded 1661. The first passenger railway in the U.S. was that between Schenectady and Albany, opened in 1831. P. (1850) 9000; (1870) 11,000; (1880) 13,700; (1890) 19,900.

Schenevus, vil., U.S., New York, Otsego co., on Schenevus R., 67 m. W. by S. Albany by rail. P. <1500.

Scherweiler, vil., Ger., Alsace-Lorraine, circle Schlestadt, 15½ m. N. by E. Kolmar; manufactures pasteboard and packing paper. Petroleum spring. P. <3000.

Scherzligen, vil., Switzd., cant. Bern, 1½ m. S. by E. Thun, at the outlet of Lake Thun.

Scheveningen, ct. tn. and watering-place, Holland, prov. S. Holland, on W. ct., 1 m. NW. The Hague. Scheveningen is a country and bathing resort of The Hague, with which it is connected by two roads; one, the 'Oude Weg' ('Old Road') of the 17th century, bordered by fine trees. Both this and the New Road are traversed by tramways. The town is visited during the season by about 20,000 persons; its beach is one of the finest on the North Sea. In 1570 the W. part of the town was engulfed by an inundation. A naval battle, between the Dutch, under De Ruyter, and the allied fleets of France and England, was fought off Scheveningen, 1673. P. 18,000.

Schidlitz, suburb of Danzig, Prussia. P. <3000.

Schiedam, tn., Holland, prov. S. Holland, on the r. bk. of the Nieuwe Maas, 4 m. W. Rotterdam. Schiedam is the chief centre of the manufacture of 'Hollands' (gin). Other industries are manufacture of white-lead, rope-walks, and iron-works. Schiedam is an outer port of Rotterdam, and starting-point for the herring fisheries. Imports cereals for distilling; exports spirits, butter, and cheese. P. 25,500.

Schiefbahn, vil., Prussia, Rhine Prov., circle Gladbach, 6 m. NE. München-Gladbach; manufactures silk and velvet. P. < 3000.

Schiefergebirge ('slate mountains'), mt. region, W. Ger., covers the S. of Westphalia, a large part of Rhenish Prussia, and joins the Ardennes (Belgium) in the SW. The Rhine, between Bingen and Bonn, divides it into two nearly equal parts; the E. part contains the Sauerland Mts., the Westerwald, the Siebengebirge, and the Taunus; the W. portion has the Eifel, the Hohe Venn, and the mountains of Saarbrücken. The E. part of the Eifel has numerous volcanic rocks; the Taunus and the Eifel have important mineral springs, and the Westerwald contains iron.

Schiehallion, mt., Scot., in the N. of W. Perthshire, 9½ m. WNW. Aberfeldy. Alt. 3547 ft.

Schieranco, vil., Italy, Piedmont, prov. Novara, 10 m. SSW. Domodossola, in the Val Antrona; sulphureous iron and auriferous and argentiferous quartz mined. P. < 2000.

Schiermonnikoog, isl., Holland, in the North Sea, prov. Friesland, about 8 m. long by 1-3 m. broad; lighthouse. P. < 2000.

Schiers, vil., Switzd., cant. Grisons, 9 m. E. by S. Ragatz, in the Prättigau. Alt. 2210 ft. P. < 2000.

Schierstein, vil., Prussia, circle Wiesbaden, on the Rhine. P. < 3000.

Schiffbek, vil., Prussia, govt. Schleswig, circle Stormarn, on the Bille. P. < 4000.

Schifferstadt, tn., Ger., Bavaria, Palatinate of the Rhine, 6 m. NW. Spires, on the Rehbach: railway junction. P. < 5000.

Schiffweiler, vil., Prussia, Rhine Prov., circle and 2½ m. SW. Ottweiler; coal and iron mined. P. < 4000.

Schijndel, vil., Netherlands, prov. N. Brabant, 7½ m. SE. Bois le Duc; manufactures wooden shoes. P. (comm.) 5500.

Schildberg, tn., Austria, Moravia, 34 m. NW. Olmütz. P. < 2000.

Schildberg, or **Schildberg in Posen,** tn., Prussia, in the SE. of Posen, 43 m. NE. by E. Breslau (Silesia), circle Schildberg, the cap. of which is Kempen. P. < 4000.

Schildesche, vil., Prussia, prov. Westphalia, 27 m. SE. by S. Osnabrück, circle and 2½ m. NNE. Bielefeld. P. < 5000.

Schiltag, tn., Ger., Bavaria, circle Offenberg, in a valley of the Black Forest. P. < 2000.

Schiltern, vil., Austria, Moravia, 11 m. WNW. Znaim. P. < 2000.

Schiltigheim, vil., Ger., Alsace-Lorraine, circle and 1½ m. N. Strassburg; scene of the victory of Julian (afterwards the emperor 'Julian the Apostate') over the Alemanni in 357 A.D. P. (1846) < 4000; (1890) 7700.

Schimitz, tn., Austria, Moravia, dist. Brünn. P. < 5000.

Schinkel, vil., Prussia, govt. and circle Osnabrück. P. < 4000.

Schinznach, vil., Switzd., cant. Aargau, 3½ m. SW. Brugg, on the Aar; frequented for its thermal sulphur spring and baths. P. < 2000.

Schio, tn., Italy, Venetia, prov. and 12 m. NW. by N. Vicenza; one of the chief manufacturing centres of Italy. Has dyeing of woollen textiles. P. 9900.

Schippenbeil, tn., Prussia, prov. E. Prussia, circle Friedland, 37 m. SE. by S. Königsberg. P. < 3000.

Schirgiswalde, tn., Ger., kgd. Saxony, circle and 7½ m. S. Bautzen. P. < 4000.

Schirmeck, tn., Ger., Lower Alsace, in the Steinthal (Breusch Valley), circle Molsheim, 26 m. W. by S. Strassburg. P. < 2000.

Schirnding, vil., Ger., Bavaria, govt. Upper Franconia, near Wunsiedel; iron mined. P. < 2000.

Schivelbein, tn., Prussia, prov. Pomerania, cap. circle Köslin, 29 m. S. by E. Kolberg; birthplace of the physiologist and anthropologist Virchow (1821). P. (1816) < 2000; (1890) 5900.

Schiza, isl., Greece. See **Skhiza.**

Schkeuditz, tn., Prussia, prov. Saxony, on riv. Elster, circle Merseburg, 8 m. WNW. Leipzig. P. 5000.

Schkortleben, vil., Prussia, Saxony, govt. Merseburg, circle Weissenfels; coal mined. P. < 2000.

Schlackenwald, tn., Austria. See **Schlaggenwald.**

Schlackenwerth, tn., Austria, Bohemia, 7 m. NNE. Karlsbad. P. < 3000.

Schladebach, vil., Prussia, prov. Saxony, circle and 5½ m. SE. Merseburg; lignite mines, probably the deepest in the world (5735 ft. in 1890). Observations show that the temperature increases 1° to 117.13 ft. in depth. P. < 2000.

Schladen, or **Schladen in Hanover,** vil., Prussia, prov. Hanover, circle Liebenburg, 9 m. S. Wolfenbüttel. P. < 3000.

Schladming, vil., Austria, Styria, 10 m. WSW. Gröbming, on r. bk. of the Enns; manufactures vitriol and saltpetre; copper mined. P. < 2000.

Schlaggenwald, or **Schlackenwald,** tn., Austria, Bohemia, 6½ m. SSW. Karlsbad; manufactures porcelain, sulphuric acid, and sewing cotton; coal, iron, lead, and tin mined. P. < 5000.

Schlan, or **Slane,** tn., Austria, Bohemia, 17 m. NW. by W Prague; coal-mines. The health resort of Sternberg is near. P. 9100.

Schlangenbad (Ger., 'snake bath'), watering-place, Prussia, Hesse-Nassau, circle Untertaunus, govt. Wiesbaden; has eight thermal springs of 78°-89° F. P. < 2000.

Schlanstedt, vil., Prussia, prov. Saxony, circle Oschersleben, 9 m. N. by W. Halberstadt. P. < 3000.

Schlapanitz, tn., Austria, Moravia, dist. Brünn. P. < 3000.

Schlawe, or **Schlawe in Pommern,** tn., Prussia, prov. Pomerania, on the Wipper R., circle Köslin, 46 m. E. by N. Kolberg. P. 5300.

Schlebusch, vil., Prussia, Rhine Prov., circle Solingen, 16 m. S. by W. Elberfeld. P. < 3000.

Schlegel, vil., Prussia, prov. Silesia, circle Neurode, 45 m. SSW. Breslau. P. < 3000.

Schlei, Schley, or **Slie,** narrow inlet, Prussia, on the E. side of Schleswig-Holstein, with the town of Schleswig near its head, 25 m. long.

Schleiden, vil., Prussia, Rhine Prov., circle and 24 m. SE. Aix-la-Chapelle. P. < 2000.

Schleidweiler, vil., Prussia, Rhine Prov., govt. Trier (Trèves), near Gerolstein; iron mined. P. < 2000.

Schleitheim, vil., Switzd., cant. and 8 m. WNW. Schaffhausen. Alt. 1570 ft. P. < 3000.

Schleiz, tn., Ger., princip. Reuss, younger line, in the Wiesenthal, 58 m. SSW. Leipzig, 16 m. WNW. Plauen (Saxony).

Schlesien, prov., Prussia. See **Silesia.**

Schlestadt. See **Schlettstadt.**

Schleswig, tn. and seapt., Prussia, cap. prov. Schleswig-Holstein, circle and 18 m. S. by E. Flensburg, near the head of the Schlei (inlet). An important seat of trade as early as 800. P. 13,900; comm. P. 15,000.

Schleswig-Holstein, prov., in the NW. of Prussia, somewhat smaller than Wales, lying S. of the mainland of Denmark, between the North Sea and the Baltic, including, besides the terr. on the mainland, the isls. of Röm, Sylt, Föhr, Amrum, Pellworm, and Nordstrand, the smaller islands, known as the Halligen, between Föhr and Pellworm and Nordstrand, Heligoland in the North Sea, and the islands of Alsen and Fehmarn in the Baltic. Most of these islands are embanked. The whole terr. belongs to the N. German plain, the western parts lying very low, the tracts along the W. ct., 4-14 m. wide, being even below sea-level; originally uninhabitable marsh-lands, protected against the sea, and thus reclaimed for agriculture, like the western provs. of the Netherlands, by embankments or dykes (25 ft. high from the heights of Blankenese, on the Elbe, a little below Hamburg, to Hoyer, in 54° 58′ N.). [See the maps indicating the progress of reclamation in the portion between the Eider and Elbe in *Petermann's Mitteil.*, 1891, plate 8.] The E. ct. is indented by long and mostly deep inlets, forming excellent harbours (the shallowest, the Hadersleben Föhrde, less than 16 ft.). The W. ct. is bordered by mud-flats (*Watten*), exposed at low tide, but intersected by deeper channels between the islands. One of these channels, the Lister Tief (33 ft. at low water), lies to the S. of Röm, and another, the Hoyer Tief, branching from this, reaches to about 3 m. from the mainland, E. of the N. part of Sylt. The construction of harbours, connected with the mainland by railway embankments at the head of these channels, has accordingly been proposed. The principal **rivers** are the Elbe, which bounds the prov. on the SW. for 62 m. (tribs. Stecknitz, Bille, Alster, &c.), and the Eider (tribs. Sorge, Treene, &c.). The Eider Canal and the North Sea and Baltic Canal pass through the prov., which also contains the Stecknitz and other minor canals. In the SE. of the prov. are several considerable lakes (Plön, Selent, Wesek, Witten), and smaller lakes are scattered over other parts. Climate temperate [**Kiel**]. Special attention is given to cattle-breeding, and large numbers of cattle are exported to England. Here, as elsewhere, the reclaimed marsh-lands form rich cattle-pastures, and yield also great quantities of garden produce. The only minerals of importance are gypsum, rock-salt, and clay. There is a university at Kiel. The prov. is composed of the former duchies of Schleswig (N. of the Eider), Holstein (S. of the Eider), and Lauenburg (SE. of Holstein). The Nordmark was founded in this part of Germany by Henry I. in 934. In 1127 it fell to Denmark, and remained subject to the kings of Denmark till 1544. It then passed into the hands of Danish branch lines till 1773, when it was reunited to Denmark. A succession dispute having arisen on the extinction of the direct Danish line in 1864, the terr. of Schleswig was taken, along with the duchy of Lauenburg (acquired by Denmark in 1814), by Austria and Prussia after a short war, and for some time the terr. thus acquired was administered partly by the one

power, partly by the other; but a war having broken out between the two, the whole fell in 1866 to Prussia. Under Prussian rule it forms only a single government, Schleswig, which has the town of the same name for its cap. Danish is still the sole or prevailing language as far S. as the lat. of Flensburg, and in the interior even further S. A Frisian dialect is spoken on the W. islands and the SW. ct., and Platt-Deutsch (Low German) in the remainder of the southern parts.

Schlettau, or **Schlettau in Erzgebirge,** tn., Ger., kgd. Saxony, circle Zwickau, 18 m. S. Chemnitz. P. <4000.

Schlettstadt (in French **Schlestadt**), tn., Ger., Alsace-Lorraine, on the Ill R., cap. circle, 13½ m. N. by E. Kolmar. Schlettstadt was made a free city under the Hohenstaufen. In 1634 it fell into the hands of the French, and was fortified by Vauban, 1676; ceded to the Germans, 1870, and the fortress destroyed by them, 1874. Here was discovered, in the 13th century, the art of glazing pottery. Birthplace of the reformer Martin Bucer (1491-1557). P. (1846) 10,400; (1890) 8000.

Schleuis, vil., Switzd., cant. Grisons, 15 m. W. by S. Chur. Alt. 2500 ft. P. <2000.

Schleuse, Ger., Dutch *Sluys*, French *Ecluse*, 'a sluice'; *e.g.*, Sluys, in Holland; Helvoetsluis, 'the sluice on the Haringvliet.'

Schleusingen, tn., Prussia, in a detached part of the prov. Saxony, circle Erfurt, 16 m. E. by S. Meiningen. P. <4000.

Schleussheim, tn., Ger., kgd. Bavaria, govt. Upper Bavaria, 8 m. N. Munich. P. <2000.

Schlewecke, vil., Ger. See **Harzburg.**

Schley, co., U.S., Georgia, N. of 32° N., and W. of 84° W.

Schlitz, tn., Ger., gd.-duchy Hesse, circle Lauterbach, 44 m. S. Kassel, 10 m. NW. by N. Fulda. P. <3000.

Schlochau, tn., Prussia, prov. W. Prussia, cap. circle Schlochau, 70 m. SW. Danzig. P. <3000.

Schloppe, tn., Prussia, in the SW. of prov. W. Prussia, circle Deutsch-Krone, 76 m. W. Bromberg. P. <3000.

Schloss, Ger., 'a castle'; *e.g.*, Marienschloss, 'the castle of (the Virgin) Mary.'

Schlotheim, tn., Ger., Schwarzburg-Rudolstadt, near Rudolstadt. P. <3000.

Schlucht, open pass, on the frontier of France and Alsace-Lorraine, Vosges Mts., between Little Tanneck and Hohneck; is a centre of excursions in the Vosges Mts. Alt. 3775 ft.

Schlüchtern, tn., Prussia, prov. Hesse-Nassau, 42 m. ESE. Giessen, cap. circle Schlüchtern. P. <3000.

Schluckenau, tn., Austria, Bohemia, 31 m. NW. by W. Reichenberg, 12 m. S. Bautzen (Saxony). P. <5000.

Schlüsselburg, dist. tn. and fortress, Russia, govt. and 40 m. E. St. Petersburg, at the issue of Neva from Lake Ladoga, on a low promontory open to the icy winds from the lake; surrounded by marshes. The fortress is opposite the town, on an island of the Neva. It was founded by the Novgorodians in 1323 under the name of Oryeshek, and is now a political prison. P. 4000.

Schmadribach, waterfall, Switzd., Bernese Oberland, 1 m. S. Lauterbrunnen.

Schmal, Ger., Scandinavian *Smaa*, 'little'; *e.g.*, Schmalkalden, 'the town on the little stream'; Smailholm, 'little hill,' a par. in Roxburghshire, Scot.

Schmalkalden, tn., Prussia, in a detached part of prov. Hesse-Nassau, 19 m. SSE. Eisenach, cap. circle Schmalkalden; iron and lignite mines in the vicinity; manufactures of iron and steel articles (needles, pincers, &c.), machinery, and toys. Famous in history for the Protestant leagues of 1531, 1537, and 1540. P. 7300.

Schmecks, watering-place, Hungary. See **Tatra Füred.**

Schmelz, or **Königlich-Schmelz,** vil., Prussia, prov. E. Prussia, 3½ m. S. by E. Memel, on the Kurisches Haff. P. <5000.

Schmiedeberg, tn., Austria, Bohemia, dist. Pressnitz. P. <4000.

Schmiedeberg, tn., Prussia, prov. Saxony, circle Wittenberg, 15 m. NW. by W. Torgau. P. <3000.

Schmiedeberg, or **Schmiedeberg in Schlesien,** tn., Prussia, prov. Silesia, circle Hirschberg, 33 m. SW. by S. Liegnitz. Alt. 1490 ft. P. <5000.

Schmiedefeld, vil., Ger., duchy of Saxe-Meiningen, circle and 10 m. SSW. Saalfeld, in the Thüringer Wald; manufactures sulphuric acid; iron mined. P. <2000.

Schmiegel, tn., Prussia, prov. Posen, 31 m. NE. by N. Glogau, cap. circle. P. <4000.

Schminger, riv., Prussia, prov. Hanover, flows NE. past Stade into the Elbe; navigable up to Stade, 3 m.

Schmölln, tn., Ger., prov. Saxe-Altenberg, on the Sprolte. P. 8700.

Schmöllnitz, Hungarian **Szomolnok,** tn., Hungary, co. Zips (Szepes), 24 m. W. Kaschau; mines of copper, silver, and lead, formerly of importance, now of no account. P. <3000.

Schmölz, vil., Ger., Bavaria, govt. Upper Franconia, dist. Kronach; gypsum and rock-salt mined. P. <2000.

Schmottseifen, vil., Prussia, prov. Silesia, circle Löwenberg, 27 m. WSW. Liegnitz. P. 2000.

Schnaitheim, vil., Ger., kgd. Würtemberg, circle Jagst, 22 m. NNE. Ulm. P. <3000.

Schnapper Point, watering-place, Victoria. See **Mornington.**

Schnasse, co., U.S., S. Dakota, on the N. frontier, bounded on the W. by 102° W., traversed by the Grand R.

Schneeberg, mt., Ger., Bavaria. See **Fichtelgebirge.**

Schneeberg, tn., Ger., kgd. Saxony, circle and 11 m. SE. by S. Zwickau. P. 8200.

Schneeberg ('snow mountain'), mt., Lower Austria, 20 m. WSW. Wiener-Neustadt, in S. of Wienerwald; has a statue of the Tsar Alexander I. Alt. 6810 ft.

Schneeberg, mt., on the frontiers of Prussian Silesia, Bohemia, and Moravia, at junction of the Riesengebirge and the Sudetes Mts., 18 m. SSE. Glatz. Alt. 4670 ft.

Schneeberg, Krainer (Carniolan), mt., in the extreme E. of Karst, on the borders of Carniola, Croatia, and Istria. To the W. of this mountain the railway from Trieste to Fiume traverses the *Porta Hungarorum* of the Middle Ages. Alt. 5890 ft.

Schneekopf, mt., Ger., Saxe-Koburg-Gotha, 19 m. S. Gotha, the second in height of the Thüringer Wald. Alt. 3209 ft.

Schneekoppe ('snow peak'), or **Riesenkoppe** ('giant peak'), mt., Austria, Bohemia, on the N. frontier, in the Riesengebirge, 15 m. NW. by N. Trautenau; has a meteorological station, and is much frequented by German tourists. Alt. 5260 ft.

Schneidemühl, tn., Prussia, circle Kolmar in Posen, 52 m. N. by W. Posen. P. 14,100.

Schneidlingen, vil., Prussia, prov. Saxony, govt. Magdeburg, circle and 8½ m. N. Aschersleben; lignite mined. P. <2000; comm. P. 8700.

Schnellewalde, vil., Prussia, prov. Silesia, circle Neustadt-in-Oberschlesien, 37 m. NW. by W. Ratibor. P. <3000.

Schnierlach, vil., Ger., Alsace-Lorraine, 10½ m. NW. by W. Kolmar. P. <3000.

Schnierlach, or **La Poutroye,** tn., Ger., Alsace-Lorraine, Upper Alsace, circle Rappoltsweiler; has spinning and weaving. P. <3000.

Schober Pass. See **Alps,** PASSES, **IV.** (3 *c*).

Schoemansdal, tn., S. African Republic, Zoutpansberg dist., about 210 m. NNE. Pretoria, with goldfields near.

Schoharie, co., U.S., in E. of New York state, to the S. of 43° N., and E. of 75° W.; traversed from S. to N. by the **Schoharie Creek,** which enters the Mohawk R. in Montgomery county.

Schoharie, vil., U.S., New York, cap. Schoharie co., on Schoharie Creek, an affluent of the Mohawk, 30 m. W. Albany. P. <1500.

Schokland, isl., Holland, in the Zuider Zee, prov. Overijssel.

Scholar Green, PM.O., Eng., Staffordshire, 3 m. from Ridsgrove.

Scholes, vil., Eng., Yorkshire, W. Riding, Barkston Ash div., 5½ m. ENE. Leeds, on the NE. R., included in the par. of Barwick-in-Elmet, P.O.

Scholes, tn. (urban dist.), Eng., Yorkshire, W. Riding, 6 m. S. by E. Huddersfield, 1 m. E. Holmfirth stn. P. <1500.

Scholes, vil., Eng., Yorkshire, PM.O. See **Cleckheaton Whitechapel.**

Scholing, eccles. par., Eng., Hampshire, near Southampton, with a stn. (**Sholing**) on the L. & SW. R., PM.O. (**Sholing**). P. <3000.

Schöllenen, mt. gorge, Switzd., cant. Uri, traversed by the St. Gothard road and railway.

Schomberg, vil., Canada, Ontario, York co., 30 m. NW. by N. Toronto. P. <1500.

Schömberg, or **Schömberg in Schlesien,** vil., Prussia, prov. Silesia, circle Landeshut, 53 m. SW. Breslau, 11 m. NE. Trautenau (Bohemia). P. <3000.

Schön, German, 'beautiful.'

Schönach, vil., Ger., gd.-duchy Baden, circle Villingen, 2 m. NW. Triberg; manufactures watches, and has straw-plaiting. P. <3000.

Schönau, watering-place, Austria, Bohemia, dist. Teplitz. P. <3000.

Schönau, tn., Ger., kgd. Saxony, near Chemnitz; manufactures hosiery, crucibles, &c. P. <4000.

Schooten, comm., Belgium, prov. and arr. Antwerp. P. <4000.

Schopfheim, tn., Ger., gd.-duchy Baden, circle and 8 m. ENE. Lörrach, on the Wiese; manufactures cotton, textiles, silk ribbon, iron chains and wire, leather, and wooden shoes; has bleach-works. P. <3000.

Schopfloch, vil., Bavaria, circle Middle Franconia, 4½ m. NNE. Dinkelsbühl; nursery for fruit trees. P. <3000.

Schöppenstedt, tn., Ger., duchy of Brunswick, circle and 10 m. E. by S. Wolfenbüttel. P. <4000.

Schoppinitz, vil., Prussia, prov. Silesia, circle Kuttowitz, 40 m. E. by N. Ratibor; manufactures machine oil and glass; coal, zinc, silver, and lead mined. P. 6000.

Schoritz, Gross, Prussia, prov. Pomerania, isl. of Rügen, 12 m. E. by S. Stralsund.

Schorndorf, tn., Ger., kgd. Würtemberg, govt. and 29 m. WSW. Ellwangen, circle Jagst, on the Rems, N. of the Rauhe Alb; manufacture of articles in silver. P. <5000.

Schössberg, tn., Austria. See **Sasvár.**

Schoterland, comm., Netherlands, prov. Friesland, 18½ m. SSE. Leeuwarden. P. 14,000 (in many vils.).

Schötmar, vil., Ger., princip. Lippe (Detmold), 18 m. SSW. Minden. P. <3000.

Schotten, tn., Ger., gd.-duchy Hesse, prov. Upper Hesse, on the Nidda, in a valley of the Vogelgebirge, 33 m. NE. by N. Frankfurt-on-the-Main; cap. circle Schotten. P. <3000.

Schottwein, or **Schutzwein,** vil., Lower Austria, dist. and 7½ m. SW. Neunkirchen; marble and gypsum quarried; iron mined. P. <2000.

Schouten Island, Tasmania, S. of Freycinet Penin., in 42° 25′ S.

Schouten Islands, a group of one large and many small isls., Eastern Archipelago, off the N. ct. of the W. end of New Guinea, at the mouth of Geelvink Bay.

Schouwen, a former isl., Holland, prov. Zeeland, between the E. Scheldt and the Brouwerhavensche Gat, now united with Duiveland.

Schraalenburg, vil., U.S., New Jersey, Bergen co., 7 m. E. by N. Paterson. P. <1500.

Schramberg, tn., Ger., Würtemberg, circle Schwarzwald, 12 m. WNW. Rottweil. P. (1861) <4000; (1890) <5000.

Schraplau, tn., Prussia, prov. Saxony, circle Mansfeld, 12 m. W. by S. Halle; lignite mined. P. <3000.

Schreckhorn Mountain. See **Alps,** SUBDIVISIONS, **II. B. 1.**

Schreiber, stn., Canada, prov. Ontario, on the C. P. R., 865 m. by rail W. Montreal.

Schreiberhau, vil., Prussia, prov. Silesia, circle Hirschberg, 33 m. SE. Görlitz; celebrated glass-works. Schreiberhau is the highest place in Silesia, alt. 1788 ft.; and has one of the finest cascades in the Riesengebirge. P. <2000; comm. P. 4000.

Schreibersdorf, vil., Austria, Bohemia, 29 m. ESE. Königgrätz, and 3 m. SW. by S. Senftenberg. P. <2000.

Schrems, vil., Lower Austria, 50 m. NE. Linz. P. <2000.

Schriesheim, vil., Ger., gd.-duchy Baden, circle Mannheim. P. <3000.

Schrimm, tn., Prussia, prov. and 22 m. S. by E. Posen, on riv. Warthe; cap. circle S. P. (1816) <2000; (1890) 6100.

Schrobenhausen, tn., Ger., kgd. Bavaria, govt. and circle Upper Bavaria, 15 m. SW. by S. Ingolstadt. P. <3000.

Schroda, tn., Prussia, prov. and 19 m. SE. by E. Posen; cap. circle Schroda. P. <5000.

Schroon Lake, vil., U.S., New York, Essex co., 15 m. from Riverside stn.; is a favourite summer resort. P. <1500.

Schubin, tn., Prussia, prov. Posen, 13½ m. SW. by W. Bromberg; cap. circle Schubin. P. <3000.

Schuelen, comm., Belgium, prov. Limburg, arr. Hasselt, 15 m. NE. Tirlemont. P. <2000.

Schuitklip, Cape Colony, dist. Calvinia, 112 m. ENE. Ookiep.

Schulenburg, vil., U.S., Texas, Fayette co., 25 m. by rail, W. Columbus. P. <1500.

Schulitz, tn., Prussia, prov. Posen, on the l. bk. of the Vistula, circle and 11 m. E. by S. Bromberg. P. <3000.

Schull, or **Scull,** PMT.O., Ire., co. Cork; has barytes. See **Skull.**

Schuls, or **Scuols,** tn., Switzd., cant. Grisons, in the Lower Engadine, on the l. bk. of the Inn, 30 m. NE. St. Moritz; saline springs and baths. Alt. 4030 ft. P. <2000.

Schüpfen, vil., Switzd., cant. and 7 m. NW. by N. Bern. Alt. 1755 ft. P. <3000.

Schüpfheim, vil., Switzd., cant. and 15 m. SW. by W. Lucerne, in the Entlebuch. Alt. 2385 ft. P. <3000.

Schüren, vil., Prussia, prov. Westphalia, govt. Arnsberg, 5 m. SE. Dortmund; coal and iron mined. P. <4000.

Schussen, small riv., Ger., in the S. of Würtemberg, flows S. into the Lake of Constance.

Schussenried, vil., Ger., kgd. Würtemberg, circle Danube, 31 m. SSW. Ulm. P. <3000.

Schütt, two isls., in the NW. of Hungary, in the Danube, a little below Pressburg. The Grosse-Schütt (Magyar, Czallo-Köz) is 50 m. long, by 18½ m. in its widest part; area, 595 sq. m.; covered with orchards. In the extreme E. is the fortress of Komorn. The Kleine-Schütt (Magyar, Sziget-Köz) is 28 m. long, and 106 sq. m. in area. They are regarded as the granary of Vienna.

Schüttenhofen, or **Sušice,** tn., Austria, Bohemia, 36 m. S. by E. Pilsen; manufactures cloth, malt, and matches; deposits of plumbago in the vicinity. P. 6500.

Schutterwald, comm., Prussia, govt. and circle Offenburg. P. <3000.

Schüttorf, tn., Prussia, in the SW. of prov. Hanover, circle Lingen, 35 m. W. by N. Osnabrück. P. <4000.

Schutzwein, vil., Austria. See **Schottwein.**

Schuyler, co., U.S., Illinois, crossed in extreme S. by 40° N. and E. of 91° W.

Schuyler, co., U.S., Missouri, in the NE., on the N. frontier, E. of 93° W.

Schuyler, city, U.S., Nebraska, cap. Colfax co., 60 m. W. by N. Omaha, near the l. bk. of the Platte R. P. <3000.

Schuyler, co., U.S., New York, N. of 42° N., crossed by 77° W.; it contains the head of Seneca Lake.

Schuylerville, vil., U.S., New York, Saratoga co., on the r. bk. of the Hudson R., 26 m. N. Troy. P. <1500.

Schuylkill, co., U.S., in the E. of Pennsylvania, S. of 41° N., crossed in the E. by 76° W.; it contains the source of the Schuylkill R.

Schuylkill (skul'kil), riv., U.S., rises in co. of same name, Pennsylvania, breaks through the Blue Mts., flows SE., passing Pottsville, Reading, Pottstown, Norristown, and Philadelphia, and joins Delaware R. 5 m. below the last-named city. Total course 120 m., for 108 of which, or to Port Carbon, it is made navigable by canals; vessels of 300 or 400 tons ascend it to Philadelphia, and a large coal trade is conducted on its waters. It is connected by a canal with the Susquehanna.

Schuylkill Haven, bor., U.S., Pennsylvania, co. and on Schuylkill R., 48 m. NE. by E. Harrisburg, 4 m. SSE. Pottsville; has coal-mining. P. <4000.

Schwaan, tn., Ger., Mecklenburg-Schwerin, on riv. Warnow, 12 m. S. Rostock. P. <4000.

Schwabach, tn., Ger., kgd. Bavaria, govt. and circle Middle Franconia, 9 m. SSW. Nürnberg; manufactures needles (formerly very important; the needle-makers' guild was renewed in 1651), also sheet-metal, gold, silver, brass, and steel wares, &c. Alt. 1045 ft. P. (1840) 7000; (1890) 8000.

Schwaben, region, Ger., called in English Swabia, or Suabia.

Schwabenberg, hill, Hungary. See **Budapest.**

Schwabing, tn., Ger., Upper Bavaria, 1 m. N. Munich, near l. bk. of the Isar; pleasure resort. P. <5000; comm. P. 8700.

Schwäbisch-Hall, tn., Ger. See **Hall.**

Schwabmünchen, tn., Ger., kgd. Bavaria, govt. and circle Swabia, 14 m. SSW. Augsburg. P. <3000.

Schwaderbach, tn., Austria, Bohemia, dist. Graslitz. P. <4000.

Schwadowitz, comm., Austria, Bohemia, circle Gitschin, 5½ m. SE. Trautenau; coal mined; bathing establishment; celebrated resort of pilgrims. P. <3000 (in two vils.).

Schwaigern, tn., Ger., kgd. Würtemberg, circle Neckar, 26 m. N. by W. Stuttgart. P. <3000.

Schwakop, riv., SW. Africa. See **Swakop.**

Schwalbach, tn., Ger. See **Langenschwalbach.**

Schwanden, vil., Switzd., cant. and 3½ m. S. Glarus. Alt. 1740 ft. P. <3000.

Schwandorf, tn., Ger., kgd. Bavaria, govt. and circle Upper Palatinate, 21 m. N. Regensburg. P. <5000.

Schwanebeck, tn., Prussia, prov. Saxony, circle Oschersleben, 5½ m. NNE. Halberstadt. P. <4000.

Schwangau, vil., Ger., Bavaria, govt. Swabia, 2 m. ENE. Füssen, near r. bk. of the Lech. Two miles S. are the royal castles of Hohen-Schwangau (alt. 2935 ft.), built 1832, and Neu-Schwanstein (alt. 3305 ft.). P. <2000.

Schwanheim, vil., Prussia, govt. Wiesbaden, circle Höchst, on l. bk. of the Main. P. <3000.

Schwartau, vil., Ger., gd.-duchy Oldenburg, 4 m. N. by E. Lübeck. P. <2000.

Schwarz, Ger., 'black;' *e.g.*, Schwarzwald, 'Black Forest' (*g.v.*).

Schwarzach, small riv., Ger., in the SE. of Bavaria, flows from the Bohemian Forest into the Naab; not navigable.

Schwarzburg, vil., Ger., Schwarzburg-Rudolstadt, dist. Königsee, in a picturesque part of the Thüringer Wald, on the Schwarza. P. <2000.

Schwarzburg-Rudolstadt, princip., Ger., near its centre, and a state of the German empire, about one-fifth larger than the isl. of Anglesey, consisting chiefly of three detached pieces, one known as the Lower Prov. (*Unterherrschaft*), immediately to the S. of the Goldene Aue, in the angle between the Helme and Unstrut, surrounded by the Prussian prov. of Saxony except on the W., where it is contiguous with the Lower Prov. of Schwarzburg-Sondershausen; the two others forming the Upper Prov. (*Oberherrschaft*), lying to the S. in the Thuringian Forest, one traversed by the Ilm and Schwarza, in the NE. corner also by the Saale, the other in the N. by the Saale; aggregate area about one-fifth larger than the isl. of Anglesey. Principal towns, Rudolstadt on the Saale (the cap.) and Frankenhausen. Area, 363 sq. m. P. (1875) 76,676; (1890) 85,900. See **Thuringian States** and **German Empire,** table.

Schwarzburg-Sondershausen, princip., Ger., near its centre, and a state of the German Empire, divided like Schwarzburg-Rudolstadt into upper and lower provs., both lying immediately to the W. of the corresponding sections of Schwarzburg-Rudolstadt, the upper prov. in several distinct sections; aggregate area about one-tenth larger than the isl. of Anglesey. Principal towns, Sondershausen (the cap.) and Arnstadt. P. (1875) 67,500; (1890) 75,500. See **Thuringian States** and **German Empire,** table.

Schwarzenbach, or **Schwarzenbach an der Saale,** tn., Ger., kgd. Bavaria, govt. and circle Upper Franconia, 24 m. N Bayreuth. P. <4000.

Schwarzenberg, tn., Ger., kgd. Saxony, circle and 18 m SE. by S. Zwickau, cap. circle; has iron-mines in the vicinity. P. <4000.

Schwarzenberg, vil., Switzd. See **Noirmont.**

Schwarzenburg, Switzd., cant. Bern, 9 m. E. Freiburg. Alt. 3225 ft. P. <2000.

Schwarz Kosteletz, tn., Austria, Bohemia, 20 m. ESE. Prague. P. <3000.

Schwarzwald ('black forest'). See **Black Forest.**

Schwarzwald, circle, Ger., kgd. Würtemberg, in the SW. See **Würtemberg.**

Schwarzwasser, tn., Austria, on the N. frontier of Silesia, 38 m. E. Troppau. P. <2000.

Schwaz, tn., Austria, Tirol, 17 m. ENE. Innsbruck. P. <4000.

Schwechat, tn., Lower Austria, dist. Schwechat. P. 6000.

Schwedt, or **Schwedt am Oder,** tn., Prussia, prov. Brandenburg, circle Angermünde, on the l. bk. of the Oder, 35 m. NNW. Küstrin. P. 9800.

Schweich, or **Schweich an der Mosel,** tn., Prussia, Rhine Prov., circle and 7½ m. NE. Trier (Trèves). P. <3000.

Schweidnitz, tn., Prussia, prov. Silesia, on the Weistritz, 30 m. SW. Breslau, cap. circle Schweidnitz; iron-founding, manufactures of machinery, pottery, &c.; has a sugar refinery in the neighbourhood. Schweidnitz was the cap. of a principality from 1278 to 1368. Scene of the victory of the Swedes, May 21, 1642; was an important fortress in the Seven Years' War. Alt. 810 ft. P. (1816) 10,000; (1890) 24,700.

Schweinau, tn., Ger., kgd. Bavaria, govt. and circle Middle Franconia, 2½ m. SW. by W. Nürnberg. P. <3000.

Schweinfurt, tn., Ger., kgd. Bavaria, govt. and circle Lower Franconia, on the r. bk. of the Main, 22 m. NE. by N. Würzburg, in a fertile district; important manufactures of colours, machinery, shoes, &c. Near is the old gymnasium, founded by Gustavus Adolphus; has a town hall, founded 1570; was made a free city in 1130. Schweinfurt was the headquarters of Gustavus Adolphus in the Thirty Years' War. Alt. 740 ft. P. (1840) 7300; (1890) 12,400.

Schweinitz, tn., Austria, Bohemia, 10 m. SE. Budweis. P. <4000.

Schwellbrunn, vil., Switzd., cant. Appenzell, 3 m. SSW. Herisau. P. <3000.

Schwelm, tn., Prussia, prov. Westphalia, circle Arnsberg 4½ m. E. by N. Barmen; manufactures of cord, rope, lines, bookbinding, &c. Alt. 920 ft. P. 13,500.

Schwenningen, or **Schwenningen am Neckar,** tn., Ger., in the SW. of Würtemberg, circle Black Forest, 39 m. SW. by S. Tübingen. P. 6400.

Schwerin, or **Schwerin in Mecklenburg,** city, Ger., cap. Mecklenburg-Schwerin, 19 m. S. Wismar, beautifully situated between Lakes Schwerin (E.), Ziegel (N.), and Ostorf (S.); the seat of the grand duke, with magnificent gardens, on an island between Lakes Schwerin and Burg. Has a Roman Catholic cathedral (1365–1430), with large organ. Seat of an arsenal. Trade and industry unimportant. P. (1810) 7700; (1890) 33,600.

Schwerin, or **Schwerin an der Warthe,** tn., Prussia, in the W. of prov. Posen, on the r. bk. of the Warthe, 37 m. E. Küstrin, cap. circle Schwerin. P. (1816) <4000; (1890) 6300.

Schweriner See, lake, Ger., Mecklenburg-Schwerin, near Schwerin; contains several islands. Length, 13½ m.

Schwersenz, tn., Prussia, prov. and 6 m. E. Posen, was founded by Jews expelled from Posen. P. <4000.

Schwerte, or **Schwerte an der Ruhr,** tn., Prussia, prov. Westphalia, on the Ruhr, circle and 6½ m. SE. Dortmund; manufactures of machinery and iron and steel goods. P. (1816) <2000; (1890) 6200.

Schwesing, vil., Prussia, prov. Schleswig-Holstein, circle Husum, 17 m. W. Schleswig, 3½ m. ENE. Husum. P. <2000.

Schwetz, or **Schwetz an der Weichsel** (Vistula), tn., Prussia, prov. W. Prussia, on l. bk. of the Vistula, 25 m. NE. by N. Bromberg, cap. circle Schwetz. The old town, founded 1308, frequently suffered from inundations, and was raised to the height of the river bank, 1875–83. P. (1816) <3000; (1890) 6600.

Schwetzingen, tn., Ger., gd.-duchy of Baden, circle Mannheim, 6 m. WSW. Heidelberg; founded 1656. P. <5000.

Schwetzkau, tn., Ger., Prussia, prov. Posen, circle Fraustadt, 22 m. NE. by E. Glogau. P. <2000.

Schwiebus, tn., Prussia, prov. Brandenburg, circle Züllichau, 42 m. E. by S. Frankfurt; important linen and woollen manufactures; coal mined. P. (1816) 4000; (1890) 8200.

Schwieloch, or **Schwielug,** lake, Prussia, prov. Brandenburg, govt. Frankfurt on the Oder, 13 m. NE. Lübben. Length, N. to S., 8½ m. by 2½ m. in its widest part. The Spree enters it in the NW.

Schwientochlowitz, vil., Prussia, prov. Silesia, circle Beuthen, 34 m. ENE. Ratibor, and 2 m. WSW. Königshütte. P. <5000; estate P. <3000.

Schwiz, formerly spelt **Schwyz,** or **Schwytz,** one of the four forest cants., Switzd., nearly in the centre of the Confederation, to which it gave name, enclosed by Lucerne, Zug, Zürich, St. Gall, Glarus, Uri, and the Lake of Lucerne. Area, 351 sq. m. Population nearly all Roman Catholics, and speaking the German language. Surface mostly mountainous; highest point the Rosstock, 8080 ft. (See also **Rigi.**) Principal rivers, the Sihl and the Muotta. The Lake of Zürich forms its N., and that of Zug a portion of its W. boundaries. The climate varies according to altitude; the upper valley, in which is Einsiedeln, and the mountainous part of the country, have very severe winters, while Gersau, on the Lake of Lucerne, has a mild climate. The S. wind, called 'föhn' (*q.v.*), often prevails in the valley of Schwiz and at Gersau. Wine and fruit are cultivated, but cattle-rearing is the chief branch of industry, and cattle, cheese, and timber are the principal exports. Manufactures nearly confined to cotton twist. Government a representative democracy; legislative power exercised by an elected council, one member for every 600 inhabitants; executive by a council of seven members, both councils being elected for four years. Principal towns, Schwiz, Einsiedeln, Küssnach, and Art. The terr. of Schwiz was composed in the Middle Ages of the three free communes of Schwiz, Steinen, and Muottathal. In 1291 it concluded with the terrs. of Uri and Unterwalden the treaty of alliance, which was the origin of the Swiss Confederation. After the victory of Morgarten, over the Austrians, 1315, the influence of Schwiz preponderated over the other allies, so that its name, slightly modified to Schweiz, was given to the entire Confederation. Schwiz heroically resisted the invasion of the French army, 1798. See **Switzerland,** table.

Schwiz, or **Schwytz,** tn., Switzd., cap. cant., is situated in the Muotta Valley, at the base of the Mythen Mt., 17 m. E. Lucerne. The town suffered greatly in the Revolutionary wars of 1798–99, when it was alternately occupied by the French and Austrian armies. P. 6700.

Schyn Pass, gorge, Switzd., Grisons, in the valley of the Albula, a few miles E. of the confluence of the Albula with the Hinter-Rhine. In 1868-69 a carriage road was made through this gorge, connecting the Hinter-Rhine valley (Thusis) with the foot of the Oberhalbstein (Tiefenkasten).

Sciacca, tn. and port, on the S. ct. of Sicily, prov. Girgenti, 40 m. SE. by E. Marsala; has coral fisheries. Manufactures pottery and saltpetre. Hot springs on the sides of the mountain (*Thermæ Selinuntinæ*), famous since ancient times. P. 22,200.

Scicli, tn., Sicily, prov. and 37 m. SW. by W. Syracuse. Alt. 695 ft. P. 12,000.

Sciencien, P.O., Ire., 3 m. from Fivemiletown (co. Tyrone).

Scigliano, comm., Italy, Calabrie, prov. and 11 m. SSE. Cosenza; manufactures woollen counterpanes. P. <4000.

Scilla, tn. and port, Italy, Calabrie, at the entrance of the Straits of Messina, prov. and 11 m. NNE. Reggio; manufactures silk goods. The town has been almost wholly rebuilt since the earthquake of 1785. Here is the famous rock of Scilla, known to ancient mariners. P. 5800. See **Messina, Gulf of.**

Scilly, tn., Ire., co. Cork, bar. and 1½ m. SE. Kinsale, on the E. side of Kinsale Harbour, P.O. P. <750.

Scilly Islands, group of isls. forming an eccles. par., Eng., included in the co. of Cornwall, 25–35 m. WSW. Land's End, Cornwall. They consist of about 140 islets and rocks, the principal of the former being St. Mary, Tresco, St. Martin, Bryher, and St. Agnes, all of which, with adjacent smaller islands, now constitute separate civil pars. The climate is mild; trees are few. High Town, the cap., on St. Mary, is the seat of a judicial court of twelve members, who have the civil government of the islands. The inhabitants are employed in fishing, and the cultivation of early flowers and vegetables for the London market. There are various Celtic remains, including stone circles, cromlechs, and a 'cliff castle.' They were long believed to be the *Kassiterides,* or tin islands of the ancients, though recent investigations have rendered this very doubtful, these islands being now placed on the W. ct. of Galicia, Spain. On St. Mary's I., St. Agnes, and Bishop Rocks are lighthouses. In the 10th century the islands were annexed to England, and they now form part of the duchy of Cornwall and the diocese of Truro. PMT.O. (**Scilly**). Mean temp. (20 yrs.), yr. 57.1° F., Jan. 45.9°, Aug. 61.0°; mean annual rfall. (20 yrs.), yr. 34.38 in. P. <2000.

Scinde, Brit. India. See **Sind.**

Surface.—As to the southern frontier, see the beginning of the article on England. Scotland is broadly divisible into three great regions, the Southern Uplands, the Middle Lowlands, and the Highlands. The boundary between the first two regions may be taken as formed by a line, curving somewhat towards the NW., drawn from near Dunbar on the E. to Ayr on the W. The region to the S., or rather SE., of this line comprises considerable stretches of populous lowlands bordering the Solway Firth and in the lower part of the basin of the Tweed, but is composed mainly of thinly-peopled hill-country, or rather broad, grassy, steepsided tablelands, the chief features of which are fairly well marked out by the three railway lines from Carlisle to Edinburgh and Glasgow—those of the N. B. R. (Waverley Route), the C. R., and the G. & SW. R. The first ascends Liddesdale, and then passes in a tunnel (alt. about 1000 ft.), between Riccarton Junction and Shankend stns., through a spur connecting the Cheviots with the central uplands, to descend by the valley of the Slitrig Water to Hawick in Teviotdale. In this section, however, the natural boundary between the Cheviots and the central uplands of the S. of Scotland is better marked by the highroad from Langholm to Hawick up the Ewes Water, and crossing into the Teviot valley at a notch (alt. 800 ft.) on the borders of counties Dumfries and Roxburgh. From Hawick both railway and road pass to the valley of the Tweed and ascend that of the Gala, crossing another summit at the height of 900 ft., between the Moorfoot and Lammermuir Hills, before descending into the valley of the South Esk not far from Edinburgh. On the other two lines there is only one summit; that on the C. R., which ascends the valley of the Annan, is situated a few miles N. of Beattock, at the height of 1028 ft., the railway descending thence into the valley of the Clyde. Finally, the G. & SW. R. ascends the valley of the Nith, passes New Cumnock at the height of 600 ft. near the head of that valley, and then descending into the Ayrshire lowlands passes round the NW. of the upland area. The highest summit of the Southern Uplands is Mount Merrick (2764 ft.), in a section in the SW., cut off to some extent by the valleys of the Dee and the Doon.

The Lowlands, or more properly the Middle Lowlands, of Scotland form the area which has at all times in all probability been the most populous part of the country. Its N., or rather NW., boundary may be taken as marked by a nearly straight line drawn from Stonehaven or Aberdeen to the mouth of the Clyde. To this section belongs the great bulk of the mineral wealth of Scotland, the greater part of the fertile soil of the country, and, consequently, most of the chief towns, including the principal seaports. It is not entirely composed of lowlands, but embraces three ranges of hills—the Sidlaw Hills, between the lowlands bordering the N. shore of the Firth of Tay and the valley of the Isla (l. bk. trib. Tay); the Ochil Hills, between the riv. Earn and the rivs. Teith, Forth, and Devon; and the Campsie Fells, with their continuation the Kirkpatrick Hills, between the Forth and Clyde.

The remainder of Scotland, comprising more than half the area, is the least populous part of the whole. It includes considerable lowland areas in the shoulder jutting out to the E. in Aberdeenshire, on the S. shore and near the head of the Moray Firth, and in the penin. of Caithness; but the great bulk of it is composed of high hills intersected by deep and narrow valleys, the hills on the W. side mostly coming close up to the shore of the numerous inlets which here indent the coast-line, and reappearing in the numerous islands by which that coast is bordered. The Highlands proper are first of all divisible into two great sections, a NW. and a SE., by what is known as Glenmore or the Great Valley, the straight depression, marking the line of a geological fault running from the Moray Firth to Loch Linnhe, partly occupied by Lochs Ness, Oich, and Lochy, and now traversed by the Caledonian Canal. The section to the SE. of this valley contains the highest peaks in Scotland and, indeed, in the British Isles, and is on the whole more compact than the other, yet it is divisible by natural features into subsections. First, the valley of the Spey, along with that of the Spean (separated by a water-parting 848 ft. high), cuts off to the NW. the subsection known as the Monagh Lea (Monadh Liath) Mts. The remainder, known collectively as the Grampian Mts., is then divided into two larger subsections by the valleys of the Garry and Truim, the latter a trib. of the Spey, these valleys having formed at all times the main route (now that of the Highland Rly.) across the central Highlands, leading through the Pass of Killicrankie up to that of Drummouchter (the water-parting 1500 ft.), and then down to the valleys of the Spey and Spean. In the NW. of the western of these two subsections, E. of the head of Loch Linnhe, stands Ben Nevis (4406 ft.), the highest mountain in the British Isles. About the middle of the E. subsection, but more towards the N., on the borders of the cos. of Aberdeen, Banff, and Inverness, rise a group of giants, including the four peaks next in height to Ben Nevis—Ben Macdhui (4296 ft.), Carntoul (4241 ft.) Briaeriach (4248 ft.), and Cairngorm (4084 ft.). The W. subsection is again subdivided in a somewhat marked manner by the valleys of the Dochart, Fillan, and Lochy (the two latter separated by a pass near Tyndrum), now followed by the railway to Oban. The West Highland Rly., ascending the W. shore of Loch

Lomond and then Glen Falloch and Strath Fillan, and proceeding N. from Tyndrum by Glen Tulla and Strath Ossian into Glen Spean, can hardly be said to mark a natural line of division, the route ascending and descending several times.

The NW. section of the Highlands is divided into numerous subsections by lines of valleys under 1000 ft. in height stretching from side to side, the principal being that formed by Strath Bran and Glen Carron, with a water-parting at about 550 ft., now traversed by the Dingwall and Skye Rly. The highest summits of this section are Carn Eige (3877 ft.) and Mam Soul (3862 ft.), in the SW. of the section, N. of Glen Affric, a few miles from the head of Loch Alsh. Better known summits, on account of their conspicuousness from neighbouring lowlands, are Ben Wyvis (3429 ft.), NW. of Dingwall; Ben Dearg (3547 ft.), near the head of Loch Broom; and Canisp (2779 ft.) and Suilven, or the Sugar-loaf (2399 ft.), masses of Torridonian sandstone, which rise abruptly from a bed of ancient gneiss in the SW. of Sutherland.

The prevailing **geological** formations are disposed in certain well-marked zones stretching NE. and SW.; the detailed features are, however, often exceedingly complicated. The Southern Highlands consist mainly of Silurian beds arranged in a series of folds, the anticlinal axes of which are marked by the outcrop of black shale. The Upper Silurians stretch from Berwick and Haddington through the Lammermuir Hills, Peebles, Selkirk, Dumfries, Kirkcudbright, and Wigtown to the Mull of Galloway. NW. the Lower Silurian forms a parallel band, widening towards the SW. E. of the Upper Silurian, the Old Red Sandstone covers nearly the whole of Roxburghshire, and stretches N. and W. through Berwick and Haddington, flanking for a short distance the Lower Silurian. Beds of the Lower Carboniferous series are found in the Tweed valley and in Liddesdale; Permian deposits cross the Upper Silurian in the valleys of the Nith, Kennet, and Annan; Triassic beds occur about the head of the Solway Firth, and Alluvial deposits along the coast. The principal granitic masses occur in Kirkcudbright and Ayr, and in the Cheviots in Roxburghshire. In the Middle Lowlands, Old Red Sandstone forms a large part of the Pentland Hills, and extends SW. through Lanark and Ayrshire; northward it reappears over a large area about the Firths of Forth and Tay and the great fault, along which it is bordered by a narrow band of clay slate. The central part of the Lowland region is mainly occupied by numerous formations of the Carboniferous series, the coalfields having the greatest development in Ayrshire and Lanark; smaller coalfields occur in Clackmannan, Edinburghshire, and on the opposite coast of Fife. Porphyritic rocks predominate in the hilly region and S. of the Tay, intermixed, especially in the Ochill Hills, with tuff; porphyritic rocks also form the elevated region on the borders of Renfrew and Ayr. Basaltic masses break through the Carboniferous deposits, chiefly in the W., and also form numerous dykes (E. and W.). In the Highland region by far the most widespread formations are those belonging to the Dalradian series (Metamorphic). S. of the Glenmore depression these formations extend through the greater part of Inverness, Aberdeen, northern Kincardine, and SW. through Forfar, Perth, and Argyll, to the Mull of Kintyre, and the islands of Jura and Islay. In the Monagh Lea section, along the Caledonian Canal to the SW., and in S. Aberdeenshire, the rocks belong mainly to the lower series, gneiss, gneissose, and schistose rocks; while the upper series, chiefly mica schists, predominate throughout the central region and along the line of the great fault. In the NE. subsection, E. of the Spey, the arrangement of various members of the series is very complex. There also are large tracts of crystalline and semi-crystalline rocks of the Dalradian-Lewiscan series, but there are also considerable deposits of Old Red Sandstone. Extensive granitic areas occur in the Ben Macdhui group, and in the mountainous region which extends eastward on both sides of the Dee and around Peterhead. In the SW. subsection granitic masses occur around the head of Loch Etive, in Ben Nevis, and other parts. Basaltic dykes are exceedingly numerous in the Loch Fyne dist., running generally NW. and SE. Diorite occupies an extensive area W. of Loch Rannoch. In the northern division of the Highlands, gneissose and schistose rocks stretch from Loch Linnhe northward through the whole central region to the Pentland Firth, including the W. coast (with the exception of Ardnamurchan promontory, which is terminated by a mass of gabbro), from Loch Suna to Loch Alsh. Old Red Sandstone prevails about the Moray and Cromarty Firths, and is continued N. to Caithness, of which it covers the greater part. Granite forms the Morven Hill region on the borders of Caithness and Sutherland, and appears in other parts of these counties. Along the W. coast, from Cape Wrath to the Sound of Sleat, stretch pre-Torridonian gneiss and Torridonian sandstone; the former, traversed by numerous basaltic dykes, predominates in the N., and the latter in the S. Torridonian sandstone is noteworthy for the fantastic forms into which it weathers, and also as containing the most ancient traces of organic remains in Britain. The Outer Hebrides consist almost entirely of pre-Torridonian gneiss, forming the largest area of that formation in the United Kingdom. The Inner Hebrides consist mainly of basalt with masses of gabbro, notably in the Cuillen Hills of Skye. The Orkney Is. are formed of Old Red Sandstone, and the same formation appears in the W. of the Shetland Is., but the greater part of these belong to the Dalradian series. It should be noted that although the above outline indicates the distribution of the principal series of rocks forming the 'crust' of Scotland, the actual surface is covered over large areas, sometimes to a depth of 100 ft., with boulder-clay of the glacial epoch. The principal **rivers** of Scotland, in order of drainage area, are the Tay, Tweed (lower course in England), Clyde, Spey, and Forth. Commercially, the Clyde is by far the most important, followed next by the Forth (including its estuary) and the Tay. The Forth and Clyde basins are united by a canal opened in 1790. For **climate**, see **United Kingdom.** It may, however, here be mentioned that the winter isotherms in Scotland present a striking feature in that they are approximately N. and S., the highest temperature being then found on the Atlantic sea-board, and the lowest inland, while the temperature of the E. coast is intermediate. The principal corn **crops** of Scotland are oats, barley, and wheat, the order of their importance being thus exactly the reverse of that in England; of the total area under corn crops, oats occupies nearly four-fifths, and wheat only one-thirty-third. Of minor corn crops, the largest is beans; rye and pease are very limited. The principal green crops are turnips and potatoes; of minor, the most important is vetches or tares; mangold is little cultivated. The total area under corn crops is about twice that under green crops. Further facts of interest under this head may be gathered from an inspection of the table on pp. 10-12 of the **Appendix.** From this it may be seen that a decrease of about 8 per cent. has taken place since 1869 in the total area under corn crops. This decrease is small as compared with that in any other section of the United Kingdom, and it is likewise interesting to note that, unlike England, Wales, or Ireland, Scotland has several counties (Orkney, Caithness, Sutherland, Nairn, Aberdeen, Selkirk) showing an increase under this head between 1869 and 1893. The decrease in area under wheat alone has been proportionally greater than in England, but the area under oats remains the same, though the distribution varies. In green crops there has also been a slight decrease, chiefly in potatoes. The only counties showing an increase in green crops are Sutherland, Orkney and Shetland, and Caithness. Cattle and sheep show an increase, the former of 21 per cent., the latter of 5 per cent. Dairy-farming is carried on chiefly in the three SW. counties; in the five NE. counties cattle are reared in large numbers for beef. The special Scottish breeds of sheep are the Cheviot and the blackfaced; the former valuable chiefly for its wool, the latter for its mutton. The Clydesdale cart-horses are famous. The **sea-fisheries** of Scotland constitute an important source of wealth. They are under the control of the Fishery Board, the country being divided into twenty-six fishery dists., of which the chief centres are Aberdeen, Fraserburgh, Peterhead, Leith, and Wick. The principal fish in order of importance are herring (about half the total), haddock (more than one-fifth), cod, ling, flat-fish of several kinds, halibut, and whiting. A sea-fish hatchery was established at Dunbar in 1893. Shell-fish include lobsters, crabs, and mussels, &c. Salmon is caught in several rivers. The herring fishery has been carried on in Scotland from early times. It is said (*Anderson's Hist. of Commerce*) that about A.D. 836 the Netherlanders were in the habit of resorting to Scotland to buy salt-fish; in 1424, mention is made of the custom on pickled herrings exported, and of a duty on red herrings; and laws to regulate the industry were passed in the reign of James II. and subsequent sovereigns. The total value of the **mineral productions** of Scotland is about one-ninth of that for the United Kingdom, the chief being coal, stone, oil-shale, and iron ore. When coal was first worked in Scotland is not known, but Mr. Hull (*Coalfields of Great Britain*) shows that it was used in the 14th century, while certain abandoned surface pits and 'coal-heughs,' existing in Fifeshire in the time of Camden, are supposed to belong to the 15th century. Coal is now mined in about twelve counties, but four (Lanark, Fife, Ayr, and Stirling) produce more than five-sixths of the total. Iron ore (chiefly black band ironstone) is worked in connection with the coal-fields, about one-half of the total being obtained in Ayrshire. The production of pig iron is almost confined to Lanarkshire, which (with the Carron Works in Stirlingshire) supplies about three-fourths of the total. Lead, yielding silver, is obtained in small quantities in Lanark (Leadhills) and Dumfries (Queensberry, &c.), with a little zinc in the latter county. Oil-shales are now extensively worked in the cos. of Linlithgow and Edinburgh. Fireclay is obtained from the coal-mines, chiefly in Lanark.

Manufactures.—The oldest manufactures in Scotland are those of linen and woollen, both of which were actively carried on in the 16th century. In 1540 an Act was passed to regulate the manufacture of woollens, and towards the end of the same century linen formed the principal export. Its growth in the 18th century is shown by the fact that during the forty years 1728-68, the value of stamped linen increased from £103,000 to

£637,000. Till the close of the last, and even during the first years of the present, century the flax continued to be hand-spun. With the introduction of steam machinery a rapid advance took place, and as early as 1822 the value had risen to £1,396,000. (For mechanical improvements in textile manufactures, see **England, Manufactures.**) In later years the industry has been less widespread, having been in some dists. (Glasgow, Paisley) replaced by cotton. It is now mainly carried on in the E. midland counties (Forfar, Perth, Kinross, and Clackmannan), the chief centres being Dundee and Dunfermline. Jute has, since 1860, become a formidable rival of flax, and now forms a staple industry in Dundee. To the same group of textiles belongs hemp. The cotton manufacture has its centre in Glasgow (*q.v.*), from which it has spread to the surrounding towns within a radius of 20 or 30 m. The woollen manufacture is more widely distributed, though the greatest number of factories are situated in the east, midland, and southern dists. The chief centres are Galashiels, Selkirk, Dumfries, Hawick, and Innerleithen—famous for 'tweed' cloths; Inverness, Elgin, and Aberdeen are also noted for plaids, &c. Wool-spinning is carried on at Kinross and Alloa. Silk is manufactured to a limited extent (Glasgow, Paisley); carpets (Kilmarnock, Paisley, Glasgow, Ayr); floor-cloth and linoleum (Kirkcaldy). Paper was first made in Scotland about 1695; the manufacture is now carried on in many counties, most extensively in Edinburgh. The principal centres of the iron industry are Glasgow, noted for locomotives, machinery, and heavy iron goods generally, and Carron, where iron-works have been in operation since 1760, besides other places on the coal-fields. The distillation of mineral oil from shale, introduced in 1850, is now an important industry, of which Bathgate is the centre. Minor manufactures are glass and pottery, the former commenced at Wemyss under a patent from James VI., the latter at Glasgow, 1748; chemicals, &c. Shipbuilding is extensively carried on at Glasgow and other Clyde towns. (For the **commerce** of Scotland, see **United Kingdom.**) **Local Government.**—The most important centres of local administration in the Middle Ages were the 'royal burghs,' originally corporations enjoying a monopoly of trading privileges within a certain dist. Many of these were created by David I., in whose reign they formed a confederation or 'hanse' (ansa). In 1487 a 'General Convention' of Royal Burghs was constituted by Act of Parliament to deal with matters relating to merchandise, and to make rules, &c. A Convention of the Burghs still meets annually in Edinburgh. In 1633 Parliament confirmed the monopolies and privileges of the burghs, but in 1672 their exclusive right to buy and sell was limited to certain commodities—a restriction which they strenuously opposed. The Treaty of Union again confirmed their privileges, and though, in later times, these gradually ceased to be claimed, it was not till 1846 that they were formally abolished. The largest administrative div. in Scotland is the *civil county* or *shire* (33; Ross and Cromarty forming one, and Orkney and Shetland two counties). This div., which is of ancient origin, appears to have been gradually evolved; it cannot be assigned to any definite period. The *stewartry*, a term sometimes used as synonymous with county, was formerly a 'heritable jurisdiction,' not necessarily, or even generally, co-extensive with the county. The jurisdiction was abolished in 1748, though the name still survives as applied to Kirkcudbright. The old sub-divs. of counties have for the most part ceased to be recognised, but the county of Lanark is still divided into three 'wards,' and Ayr retains the names of its three 'bailiaries.' The chief officials of the civil or administrative county are the lord-lieutenant (who is also high-sheriff) and the sheriff-principal, both appointed by the Crown. The former represents the sovereign for military purposes, but has little administrative authority; the latter is a salaried official, entrusted with important judicial and administrative authority, and is the special guardian of the peace. From an early period in Scottish history the 'king's sheriff' was required to be present at the courts held by nobles and ecclesiastics, and himself to hold a court 'at the beginning of every forty days,' at which the lower nobility attended in person, and the higher—earls and ecclesiastics—were represented by their stewarts. The *sheriffdom*, or jurisdiction of the sheriff, is not confined to one county; its extent has varied at different periods, but an Act of Parliament passed in 1870 provided that the 33 counties of Scotland should, eventually, be grouped in 8 sheriffdoms, as the older ones fell vacant. The sheriff is represented in the different counties by sheriff-deputes (also appointed by the Crown), who are judges, in first instance, in the sheriff's court; they are also entrusted with the arrangements for parliamentary elections, the summoning of jurors, &c. The sheriff-principal must hold three (in some cases four) sittings annually in every county within his jurisdiction. Justices of the Peace, nominated by the lord-lieutenant, are appointed in each county by a commission under the Great Seal. The Justices hold the Court of Quarter-Sessions four times yearly. For judicial purposes the county is divided into Petty Sessional Districts. Commissioners of Supply, a body representing the landed interest of the county, originally appointed to collect and apportion the land-tax, were incorporated 1867–68. Previous to the passing of the Local Government Act, 1889, the provisions of which are similar to those of the English Act of 1888, they formed the chief county authority for administrative and rating purposes. Their functions are now very limited. The *civil parish* (or par. '*quoad omnia*') is the unit for poor-law administration, and (generally) for the registration of the population. A parish is either 'burghal' or 'rural'; a *burghal parish* (8) is one wholly within a burgh; all other parishes are *rural*. The local authority is the *Parochial Board*, consisting in burghal parishs of 'managers of the poor,' elected by the ratepayers according to a graduated scale; in rural parishes of all owners of property of £20 ratable value, with representatives elected by the ratepayers, certain members of the kirk-session, and of any royal burgh within the parish. A *Poor-house Combination* is the union of two or more contiguous parishes for the building and support of a common poor-house (work-house). The *ecclesiastical parish* (or par. '*quoad sacra*'), originally the same as the civil parish, but now in many cases different, is in all extra-burghal dists. the unit for educational purposes. A *royal burgh* (70) is a municipal corporation, originally created by royal charter, now governed by magistrates and councillors, the latter annually elected by the ratepayers, and the former by the councillors from among their own body. The chief magistrate is styled provost (in the principal towns, lord-provost), and the other magistrates are called 'bailies.' The *burgh of regality* and the *burgh of barony* belong to a lower class of burghs, originally erected by the Crown out of territory belonging to a lord of regality or of barony; some of these hold of a superior, others are independent. A *police burgh* is any town of more than 700 inhabitants incorporated under the Police Acts (1850, 1862), or under special Acts; in the police burgh elected police-commissioners (6 to 12) control the watching, lighting, water-providing, &c. A *parliamentary burgh* is one which, either separately or in union with other towns, returns a member to Parliament; it has municipal government similar to that of the royal burgh. A *burgh*, as defined by the Act of 1889, 'is any royal or parliamentary burgh.' The **Education** Act, 1872, provides for the election in every parish and burgh of a School Board, the members of which (5 to 15, as the Scotch Education Department may determine) are elected by owners and occupiers of houses rated at £4 and upwards. The School Board is responsible for the management of all burgh and parochial schools within its dist., and for providing sufficient school accommodation. By an Act passed in 1878 the Board is authorised to provide for the examination of higher-class public and of private secondary schools. Elementary education is compulsory. University education is provided for by the universities of St. Andrews, Glasgow, Aberdeen, and Edinburgh, of which the three first existed in pre-Reformation times. By the Act of 1858 the management of each university is vested in a Court of 6 to 8 members and a General Council, consisting of all registered graduates. The official head is the Chancellor, elected for life by the Council. **Administration of the Law.**—The supreme civil tribunal is the *Court of Session*, instituted by James V., 1532, on the model of the Parliament of Paris. As reorganised in 1830, it consists of the Lord President, the Lord Justice-Clerk, and eleven ordinary judges. Departments of the Court are the (1) Jury, (2) Tiend, (3) Valuation Appeal, and (4) Registration Appeal Courts. The *High Court of Justiciary* is the supreme criminal court, presided over by the Lord Justice-General (or in his absence the Lord Justice-Clerk) and the judges of the Court of Session, all of whom, by Act 1887, are Commissaries of Justiciary. Trials in this court are conducted with a jury of 15, the verdict being given by a majority, the procedure in these respects differing from that in England. The Judges of Justiciary hold circuits twice a year (a third circuit is held at Glasgow), the country being divided into three districts—Southern (courts held at Jedburgh, Ayr, and Dumfries); Western (Glasgow, Inverary, and Stirling); Northern (Dundee, Perth, Aberdeen, and Inverness). Inferior courts are the Sheriff's Court, Burgh Courts, Justice of Peace Courts, &c. The **ecclesiastical** jurisdiction of Scotland stands nearly as constituted, 1592. The unit of authority is the *Kirk-Session*, consisting of the ministers and elders of the Church; the *Presbytery*, comprising all the ministers of the parishes within its dist., with an elder from each kirk-session; the *Synod* (16), a provincial assembly; and the *General Assembly*, the highest ecclesiastical court in Scotland, held annually in Edinburgh, and consisting of representatives from all the presbyteries, royal burghs, and universities in the country.

Historical Notes.—At the period of the Roman invasion the northern part of Britain was divided amongst three peoples: the Brythons (Britons) mainly in the SE., the Goidels (Gaels) in the SW., both Celtic, and the Picts, as the aboriginal inhabitants were called, a non-Aryan race, but speaking a Celtic dialect, who occupied the northern part of the country. The Roman dominion was extended, though not steadily maintained, over the southern part as far as the Forth and Clyde. During the 4th century the Scots, a Celtic tribe from the N. of Ireland,

began to make descents on the SW. coast, and in the beginning of the 6th century founded a colony in Argyllshire, from which grew the kingdom of Dalriada, so named after the dist. whence they had migrated. About the 4th century also, Saxons and Angles formed settlements on the E. coast. These were extended after the departure of the Romans, and in 547 A.D. were united by Ida into the kingdom of Bernicia—later included in that of Northumbria. The language of the settlers, which eventually spread over the whole Lowland region, supplanting the earlier Celtic, was one with that of northern England, and continued to be so in the 14th century. It was not till the 15th century that this dialect was called Scotch, that name having previously signified the Gaelic of the northern parts. At the beginning of the 7th century the country was divided into four kingdoms: The Picts, holding the greater part of the country N. of the Forth; the Scots in Dalriada; the Britons in the SW., Strathclyde; and the Angles of Bernicia in the E. In the 7th century, Oswy, king of Northumbria, conquered Strathclyde and Dalriada, but the latter passed in the following century under Pictish rule. In 842 Kenneth MacAlpin became king of Dalriada, and two years later conquered the Pictish country between the Spey and the Forth, afterwards known as the kingdom of Alban, thus laying the foundation of modern Scotland. Moravia or Moray, NW. of the Spey, and the W. coast were independent, while the Scandinavians got possession of the Orkney and Shetland Is., the Hebrides, and part of the northern mainland. In 945 Strathclyde was ceded to the Alban kingdom by Edmund, king of Wessex, and early in the 11th century the Northumbrian dist. between the Forth and the Tweed was added to Scotia, as the kingdom was now called. In 1056 Malcolm Canmore ascended the throne. Hitherto the Celtic race had been dominant, but Malcolm represented in his own person Saxon as well as Scot; Saxon influences were further strengthened by his marriage with Margaret, sister of Edgar Atheling, and by the many Saxons who sought refuge there after the Norman Conquest. David I. (1124) extended his authority over Moray, and did much to consolidate the kingdom. He introduced Norman feudal institutions, and founded many royal burghs. Caithness was annexed by William the Lion in 1196, and in 1266 the defeat of the Norwegians in the battle of Largs added the Hebrides to the kingdom. The only territories still outstanding were the Orkney and Shetland Is.; these were acquired in 1469 by the marriage of James III. with the daughter of Christian I. of Denmark. [**E. J. H.**]

Sebago Lake, U.S., Maine, Cumberland co., 12 m. NW. Portland, drained into Casco Bay. Alt. 247 ft. (Water-power of Maine).

Sebak, oasis, French Sudan. See **Sbû.**

Sebakh. See *Sebkha.*

Se-bang-hien, or **Bang-hien,** riv., Indo-China, l. bk. trib. of the Mekong; its imperfectly known course is 155 m. long.

Sebastian, co., U.S., Arkansas, on W. frontier, bounded on N. by Arkansas R.

Sebastian Lobos, or **Grampus Islands,** Pacific, in the E. of Magellan Archipelago.

Sebastiansberg, tn., Austria, Bohemia, dist. Sebastiansberg, 8 m. WNW. Komotau; tin and silver mined. P.<3000.

Sebastian Viscaino, Bay of, on W. ct. of the penin. of Lower California, in 28° N., is 68–75 m. in diameter; open to the NW.

Sebastopol (**Sevastopol**), tn. and seapt., Russia, govt. Taurida, in SW. part of Crimea, at Sebastopol Bay, 44° 37′ N., 33° 31′ E., 48 m. SW. Simpheropol, and 947 m. by rail from Moscow. Seat of a Greek colony *Khersones,* 500 B.C.; later on, centre of Byzantine administration of Taurida. Place where the Russian Prince Vladimir was baptized. Destroyed by Lithuanians in 1363. Annexed by Russia in 1783, and made afterwards an important fortress and naval station. Besieged by the allied armies of France, Great Britain, Turkey, and Sardinia, from Sept. 1854 till Sept. 8, 1855, when it was taken. The great harbour or inlet, on the S. side of which the town is situated, extends 4½ m. W. to E., with an average width of ½ m., and

is enclosed by calcareous hills. At a right angle to it the South Bay runs 1½ m. N. to E., and to the W. of it the Artillery Bay runs ¾ m. in the same direction. Between these bays the town rises in the form of an amphitheatre. It is only now beginning to be repeopled. Mean temp. (15 yrs.), yr. 54.4° F., Feb. 34.9°, July 74°; rfall. (33 yrs.), 15.2 in. P. (1842) 41,155; (1864) 5450; (1891) 33,800.

Sebastopol, mining centre, Victoria, Grenville co., 2 m. SW. Ballarat. P. <3000.

Sebastopol, PM.O., Wales, Monmouthshire, 1 m. from Newport.

Sebattik, isl. in Sibuco Bay, in the SE. of Brit. N. Borneo.

Sebec, vil., U.S., Maine, Piscataquis co., on Sebec Lake, 10 m. E. Dover. P. <1500.

Sebec Lake, U.S., Maine, in the S. of Piscataquis co., 37 m. NW. by N. Bangor, drained E. into the Piscataquis, and by that into the Penobscot R. Alt. 375 ft. (Water-power of Maine). Length about 10 m.

Sebenico, or **Sibenik,** seapt. tn., Austria, crownland Dalmatia, on the W. ct., 31 m. NW. by W. Spalato; famous for its liqueur (Maraschino). In the Bay of Sebenico is found a peculiar species of fish, the *Dentex gibbosus*. This bay forms a small, well-sheltered basin, lying NW. and SE., 2½ m. long, and 1 m. wide in its widest part; connected with the sea by a strait of 650 ft. wide. Sebenico is the seat of a Greek and also of a Latin bishop. The town is situated in an amphitheatre, overlooked in the NE. by fortified hills. Some of the narrow streets are united with the two principal thoroughfares by ladders. The cathedral, of the pointed Italian style, built 1443–1556, is the finest sacred building of Dalmatia; near it is the old palace of the Venetian governors. In 1066 Sebenico was only a fortified castle, taken by Koloman, King of Hungary, 1105. The Turks devastated the town in 1538, 1647, and 1648. Birthplace of the painter Schiavone, died 1582. P. 7000.

Secretary, isl., on the W. ct. of the South I. of New Zealand, crossed by 45° 13′ S., one of those set apart by the New Zealand government for the preservation of the native fauna and flora.

Secunderábád, military cantonment, India, Haidarábád, 6 m. NNE. Haidarábád. Secunderábád is the largest military station in India. The cantonment extends to Bolaram, and covers an area of 19 sq. m. It is unhealthy in the rainy season. Alt. 1787 ft. Mean temp., yr. 78° F., May 89°, Dec. 69°; mean rfall., yr. 28.3 in., June–Oct. 23.9 in. P. 74,100.

Secundra, or **Sikandra.** See **Agra.**

Sedalia, vil., U.S., Indiana, Clinton co., 28 m. by rail S. by W. Logansport. P. <1500.

Sedalia, city, U.S., Missouri, Pettis co., 60 m. W. by N. Jefferson City; has important railway works, foundries, and manufactures of agricultural implements, carriages, &c. P. (1870) 4600; (1880) 9600; (1890) 14,100.

Sedan, fortified tn., France, dep. Ardennes, on the r. bk. of the Meuse, 25 m. SE. Rocroi; cap. arr. The manufacture of woollen cloth has constituted the chief element of the prosperity of the town for three centuries; has also manufactures of woollen yarns, machinery, copper wares, swords, &c., along with dyeworks. After their acquisition of the duchy of Bouillon, the Seigneurs de la Marck made Sedan their principal residence. The town became one of the intellectual centres of Protestantism on account of its academy. Here the entire French army surrendered to the Germans, 2nd Sept. 1870, and Napoleon III. gave up his sword to the King of Prussia, after the sanguinary battles fought round the town August 30th to September 1st. Birthplace of the great Turenne, died 1675, of whom the town contains a statue, and of the Protestant pastor Charles Drelincourt, died 1669. P. (1872) 14,300; (1891) 20,300.

Segl, vil., Switzd. See **Sils.**

Segni, the ancient *Signia,* city, Italy, prov. Rome, 22 m. SE. by S. Tivoli; seat of a bishop. The town is enclosed by a Pelasgic wall. P. 5700.

Segodunum. See **Rodez,** tn., France.

Segontiacum. See **Silchester.**

Segonzac, tn., France, dep. Charente, arr. and 8 m. SE. Cognac. P.<2000.

Segör, French spelling **Seggueur,** riv., Algeria, Sahara, prov. Oran, rises in the mountains near Geryville, 4920–6355 ft. high; flows SW. then SSE., but dries up before reaching El Golea. Length about 220 m.

Segorbe, the ancient *Segobriga Edetanorum,* city, Spain, prov. Castellon de la Plana, 26 m. N. by W. Valencia; seat of a bishop and cathedral; has mills, oil-works, &c. The old castle and walls still exist. In the vicinity is fine black marble, which the Romans exported to Italy. Segorbe was one of the most important cities of the Celtiberians. P. 7400.

Segovia, riv., Nicaragua. See **Coco.**

Segovia, tn., Spain, cap. prov. Segovia, 43 m. NW. by N. Madrid; the manufacture of cloth and glass is declining

Seat of a suffragan bishop of Toledo with a cathedral, begun 1525. A fine Roman aqueduct, partly destroyed by the Moors in 1071, still supplies the town with water from the Rio Frio, 10½ m. to the SE. The Alcazar, a Moorish fortress, 260 ft. high, was repaired about 1450; its walls surround the old portion of the town. To the N., in the valley of Eresma, is the Gothic church Vera Cruz, of 1204 or 1208, which once belonged to the Knights Templars; near are the fine gardens of Parsal. Segovia was an ancient Celtiberian city, later a Roman town, then Arabic, residence of the Emirs, and finally became Spanish. Alt. 3150 ft. P. 14,400.

Segre, riv., chiefly in the Spanish prov. of Catalonia, rises in the French dep. of Pyrénées-Orientales, a few miles to the S. of the Col de la Perche, and flows SW. past Puigcerda and Lerida to the Ebro, which it joins about 0° 18′ E. Length, 160 m.; area of basin, 8850 sq. m.

Segré, tn., France, dep. Maine-et-Loire, 21 m. NW. Angers; cap. arr. Manufactures agricultural implements; has engineers' workshops; iron mined. P. <3000.

Segu, or **Empire of Ahmadu,** native state, western Sudan, lying principally between the r. bk. of the upper Niger and Samori's kingdom of Wasulu. Comprised since 1887 in the protectorate of French Sudan. France took Segu-Sekoro in 1890. P. (1888) 362,000, in several towns which follow the course of the river for 9 m., the principal surrounded by walls, with seven gates.

Seguin, small isl., U.S., Maine, off the mouth of Kennebec R.

Seguin, tn., U.S., Texas, cap. co. and on Guadalupe R., 51 m. S. by W. Austin. P. <2000.

Segundo, Rio, or **Second River.** See **Córdoba.**

Segupong, Sekoepong, Sebon, or **Pappan,** isl., E. Indies, Karimon group, off E. ct. of Sumatra, in Strait of Malacca; 15½ m. long by 2–3 m. wide.

Segura, riv., in the SE. of Spain, rises on the E. slopes of the Sierra de Segura and winds E. past Archena, Murcia, and Orihuela to the Mediterranean.

Segura, Sierras de, chain of mts., Spain, Andalusia, prov. Jaën, on borders of provs. Granada, Murcia, and Albacete; highest point, Yelmo. Alt. 5925 ft.

Segura de la Sierra, comm., Spain, prov. Jaën, 65 m. SW. Albacete. P. <3000.

Segura de Leon, tn., Spain, Estremadura, prov. and 55 m. SSE. Badajoz. P. <4000.

Seighford, par., Eng., Staffordshire, W. div., 2½ m. WNW. Stafford, P.O.; 4741 ac. P. <1000.

Seignaux, small dist., in the SW. of France, between the r. bk. of the Adour and the Gulf of Gascony, in dep. Landes.

Seigne, Col de la. See **Alps,** SUBDIVISIONS, **I. A. 3.**

Seignelay, tn., France, dep. Yonne, 36 m. SW. Troyes, arr. and 8 m. N. by E. Auxerre. P. <2000.

Seihun, or **Seihan,** the ancient *Sarus,* riv., in the SE. of Asia Minor, traverses the plain and passes the town of Adana, and flows SW. into the Mediterranean to the E. of Mersina, formed by the union of two streams, the Gök-su or Sara-su, which flows SW. to the E. of the Anti-Taurus, and the Zamanti-chai, which flows in the same direction on the W. of the Anti-Taurus, through the valley separating that range from the Taurus. Length, 280 m.; area of basin about 8650 sq. m.; discharge, 8800 cubic ft. per second.

Seid, Arabic, 'lord.' See *Sidi.*

Seihut, improperly **Saihut,** coast-tn., Arabia, at the mouth of the main valley of Hadramut.

Seil, isl., Scot., Argyllshire, off the W. ct., in the Firth of Lorne, in 56° 15½′–19½′ N.; it rises to the height of 800 ft., but has some low valleys and fertile soil. Length, 4½ m. P. 548.

Seilan, Ras, cape, in the S. of Arabia, 30 m. NE. Aden.

Seiland, or **Sejland,** isl., N. ct. of Norway, 5 m. WSW. Hammerfest; the interior is mountainous, the highest point reaching 3386 ft.; 25 m. by 24 m.; area, 229 sq. m.

Seilhac, tn., France, dep. Corrèze, 73 m. WSW. Clermont-Ferrand, arr. and 8 m. NNW. Tulle. P. <2000.

Seille, riv., France, rises in the Jura Mts., flows SW. across the plain of Bresse, and enters the Saône on the l. bk., about 15 m. N. Macon. Length, 68 m., for 24 m. of which it is navigable; area of basin, 900 sq. m.

Seille, riv., Ger., prov. Alsace-Lorraine, a r. bk. trib. of the Moselle; flows through a dist. rich in salt.

Seilles (from root occurring in Chaillé, &c., see **Chaillé-les-Marais**), vil., Belgium, prov. Liège, on the l. bk. of the Meuse, 9 m. ENE. Namur; iron, zinc, and pyrites mined. P. <3000.

Seilûn, ruins, Palestine, *Shiloh* in the O. T., 32° 3′ N., 35° 17′ E., 11½ m. S. by E. Nablus.

Seim, riv., middle Russia, govts. Kursk and Chernigov, l. bk. trib. of Desna, flows W. past Kursk, Rylsk, Putivl, and many populous villages; joins Desna 55 m. E. of Chernigov. Length about 400 m.

Seimen, vil., Bulgaria, Eastern Roumelia, on the Maritsa, prov. and 29 m. SSE. Eski-Saghra (Stara Zagora), at junction of rly. to Constantinople with the branch to Burgas. P. <2000.

Seiin, isl., France. See **Seins.**

Seine, dep., N. France, traversed with many windings from S. to NW. by Seine R., formed in 1790 out of a small portion of Ile-de-France, and completely surrounded by Seine-et-Oise; divided into three arrs.: Paris (cap.), St. Denis, and Sceaux. The dep. really consists of **Paris** (*q.v.*) and a part of its suburbs. Only a limited area is available for cultivation. The principal cereals are wheat and oats; the vine covers nearly 1½ per cent. of the surface, and the production per hectare is about twice the average for France. The raising of vegetables for the Paris market is, however, the most important branch of agriculture. In manufactures the dep. is pre-eminent, its products being more than three times the value of those of Nord, the second manufacturing dep. in the country. Paris is the great industrial centre, but a very great variety of manufactures are also carried on in the surrounding towns. Amongst these may be noticed the extensive metallurgical and chemical works, tanneries, distilleries, glass-works, &c., of St. Denis, breweries (St. Ouen), dye-works (Vitry), indiarubber and porcelain (Ivry), besides numerous others. Area, 185 sq. m. P. (1891) 3,141,600. See **France,** table.

Seine (*Sequana*), important riv. of France, rises in Mont Tasselot, 1426 ft. above the sea, near the village of Chanceau, dep. Côte d'Or, flows NNW. past Châtillon, Bar-sur-Seine, and Troyes, thence W. and NW. by Nogent, Bray, Montereau, Melun, Corbeil, and Paris, where it is 300 to 500 ft. broad, Mantes, Vernon, Pont-de-l'Arche, Elbeuf, Rouen, Caudebec, Honfleur, and Havre, and enters the English Channel by an estuary 7 m. wide. Its waters are sluggish, and its banks are highly picturesque in the lower part of its course. It waters the deps. Côte d'Or, Aube, Marne, Seine-et-Marne, Seine-et-Oise, Seine, Eure, and Seine-Inférieure. Chief affluents, on the left the Yonne, Loing, Essonne, Eure, and Rille; on the right the Aube, Marne, and Oise. At Troyes its bed is 331 ft. above the sea, at the confluence of the Loing 184 ft., at Corbeil 147 ft., and at Rouen 111 ft. The Seine is navigable for boats to the confluence of the Aube, 360 m. from the mouth; for small sea-going vessels to Paris, and for large ships to Rouen (*q.v.*), below which the course of the river has been regulated and deepened. Between Caudebec and Quillebeuf, that is, in the last loop of the river proper, the river is subject at high water in spring tides to a bore (*mascaret*), like that of the Severn. At Quillebeuf the river begins to widen out and form an estuary, which tends to become silted up, and in which the channel of the river tends to be gradually displaced. In consequence of this it has been proposed to construct embankments, on the N. side from Havre, on the S. side from Honfleur, upwards to confine the river within narrower limits, and thus deepen it and increase its scour. On the N. side a ship canal has been constructed from Havre to Harfleur with a depth of 23 ft., and thence to Tancarville, opposite Quillebeuf, with a depth of 11.6 ft. The Seine communicates with the Loire by the canals of

Loing, Orleans, and Briare. The Yonne unites it with the Saône and Rhine by the Burgundy Canal, and the Rhone and Rhine Canal. The Oise connects it with the Somme, Scheldt, and Sambre, by the canals of Crozat, St. Quentin, and the Sambre, and it communicates with the Meuse by the Aisne and the canal of Ardennes; by the canal from the Marne to the Rhine it communicates with the Meuse, Moselle, and Rhine. Length, 425 m., according to Strelbitsky, whose measurement, however, does not include minor windings; length, including minor windings, 480 m.; area of basin, 30,028 sq. m. (Strelbitsky). Minimum discharge at the mouth, 2650 cubic ft.; maximum, 90,000 cubic ft. per second. See also **France,** rivers.

Seine-et-Marne, dep., N. France, traversed E. and W. in the N. by the Marne, and in the S. by the Seine; formed in 1790 out of parts of Champagne, Île-de-France, and Orléanais (Brie and Gâtinais); divided into five arrs., Mélun (cap.), Fontainebleau, Provins, Coulommiers, and Meaux. Surface traversed by low hills, and intersected by valleys; highest point, Butte St. Georges (705 ft.), in NE. on frontier of Aisne; lowest in W. (105 ft.), where the Seine leaves the dep. The Brie is a hilly, well-wooded, and highly fertile plateau between the Seine and Marne; N. of the Marne are the smaller plateaux of Multein (E.) and Goële (W.). S. of the Seine is a sandy, almost waterless tract, part of which is occupied by the forest of Fontainebleau; between the valleys of the Loing and Essonne is a fertile dist., chiefly supplied with water from deep wells. The dep. belongs entirely to the basin of the Seine, of which the principal tribs. belonging to the dep. are l. bk. Yonne and Loing (lower courses only), r. bk. Yerès and Marne, both of which join beyond the dep.; principal affluents of the Marne are r. bk. Ourcq, l. bk. Grand Morin. The Seine, classed as navigable throughout the dep., in which it has a length of 63 m., is practically so only from the confluence of the Yonne; the Marne and Loing are canalised and navigable. Geological formations mainly Tertiary, flanked in N. by Upper Cretaceous beds. Forests cover about one-sixth of the surface (Fontainebleau, Crécy, Jouy). Climate temperate, warmer in S. than N.; rfall. about the minimum for France. The principal cereals are wheat and oats, cultivated chiefly in the Brie; the vine (not extensively cultivated N. of the Marne) occupies about 1 per cent. of the surface, production per acre considerably under the average for France; sugar-beet is cultivated, and forage root crops have here a larger area than in any other dep. The quarries of Fontainebleau supply paving-stone to Paris; a little peat is obtained. Flour-milling and sugar manufacturing are the principal industries. Area, 2273 sq. m. P. (1891) 356,700. See **France,** table.

Seine-et-Oise, dep., N. France, enclosing dep. Seine, traversed from SE. to NW. by the Seine, which receives the Oise from the NE., formed in 1790 out of parts of Île-de-France; divided into six arrs.: Versailles (cap.), Corbeil, Étampes, Rambouillet, Mantes, and Pontoise. Surface diversified, traversed by low hills, highest in the N. near Marines in Vexin dist.; S. of the Seine are dists. Muntois or Pincerais in centre, Hurepoix in SW., Beauce S., and Gatinais SE. The dep. belongs entirely to the basin of the Seine, which has a course in the dep. of about 86 m. (18 m. E. of dep. Seine); principal tribs., r. bk. Yères, Marne, Oise, and Epte; l. bk. Essonne and Orge; a small area in the W. is drained to the Eure (l. bk. trib. of Seine). The Seine, Oise, and Marne are navigable. Geological formations mainly Tertiary, with Quaternary in the Seine valley, flanked in N. by Cretaceous beds. Forests cover about one-eighth of the surface (Rambouillet, St. Germain, Sénart, Marly, Montmorency, &c.). Soil fertile; oats is the chief cereal, then wheat; little more than 1 per cent. of the area under the vine, of which the production per acre is considerably above the average; sugar-beet is an important crop; forage-roots, apples for cider, and vegetables for the Paris market are largely grown. Manufactures and commerce employ the majority of the inhabitants, although the dep. possesses no great industrial centres; silk, wool, and flax-spinning; hosiery (Rueil, Etampes, &c.); metallurgical industries include iron and copper-works, locomotives, &c. (Petit-Bourg); flour-milling is the leading industry (arrs., Corbeil, Étampes, Pontoise); paper (Argenteuil, Essonne, &c.); sugar refineries, porcelain (Sèvres). Area, 2185 sq. m. P. (1891) 628,600. See **France,** table.

Seine-Inférieure, maritime dep., N. France, at the mouth of the Seine, formed in 1790 of parts of Normandy (Vexin, Caux, Bray, and Roumois); divided into five arrs.: Rouen (cap.), Neufchâtel, Dieppe, Yvetot, and Le Havre. The coast-line, about 75 m. in length, has few indentations; principal ports, Dieppe and Havre. The surface consists mainly of low plateaux, intersected by fertile valleys, highest point (795 ft.) SW. of Aumale, near the frontier of Oise; the plateau of Caux, which occupies the greater part of the dep. in the centre and W., terminates along the coast and the Seine valley in abrupt cliffs; S. of the mouth of the Seine is the small plateau of Roumois, and in the SE. the valley of Bray. The Seine traverses or bounds the dep. in the S., during an exceedingly tortuous course E. to W. of 90 m.; principal tribs., Epte and Andelle (upper courses only in dep.), and several streams from the Caux plateau, affording valuable water-power. The principal coast rivers are, N. to S., Bresle (mainly frontier), Yères, Arques, Scie, Saane, Durdent, and the Fécamp R. Geological formations are chiefly Quaternary and Upper Cretaceous; Lower Cretaceous and Jurassic in SW. Forests cover nearly one-sixth of the surface (Eu, Brotonne, Eawy, Roumare, and Rouvray). Climate mild, equable, and humid (**Rouen, Fécamp**). Wheat is the principal cereal, then oats; a little sugar-beet; colza occupies about one-fifth of the total area under this crop in France; flax in the S. ct. region; apples for cider chiefly in the W. The Bray dist., largely pastoral, is noted for cheese (Gournay). A little peat is obtained. Textile manufactures (cotton and wool) are the most important, and in the production of these the dep. ranks second. Rouen is the great centre of varied cotton manufactures; also carried on in the surrounding towns (Darnétal, Deville, Maromme, &c.), and in Montvilliers, Yvetot, and Bolbec; the woollen industry has Elbeuf as its centre; flax-spinning is carried on in various places. Metallurgical industries include iron and copper-founding, locomotives, heavy machinery, &c. (Havre and Rouen); shipbuilding (Havre, Rouen, Fécamp, &c.). Area, 2448 sq. m. P. (1891) 839,900. See **France,** table.

Selerö, or **Sejrö,** isl., Denmark, off the NW. ct. of Seeland, to the W. of **Selerö Bugt** (bay).

Seins, or **Sein,** isl., France, off coast of Brittany, dep. Finistère, in the Atlantic, about 5 m. W. Pointe du Raz, the westernmost point of the penin. Douarnenez. To the E. is the Raz de Seins, a dangerous strait, with a strong current; to the W. is the Chaussée de Seins, lighted by the lighthouse of Ar-Men.

Selje, or **Hove,** vil., Norway, prov. and 112 m. N. Bergen, on SW. ct. of Statland. P. (comm.)<5000.

Selkirk, vil., Canada, prov. Manitoba, on the C. P. R., 1403 m. by rail W. Montreal, 21 m. NE. Winnipeg. P.<1500.

Selkirk, vil., Canada, Ontario, Haldimand co., 32 m. S. by W. Hamilton, near Lake Erie. P.<1500.

Selkirk, the ancient *Sella-chyrche-Regis*, 'the seat of the king's church' (originally attached to a royal hunting seat), parl. and royal burgh, par., and market-tn., Scot., in the E. of Selkirkshire, on the r. bk. of the Ettrick, and the N. B. R., 8 m. N. by W. Hawick; manufactures tweeds, shawls, and other woollen goods. Selkirk was formerly noted for the manufacture of shoes, the 'souter' (shoemaker) burgesses having been famous in border warfare. Near the town is the scene of the defeat of the Marquis of Montrose by General Leslie, 1645. The traveller, Mungo Park, was a native of the vicinity. Selkirk was made a royal burgh in the reign of David I. Market-day, W. Par. (partly in Roxburghshire), 22,559 ac., P. 7300; tn. P. 6400; burgh P. 5800; parl. dist. of co. (**Peebles and Selkirk**) P. 19,100. See **Hawick.**

Selkirk Island, small isl., in the NW. of Lake Winnipeg, Canada.

Selkirk Range, range of the Rocky Mts., Canada, Brit. Columbia, with a nearly N. to S. trend round the N. end of which the Columbia R. describes its great northern curve, after which the river separates this range from the Columbian Gold Range on the W., crossed by the C. P. R. at Roger's Pass (4313 ft.).

Selkirkshire, inland co., Scot., in the Tweed basin, mainly composed of the valleys watered by its tribs., the Yarrow and Ettrick. The surface rises in a succession of uplands from NE., at junction of Gala and Tweed (where alt. is 300 ft.), to Dun Rig (2433 ft.), on W. boundary. Excepting the 'haughs' near the rivers, the surface is mountainous, the strata belonging to the Silurian system, which crosses the island from Galloway to St. Abb's Head, with igneous rocks appearing at some points. The chief heights are Ettrick Pen (2269 ft.), Capel Fell (2223 ft.), Deer Law and Herman Law, in the S., and on N., close to Midlothian, Windlestrae Law (2161 ft.). Minchmoor is a round mass (1856 ft.) to N. of the Vale of Yarrow. About one-seventh of the county is under cultivation. For agricultural statistics, see **Appendix,** pp. 7–9. Sheep-farming is a staple industry. Important manufactures of 'tweed' cloths at the county town and Galashiels, the latter being a weaving centre since the beginning of the 17th century. All other towns or villages P.<500. When still covered with trees this 'shire of the forest' was a favourite hunting-ground of the Scottish kings. The whole dist. was sometimes called 'Ettrick Forest.' The *Catrail*, a trench of British or Saxon times, passes from above Galashiels across the county towards the borders, and near it is the *Rink*, a circular fort. Near the county town is Philiphaugh, where Montrose was finally defeated by David Leslie; and further up the Yarrow is Newark Castle, immortalised in Scott's *Lay of the Last Minstrel.* St. Mary's Loch, Ashestiel, and many other classical spots are in this county. This county unites with Peeblesshire in returning one member to the House of Commons. Area, 166,524 ac. P. (1891) 27,300. See **Scotland,** table.

Sella, oasis, Tripoli, 275 m. NE. Murzuk.

Sellack, par., Eng., Herefordshire, on the r. bk. of the Wye, div. and 3½ m. NW. Ross, 1½ m. SW. by S. Fawley stn., P.O. (**Sellack's Marsh**). P.<500; eccles. par. (**Sellack with King's Caple**) P.<750.

Semil, or **Semilov,** tn., Austria, Bohemia, on the Iser, 25 m. W. by N. Trautenau; manufactures cotton textiles. P. <4000.

Seminara, tn., Italy, Calabrie, prov. and 20 m. NE. by N. Reggio. D'Aubigny defeated Gonzalvo de Cordova here, 1495, and was himself defeated by Antoine de Leva, 1503. The town was destroyed by an earthquake, 1783. P. <4000.

Semine, small dist., France, dep. Haute-Savoie.

Semington, par., Eng., Wiltshire, Westbury div., 3 m. NE. by E. Trowbridge, on the Kennet and Avon Canal, P.O. P. <500. See **Ashton, Steeple.**

Seminoles, tribe of civilised Creek or Muskogee Indians, formerly in central Florida, now settled on a reservation in Indian Territory. P. <2500, besides about 150 in Florida. See **Indian Territory.**

Semionovka, tn., Russia, govt. and 73 m. NE. Chernigov; tanneries, sheep-skins. P. 7780.

Semipalatinsk, prov., Russian Central Asia, general governorship of the Steppes; has Tobolsk and Tomsk on N., Akmolinsk on W., Semiryechensk on S., and the Chinese prov. Chuguchak on SE. The Tarbagatai Mts., 9000–10,000 ft. high, separate it from China, and the snow-clad ridges (also 9000–10,000 ft. high) of Great Altai and Naryn rise in the SE., and are continued westwards by the Kandygatai and Kalbinsk Mts. (5000-6000 ft.), while many lower spurs of mountains stretch northwards. Wide prairies elsewhere, known as the Zaisan Steppe (1200–1500 ft.), the Lake Balkhash Steppes (900–1000 ft.), and the Irtysh prairies (500–600 ft.). Watered by the Irtysh, which issues from navigable Lake Zaisan, and flows N. and NW., piercing the Altai in a wild gorge. The Black Irtysh, which flows into Lake Zaisan from Kulja, is also navigable for some 100 m. Many large tribs. join the Irtysh: the Kurchum, Naryn, and Bukhtarma from the right, and the Bukoñ and Kizil-su from the left. Lake Balkhash lies on the SW. border, and many small lakes are scattered on the Irtysh plain. Climate severe and most extreme, the average yearly temp. being 43° in the S., and 34° in the N. Very severe cold in the winter, and scorching heat in the summer. Yearly rainfall very small. Population chiefly Kirghiz-kazaks, who live on their cattle, and about 50,000 Russians, mostly agriculturists. Some gold (about 6400 oz.) is extracted. Divided into four dists.: Semipalatinsk, Pavlodar, Kokbekty, and Karkaralinsk, besides which the towns Bukhtarma and Ust' Kamenogorsk are worthy of note. Area, 184,631 sq. m. P. (1890) 576,580.

Semipalatinsk, tn., Russian Central Asia, cap. of above prov., on r. bk. of Irtysh, on highway from central Asia to Omsk; trade with Kirghizes. Alt. 389 ft. Average temp., yr. 36°, Jan. 5.7°, July 73°; mean rfall. (7 yrs.), 7.3 in. P. (1881) 17,820; (1891) 16,670.

Semiryechensk, prov., Russian Turkistan, has Semipalatinsk on N., China (Chuguchak, Kulja, Ak-su, and Kashgaria) on E. and S., and the Russian provs. Fergana, Syr-daria, and Akmolinsk on W. Owes its names to the rivers which flow from SE. into Lake Balkhash. It includes parts of the Tarbagatai Mts. (6000–10,000 ft.) in the NE., and the Dzungarian Alatau, which stretches from Kulja towards the Ili R. (6000–12,000 ft.). The Trans-Ili Alatau and the northern parts of the Tian Shan Mts., respectively in the N. and S. of Lake Issyk-kul, both rise to an alt. of from 10,000 to 16,000 ft. (beyond the limits of perpetual snow), while the Alexandrovskiy ridge runs westwards, attaining heights of 10,000 ft. The remainder consists of fertile valleys, now colonised by Russians, between the spurs of the Tian Shan; of deserts in the S. of Lake Balkhash; and of fertile prairies in the NE., about Sergiopol. Climate relatively temperate, the average temp. at Vyernyi being, yr. 46.6° F., Jan. 13.4°, July 75.6°; yearly rfall. 23 in. Watered by the Ili, which flows from Kulja into Lake Balkhash, receiving the Naryn, Chilik, and Kurtu; the Chu, which flows from the Tian Shan in a NW. direction, to be lost in the sand deserts of the Famine Steppe; and the Naryn, which flows westwards into the Syr-daria. Several rivers (Lepsa, Ak-su, Karatal) also flow from the mountains into Lake Balkhash. Semiryechensk has several large lakes, namely, Balkhash in N., Ala-kul and Sisyk-kul between the Tarbagatai and the Alatau, and the mountain lakes Issyk-kul, Son-kul, and Chatyr-kul. Population chiefly Kirghizes (about 600,000), Taranchis, Kalmuks, Mongols, and Tatars, and about 50,000 Russians. Cattle-breeding is the chief occupation. Agriculture is carried on with success. Divided into six dists.: Vyernyi, Issyk-kul, Jarkent, Kopal, Prjevalsk (formerly Tokmak), and Sergiopol. Area, 152,280 sq. m. P. (1891) 671,880.

Semiyarskaya, Cossack vil., Russia, prov. and 100 m. below Semipalatinsk, on r. bk. Irtysh. P. <2000.

Semley, par., Eng., Wiltshire, Wilton div., 16½ m. W. by S. Salisbury, 1½ m. E. of its stn. (**Semley** for **Shaftesbury**) on the L. & SW. R., P.O., and PM.O. (**Semley Station**). P. <750.

Sem'liki, Isango, or **Itiri,** riv., central Africa, issues from the N. side of Lake Albert Edward, and enters the S. end of Lake Albert Nyanza, traversing between these lakes a deep level valley about 15–25 m. wide, very level in the N., bounded on both sides by steep highlands, on the E. by the Ruwenzori Mts. *Proc. R. G. S.*, 1889, pp. 721–22.

Semlin (Hungarian **Zimony,** Slavonic **Zemun**), tn., Hungary, Croatia-Slavonia, on the l. bk. of the Danube, 6 m. NW. by W. Belgrade. Hunyady János died here in 1456. P. 12,800.

Seneca, tn., U.S., Missouri, Newton co., 31 m. by rail SW. Pierce City. P. <1500.

Seneca, co., U.S., New York, crossed in the extreme N. by 43° N., partly bounded on the W. by Seneca Lake, and on the E. by Cayuga Lake.

Seneca, co., U.S., Ohio, in the NW., bounded on the S. by 41° N., crossed in the E. by 83° W.

Seneca City, vil., U.S., S. Carolina, Oconee co., 25 m. SSE. of the NE. corner of Georgia. P. <1500.

Seneca Lake, lake, U.S., New York, stretching 35 m. nearly N. and S., in about 77° W., with a breadth of 1–3 m., drained from its N. end by the Seneca R. It is connected by canal with the N. end of Crooked Lake and the Erie Canal. Alt. 370 ft. (Geological Survey of New York).

Seneca Falls, vil., U.S., New York, Seneca co., and on Seneca R., 35 m. W. by S. Syracuse. The falls in the river afford water-power, utilised in the manufacture of pumps, fire-engines, &c. P. 6100.

Seneca River, U.S., New York, flows E. from the N. end of Seneca Lake to the N. end of Lake Cayuga, then turns N. and is joined on the left by the outlet of Lake Canandaigua, a lake to the W. of and parallel to Lakes Seneca and Cayuga, then turns again E. and receives in succession the drainage of the other parallel 'finger-lakes' to the E. (Owasco, Skaneateles, and Onondaga), then turns NW., taking the name of Oswego R., and enters Lake Ontario at Oswego. Length (including the Oswego) nearly 100 m.

Senecas, one of the Iroquois tribes, U.S., occupying reservations in New York. P. about 3000, besides about 200 in the Indian Territory.

Seneffe, comm., Belgium, prov. Hainaut, on the Samme, arr. and 12 m. NW. Charleroi; manufactures Dutch blue, soap, and drain-pipes, and has tanyards. Has a fine castle. Scene of a battle, 1674, between the Princes de Condé and of Orange. The French defeated the Austrians here, 1794. P. <4000.

Senegal (name given to this river by the Portuguese, from Senaga, a Berber tribe), riv., W. Africa. The two source rivers of the Senegal, the Bafing (with trib. Bakoi or Bakhoi) and Faleme, take their rise in the mountains of Futa Jallon (*q.v.*), both flowing for a long distance N. and NW. parallel to one another, till they converge and finally meet above Bakel. The Senegal then describes a bend, first NW. and W., and afterwards (parallel to the coast) SW., reaching the ocean near St.

Louis The Senegal forms an excellent waterway into the interior, it being navigable, even in the dry season, for 430 m. from its mouth. Total length, 890 m.; area of basin, 170,000 sq. m. See **Senegambia.** [H. G. S.]

Senegambia, French colony, forming part of French West Africa. It is situated between the rivs. Senegal and Gambia, the dist. of Casamance, S. of the Gambia, belonging likewise to Senegambia (the lower Gambia is British). The country is low near the Atlantic, but mountainous in the interior. The climate is very dangerous. Many parts of Bas-Senegal (near the Atlantic) show Sahara features. The chief importance of this low and unhealthy country consists in the fact that the Senegal forms an excellent waterway, connecting the coast with the fertile countries in the interior. Principal towns: St. Louis (cap., P. 20,000), Dakar, Gorée, Carabane, Bakel, Kayes, Bafulabe. Railways connect St. Louis with Dakar, and Kayes with Bafulabe. Senegambia is inhabited by various Negro and Fellatah tribes (Mandingo, Tukulör, Jolofs, Toro). See **French West Africa, Senegal, Niger, Futa Jallon, Rivières du Sud.** [H. G. S.]

Seneghe, comm., Sardinia, prov. Cagliari, 45 m. S. Sassari; iron mined. P. <3000.

Senekal, tn., S. Africa, Orange Free State, 96 m. NE. Bloemfontein, in Winburg div. P. <2000.

Senez, vil., France, dep. Basses-Alpes, 38 m. NNW. Fréjus, arr. and 8 m. NW. Castellane; has an old cathedral, built 1130–1242. The diocese of Senez, founded at the end of the 4th century, was suppressed during the Revolution. P. <2000.

Senftenberg, tn., Austria, Bohemia, on riv. Adler, 30 m. E. by S. Königgrätz; manufactures linen and cloth. P. <4000.

Senftenberg, or **Senftenberg in der Lausitz,** tn., Prussia, prov. Brandenburg, 34 m. NNE. Dresden; manufactures of glass and tiles; coal mined. P. <3000.

Sengan, tn., China, Kwangsi, 340 m. W. Canton.

Senger, riv., Argentine Republic, in the S. of Chubut terr., flows SE. from the Andes, then NE. through Lakes Musters and Colhue into the Chubut.

Senjenö, isl., off N. ct. of Norway, 25 m. WSW. Tromsö. The interior is mountainous, reaching 2950 ft.; has a nickel mine on the W. ct. Length, 45 m.; breadth, 30 m.; area, 612 sq. m. (Strelbitsky). P. <4000.

Senjes, or **Sinjes,** Berber tribe, Algeria, prov. and 95 m. WSW. Algiers. P. about 9000.

Senji, tn., Japan. See **Senzi.**

Senlis, the ancient *Ratumacos, Sylvanecti,* or *Sylvanectum,* tn., France, dep. Oise, on the Nonette, 19 m. SW. by S. Compiègne, 27 m. NNE. Paris, cap. arr.; manufactures watch-springs, yard-measures, &c. The remains of its old amphitheatre and Gallo-Roman ramparts are well preserved; its cathedral, begun 1155, is important in the history of art. P. 5900.

Senna, Portuguese S. Africa. See **Sena.**

Senna, or Sihnah, tn., Persia, prov. Ardilan, 98 m. WNW. Hamadan. P. 8000.

Sennar, or **Sennaar,** tn., eastern Sudan, on the l. bk. of the Bahr-el-Azrek, 158 m. SSE. Khartum; cap. of kgd. of Sennar, founded by the Funj at the beginning of the 16th century; conquered by the Egyptians, 1821. It is exposed to floods from the Bahr-el-Azrek (Blue Nile). P. 8430.

Sennar, Sennaar, or **Dar-Sennar,** country, eastern Sudan, the greater part of which is contained in the triangle formed by the White Nile and the Blue Nile, and the parallel of 12° N. In the widest application of the name, Sennar extends E. to the Atbara, a r. bk. trib. of the upper Nile, SE. to the W. frontier of Abyssinia, and S. to the mountains of Fazokl. It is mainly a nearly dead level, or a slightly undulating plain, inclining W. The river dists. are very fertile; in the other parts the ground is covered with tall grasses, with a few mimosas interspersed. The principal product of the country is durrha, but maize, tobacco, cotton, sesame, &c., are also grown. The grain is planted after the first showers of summer, and the cultivator then leaves the country to avoid the fevers of the rainy season, returning after five months to reap his crops. The population contains many different elements; the main appears to be the Funj.

Senne, riv., Belgium, rises in prov. Hainaut, flows NNW. past Soignies and Brussels. A little to the NW. of Malines it joins the Dyle and then the Nèthe, and forms the Rupel. Length, 64 m.

Senne, sandy and marshy tract, Prussia, Westphalia, dist. Münster.

Sennecey-le-Grand, tn., France, dep. Saône-et-Loire, arr. Châlon, 11 m. S. Châlon-sur-Saône. P. <2000.

Sennen, par., Eng., Cornwall, St. Ives div., 1 m. E. Land's End, 8 m. WSW. Penzance; visited by artists. PMT.O. P. <750. **Sennen Cove,** ½ m. to the NW., with coastguard station.

Sennheim, tn., Ger., Alsace-Lorraine, on the Thur R., 8½ m. NW. by W. Mülhausen, cap. dist. Sennheim. P. <5000.

Sennori, comm., Sardinia, prov. and 5 m. NE. by N. Sassari. P. <4000.

Sennwald, vil., Switzd., cant. and 12 m. SE. by S. St. Gall, near the l. bk. of the Rhine. P. <3000.

Senny, par., Wales, co. and 8 m. SW. Brecknock, PMT.O. (**Sennybridge**); 7691 ac. P. <250.

Seraju, riv., Java. See **Serayu.**

Serampur, tn., Brit. India, Bengal, Húglí dist., on r. bk. riv. Húglí, 13 m. N. Fort William, Calcutta; was a Danish settlement until 1845. Serampur was made famous by the work of the Baptist missionaries Carey, Marshman, and Ward; it has a college and fine library. P. 36,000; Hindus, 30,200.

Séran, riv., France. See **Ain.**

Serang, another form of the name of the isl. of **Ceram,** Eastern Archipelago.

Serang, tn., Java, 45 m. W. Batavia, in 6° 7′ S., 108° 9′ E.; cap. residency Bantam. P. <2000.

Serantes, comm., Spain, Galicia, prov. and 10 m. NE. Corunna, dist. Ferrol. P. 7000.

Seravezza, tn., Italy, Tuscany, prov. and 17½ m. NW. Lucca; has marble cutting and workshops; white marble is quarried in the neighbourhood. P. <3000; comm. P. 9300.

Serbal, mt., Arabia Petræa. See **Jebel-Serbal.**

Serbaz, vil., Persia, Mekran, 105 m. N. by W. of the SE. corner of the empire.

Serbaz, dist., Persia, prov. Mekran, or Persian Baluchistan, on the borders of Baluchistan proper, bounded S. by the Gulf of Oman. The country is rugged, mountainous, and sterile; cap. Serbaz. The inhabitants are nomadic Baluchis, nearly independent.

Serchio, riv., Italy, Tuscany, rises in the Apennines, on the Pizzo Cerreto, and flows SSE. then SW. past Lucca to the Gulf of Genoa, which it enters about 7 m. N. of the mouth of the Arno. Length, 68 m.; area of basin, 450 sq. m.; discharge, mean 1840 cubic ft. per second, highest 53,700, lowest 570.

Serdeles, oasis, Fezzan, about 70 m. NNE. Rhat (Ghat), and 220 m. W. Murzuk.

Serdobsk, dist. tn., Russia, govt. and 129 m. NW. Saratov. P. 7800.

Seredina-Buda, tn., Russia, govt. and 125 m. NE. Chernigov, on boundary of Orel. P. 5000.

Seregélyes, comm., Hungary, co. Fejér, dist. Szekes-Fejér. P. <5000.

Seregno, comm., Italy, Lombardy, prov. Como, 15 m. N. Milan. P. 7900.

Serein, riv., France, rises between the Seine, Saône, and Loire, flows NW. past Noyers, Chablis, and Pontigny to the Yonne. Length, 117 m.; area of basin, 565 sq. m.; not navigable.

Serena, dist., Spain, prov. Badajoz, on N. slope of the Sierra Morena.

Serena, vil., in the S. of Spain, in E. of prov. Almeria, with important deposits of red hematite.

Serena, La, tn., Chile, prov. Coquimbo, on the W. ct., in about 21° 58′ S.; copper mined. Mean temp. (4 yrs., 1869–72), yr. 58.5° F., Feb. 64.6°, July 52.5°. P. 17,200.

Serend, tn., Persia, prov. Irak-Ajemi, 60 m. WSW. Teheran.

Sereres, negro people, W. Africa, Senegal, between Cape Verde and the ridge separating the basins of the rivs. Salum and Gambia.

Seres, tn., Turkey in Europe, cap. prov. Seres, 43 m. NE. Salonica, 3 m. to the N. of the NW. end of Takhyno-göl, the largest and most important town in E. Macedonia, lies on the edge of the great plain and at the base of the mountains bounding the plain on the N.; manufactures woollen and cotton goods, and carpets. Value of aggregate trade one quarter to one half a million sterling. Exports tobacco, cotton, wool, and skins. P. 30,000.

Seres, tribe, eastern Sudan, formerly in the N. of Niam-Niam country, principally on the upper tribs. of the Bahr-el-Ghazal.

Sereth, tn., Austria, crownland Bukovina, 24 m. S. by E. Czernowitz. Alt. 1247 ft. Mean temp. (15 yrs.), yr. 45.8° F., Jan. 23.9°, July 67.5°. P. 7200.

Sereth, riv., Austria, Galicia, rises in dist. Brody, flows S. past Tarnopol and Trembowla, and enters the Dniester from the left, 30 m. NW. Chotin.

Sereth, in Roumanian spelling **Seretŭ,** riv., Roumania, rises in Bukovina by two branches, the Great and Little S., which rise in the Carpathians. They both flow at first N., but gradually turn round and unite 12–15 m. from the frontier of Roumania. From their confluence the united stream flows SE. past the town Sereth, then SSE., and enters the Danube a few miles above Galatz. Receives, r. bk., the Suczawa, Moldova, and Bistrița, Trotus, Rîmnicŭ, and Buzĕu, and on its left the Barlad. It carries down so much matter in suspension that on entering the Danube it constantly causes the formation of a shoal known as the Tsiglina shoal, which tends to impede the navigation between Galatz and Brăila.

Serfije, Servije, or **Selfije,** called by the Greeks **Servia,** or **Serviya,** tn., Turkey in Europe, 42 m. NW. by N. Larissa; founded by the Servians in 636 under the name of Srbica, con-

quered by the Byzantines, 1001, and retaken by Dušan, king of Servia, 1342. Has ruins of a Byzantine fortress. P. 3500, mainly Moham.

Sergach, dist. tn., Russia, govt. and 100 m. SW. Nizhniy Novgorod. P. <2000.

Sergeant Bluffs, vil., U.S., Iowa, Woodbury co., on the l. bk. of the Missouri, 7 m. S. Sioux City. P. <1500.

Sergievsk, tn., Russia, govt. and 63 m. NE. Samara, in the valley of the Sok. Sergievsk mineral waters (sulpho-alkaline) 7 m. from it. P. <5000.

Sergievskiy Posad, tn., Russia, govt. and 46 m. by rail NE. Moscow, around the **Troitsko-Sergievskiy Monastery;** manufactures on a large scale carved wooden spoons and toys, which are sold in large quantities to the pilgrims. P. 31,400.

Sergines, vil., France, dep. Yonne, 27 m. E. by S. Fontainebleau, arr. and 11 m. N. by W. Sens. P. <2000.

Serginskiy, Upper and **Lower,** iron-works, Russia, govt. Perm, 43 m. WSW. Ekaterinburg. P. 5650 and 7950.

Sergiopol (Ayaguz), dist. tn., Russian Central Asia, prov. Semiryechensk, 115 m. NNE. of NE. extremity of Lake Balkhash, on highway to Vyernyi. P. <2000.

Sergipe, one of the littoral states (93 m. of coast) of Brazil, and the smallest of all, on the S. bank and mouth of riv. São Francisco, traversed by the Irapiranga or Vasa Barris. Interior very fertile (sugar-cane along the slopes of the Itabaiana); further back are large campos, with cattle-rearing. The S. part of the plateau is very good for coffee. Very good timber, along with caoutchouc, medicinal plants, &c., in the forests which cover the S. slopes. Gold in the Itabaiana, also iron. The Cotinguiba forms a very good harbour (5 m. long, 38–58 ft. deep at Aracaju); other ports at the mouths of Irapiranga and Rio Real. See **Brazil.**

Serhad, or **Sarhad,** dist., Persia, prov. Mekran, or Persian Baluchistan, is a high plateau, almost sterile, in the extreme S. of the plateau of Khorassan.

Seriakus, tn., Lower Egypt, prov. Kalyubiye, 7½ m. NNE. Shubra, on r. bk. of Ismailie Canal. P. <3000.

Seriana, oasis, Algeria, prov. Constantine, 10½ m. E. Biskra.

Sérignan, tn., France, dep. Hérault, on the Orb, arr. and 6 m. SE. Béziers; manufactures brandy; sea-bathing. P. <4000.

Seringapatam, tn. and isl., India, Mysore, on Cauvery R., 8 m. NNE. Mysore, and 75 m. by road SW. Bangalore; sacred to Vishnu, from one of whose names, Srí Rangá, the name of the town is derived. The town has fortifications erected by Tipú Sultan, who was killed in defending them on the occasion of the last assault by the British, under General Harris, in 1799. After the transference of the seat of government to Mysore it rapidly fell into decay, and is now almost deserted. Its population in 1881 was under 12,000, and its almost deserted site has a bad reputation for malaria. Fairs three times a year are held in the suburb of Ganjam. Seringapatam contains the ruins of Tipú's palace, and a mausoleum built by him for his father, Haidar Ali. The isl. of Seringapatam is 3 m. long, E. to W., and 1 m. broad, and has a fort. P. (including Ganjam) 11,700.

Seringapatam, shoal, Pacific, just N. of 30′ S., in about 159° E.

Seringham, India. See **Srirangam.**

Serino, comm., Italy, Campania, prov. and 7 m. SE. Avellino, 12½ m. NE. by N. Salerno; manufactures silk and woollen goods. P. 6400.

Seriphos, or **Livadion.** **1.** Isl., Greece, one of the Cyclades, 50 m. S. of the SE. point of Eubœa; rich deposits of iron ore (hematite and magnetic oxide) worked. Area, 25 sq. m. (Wisotzki); 30 sq. m. (Strelbitsky). P. (demos) 2731. **2.** A town on the E. ct.

Seripul, Persia. See **Saripul.**

Serle, isl., Pacific. See **Reao.**

Serle Island, low coral isl., Pacific Ocean, Lower Archipelago, WNW. Clermont-Tonnerre, in 18° 21′ S. and 137° 2′ W. Length, 7 m.; average breadth, 1¼ m.

Serle, Mount, mt., S. Australia, in the Flinders Range, in 30½° S. Alt. 3000 ft.

Sermaize, tn., France, dep. Marne, arr. and 15 m. ENE. Vitry, on the Saulx; manufactures clock-works and wooden articles, and has foundries and blast-furnaces; ferruginous springs. P. <3000.

Sermano, vil., Corsica, arr. Corte, 29 m. SSW. Bastia. P. <2000.

Sermide, tn., Italy, Lombardy, on the r. bk. of the Po, prov. and 27 m. ESE. Mantua. P. <3000.

Sermione, penin., Italy, Lombardy, prov. Brescia, on S. shore of Lake Garda; in the Roman era a country resort; Catullus, the poet, built a villa here. In the 14th century the Scaligers, lords of Verona, had a fortified castle built near the town of Sermione. Near the E. ct. is a sulphureous thermal spring.

Sernache do Bomjardine, or **Sarnache,** tn., Portugal, Beira, 37 m. W. Castello Branco. P. <4000.

Serneus, vil., Switzd., cant. Grisons, 16 m. E. by N. Chur; bathing establishment (alt. 3230 ft.) near. P. <2000.

Seron, tn., Spain, Andalusia, prov. and 28 m. N. Almeria, dist. Purchena; has a fortified castle, dating from the time of the Moors. P. (comm.) 7000.

Séron, small dist. of the ancient co. of Foix, France, now in dep. Ariège.

Serowitz, tn., Austria, Bohemia, 27 m. ESE. Tabor, and 5 m. SE. by E. Kamenitz. P. <3000.

Serpa, tn., Portugal, Alemtejo, dist. Beja, 45 m. SSE. Evora; near noted cascades of the Guadiana. Has pig-breeding for the Spanish market; its wines are good. Serpa was conquered by Affonso Henriquez, 1166, retaken by the Moors, again taken by Sancho II., 1230, then by the Castillians, and lastly by King Diniz in 1295. The fortifications were destroyed by Spain, 1708. P. 6100.

Serpa, tn., Brazil, on the Amazon, 110 m. E. Manaos. P. <2000.

Serpenizza, vil., Austria, Görz and Gradisca, 26 m. N. by W. Görz.

Serpentine, post-tn., W. Australia, Murray co., 25 m. S. Perth. P. <1500.

Serpentine Creek, or **Janiember East,** post-tn., Victoria, Bendigo co., 31 m. NW. by N. Sandhurst. P. <1500.

Serpents, Isle of, or **Fidonisi,** isl., Roumania, in the Black Sea, 23 m. ENE. the Sulina mouth of Danube.

Serpent's Mouth, or **Boca de la Sierpe,** strait, between Trinidad I. and Venezuela. Length 35 m., by 10 m. in width.

Serphopoulon (serfopulo), isl., Greece, one of the Cyclades, 46 m. S. of the SE. point of Eubœa.

Serpukhov, dist. tn., Russia, govt. and 61 m. by rail S. of Moscow, on hills at the Nara R., near its junction with Oka; was for a long time the stronghold of Moscow against Tatar invasions. Important cotton, woollen cloth, and paper mills; tanneries, iron and chemical works. Port on Oka. P. 23,200.

Serq, one of the Channel Is. See **Sark.**

Serra, Portuguese, 'a mountain chain having a serrated appearance.' See *Sierra.*

Serra, La, mt., Italy, Piedmont, prov. Novara, between Biella and Ivrea, is a detached portion of the Alps, trending SSE. for 10½ m. Alt. 1585–2800 ft.

Serra, tn., Portugal, Estremadura, 30 m. NNE. Santarem. P. <4000.

Serracapriola, comm., Italy, Apulia, prov. Foggia, 13 m. NW. San Severo. P. 5600.

Serra da Mantiqueira, mt. chain, Brazil. See **Mantiqueira.**

Serra de' Conti, vil., Italy, The Marches, prov. and 25 m. WSW. Ancona; saline and sulphureous mineral springs. P. <2000; comm. P. <3000.

Serra-de-Scopamene, vil., Corsica, arr. Sartène, 22 m. SE. by E. Ajaccio. P. <2000.

Serradifalco, comm., Sicily, prov. and 10 m. WSW. Caltanissetta; centre of sulphur mining. P. 7800.

Serradilla, La, tn., Spain, Estremadura, prov. and 28 m. NNE. Cáceres; has an ancient women's convent, resorted to by pilgrims. P. <3000.

Serraggio, comm., Corsica, 30 m. NE. Ajaccio. P. 2000.

Serramanna, tn., Sardinia, on the Samassi, prov. and 17½ m. NW. by N. Cagliari; cultivates water-melons, artichokes, and figs. P. <3000.

Serra Matta das Canastras, mt. chain, Brazil. See **Mata da Corde.**

Serrara Fontana, vil., Italy, Campania, prov. Naples, 13 m. WSW. Pozzuoli, Ischia I.; has an acidulated saline spring, and another famous spring at Olmitello, near the S. ct. of the island. P. <2000.

Serra San Bruno, comm., Italy, Calabrie, prov. and 26 m. SW. by S. Catanzaro. P. <4000; including **Spinetto,** P. 5300.

Serra San Quirico, vil., Italy, The Marches, prov. and 27 m. WSW. Ancona. P. <3000; comm. P. 4000.

Serrastretta, tn., Italy, Calabrie, prov. and 12 m. NW. Catanzaro. P. <3000.

Serrat, Cap. See **Mushikar, Ras.**

Serravalle, comm., Italy, Piedmont, prov. and 18½ m. SE. Alessandria. P. <4000.

Serravalle Pistoiese, vil., Italy, Tuscany, prov. Florence, 4½ m. WSW. Pistoia; acidulated ferruginous mineral spring. P. <3000; comm. P. 5900.

Serrawat, region in Algeria, prov. Constantine, traversed by the upper (W. to E.) course of the Wed-er-Rumel; well adapted for wheat.

Serre, riv., France, deps. Ardennes and Aisne, rises about 18 m. W. Mézières-Charleville, flows W. by S. to the Oise in the prairies of Fère. Length, 70 m.; area of basin, 715 sq. m.

Serre, tn., Italy, Campania, prov. Salerno, 7 m. SSE. Campagna. P. <3000; comm. P. <4000.

Serres, vil., France, dep. Hautes-Alpes, on the Buech, arr. Gap, 50 m. ENE. Orange. P. <2000.

Serrières, tn., France, dep. Ardèche, on the r. bk. of the Rhone, 20 m. ESE. St. Étienne, arr. Tournon. P. <2000.

Serro, tn., Brazil, Minas Geraes, 140 m. NNE. Ouro Preto; gold mined; diamond deposits. P. 7000.

Sersale, comm., Italy, Calabrie, prov., circle, and 10 m. NE. Catanzaro; sulphureous ferruginous spring. P. <5000.

Sers-el-Lyana, or **Lyana,** tn., Lower Egypt, prov. Menufiye, 8 m. SSW. Shibin-el-Kum. P. 10,600.

Sert, Asiatic Turkey. See **Sört.**

Serua, two volcanic isls., E. Indies, in the SW. group, in 6° 21′ S., 130° 5′ E. The last eruption was in 1844. Alt. 660 ft.

Serval, or **Servois,** small dist., France, dep. Oise.

Serverette, vil., France, dep. Lozère, arr. Marvejols, 70 m. SW. St. Étienne, 14 m. NNW. Mende. P. <2000.

Servia, Turkey in Europe. See **Serbije.**

Servia (Slavonic **Srbija**), independent kingdom of Europe, less than two-fifths of the size of England, lying between Hungary (N.) and Turkey-in-Europe (S.), and between Bulgaria (E.) and Austria, or rather Bosnia (W.), and divided as shown in the following table:—

Provinces.	Area in sq. m.	Pop. in Thousands. 1891.[1]	Pop. per sq. m.
Belgrade, city	5	54	10,800
Crna-Rjeka	556	70	126
Danubē (Podunavlje)	1,217	207	17
Kragujevac	921	141	153
Kraina	1,258	92	73
Kruševac	1,257	150	119
Morava	1,201	160	133
Niš (Nish), city	4	20	5,000
Pirot	1,214	121	100
Podrinje	1,300	177	136
Požarevac	1,405	205	146
Rudnik	1,757	152	86
Timok	808	93	115
Toplica	1,399	121	86
Užice	1,688	138	82
Valjevo	1,122	115	102
Vranja	1,620	149	92
Total	18,762	2,162[2]	115

[1] Dec. 31, 1890, O.S., Jan. 12, 1891, N.S.

[2] The population at the census of 1879 was 1,669,300, which gives a mean rate of increase of 2.18 per cent. per annum; but the 1879 census was admittedly less accurate than that of 1891, which affects, of course, the value of the calculated rate of increase.

The **boundaries** are formed by the Danube (200 m.) and the Save (90 m.) on the N., by the Drina (100 m.) on the W., by the Timok (25 m.) on the E., and in other quarters (E., SW., and W.) by conventional frontiers. The longest line, drawn from NW. to SE., measures 220 m. The area is 18,750 sq. m., or only about one-fifth as large as Great Britain. The **surface,** except in part alongside the Danube, is mountainous. Not that it contains any well-marked independent system; but the extremities or furthest outliers of the Alps, Carpathians, Balkans, Rhodope Mts., and Albanian Mts. all meet within its confines. Succinctly stated, the contour shows a number of mountain knots radiating short chains in all directions. As a whole, the surface slopes gradually towards the Danube (N.). Everywhere the mountains are interpenetrated by long, deep, and narrow valleys, mostly traversed by torrents. The longest and widest valley, that of the Morava, the most important of the purely Servian rivers, runs from S. to N., inclining to W., and roughly divides the country into two portions. The mountain ranges of the W. side of Servia—the Čer Planina and Vlašić (2353 ft.), Jagodina Planina (2500–3000 ft.), Šturac (3836 ft.), Maljen (2625 ft.)—meet in the Povlen Planina (4173 ft.); they are generally well-wooded, and rich in pasturage. A still more important orographical feature of the same dist. is the picturesque alpine region of Zlatibor (3000 ft.). Along the SW. frontier stretch the Golija Planina (6500 ft.), the Kopaonik (28 m.), and the Goljak Planina (3914 ft); the culminating point of Kopaonik is Suvo-Rudište (6900 ft.), which sends off E. the Jastrebać Planina (5138 ft.). The SE. is invaded by offshoots of the Rila (or Rhodope) Mts., which run up to 6330 ft. in Mount Strešar. Further N. the E. frontier crosses the Stara Planina (6600 ft.), above which towers the loftiest point in all Servia, namely, Midžur (7107 ft.). In the NE. corner of the kingdom the Carpathian outliers radiate from the Pek Planina (3000–3600 ft.), the chief ranges being the Miroć Planina (2589 ft.) and the Biljanica (Mount Lisac, 4767 ft.). The principal **rivers** are the Danube (*Dunav*) and its affluents, embracing the Save (*Sava*) with its tribs. the Drina and Kolubara; the Morava, with its trib. the Ibar; and the Mlava, Pek, and Timok. All these flow, generally speaking, from S. to N.; but the only ones that are navigable are the Danube and the Save, though formerly the Morava was to some extent navigable. There are four **geological regions;** the E. side of the Morava is characterised by Cretaceous limestones; in the S. and SW., between the two arms of the Morava, crystalline schists predominate; further W. and N. come Palæozoic and Mesozoic (Triassic, Jurassic, and Cretaceous) schists and limestones, with eruptive rocks of later date; alongside the Danube and the Save, Quaternary alluvium is the prevailing formation. On the whole, the country enjoys a fairly temperate **climate,** inclined, however, to continental extremes, partly in consequence of its elevation, and partly because of the valley of the Danube offering an easy ingress to the cold winds of the N. and NE. Warm moist winds from the W. and SW. sometimes get over or round the mountains. The extreme NE. (prov. Kraina) has a precisely similar climate to Roumania. Yearly mean temp. 55° F., Jan. 49°, July 73½°; but the range, both monthly and yearly, is exceptionally wide, moving between a summer maximum of 113°, and a winter minimum of -13° F. Rfall. 25 in. The **fauna** includes the bear, wild boar, lynx, wolf, fox, deer, chamois, roebuck; eagle, vulture, falcon, stork, and various wild-fowl; salmon, sturgeon, carp, trout, and pike. Servia is emphatically an agricultural country, though **agriculture** is in a deplorably backward condition; and the area under grain crops and the vine together does not exceed 2 per cent. of the entire surface. But the principal occupations of the people are keeping swine and cattle, and, in a secondary degree, sheep and goats. The swine are fed chiefly in the oak forests of the W. and SW. borders; and there, too, are the finest pastures. Maize (the food of the people) and wheat are the principal crops grown; the others are barley, oats, rye, hemp, tobacco (especially in Užice and Aleksinac), beans, capsicums (red pepper), water-melons, and vegetables (onions and garlic) The vine is extensively grown near Negotin (NE.) and Smederevo (on the Danube). Plums are extraordinarily common, and are exported in vast quantities under the name of prunes. Silkworm eggs are produced in the Morava valley, and bees are kept in the E. and middle of the country. **Forests** cover probably 15 per cent. of the area; they are thickest in the SW. and W., and consist in great part of oaks, though pines and firs predominate in the Morava Valley. The beech, elm, ash, birch, lime, maple, and wild walnut and mulberry also occur. Servia is reputedly very rich in **minerals,** though as yet they are comparatively little mined, chiefly owing to want of capital. Lead, silver, iron, copper, and gold exist in the Kopaonik Mts., in prov. Rudnik (SW. Kragujevac), in the basin of the Pek (chiefly at Maidanpek and Kučevo or Kučajna), in the SE. dist. between the Morava and the Nisava Rivs., in prov. Crna-Rjeka (E.), and prov. Podunavlje (N.). Coal is present in great abundance, principally in the NE. (in Timok valley, near Negotin, at Dobra on the Danube, and in Pek valley) and in the valley of the Morava (Senje, Ćuprija, Paraćin, and at Niš and Aleksinac). Zinc and antimony exist in provs. Podrinje (near Krupanj) and Valjevo, both in the NW.; quicksilver at Avala, S. of Belgrade; and lithographic stones near Valjevo. Coal is the only mineral extracted to any extent, and in addition thereto a little lead, iron, and copper. Evidences of Roman workings have been found in the Kopaonik Mts., in the Pek valley, and in prov. Podunavlje. Mineral springs are pretty common; those of Jošanica (N. of the Kapaonik Mts.), Brestovačka (N. of prov. Crna-Rjeka), Aranjelovac (half way between Belgrade and Kragujevac), and Smrdan (beside the Drina, near Ložnica) are probably the best known. Servia has but few **manufactures** outside of her domestic industries, which embrace the making of clothing, wooden and iron utensils, linens and woollens, and embroidery in gold and silver. There are, however, flour-mills at Belgrade and Požarevac, carpet-factories at Pirot and Trstenik (W. Kruševac), breweries at Belgrade, Niš, and other towns, brick and tile works at Aranjelovac, glass-works at Jagodina (in prov. Morava), cloth is manufactured at Paraćin, arms at Kragujevac, ropes at Vranja and Leskovac (SE.), silver filigree at Belgrade, Niš, Leskovac, and Užice (near Zlatibor Planina in the W.), baskets at Belgrade, travelling-trunks in various quarters. The country possesses a fairly good network of **roads,** but they are generally in a very ruinous and neglected condition. The other means of transit are the Danube and Save, and nearly 400 m. of railways. The principal trunk line ascends the Morava valley from Belgrade, and a little beyond Vranja enters the Turkish vilayet of Kossovo, thus forming a portion of the main line that connects Constantinople with Vienna. Two other important lines have been sanctioned, one from Radujevac, on the Danube, up the Timok valley to Niš, and thence by Prokuplje SW. to join the Turkish Ushkub-Mitrovica line in Kossovo; the other from Kruševac up the Servian Morava valley to Užice, in the W. There are approximately 2000 m. of telegraphs. About 75 per cent. of the foreign **commerce** of Servia is carried on with Austria-Hungary; Turkey, Germany, and England come next, but at a long interval behind. The imports, consisting chiefly of cottons and linens, sugar, coffee, and other groceries, ready-made clothing, iron and other metals, wool and woollens, hides and leather, oils and fats, timber and wooden goods, fancy goods, drugs and chemicals, glass, &c., range between 1½ and 2 millions; the exports, principally live stock (swine and oxen for the most part),

cereals, prunes, &c., and hides and leather, generally exceed the imports by a quarter of a million in annual value. In addition to this there is a transit trade between Austria-Hungary and the Balkan states valued at nearly one million sterling in the aggregate. Since 1876 the metric system of **weights and measures** has been in use in Servia. The unit of **money** is the dinar=1 franc, and divided into 100 para. The head of the **government** is the hereditary, constitutional king. He is assisted by eight ministers of state, and by a state council of sixteen members, elected from persons nominated by himself (8) and by the Skupchina (16). This last is the chief legislative power of the land; it consists of 130 members, elected directly by the people. Every man between the ages of 18 and 48 is liable to military service—10 years with the standing **army** and its reserve, 10 years with the first militia, and 10 years with the reserve militia. In time of war the Servian forces mount up to 105,000 regulars, with some 141,000 of the militia. The **population** consists almost wholly (90 per cent.) of Servians, who belong to the Slav family; in addition there are about 7 per cent. of Roumanians (in the E.) and 2 per cent. of Gypsies. Ninety per cent. of the population belong to the peasant class. A peculiar social institution—zadruga—prevails amongst them, by which several blood relatives voluntarily associate themselves together in rural communes, under the rule of a patriarchal elder or family head, and share their property and labour in common. Besides, the bulk of the populations of Bosnia, Herzegovina, and Montenegro are Servian, and there are a large number of Servians in Hungary and in the Turkish vilayet of Kossovo. In all it is estimated that there are close upon 4,000,000 Servians outside of Servia, without counting the Slav population of Macedonia (see **Turkey-in-Europe**). The established religion is that of the Orthodox Greek Church, at the head of which stands the metropolitan of all Servia, and he is further assisted by bishops. Attendance at school is compulsory for 6 years. There is a university at Belgrade, and also a royal academy. The **principal towns,** including the cap., Belgrade, have been already mentioned. **History.**—The Slav tribes, from whom are descended the modern Servians, settled in Servia and Bosnia, and the dists. immediately S. of them, towards the middle of the 7th century; and although they accepted Christianity from the Byzantine emperors, they refused to give them anything more than a half-hearted political allegiance. From the middle of the 12th century the Servians began to take the leading position amongst the states of the Balkan Penin., chiefly under the able leadership of Stephen Dushan, who died in 1356. But in 1389 his people were disastrously routed by the Turks on the 'Field of Blackbirds,' in Kossovo, and from that time down to 1804 the Servians were crushed under the iron rule of the Turks. During the years 1718–39, however, Servia was a prov. of Austria. In 1804, and again in 1815, a revolt broke out against Turkish oppression, and resulted (in 1829) in the concession to the Servians of a large share of self-government. The last Turkish garrisons quitted the country in 1867. After participating in the Russo-Turkish war of 1878–79 against her old enemies, Servia was in 1882 proclaimed a kingdom. Since then she has fought a short but inglorious war against Bulgaria (1885). See A. Tuma, *Serbien* (1894), map (since 1887) by Servian military officers. [**J. T. B.**]

Sevenoaks, par. and market-tn., Eng., Kent, Sevenoaks div., 6 m. NW. by N. Tunbridge, amidst beautiful scenery, with a stn. (**Sevenoaks and Riverhead**) on the SE. R., and another stn. (**Sevenoaks Bat and Ball**) on the L. C. & D. R.; has many country residences, and a grammar-school, founded 1432. Alt. 500–700 ft. Mean annual rfall., 29.84 in. 6805 ac. Par. P. 9300; tn. P. 7600; parl. div. P. 80,100.

Sevenoaks Weald, eccles. par., 2½ m. S. of and included in Sevenoaks par. P. <1000.

Seven Sisters, stn., Eng., Middlesex, Tottenham div., 5 m. N. by E. St. Paul's, London, on the G. E. R.

Seven Sisters, stn., Wales, Glamorganshire, Gower div., on the M. & Neath & Brecon Rly., 8 m. NNE. Neath; coal is worked in the neighbourhood. PMT.O.

Seven Stones, rocks, Eng., Cornwall, 18 m. W. by S. Land's End; a light-vessel is stationed about 2 m. ENE.

Seventeen Mile Rocks, vil., Queensland, on riv. Brisbane, 12 m. from Brisbane by road. P. <1500.

Seventon, vil., Eng., Wiltshire, 6 m. NW. Chippenham.

Seven Tors, hill range, Eng., Devonshire, on the N. ct., to the E. of Ilfracombe.

Sever, tn., Portugal, Beira, dist. Aveiro; silver-lead mined near. P. <2000.

Severa, Monte, mt., Sardinia, in the SW., 20 m. SW. Cagliari.

Severac, tn., France, dep. and on riv. Aveyron, arr. Millau, 54 m. NE. by E. Albi, 25 m. E. Rodez. P. <2000.

Severek, or **Süverek,** tn., Turkey in Asia, vilayet and sanjak and 25 m. WSW. Diarbekir, on the main road to Urfa and Aleppo; has ruins of an old citadel on a hill in the middle of the town. P. 10,000; Moham. 5250; Christians, 4750, of whom Gregorian Armenians 3500.

Severi, riv., Brit. India. See **Sabari.**

Severn, riv., Canada, Ontario, drains Lake Simcoe into Georgian Bay.

Severn, riv., Canada, dist. Keewatin, flows N. then NE., and enters Hudson's Bay just a little below Fort Severn, in 89½° W. Navigation stopped by rapids within 30 m. of its mouth. Length about 350 m.

Severn, one of the two longest rivs. of England, rises in Montgomeryshire, Wales, on the E. side of Plinlimmon, 1500 ft. above the sea, flows at first E. and NE. until it enters England between Welshpool and Shrewsbury, and then successively SE. and S. through Shropshire, Worcestershire, and Gloucestershire, and between Somersetshire and S. Wales, to its expansion into the Bristol Channel. Principal affluents, the Vyrnwy, Stour, Terne, upper and lower Avon, from the E., and the Teme, Wye, Usk, and Taff, from the W., some of which pour themselves into its estuary. Great improvements have recently been made in the river below Worcester, whereby vessels of 400 tons burden (instead of only 100 tons as heretofore) can ascend to that city. Between Worcester and Gloucester the river has been deepened to 10 ft. (minimum), with a minimum bottom width of 40 ft.; the two rock barriers of Bunns Hill Ford, 1 m. below Worcester, and Wainlode Shoal, about 7 m. above Gloucester, have been cut through to 10 ft. deep by 40 ft. wide; a transhipping dock has been constructed at Diglis, near Worcester; and the lock at Gloucester, which connects the Severn with the Gloucester and Berkeley Ship Canal, has been deepened to 9 ft. 6 in. Above Worcester also the river has been deepened to a minimum of 7 ft. up to Stourport, where it is joined by the Staffordshire and Worcestershire Canal, which runs into other canals that go to the Mersey. Other canals connect the riv. Severn with the Thames and the Trent; and the ship canal above referred to (without locks, 16½ m. in length), is available for the navigation of vessels up to 230 ft. long, 33 ft. beam, and drawing 13–16 ft. The tidal wave, here termed the *eagre* or *bore,* sometimes rises suddenly 9 ft. at Gloucester, and extensive embankments have been formed below that city to protect it. At its junction with the English Channel the Severn is 8⅓ m. across. At Sharpness the river is crossed by a railway bridge, 22 spans, and 4162 ft. long. The Severn Tunnel, 4½ m. long, carries the railway beneath the bed of the river a little below New Passage, at a depth of from 45 to 100 ft.; the tunnel was opened for traffic, 1886; total cost, including the approaches, £2,000,000. The Severn yields good salmon and lampreys. Total length, 210 m.; area of basin, including the Wye, 5960 sq. m.; excluding the Wye, 4350 sq. m.

Severn Bridge, vil., Canada, Ontario, Muskoka co., on the riv. Severn, 50 m. ENE. Collingwood. P. <1500.

Severn Bridge, stn., England, Gloucestershire, on the r. bk. of the Severn, 11 m. NE. Chepstow, and the M. R. (stn. for Blakeney).

Severn Tunnel Junction, stn., Eng., Monmouthshire, Severn div., on the G. W. R., 9 m. E. Newport.

Sevier, co., U.S., Arkansas, on W. frontier, crossed by 34° N.

Sevier, co., U.S., Tennessee, on the E. frontier, just S. of 36° N.

Sevier, co., U.S., Utah, crossed in the N. by 39° S. and 112° W.

Sevier Lake, salt lake, U.S., Utah, Millard co., 25 m. by

10 m., 100 m. SSW. Great Salt Lake; it has no outlet, and its sole trib. is Sevier R., in the N. Alt. 4600 ft.

Sevignac, vil., France, dep. Basses-Pyrénées, arr. Oloron, 1 m. NE. Arudy; has mineral-water establishments; grey marble and gypsum quarried. P. <2000.

Sevilla, isl., Colombia, Isthmus of Panama, in the Pacific, opposite delta of Rio David. Length, 6 m., by 3 m. broad.

Seville, one of the three provs. of Spanish or Lower Andalusia (the others being Cadiz and Huelva), in which the old Moorish kingdom of Seville (separated from Córdoba between the 11th and 13th centuries) was divided, formed by the lower basin of riv. Guadalquivir, having very fertile plains in the centre (well adapted for the growth of cereals, vine, olives, tobacco, and cotton), and S. swampy and desert lands (*Marismas dunas*), between two very mountainous dists. N. (slopes of Sierra Morena) and S. (Montanhas del Pinal). The climate is very hot and dry (no summer rains [see **Europe, climate**]) in the valleys of the Guadalquivir and its affluents (Campos de Eciga; *el sarten* ['the frying-pan'] *de Andalusia*). Important rearing of cattle and horses. The minerals include iron (Pedroso), silver (Cagulla, Guadalcanal, Almaden), lead, copper (Sierra Morena), coal (Villanueva del Rio). See **Spain.**

Seville, Spanish **Sevilla,** the ancient Phœnician *Sephela, spela,* 'plain'; Greek, *Ispola;* Roman, *Hispalis, Julia Romula, Colonia Romulensis;* Arab, *Ishbiliah, Sibilia,* tn., Spain, Andalusia, on the l. bk. of riv. Guadalquivir, with a suburb on the r. bk. (Triana, the headquarters of Spanish gipsies), 356 m. by rail SW. Madrid, in the middle of a large and very fertile plain; cap. prov. Seville. Seat of the military *Capitania-General* of Andalusia (S. Córdoba, Cadiz, Huelva, see **Granada**), of an archbishopric (with Ceuta and the Canary Is. as suffragans), and a university (founded by Alfonso the Wise in 1256). Has famous monuments of ancient times and the Middle Ages (the Torre d'Oro, 'tower of gold,' an octagon tower, probably of Roman construction; a Roman aqueduct, which still conveys water to the city from Alcala; the cathedral, a building with four aisles, besides the nave, founded in 1401 on the site of a mosque, and still adorned with the beautiful tower of the *Giralda,* 337 ft. high, built by the Arabs about the year 1000; the *Alcazar,* a royal palace, constructed in imitation of the Alhambra at Granada, and containing the 'Court of Lyons,' hall of ambassadors, &c.; a very remarkable gallery of paintings (*Museo*); Libraries (the *Bibliotheca Columbina* of Fernando Columbus), the *Lonja* (Archives of the Indies, with most of the Spanish documents on the discovery, conquest, and administration of America). Seat of important manufactures (ordnance foundry, tobacco, silk, dye-works, ceramics, at Triana; perfumery at San Juan d'Alfarrache). A celebrated fair in Easter, when the most celebrated bull-fights take place. By the deepening of the Guadalquivir Seville has been restored to the position of a seaport, which it had lost in consequence of the silting up of the river. It has now 6600 ft. of quayage, and a depth at the harbour entrance of 21 ft. at high water, 16 ft. at low water ordinary springs. Seville was the cap. of the *Hispania Baetica* of the Romans, of the Silingi Vandals (5th century), of the Goths (531–584); conquered by the Arabs (711); by (Saint) Ferdinand III. (1248); cap. of Spain to the time of Charles V. Became the great emporium of American commerce (see **Cadiz**). Columbus, Cortez, and Pizarro started from Seville in their voyages to America. Silvius Italicus, and the emperors Trajan, Hadrian, and Theodosius, were born near it (*Italica,* now the village of Santa Ponce); Saint Izidor, and the painters Velasquez, Murillo, Zurbaran, and Cano were born in it. Mean temp. (15 yrs.), yr. 68° F., Jan. 52.2°, Aug. 85.2°; summer, 91°; rfall. 29 in. in 34 days. Evening breezes (*marea*) from W.; rare falls of snow. P. (1860) 118,000; (1877) 133,000; (1887) 143,000.

Seville, vil., U.S., Ohio, Medina co., 35 m. S. by W. Cleveland. P. <1500.

Seville, post-tp., Victoria, Evelyn co., in 37° 50′ S. and 145° 31′ E. P. <1500.

Sevington, par., Eng., Kent, div. and 2 m. SE. by E. Ashford. P. <250.

Sevke, tn., Asia Minor. See **Söke.**

Sevlijevo, or **Selvi,** tn., Bulgaria, cap. prov. Sevlijevo, on the Rusica, 36 m. SE. Plevna. Alt. 655 ft. P. 8900.

Sèvre-Nantaise, riv., France, called Nantaise because it enters the Loire at Nantes. Rises in the Gâtine de Poitou, and flows NW. for 85 m.; navigable, with one lock, 14 m. Area of basin, 920 sq. m.

Sèvre-Niortaise, riv., France, called Niortaise from passing Niort; rises 15–20 m. E. Niort and flows W. to the NE. angle of the Pertius Breton, 12 m. N. La Rochelle. Length, 95 m. Area of basin, 1380 sq. m.; navigable, 45 m.; has seven locks.

Sèvres, tn., France, dep. Seine-et-Oise, 6½ m. W. by S. Notre Dame, Paris, on the l. bk. of the Seine, 2 m. from the city wall, arr. Versailles. Seat of the national artistic china works, founded in 1745 at Vincennes and transferred to Sèvres eleven years later, to which is attached a museum of ceramic art, the first in Europe; manufactures sweetmeats, crystals, and carriages; has also bleach-works. P. 6600.

Sèvres, Deux-, dep., W. France, traversed SW. by the Sèvre-Niortaise and NW. by the Sèvre-Nantaise; formed in 1790 chiefly out of Poitou (Niortais, Thouarsais, and Gâtine), with small portions of Saintonge and Aunis; divided into four arrs: Niort (cap.), Melle, Parthenay, and Bressure. Surface diversified; highest point, Ferrier de St. Martin, 890 ft., about 23 m. NNE. Niort; lowest, 10 ft., where the S. Niortaise leaves the dep. Comprises three regions, the Gâtine in the N. and centre, traversed by low hills (granite and schists); the soil, naturally of little fertility, has been improved by the admixture of lime; the Plain (chiefly oolite and lias) in the SE. slightly undulating, rising from about 25 ft. in the W. to 500 ft. on the frontier of Charente, monotonous, but very fertile; the Marsh, a limited tract in the SW., formerly a swamp, in which the clayey sub-soil is covered with a thick layer of vegetable matter, now reclaimed and comprising the 'dry' and 'wet' marsh, the latter periodically submerged, but drained by numerous canals, which also take the place of roads, yields rich crops. The dep. belongs to the basins of the Loire, Sèvre-Niortaise, and Charente. The Loire does not touch the dep. but receives more than half the drainage, mainly by the Thouet and Sèvre-Nantaise, a small dist. in the W. being drained to indirectly through the Clain; principal affluents of Thouet, r. bk. Dive (joins outside the dep.), l. bk. Thouaret and Argenton; the Sèvre-Niortaise, a coast river, receives r. bk. Liguaire or Chambon and Autise, l. bk. Mignon (beyond the dep.); the Charente receives the Boutonne and other streams from the SW. Climate mild and humid, colder in the Gâtine. The principal cereal is wheat, next oats; the vine covers about two per cent. of the surface (Airvault, St. Varent, Argenton-Chateaux), production per hectare about one-third of the average for France; a little sugar-beet and flax, apples for cider, nuts and plums. Coal is mined to a limited extent Area, 2338 sq. m. P. (1891) 354,300. See **France,** table.

Seybus, or **Selbus,** in French spelling **Seybouse** (corruption of the ancient *Ubus*), riv., Algeria, prov. Constantine, rises in the same group of mountains as the Mejerda, flows N., under the names of Husb, Sherf, and Seybus, into the Mediterranean, 1 m. S. Bona. Length, 140 m. Area of basin, 4000 sq. m.; mean discharge, 700 cubic ft. per second.

Seychelles, group of isls., Indian Ocean, 700 m. NE. Madagascar, and 1035 m. NNW. Mauritius, of which it is a dependency, between 4°–5° S., 55° 10′–56° E. Mahé is the largest island, area 45 sq. m. Praslin is the second in size, area 15 sq. m. The next largest are Silhouette, Curieuse, Digue, and Frigate; the entire group has an area of 100 sq. m., and is on a bank of sand and coral, 93 m. round, rising at

Mahé to 3240 ft.; no bar, but good and safe anchorage in all winds. Vessels load and discharge by lighters. The principal products are obtained from the coco-nut palm, though maize, manioc, vanilla, and cloves are also cultivated. Exports are valued at £40,000; imports at £50,000. On Praslin and Curieuse Is. grow the curious double coco-nuts, derived from the *Lodoicea Seychellarum*. Cap. of the group, Victoria, on Mahé; it is an imperial coaling station. The Seychelles were colonised by the French in 1742, but passed to England in 1794. The temp., by reason of monsoons and winds, is always equal. Mean temp. (1½ yrs., 1883–84), yr. 79.7° F., Feb. 80.6°, July 77.4°. The regularity of the winds makes the islands healthy. Rain is frequent. The French language predominates. P. (1890) 16,200, mostly French Creoles.

Seyches, vil., France, dep. Lot-et-Garonne, 30 m. NW. by N. Agen, arr. and 18 m. NE. by E. Marmande. P. <2000.

Shamsdin, tract of country in eastern Turkey, adjoining the Persian frontier, SE. of Lake Van. It is an extremely mountainous region, inhabited principally by Assyrian Christians, mostly shepherds.

Shamsha, riv., India, Mysore state, trib. of the Káveri, which it joins in 12° 19′ N., 77° 18′ E.

Shamsherganj, vil., Brit. India, Assam, dist. and 25 m. WSW. Sylhet.

Shan, Chinese, 'mountain;' *e.g.*, Shantung, 'east of the mountain.'

Shanagarry, P.O., Ire., SE. co. Cork, bar. Imokilly, 11 m. E. Queenstown, 7 m. from Mogeely stn.

Shanagolden, par. and tn., Ire., NW. co. Limerick, bar. Shanid, 18 m. NE. by E. Listowel, 3 m. from Foynes stn., PM.O. Par. 4183 ac., P. <1500; tn. P. <500.

Shanahea, P.O., Ire., co. Clare, 4 m. from Kildysart.

Shanahoe, P.O., Ire., 4 m. from Abbeyleix, Queen's co.

Shan-alin, name formerly applied on maps to all the mountains in the SE. of Manchuria, forming the water-parting on that side of the Sungari basin; now restricted to the range in which the E. tribs. of the upper Sangari take their rise.

Shanawan, tn., Lower Egypt, prov. Menufiye. P. 6500.

Shanballymore, electoral div., Ire., NE. co. Cork, bar. and 10 m. NW. by W. Fermoy, 8 m. from Castletownroche stn., P.O.

Shanbogh, par., Ire., co. Kilkenny, bar. Ida, on riv. Barrow, 2 m. SW. New Ross. P. <500.

Shancough, par., Ire., co. Sligo, bar. Tirerrill, 7 m. SE. Collooney; 5451 ac. P. <750.

Shandon, vil., Scot., Dumbartonshire, on the E. shore of Gare Loch, and N. B. R., 4 m. NW. Helensburgh; noted hydropathic establishment. PMT.O. P. <750.

Shandrum, par., Ire., co. Cork, bar. Orrery and Kilmore, 4 m. SW. Charleville; 13,451 ac. P. <2000.

Shandwick, vil., Scot., Ross and Cromarty, on Moray Firth, par. and 5 m. W. Nigg stn.

Shangarry, electoral div., Ire., co. Carlow, dist. Fennagh and Myshall.

Shangchwan, or **Shangchwan-shan,** isl., China, off S. ct. of prov. Kwangtung, in 21° 40′ N., 112° 50′ E. On its NW. side is the noted harbour of Timao or Tamao, called by the Malays Veniagá or Beniagá ('mart'), where the Portuguese received permission to establish a factory in 1518, whence, however, they were soon after expelled on account of their erecting a fort without permission.

Shanghai, seapt., China, prov. Kiangsu, on a branch of the Yangtse-kiang, 12 m. from the sea, and 160 m. SE. of Nanking. The city consists of two distinctive parts, the native Chinese town, surrounded by walls, with narrow, filthy streets, and the European settlement, lying on the N., with wide streets and handsome buildings, including a Protestant cathedral designed by Sir Gilbert Scott. The site of Shanghai is low, subject to great heat in summer, and generally visited by fever, dysentery, and cholera. Mean temp., yr. 62.5° F.; maximum 100.5°, minimum 24°. Shanghai is without a rival among the treaty-ports of China in the volume and value of its trade. This importance it owes to its situation on the seaboard of middle China, beside a deep river accessible to ocean-going vessels, and to its connection by numerous canals with rich tea and silk growing provs. in the interior. Excluding the native junk trade and the foreign transit trade, Shanghai sends out annually about seven and a half millions sterling worth of native local produce, principally silk and tea, augmented by raw cotton, rice, paper, wheat, native cloth, medicines, sugar, tobacco, wax, wool, and numerous minor commodities; and receives foreign imports (cottons and cotton yarn, opium, sugar, metals, kerosene oil, woollens, coal, cloth, &c.) to the annual value of £16,500,000 sterling; and in addition to this, close upon £11,000,000 worth of tea, silk, sugar, skins, rice, straw-braid, tobacco, paper, beans and bean-cake, wax, wool, and raw cotton from other Chinese ports. The trade in direct imports and exports increased 64 per cent. between 1884 and 1893. The foreign countries chiefly traded with are Great Britain, Hong-kong, India, Japan, the United States, and the southern countries of Europe. Owing to the depreciation in the value of silver, Shanghai alone exports annually about one and a quarter million sterling of gold, and imports two and a quarter millions sterling of silver—this in addition to the trade statistics given above. Cotton and silk spinning, cotton-weaving, and the manufacture of matches, soap, paper, &c., are prosecuted on European models. Shanghai was declared a treaty-port, open to foreign trade, in 1842. Between 1856 and 1864 the trade increased with extraordinary rapidity. In 1865 the British government established at Shanghai the supreme consular court and court of appeal for all China and Japan. P. 3-400,000, including 3000 foreigners.

Shangton, par., Eng., Leicestershire, Harborough div., 9½ m. SE. by E. Leicester, 2 m. NE. Kibworth stn. P. <250.

Shanmullagh, electoral div., Ire., Monaghan, dist. Aughnacloy.

Shannock Mills, vil., U.S., Rhode I., Washington co., 16 m. W. by S. New Port. P. <1500.

Shannon, isl., Greenland, off E. ct., a little N. of 75° N. Area, 420 sq. m.

Shannon, the longest riv. of Ire., traverses the centre and W., dividing Connaught from Leinster, and crossing the N. of Munster, where it separates co. Clare from cos. Tipperary, Limerick, and Kerry. It rises in Cuilcagh Mts., co. Cavan, 345 ft. above the sea, flows at first SW., and then generally S., through Loughs Allen, Boderg, Ree, and Derg to near Limerick, where it turns W. and enters the Atlantic by an estuary 10 m. in width and 70 m. in length. Total course, 225 m. Its basin is 6060 sq. m. Affluents—W., the Boyle, Suck, and Fergus; E. and S., the Inny, Brosna, Mulkear, Deel, and Maigue. It is navigable for the last third of its course, and may be ascended by vessels of 1000 tons to Limerick. Above Limerick it is canalised so as to be made navigable to the head of Lough Allen, rather more than 141 m.; but the number of locks (18) considerably diminishes the utility of the stream for navigation. All the locks except the highest, that of Drumleague, a few miles below Lough Allen, can be passed by steamers 72 ft. long, 13 ft. 4 in. wide, and of 4 ft. 10 in. draught. The Shannon is connected with Dublin by the Grand Canal at Shannon Harbour, King's Co., and the Royal Canal, near Longford.

Shannon, vil., U.S., Illinois, Carroll co., 53 m. ESE. Dubuque (Iowa). P. <1500.

Shannon, co., U.S., Missouri, in the S., W. of 91° W., crossed in the S. by 37° N.

Shannon, co., U.S., S. Dakota, on the S. frontier, between 102° and 103° W., traversed by the White R.

Shannonbridge, tn., Ire., NW. King's co., bar. Garrycastle, on the l. bk. of the Shannon, there crossed by a bridge, 11 m. SSW. Athlone, 7 m. from Ballinasloe stn., P.O. P. <250.

Shannondale Springs, vil., U.S., W. Virginia, Jefferson co., on Shenandoah R., 4½ m. E. Charleston; has saline chalybeate springs. P. <1500.

Shannon Harbour, tn., Ire., W. King's co., bar. Garrycastle, 8½ m. N. by W. Parsonstown, on the l. bk. of the Shannon, 2 m. from Banagher stn., P.O. P. <250.

Shannonville, vil., Canada, Ontario, Hastings co., on the Bay of Quinté, and a railway, 37 m. W. Kingston; accessible to large vessels. P. <1500.

Shanoguestown, P.O., Ire., 2 m. from Muckamore, co. Antrim.

Shanrahan, par., Ire., SW. co. and 14½ m. SSE. Tipperary, bar. Iffa and Offa West; 24,923 ac. P. <3000.

Shans. See **Laos.**

Shanshan, port, Chile. See **Maiquillahue.**

Shansi ('western mountains'), prov., N. China, W. of Pechili, and bounded on the W. and partly on the S. by the Hwang-ho, the prov. occupying the angle to the E. and N. of the great bend of that river, but separated on the SE. from Honan by the Taihang-shan Range (rather the declivity of a tableland than mountains proper); cap. Taiyuen-fu. The northern half of the prov. is occupied by ranges of mountains having a SW. to NE. trend, among which is the Wutai-shan (*q.v.*), noted for its sanctity. The principal river in this section is the Sankan-ho, or upper Hun-ho, which has the same general direction. The southern half of the prov. is occupied by two tablelands, an E. and a W., separated by the valley of the Fönho or Fen-ho. The whole prov. belongs to the lœss region of China, and on account of the extreme porousness of this soil is capable of bearing large crops only in irrigated areas, which are from 10 to 20 times as valuable as the unirrigated. Such

tracts occur chiefly at the bottom of narrow river valleys, and are estimated to form in the aggregate scarcely one per cent. of the surface. Hence the prov. does not grow enough grain for its own consumption. On the other hand, it is remarkably rich in minerals. The SW. tableland has vast fields of bituminous coal, and the SE. tableland is occupied between about 35½° and 38° N., and 112°–114° E., by a field of excellent anthracite, estimated by Richthofen at about 13,500 sq. m., mostly with seams of from 20 to 30 ft. thick, and in places so situated as to be worked with the greatest ease. Here also are to be found excellent iron ore and fireclay in great abundance. (See Richthofen's *China*, vol. ii., pp. 439–40.) It is an outlier of this field that is worked in the plain of N. Honan round Hwaiking-fu. In the N. of Shansi also there is a detached but important coalfield round Tatung-fu. In the SW. of the prov. are extensive supplies of salt, round the lakes of Wusing-hu and Yenchi. The development of the mineral resources of the prov. is, however, greatly impeded by the difficulty of the communication with the surrounding provs. N. Shansi communicates with the plain on the E. only by the difficult Nankon Pass, and S. Shansi only by a rocky road, difficult for carts passing by Khavailu (Hwoluhien). The ravines of the loess make communication equally difficult with the W. See **China,** table.

Shantar Islands, Russia, Maritime Prov., in Gulf of Udskoi, at the extremity of Tugur Bay, of the Sea of Okhotsk; consist of Great Shantar, Little Shantar, Feklistov, and seven smaller islands. Area, 1102 sq. m.

Shantonagh, P.O., Ire., SE. co. Monaghan, bar. Cremorne, 14½ m. S. by E. Monaghan, 9 m. from Castleblayney stn.

Shantung ('eastern mountains'), prov., N. China, composed of the mountainous penin. jutting out E. to the S. of the Gulf of Pechili, together with the loess plains on the NW. (traversed by the lower course of the Hwang-ho), W., and SW.; cap. Tsinan-fu. The mountains afford a valuable shelter from the cold winds blowing from Mongolia and Manchuria across the Gulf of Pechili, and hence enable this prov. to produce some of the products of southern China, such as rice and silk, the latter a product of great importance. The loess plains in the NW. are easily irrigated by means of wells, water being mostly obtained at a depth of 10–20 ft., and hence produce abundance of grain, cotton, earthnuts, and other crops. The mountains are rich in minerals, including coal in the NW., lead also in the NW. (at Tsuchuan), gold in the E. (at Pingtu and Chaoyüan); but the difficulties of communication hinder their being worked to any great extent. The SW. plains are traversed by the Grand Canal, and recently a navigation canal has been made from Yangkia-kou, a seaport on the part of the coast S. of the mouth of the Hwang-ho, towards Tsinan-fu, which is intended to be the terminus. On the N. ct. is the treaty-port of Chefoo (Chifu), the only safe and convenient harbour on that coast for commerce. Further E. is the naval arsenal of Weihaiwei. On the S. ct. is the harbour of Kiao-chou. See **China,** table.

Shaochou, tn., China, in the N. of prov. Kwangtung, on the Pe-kiang, 125 m. N. Canton.

Shaohing, tn., China, prov. Chekiang, 23 m. ESE. Hangchow.

Shaoking, or **Shaohing,** tn., China, prov. Kwangtung, 50 m. W. Canton, on the l. bk. of the Si-kiang, which immediately below passes through gorges formed by hills rising to 700 or 800 ft. on either side.

Shao-wu, tn., China, prov. Fokien, 140 m. NW. by W. Foochow.

Shap, par. and market-tn., Eng., Westmorland, div. and 8½ m. WSW. Appleby. Near it are the remains of a Druidic temple and of an abbey, founded 1150. **Shap Fells,** an upland tract to the S., forming a neck or saddle between the mountains of the Lake District and the Pennine Chain, now crossed by the main line of the L. & NW. R. (on which Shap is a station), at the height of 916 ft. Granite is extensively quarried here; and **Shap Wells,** resorted to for mineral waters, are in a hollow of these fells, between 3 and 4 m. S. of the village. PMT.O. Par. 27,177 ac., P. <1500.

Shapinshay ('the island of Hjalpand, a Norse Viking'), isl. and par., Scot., Orkney Is., 4 m. NE. Kirkwall. The shores are low and fertile; the island has many Pictish and Scandinavian antiquities. Length, 5 m.; breadth, 4½ m. Alt. 50 ft. Mean annual rfall. 32.27 in. Par. 6733 ac., P. <1000; isl. P. 900.

Shapu, tn., China. See **Kanpu.**

Sheering, par., Eng., Essex, Epping div., 10 m. E. Ware, 1½ m. SE. by E. Sawbridgeworth stn., P.O. P. <750.

Sheerness, eccles. par., seapt. tn., and naval arsenal, Eng., Kent, Isle of Sheppey, Faversham div., on the Thames, at the mouth of the estuary of the Medway, 11 m. ENE. Chatham, with two stns. (**Sheerness-on-Sea** and **Sheerness Dockyard**) on the L. C. & D. R. The SE. R. run a steamboat from Sheerness Pier in connection with their line to Port Victoria, and thence to London *viâ* Gravesend. Of its four divs.—Blue-town, Mile-town, Marine-town, and Westminster—the first is enclosed within fortifications. The dockyard, occupying nearly 60 ac., contains three basins and five docks. The largest of the former has an area of 3½ ac., with 25.8 ft. of water on sill at spring tides high water. The longest of the latter is 268 ft. 9 in., with 15 ft. over sill at high water. It also contains extensive storehouses, &c. The naval barracks, accommodating 1000 seamen, are also within the yard. Near to, but outside, the yard are Garrison Point fort, Admiralty House (the residence of the port admiral), and the military barracks. One and a half miles from Garrison Point another strong fort has recently been erected at Barton's Point. The harbour is sheltered and commodious, with deep water at low tide. The town affords good sea-bathing. Sheerness was taken by the Dutch under De Ruyter, 1667. The mutiny of the Nore broke out here, 1798. P. 14,500.

Sheet, par., Eng., Hampshire, Petersfield div., 1⅞ m. NE. by N. Portsmouth, close to Petersfield stn., P.O. P. <1000. See **Petersfield.**

Shee Water, riv., Scot. See **Blackwater** (Perth and Forfar).

Shefa 'Amr, tn., Palestine, 32° 48′ N., 35° 10′ E., 10 m. NW. Nazareth.

Sheffield, vil., Canada, New Brunswick, Sunbury co., 20 m. E. by S. Fredericton, on the St. John R. Alt. (Broomhall Park Observatory) 330 ft.; (Redmires) 1100 ft. Mean annual rfall. (Broomhall Park), 33.03 in.; (Redmires) 43.26 in. P. <1500.

Sheffield, market-tn., Eng., Bedfordshire, on the Ivel, 5 m. SW. Biggleswade.

Sheffield, parl. and mun. (since 1843) bor., co. bor. (since 1888), and city (since 1893), Yorkshire, W. Riding, on a hilly site at the confluence of the rivs. Don and Sheaf (taking its name from the latter), at the extreme S. of the county, with stns. on the M. R., M. S. & L. R., and L. & NW R., 40 m. SE. Manchester, and 162 m. N. London by rail. Formerly it was the cap. of 'Hallamshire,' a dist. of five pars., dating from the Norman Conquest. It now contains five parl. divs.—the Central, Attercliffe, Brightside, Eccleshall, and Hallam. Since 1875 the general appearance of the town has immensely improved, some £1,000,000 having been spent in widening the streets, in public buildings, &c. Chief public buildings are the Town Hall (built 1891; crowned with statue of Vulcan), Cutlers' Hall, Corn Exchange, Mappin Art Gallery, the Albert Hall, various music-halls and literary or scientific institutions; a free library with four branches, the Sheffield library (80,000 vols.); hospitals, asylums, and other charitable foundations. The important educational institutions include the Firth College, the Royal Grammar-School, Girls High School, the Wesley College, the Technical School, School of Art, &c. In Meersbrook Park, or S. suburb of the town, near Heeley stn., is the small museum of the Guild of St. George, established by Mr. Ruskin (first in the suburb of Walkley), containing a small but choice collection of paintings, including some by Mr. Ruskin himself, a valuable collection of minerals, a very valuable collection of books and MSS., a set of Leech's drawings for *Punch*, &c. The growth of Sheffield in population and wealth was originally due to the manufacture of steel and cutlery. Ironstone and coal have always abounded in the neighbourhood, and the five mountain streams supplied water-power. The original growth of the cutlery trade was no doubt favoured also by the Wickersley grindstone quarries, a few miles to the E. Iron-smelting had begun in the Saxon period, but for centuries Sheffield has made use of Swedish iron for the manufacture of the best steel. Chaucer refers to the knives for which Sheffield was already famous in the 14th century. In 1624, the Cutlers' Company was incorporated; and in 1650 the Flemish workmen introduced the making of clasp-knives (=*jocktelegs*, for 'Jacques de Liège'), scythes, and sickles. In 1740 Huntsman of Handsworth, after his invention of cast iron, greatly enlarged the Sheffield trade in various branches. Ever since, this great centre of the cutlery trade has been foremost in the world, notwithstanding the recent competition of Germany and the United States, &c. Besides cutlery, including instruments and tools of every form, the heavier steel goods manufactured at Sheffield include armour-plates, engine-castings, rails, axles, steel shot, &c. There are also large manufactures of machinery, and an important silver-plating industry (introduced 1742). Minor industries are tanning, bicycle-making, iron and brass founding, &c.; manufacture of combs, brushes, optical instruments. The connection of Sheffield with Goole by improving the canal service is expected to greatly increase the export and import trade. Sheffield was originally a cluster of houses, homes of iron-workers, round the Castle Hill, when the castle was held by one of the De Lovetots, barons of Huntingdonshire. Cardinal Wolsey was afterwards imprisoned here, and (from 1572 to 1586) Mary Queen of Scots. Standing on N. of the town, between the Sheaf and Don, the castle with its fortifications occupied 4 ac., and its grounds 14 ac. It was demolished after Marston Moor, 1644. In 1864, 250 persons perished here through the breaking of a new embankment of the Dale Dike Reservoir at Bradfield. There are several excellent recreation grounds—Weston Park (with a museum and valuable picture gallery) on W., 13 ac.; the Firth Park on NE., 36 ac.; the Meersbrook Park, 3 ac.; Endcliffe Woods, 33 ac.; High Hazel's Park and Hillsborough Park; the Norfolk Park, 60 ac., granted by the Duke of Norfolk, lord of the manor, but remaining his property; the Botanical Gardens, 18 ac. For a great manufacturing town, the surroundings are singularly pleasant, having green wooded hills on every side except towards Doncaster. From 1832 to 1885 Sheffield returned two members to Parliament, and since 1885 it has returned five, one for each div. Till 1845 it was included in 1 par., but now there are 37 eccles. pars. Market-days, Tu. and S. Area, mun. and parl. bor., 19,651 ac. A survey of 1613 assigns 2207 inhabitants to Sheffield. P. (1801) 45,800; (1851) 135,300; (1871) 239,900; (1891) 324,200.

Shensi, prov., China, S. of the Great Wall, bounded E. by Shansi and Honan, S. by Hupe and Süchwan, and W. by Kansu. It consists in the S. of two E.-W. longitudinal valleys, the northern that of the Wei, a remarkably fertile wheat-growing region, containing Singan-fu, the cap. of the prov., and at its E. end, on the E. frontier of the prov., at the point where the Hwang-ho turns suddenly eastwards, the important strategic position of Tungkwan, separated by the Tsinling-shan Range from the southern valley, that of the upper Han-ho (Han-kiang), which in its turn is separated from the prov. of Süchwan by the Tapa-shan Range. These two valleys are virtually shut off from one another except in the E. and W., where passes lead across the Tsinling-shan (*q.v.*). The northern part of the prov. is a lœss plateau, deeply cut in the usual manner for this formation by precipitous gorges difficult to traverse. Coal is mined in the mountains. The inhabitants rank as the finest race under Chinese rule. See **China,** table.

Shenstone, par., Eng., Staffordshire, 3 m. S. Lichfield, on the L. & NW. R., PMT.O.; 8543 ac. P.<3000.

(**Charlton stn.**); has manufactures of crape, velvet, and silk; extensive breweries, and a market-cross, erected 1500. Market-day, F. P. 5500.

Shepton Montague, par., Eng., Somerset, E. div., 10½ m. SW. by S. Frome, 1½ m. SE. Cole stn. P.<500.

Sheraban, tn., Asiatic Turkey, 55 m. NNE. Bagdad, near the l. bk. of the Diyala.

Sheraton with Hulam, par., Eng., Durham, E. div., 5½ m. W. Hartlepool, 1½ m. SSE. Hesleden stn., P.O. (**Sheraton**). P.<250.

Sherborn, tn., U.S., Massachusetts, Middlesex co., 18 m. WSW. Boston. P.<1500.

Sherborne, par. and market-tn., Eng., Dorsetshire, N. div., 17 m. N. by W. Dorchester, on the riv. Ivel, and the L. & SW. R. Sherborne is situated partly on a height. The Abbey church, now the parish church, was originally built about 700 A.D. Here was a bishop's see from the 8th to the 11th century; in 1076 it was removed to Old Sarum. Sherborne has a large public school, refounded by Edward VI. in 1550, on the site of the monastic school, which was dissolved, together with the monastery, in 1539. The school buildings are of all periods, from the 12th century onward. The main part of the modern castle was built by Sir Walter Raleigh, the old Norman castle by Bishop Roger of Sarum in the 12th century. Manufactures of gloves and silk. Market-days, Th. and S. Par. 6497 ac., P. 5700; tn. P. 5000.

Sherborne, par., Eng., Gloucestershire, Cirencester div., 10 m. N. by W. Lechlade, 4½ m. S. Bourton on the Water stn. Birthplace of Bradley, the astronomer, 1693. PMT.O. 4567 ac. P.<750; eccles. par. (**Sherborne with Windrush**) P.<750.

Shetland, South, group of isls. in the Antarctic Ocean, extending NE. and SW., between 61° and 63° 30′ S., and 53° and 63° W. The principal islands are Clarence, George I., Livingstone, Deception, and Smith. The islands are mountainous and surrounded by deep water. Estimated area, 850 sq. m.

Shetland (or **Zetland**) **Islands,** an archipelago of about 30 isls., with numerous smaller islets, in the N. Atlantic Ocean, belonging to Scotland, of which country with the Orkneys, 50 m. SSW., it forms a co., mostly between 59° 51′ and 60° 50′ N., and 0° 44′ and 1° 44′ W., 180 m. SE. the Faroe group, and 210 m. W. Bergen in Norway. **Mainland,** in the SW., comprises about half the area, and more than half the entire population. Highest point of the group, Ronas Hill (1475 ft.), in NW. of this island. Other islands are Yell, Unst, Fetlar, Whalsey, Bressay, E. and W. Burra, Papa Stour, Foula (between 60° 6′ and 60° 10′ N., and in 2° 5′ W., and conjectured to be the *Ultima Thule* of Tacitus), and Fair I., half way between Shetland and Orkney. The shores are rocky and greatly indented with inlets, especially in Mainland. Climate very damp and variable, but snow or frost seldom lasts long in winter, at which season the aurora borealis is very brilliant; night is scarcely known during May, June, and July. The principal rocks are metamorphic and limestone. Surface generally hilly, covered with heath, and destitute of trees; peat is abundant, and supplies the inhabitants with fuel. Unst is the most fertile island. Agriculture is backward; but potatoes, turnips, barley, and oats are raised. Large numbers of cattle, sheep, and ponies are reared, the small, hardy Shetland ponies being famous. The herring, cod, ling, and tusk fisheries are highly important, employing a great proportion of the inhabitants. Manufactures are almost wholly domestic, chiefly hosiery and shawls; other exports are cattle, fish, &c., sent South in return for colonial and manufactured goods. The people appear to be, as to their condition and education, superior to those of the N. of the mainland of Scotland. They are chiefly of Norwegian descent, and their ancestors are said not to have embraced Christianity until the 13th century. The islands, with Orkney, send one member to Parliament. Scandinavian antiquities are numerous on the islands, and on Fetlar are the vestiges of a Roman camp. P. (co.) 28,700; Shetland (main island) 19,741; parl. dist. (**Orkney and Shetland**). P. 54,800; S. portion, 28,500.

Shettleston, tn., Scot., NW. Lanarkshire, on the N. B. R., 4 m. E. Glasgow; has coal-mines. PMT.O. P. 5400.

Shiel, Scotch, 'a hut' or 'shed.' See *Scale.*

Shiel, Loch, lake, Scot., on the border of Inverness-shire and Argyllshire, drained NW. by the **riv. Shiel** (also on the frontier of these two counties) into the Atlantic. It discharges its surplus waters on the W. by the riv. Shiel into the sea at Loch Moidart. At the head of this lake Prince Charles unfurled his standard, 1745. Alt. 16 ft. Length, 17 m.; breadth, 1 m.

Shielday. 1. Hamlet, Scot., Ross-shire, at the head of **Loch Shielday** (a small inlet in the SE. of the Gair Loch), 5 m. SW. of the foot of Loch Maree, PM.O. **2.** In the same county on **Loch Shielday** (an inlet between Loch Torridon and Upper Loch Torridon), 5 m. W. by S. of the head of Loch Torridon.

Shieldfield, eccles. par., Eng., Northumberland, in the ancient par. of Newcastle-upon-Tyne, All Saints. P. 12,300.

Shieldhill, stn., Scot., Dumfriesshire, 3½ m. WNW. Lochmaben, on the C. R.

Shieldhill, East, vil., Scot., Stirlingshire, near Polmont Junc. P.<750; eccles. par. (**Shieldhill and Blackbraes**) P.<3500.

Shield Row, stn., Eng., Durham, on the NE. R., between Beamish and Annfield Plain stns.

Shields and **Shields Road,** two stns., Scot., Lanarkshire, on the G. & SW. R., in the SW. of Glasgow.

Shields, North, par., Eng., Northumberland, on the coast, 7½ m. ENE. Newcastle, in the parl. bor. of Tynemouth, on the NE. R.; coal mined. There are also an active fishing, and a little shipbuilding. Market-day, S. Mean temp. (20 yrs.), yr. 47.1° F., Jan. 38.6°, July 58.2°; mean annual rfall. (25 yrs.), 25.87 in. P. 6000.

Shields, South, parl. bor. (since 1832, 1 member), mun. bor. (since 1850), and co. bor. (since 1888), seapt., market-tn., and seaside resort, Eng., Durham, 9 m. E. Newcastle-on-Tyne, in the diocese of Durham, on the S. bank of the Tyne, with stns. (**High Shields, South Shields,** and **Tyne Dock**) on the NE. R. The spacious market-place, with town-hall in the centre, forms an interesting architectural feature. The Marine Parks, 45 ac., are the public recreation-grounds; they are divided by the Pier Parade. Some remains of a Roman station have been excavated here, and are now preserved in the free library museum. South Shields, one of the Tyne ports, has a harbour admitting vessels of the largest size, and is protected by the South Pier, a huge breakwater about 1 m. long, built 1854–92, with a lighthouse at the end. Within the bor. are the Tyne Docks (NE. R.). The fifteen docks of South Shields vary from

430 to 120 ft. in length, depths from 23½ to 11 ft. at high tide. The principal trade is in coal. Shipbuilding is carried on, and flint-glass made. A monument to Wouldhave, the inventor of the lifeboat, and a native of the town, adorns the entrance to the pier. Steam ferries to North Shields and Tynemouth. There is more than a mile of excellent beach. Market-day, S. Parl. and mun. bor. 1839 ac., P. (1801) 8100; (1851) 29,000; (1871) 45,300; (1891) 78,400.

Shieling, Scotch, 'a hut' or 'shed.' See *Scale.*

Shifnal, par. and market-tn., Eng., Salop, Newport div., 15½ m. E. by S. Shrewsbury, on the G. W. R.; has blast-furnaces and other iron-works, but is chiefly agricultural. Market-day, Tu. Alt. 353 ft. Mean annual rfall. 29.67 in. 1175 ac. P. 6500.

Shiga, a ken or prefecture, Japan, cap. Otsu.

Shigatse, sometimes spelt **Jigatze** (the French pronunciation of and the German pronunciation of *tz* being intended), city, Tibet, about 5 m. S. of the Brahmaputra, in 29° 16′ N., 88° 44′ E. It stands 11,800 ft. above sea-level. It is 1½ m. square. To the SW. of the city is the monastery called Tashilumbo, surrounded by a wall 1 m. in extent, and containing the residence of the Panjan-Ringbo-Che, *the right reverend, great, precious teacher.* He is one of the two Great Lamas of Tibet, and is in theory equal in rank and in spiritual and temporal power with the Lama Guru, who lives at Lhasa. The latter, however, rules a much more extensive dominion, and is much more powerful. Between the city and the monastery is the bazaar, where a market is held daily. The soil is rich, and fine grain crops are raised. P. 9000, exclusive of priests.

Shihchien-iu, tn., China, Kweichou, 113 m. NE. Kweiyang-fu.

Shihhuiyao, vil., China, Hupe, on the Yangtse-kiang, about 75 m. below Hankow, with lime-works; starting-point of a railway, 17 m. long, leading to the iron-mine of Tiehshansu, in a hill of ore 3 m. long by 400 ft. high.

Shihon, place named in O. T. See **'Ayûn esh Sh'afn.**

Shildon, par. and tn., Eng., Durham, div. and 3 m. S. by E. Bishop Auckland, on the NE. R.; coal is mined here. PMT.O. (**New Shildon**). Market-day, S. P. 7900; tn. (**Shildon and East Thickley**) P. 9500; eccles. par. (**New Shildon**) P. <4500.

Shiling, pass, China, prov. Shansi, 25 m. N. Taiyuen.

Shilka, riv., Russia, E. Siberia, prov. Transbaikalia, unites with the Arguñ at Ust Stryelka to form the Amur. It is itself formed by the confluence of the Ingoda and the Onon, 44 m. above Nerchinsk town, flows NE. and E. on the lower plateau amidst undulating hills richly clothed with prairies and woods, past Nerchinsk, Sryetensk, Shilkinskiy, Zavod, and Ust-Kara. Below Gorbitsa, down to its junction with the Arguñ, it pierces a series of chains which fall as steep crags on both sides of the river, leaving no communication besides the river-bed but by a mountain footpath, and thus offering great difficulty for the construction of the Trans-Siberian Rly. Receives from the left the Nercha, Kara, Chornaya, and many small tribs.; rich gold-mines on the first two rivers and their tribs. Length about 300 m.

Shilkinskiy Zavod, vil., Russia, E. Siberia, prov. Transbaikalia, on l. bk. Shilka, 110 m. NE. Nerchinsk; silver-works, now abandoned; iron-works. P. <2000.

Shipton-on-Cherwell, par., Eng., Oxfordshire, on the Cherwell, with stn. (**Shipton**) on G. W. R., div. and 2 m. E. Woodstock, 1 m. N. Woodstock Road stn. P. <250.

Shipton Sollars, part of eccles. par., Eng., Gloucestershire. See **Shipton Oliffe.**

Shipton Thorpe, eccles. par., Eng., Yorkshire, in ancient pars. of Nunburnholme and Market-Weighton. P. <500.

Shipton-under-Wychwood, par., Eng., Oxfordshire, Banbury div., on the Evenlode, 10½ m. W. Woodstock, 1 m. SW. Ascott-under-Wychwood stn., with a stn. on the G. W. R., PM.O. P. <750; eccles. par. (**Shipton-under-Wychwood with Langley**) P. <1000.

Shipwash, shoal, Eng., off coast of Essex, 15 m. E. Harwich. Length, 8 m.

Shipwright's Point, post-tn., Tasmania, Kent co., on the r. bk. of the Huon, 15 m. SW. by W. Hobart; exports timber. P. <1500.

Shira, riv., Scot., Argyllshire, flows SSW. into Loch Shira (Loch Fyne), 1½ m. NE. Inveraray.

Shir-abad, tn., Bukhara, 210 m. SE. of it, 17 m. from r. bk. Amur. Alt. 1560 ft.

Shiragawa, or **Shirakawa,** tn., Japan, Honshiu, on the northern railway, 100 m. NNE. Tokyo. P. 9600.

Shira-ishi, tn., Japan, Honshiu, 175 m. NNE. Tokyo, 25 m. SW. Sendai, on the northern railway. P. 5300.

Shirakami-saki, the extreme S. point of Yezo I., Japan.

Shirâlí, port, Brit. India, Bombay, on SW. ct. of N. Kánara dist., at mouth of Venktapur R., 20 m. S. Honawár. P. <5000.

Shirane-san, volcano, Japan, in interior of Honshiu, in 36° 48′ N., on the border of Gumma and Shinano kens; in eruption in 1872; the recently formed cone rises from a crater more than 1 m. in width. Alt. 7400 ft. (Naumann). There is another volcano of this name further E. in Tochigi ken, alt. 7500 ft. (Naumann); and higher than either, the second highest mountain in Japan, a peak of Palæozoic age, in Yamanashi ken (old prov. Kai), in 35° 40′ N., alt. 10,150 ft. (Naumann).

Shiraz, tn., Persia, cap. prov. Fars, 205 m. S. by E. Ispahan; famous for its roses, wine, and nightingales, sung by the Persian poets Hafiz and Saadi. One of the chief trading centres in S. Persia. Exports opium, almonds, cotton, woollens, carpets.

horses and mules, tobacco, silks, &c., to the annual value of some half a million sterling; and imports cottons, sugar, tea, copper, indigo, spices, silks, glass and porcelain, to the value of nearly three-quarters of a million sterling. Has manufactures of woollens, glass, rose-water, and inlay fancy articles. Earthquakes have well-nigh destroyed it on more than one occasion (*e.g.*, 1824). P. 30-40,000.

Shirburn, par., Eng., Oxfordshire, Henley div., 13½ m. SE. by E. Oxford, 1½ m. NNE. Watlington stn. P.<500.

Shirdley Hill, stn., Eng., Lancashire, near Southport, on the W. Lancashire, and Liverpool, Southport, and Preston Junction Rly.

Shire, riv., S. Africa, issues from the SE. end of Lake Nyassa and flows S. and SSE. into the Zambezi, which it enters in about 35⅝° E., navigable at all seasons of the year for steamers to Chiromo, at the confluence of the Ruo, for boats not drawing more than 18 in. as far as Katunga, the port of Blantyre, in 16° 4′ S., and also from Lake Nyassa to Matope, in 15° 25′ S. Between Katanga and Matope, where the river makes a bend to the W. round a range of hills, its navigation is interrupted by a series of rapids and falls, the principal being the Murchison Falls, in 15° 40′ S., and the Mamvira Falls, in 15° 55′ S. (*Proc. R. G. S.*, 1890, map, p. 256.)

Shirebrook, eccles. par., Eng., Derbyshire, Chesterfield div., 4 m. N. by W. Mansfield, on the M. R. and M. S. & L. R., PM.O. P.<750.

Shire Green, vil., Eng., Yorkshire, W. Riding, Ecclesfield par., 4 m. N. Sheffield.

Shire Hall Yard, par., Eng., Suffolk, in Ipswich bor. and union. P.<500.

Shirehampton, par., Eng., Gloucestershire, Thornbury div., on the r. bk. of the Avon, 4½ m. NW. Bristol, on a branch line of the G. W. and M. Rlys., PMT.O. P.<3000.

Shiremanstown, bor., U.S., Pennsylvania, Cumberland co., 13 m. from Carlisle; limestone quarried here. P.<1500.

Shirenewton, par., Eng., Monmouthshire, S. div., 4 m. W. Chepstow, PM.O. P.<750.

Shiremoor, PM.O., Eng., 1 m. from Backworth, near Newcastle-on-Tyne.

Shireoaks, eccles. par., Eng., Nottinghamshire, Bassetlaw div., 2 m. W. by N. Worksop, on the Chesterfield Canal, and the M. S. & L. R.; partly in Yorkshire; has coal-mines and lime quarries. PMT.O. P.<1000.

Shireshead, eccles. par., Eng., Lancashire, div. and 7 m. S. by E. Lancaster, 1 m. SE. Bay Horse stn. P.<500.

Shire Stones, three stones and a pillar, Eng., on border of Cumberland, Westmorland, and Lancashire, 5 m. NW. Hawkshead.

Shiritoko, promontory, Japan, in NE. of Yezo I., terminating the long horn of the island, which shoots out towards the Kuriles, opposite Kunashiri I.

Shirland, par., Eng., Derbyshire, Mid div., 6 m. E. by S. Matlock, 2 m. SSE. Stretton stn., PM.O. P.<4000.

Shirley, par., Eng., Derbyshire, W. div., 9 m. WNW. Derby, 4 m. SE. by E. Clifton stn., P.O. P.<250.

Shirley, eccles. par. and tn., Eng., Hampshire, 2½ m. NW. and included in the parl. bor. of Southampton, 1 m. NNE. Millbrook stn., P.O. (**Old Shirley**). Par. P. 9600; tn. (**Shirley and Freemantle**) P. 15,900.

Shirley, eccles. par., Eng., Surrey, Croydon bor., 1 m. E. by S. Addiscombe stn., 9½ m. S. by E. St. Paul's, London, PM.O. P.<750.

Shirol, tn., India, Bombay, Kolhápur state, 75 m. W. Bijápur. P. (1881) 6900.

Shiron, tn., India, 28 m. S. by E. Baroda, on the r. bk. of the Narbadá. P. (1881) 6000.

Shirpur, tn., Brit. India, Bombay, dist. Khandesh, 110 m. SW. by S. Indore. P. 10,100; Hindus, 8200.

Shirvan, formerly a powerful independent khanate, which included the present govt. Baku of Caucasia, and had Shemakha for capital. Conquered by Persia in the 15th century, and by Russia in the 19th century.

Shirwa, lake, Brit. Central Africa. See **Chilwa.**

Shirwan, tn., Persia, 47 m. SW. Askhabad.

Shishaldin, volcano. See **Unimak.**

Shishtova, or **Shistova,** tn., Bulgaria. See **Svistov.**

Shiskine, PMT.O., Scot., Arran I., 10 m. SW. Brodick.

Shitlington, par., Eng., Yorkshire, W. Riding, 6 m. SW. Wakefield. P.<3000.

Shiuhing, tn., China, Kwangtung, on Si-kiang, former cap. of prov., point where first Roman Catholic missionaries Mateo and Ricci gained a foothold in 1582, still one of the strongholds of Romanists in S. of China.

Shiuri, or **Shuri,** tn., Japan, Riukiu I., on the isl. of Okinawa. P. 25,400.

Shiveluch (Sheveluch), extinct volcano, Russia, Kamchatka Penin., 56° 40′ N. Alt. 11,000 ft.

Shiven, small riv., Ire., NE. co. Galway, trib. of riv. Suck.

Shiverskoye, vil., E. Siberia, govt. Irkutsk, 200 m. W. Kirensk, on l. bk. Angara, near its rapids. P.<5000.

Shivner, hill fort, Brit. India, Bombay, Poona dist., in Junnar town; during the first three centuries A.D. the hill seems to have been a great Buddhist centre. Buddhist caves pierce the lower portion of the scarp. Alt. 1000 ft.

Shiwa Lake, lake, in the Pamir, Shighnan, 97 m. N. by W. Chitral, to the W. of the Ab-i-Panj.

Shiwogama, seapt. vil., Japan. See **Shiogama.**

Shiwono-misaki, or **Shiwo-saki,** cape, Japan, the S. point of Honshiu I. To the E., and near the coast, is Oshima I., with one of the principal lighthouses of Japan.

Shixeni Point, cape, Cape Colony, on the E. ct., in about 32° 26′ S.

Shizuoka, ken, Japan, Honshiu I.

Shizuoka, tn., Japan, 85 m. W. by S. Yokohama. P. 38,000.

Shkhara, third highest peak, Caucasus, Svanetian Alps, 43° 14′–43° 7′ E., four summits, of which the highest has an alt. of 17,526 ft.

Shkipetars. See **Skipetars.**

Shkirra (or **Shkira**), **La,** Tunis, rapidly rising in importance as a place of export of halfa (alfa).

Shklov (Polish **Szklow**), tn., Russia, govt. and 21 m. N. Moghilev, on highway to St. Petersburg, and l. bk. Dnieper. P. 10,600.

Shkumbi, riv., Turkey in Europe, rises to the SW. of Lake Okhrida, and flows NNW. then W. into the Adriatic, which it enters in about 41° 3′ N.

Shmoyo, vil., E. Africa. See **Shimoyo.**

Shoa, former kgd., now dist., S. Abyssinia, partly mountainous, with sandy plateaux, and partly flat, watered by the Hawash, which flows into the Red Sea. Oranges, bananas, and citrons are cultivated; agriculture and cattle-breeding are the chief industries; gold and iron are found in the mountains. P. about 1,500,000, of the Mehrzahl tribe, Galla race, and for the most part Christian; cap. Ankober. See **Abyssinia.**

Shoal Bay, Canada, Ontario, on Lake Ontario, in 77° 45′ W.

Shoal Bay, S. Australia, N. Terr., NE. of Port Darwin.

Shoalhaven, mining dist., New South Wales, Camden co., on the ct., 55 m. E. by S. Goulburn, in 34° 50′ S. The central town or village is **Terrara.** P. 7000.

Shoalhaven, riv., New South Wales, rises in about lat. 35° 30′ S., flows N. and E., separating the co. St. Vincent from the cos. Murray, Argyle, and Camden, and enters the Pacific by a large mouth at the village of Shoalhaven, 80 m. SW. Sydney. Before reaching the sea it throws off an arm called Crookhaven R. Through this arm, which reaches the sea 3 m. S. of the parent stream, the navigation of the Shoalhaven is carried on.

Shoal Lake, stn., Canada, prov. Manitoba, on the Manitoba and NW. Rly., 115 m. W. Portage-la-Prairie.

Shoal Lake, lake, 30 m. long, Canada, Manitoba, to the E. of the S. end of Lake Manitoba.

Shoal Lake, Canada, in the extreme W. of Ontario, communicating with the N. part of Lake of the Woods.

Shoals, vil., U.S., Indiana, cap. Martin co., on E. Branch of White R., 60 m. SE. by S. Terre Haute. P.<1500.

Shoals, Isles of, group of small isls., U.S., New Hampshire, just S. of 43° N., crossed by 70° 20′ W.; frequented in summer by tourists.

Shoalwater Bay, inlet, Queensland, on the E. ct., near Port Bowen, crossed by 22° 20′ S.

Shoalwater Bay, U.S., Washington, is entered by a channel between Toke Point and Ledbetter Point, crossed by 36° 30′ N. Length, N. to S., about 30 m. It is shallow, and has valuable oyster fisheries.

Shobdon, par., Eng., Herefordshire, div. and 6½ m. WNW. Leominster, 2½ m. WNW. Kingsland stn., PMT.O. P.<500.

Shobrooke, par., Eng., Devonshire, Molton div., 6½ m. NW. by N. Exeter, 2 m. NE. by E. Crediton stn., P.O.; 4259 ac. P.<750.

Shoby, par., Eng., Leicestershire, Melton div., 4½ m. W. by N. Melton Mowbray, 1½ m. SW. Grimston stn. P.<250.

Shocklach Church and **Shocklach Oviatt,** two adjoining pars., Eng., Cheshire, Eddisbury div., 6 m. E. by S. Wrexham, 4½ m. W. Malpas stn. P. (of each)<250.

Shoebury, North, par., Eng., Essex, SE. div., 2½ m. E. by N. Southend, P.O. P.<250.

Shoebury, South, par., on the Thames, to the S., with a coastguard station 1 m. S. North Shoebury, with a stn. (**Shoeburyness**) on the London, Tilbury, and Southend Rly. South Shoebury is the practising ground for heavy ordnance, and has extensive artillery barracks at **Shoebury Fort.** Has large brickworks. PMT.O. (**Shoeburyness**). P.<3000.

Shoebury Ness (corrupted from *Sceobirig*, 'the cape of the

sea-fortress'), cape, adjoining Shoebury. Alt. 18 ft. Mean annual rfall. 21.85 in.

Shohan, seapt., Annam. See **Turan.**

Shoho, E. Africa. See **Saho** and **Sao.**

Shohos, the African population of NE. Abyssinia, on the shore of the Red Sea, between the slope of the Abyssinian plateau and the coast.

Shokham Island, small isl., Wales, off the W. ct. of Pembrokeshire, to the S. of Skomer I., in 51° 41½′ N.

Sholágarh, tn., Brit. India, Bengal, Dacca dist., in 23° 34′ N., 90° 20′ E. P. (1881) 6100.

Sholápur, tn. and cantonment, Brit. India, Bombay, cap. Sholápur dist., 60 m. N. by E. Bijápur, in the centre of a wide plain (alt. 1800 ft.); manufactures silk and cotton, and has a steam weaving and spinning mill. Since the opening of the railway in 1859, Sholápur has been the trade centre for a large extent of country; it has a small fort, built 1345. The city wall was partly pulled down, 1872. The Ekruk Canal supplies water to the town. P. 61,900; Hindus, 45,400; Moham. 14,600.

Sholden, Kent. See **Shoulden.**

Shreve, vil., U.S., Ohio, Wayne co., 60 m. SSW. Cleveland. P. <1500.

Shreveport, city, U.S., Louisiana, Caddo par., on the Red R., at the E. end of Cross Lake, 170 m. W. Vicksburg (Miss.). Situated in the centre of the finest cotton-growing region in the world, it is one of the most important cotton-markets in the SW. Alt. 198 ft. (R.R.); signal station, 227 ft. (U.S. Signal Office). Mean temp. (15 yrs.), yr. 65.6° F., Jan. 46.0°, July 83.3°; mean annual rfall. (13 yrs.), 54.11 in. P. (1870) <5000; (1880) 8000; (1890) 12,000.

Shrewley, par., Eng., co. and 4 m. N. Warwick, P.O. P. <500.

Shrewsbury (from the Anglo-Saxon *Scrobbesburg*, that is, 'scrub-bury'—referring to the forest surrounding it during the early English period), parl. and (since Richard I.) mun. bor. and market-tn., Eng., Shropshire, 140 m. NW. London, and 42 m. W. by N. Birmingham, in the diocese of Lichfield, on a penin. of the Severn, with stns. on the G. W. R. and L. & NW. R., and connected with the Welsh lines. Carries on glass-staining, malting, and has also iron-foundries and agricultural implement works. The town occupies the site of an earlier Celtic town, and its famous Norman castle stands on site of a Saxon fortress. Just outside the town is the scene of the battle of 1403, when Hotspur was killed; the field still shown where over 8000 were then buried. The grammar-school (founded 1551) ranks as one of the great 'public schools,' and is richly endowed; the original buildings now form a county museum and free library. The town is very picturesque from its position, with three handsome bridges, suburbs on S. banks, its fine old timbered houses, and its Quarry promenade. Ruins of the ancient town walls still survive. Large cattle-market. Market-days, Tu., W., and S. Shrewsbury returns one member to Parliament, having, since Edward I., returned two members till 1885. Alt. 287 ft. Mean rfall. (1866–80), yr. 26.6 in. Parl. and mun. bor. 3470 ac., P. (1801) 14,700; (1851) 19,700; (1871) 23,400; (1891) 27,000, nearly.

Shropshire, or **Salop,** inland co., Eng., on the Welsh border, almost entirely in the basin of the Severn, which traverses it from NW. to SE. It has four parl. divs., as in the following table:—

Parl. Divs.	Acres.	Pop. 1891.
W., or Oswestry . . .	233,344	54,192
N., or Newport . . .	221,336	53,035
Mid, or Wellington . . .	46,631	46,225
S., or Ludlow	354,680	55,920
Parl. bor. of Shrewsbury . .	3,525	26,967
Total . . .	859,516	236,339 [1]

[1] The administrative county is coextensive with the ancient county.

Towards Wales it is hilly or even mountainous, the chief heights being the Breidden Range, with Cefn-y-Castell, 1300 ft.; Clun Forest, in SW.; Long Mynd, 1674 ft.; Wenlock Edge, a ridge 20 m. long; and on SE. the Clee Range, rising to 1805 ft. at Brown Clee, and 1750 ft. at Titterstone Clee. The rest of the county is undulating, well watered, and fertile. Geologically, the N. half of the county belongs mainly to the New Red Sandstone, while in the S. half are Ordovician and Cambrian and Silurian rocks, along with Old Red Sandstone, and several patches belonging to the coal-measures. The former half of the county is tolerably level, excepting the isolated Wrekin, a peak of igneous origin 1320 ft. high. There are five distinct coalfields—the Forest of Wye, Coalbrookdale, Shrewsbury, Clee Hills, and Oswestry; the second containing 28 sq. m., with strata over 1000 ft. thick. Ironbridge is another coal centre. Barytes at Minsterley (silver-mines), Welshpool, &c.; lead ore at Minsterley and Pontesbury; stone calcspar at Minsterley and Chirbury; limestone at Wellington; zinc ore at Minsterley and Worthen; blast-furnaces at Shifnal. Excepting iron, the manufactures are unimportant. The best soil is near the Severn, including the Vale of Shrewsbury. For agricultural statistics, see **Appendix,** pp. 7–9. The county has communication by three canals, and by the G. W. R., L. & NW. R., and various local railways, the county town being an important centre of railway traffic. The Romans left important remains in this county after the conquest by Vespasian (51 A.D.); *e.g.*, Wroxeter, the site of *Uriconium*. 'Offa's Dyke' is part of the county border. Other antiquities are Wenlock Priory and the abbeys of Lilleshall, Shrewsbury, Buildwas, Haughmond, &c.; the castles of Bridgnorth, Ludlow, Shrewsbury, and Clun, &c.; Whiteladies (a Norman building), Boscobel House, &c. The name is from the Saxon *Scrobbes-scire, i.e.*, of the *Scrubb* ('bush' 'forest'). Salop is in the dioceses of St. Asaph, Hereford, and Lichfield, and contains 252 pars. There is one parl. bor., the co. tn., and six mun. bors.—Bishop's Castle, Bridgnorth, Ludlow, Oswestry, Shrewsbury, and Wenlock. See **England,** table.

Shroton, P.O., Eng. See **Iwerne Courtnay.**

Siálkot, municip. and cantonment, Brit. India, Punjab, dist. Siálkot, 65 m. N. by E. Lahore, on the Aik stream, which is crossed by a substantial bridge. The town is increasing in importance since the opening of the railway to Wazírábád. Manufacture of paper, noted for its excellence under the Mughal empire, when its yearly value was £80,000. *Susi* cloth is also manufactured. The cantonment, about 1 m. to the N., on an elevated ridge, is 5 m. long E. to W., by 3 m. N. to S.; has recreation grounds and a public garden of 27 ac. In the centre of the town are remains of an ancient fort. Alt. 830 ft. Mean temp., yr. 73° F., Jan. 52°, June 91°; rfall., yr. 36.8 in., July–Aug. 20.7 in. P. 55,100; Hindus, 18,000; Moham. 31,900.

Sialtekh, tn., Brit. India, Assam, dist. Cachar, 45 m. E. Sylhet. P. <5000.

Siam (Siamese *Muang Thai*, 'land of freemen'), kgd., SE. Asia, lying E. of Burma, S. of the Chinese prov. of Yünnan, W. of Tongking, Annam, and Cambodia, and N. of the Gulf of Siam. **Boundaries.**—The E. boundary, though at no time very precisely defined, practically coincided, previous to the Franco-Siamese war of 1893, with the line of the elevated watershed that separates the valley of the Mekong R. from the

declivities of the China Sea; but in consequence of that war the boundary, between 13⅓° and 20⅓° N., has been removed W. to the riv. Mekong. At the same time, the frontier of Cambodia has been pushed out in the NW. so as to embrace the whole of the large lake of Tonle Sap, which, prior to that war, was divided between Cambodia and Siam. Of the agglomerated terr. styled Siam, little more than the valley of the Menam (up to 17½° N.) and part of the Malay Penin. (above 8° N.) are directly administered by the king of Siam; the remainder consists of tributary and dependent states. Including these, Siam extends down the Malay Penin. as far S. as 4° N., and embraces the states of Kedah, Patani, Kelantan, Trui̇gganu, and others, which touch the British protected Malay states at the extremity of the penin. On the E. side of the Gulf of Siam a narrow strip extends down the coast as far as about 11° 10′ N. The W. boundary runs along the mountains of Tenasserim, and between 16° 20′ and 20° 0′ N. coincides with the Thoungyeen and the Salwín Rivs. From this N. point on the Salwín an irregular line to the Mekong, in 20½° N., forms, along with this last river further to the E., the N. frontier. The **area** is not accurately known; probably it is three times larger than that of Great Britain. Siam proper is estimated at 80,000 sq. m. (Colquhoun and Hallett). To this must be added 60,000 sq. m. in the Malay Penin., and probably about 100,000 sq. m. of tributary states in the Shan (N.) and Laos (NE.) countries. Previous to the French annexations the Shan states of Siam were estimated at 80,000 sq. m., more than one-third of which the Siamese have since lost. **Surface and Rivers.**—Excluding the Malay Penin., Siam consists geographically of the valley of the Menam, some 500 m. from N. to S., and 160 m. from E. to W., and the Korat plateau, with an average elevation of 700 to 1000 ft., between that river and the Mekong (E.). The Shan country around the upper waters of the Menam and its principal trib., the Meping, is mountainous, being invaded by offshoots and spurs of the Tibetan plateau, which attain an elevation of 6000 to 8000 ft; but wide, shallow, grassy valleys fill in most of the spaces between the rivers. The Menam falls as it goes S., from 1000 ft. in 19° N. and 380 ft. in 17° N., to the sea-level at the head of the Gulf of Siam. The Korat plateau is fringed on the W. by the fairly marked and well wooded range called Pu-Vieng, and on the S. by the similar range of Pnom-Dongrek (lying E. to W. in about 14¼° N.), both ranging up to 5000 ft., and consisting of Primary and Secondary rocks. The plateau, about which very little is known beyond the facts that it is arid and sandy, with thickets of bamboo and resinous shrubs and salt marshes, is a Triassic upheaval of limestones and sandstones that slopes from the SW. to the NE. and drains by the Nam-Mun and other streams into the Mekong. The E. side of the Gulf of Siam is fringed by a coast range that attains 3000 ft. to the SE. of Chantabun. On the W. frontier the mountains of Tenasserim (5000 ft.) run down the length of the **Malay Penin.** (*q.v.*), and terminate in the isl. of Salang or Junkseylon (8° N.). The delta of the Menam, with its W. branch the Tachin, its trib. (L. bk.) the Nam-Sak, and its W. neighbour the Meklong, form a vast riverine tract, closely intersected by irrigation canals, on which, after the rains of the SW. monsoon (June–Nov.), enormous crops of rice are grown. The **climate,** although hot, is not unhealthy. The mean annual temp. at Bangkok, the cap., in the Menam delta, is 80.5° F. (10 yrs.); the average daily range 74.8°–83.5°. The rainfall averages (8 yrs.) 54 in., or about one-fourth only of the quantity that falls on the W. side of the Tenasserim Mts. Out of the total, some 46½ in. fall between May and Oct. inclusive. The NE. monsoon (Nov.–April) is fresh and cool. Leprosy exists; and a leper village has been established 25 m. below Chieng-mai, on the upper Meping. The **flora** resembles that of the Malay Penin. of Annam and Cambodia, and of SW. China. On the coasts the most characteristic trees are mangroves, pandanus, areca, coco-nut, and other palms, and rattans. On the fringes of the Korat plateau and in the Laos country are forests of oak, pine, and apple; with as characteristic forms, the wild vine, saxifrages, anemones, and *Violaceæ*. In the Shan dists. (on the upper basin of the Menam and Meping) the most important trees are teak, ebony, rose, sapan, cedar, ironwood, agilla, padoo, resinous shrubs (sticklac, cutch, gum-benjamin), and wild indigo. The **fauna** resembles that of India, Tibet, and China. The elephant, tiger, panther, rhinoceros, wild boar, buffalo, wild ox, musk-deer, wolf, porcupine, apes, numerous aquatic birds, the sea-swallow, crocodile, python, gecko, and tortoise are some of the most noticeable forms. Trained elephants are to be found in every village. The most important of the cultivated **products** is rice, the staple of the country; and of the natural products, teak. The agricultural methods are of a very primitive character. The area of the rice lands is being extended in the Menam delta by an irrigation company, who by the middle of 1893 had opened out more than 1,000,000 ac. for this purpose. Amongst the remaining cultivated products are hemp, tobacco, maize, cotton, sugar-cane, fruits (mangosteen, mango, durian, lichee, banana, guava, &c.), cardamoms, gamboge, teel-seed (sesamum), tea, indigo, sweet potato, yam, sago, bread-fruit, &c. In the Malay Penin. guttapercha, camphor, gums, and resins are collected. Siam is plentifully endowed with **minerals,** though comparatively few and little are extracted. Gold is, however, mined at Kabin, Batong, and Wattana (all between Bangkok and Lake Tonle-Sap), and in the Malay Penin., and washed from the Mekong at Luang Prabang, Nong-kai, and Lakhon. Tin is mined near the Kanburi and Rajaburi (in the valley of the Meklong), and in the Malay Penin. Iron exists in the mountains on the W. and S. of the Korat plateau, and in the mountains of the N. (W. of Chieng-Sen). Rubies and sapphires occur, and are to some extent extracted in the SE. provs. of Battambang and Chantabun, and at Chieng-kong in the Shan states. Coal is found at various places (Bandon, Paklan, &c.) in the Malay Penin. In addition to these, there are plain evidences of the presence of lead, copper, and antimony in the border ranges of the Korat plateau. A little silver is also extracted near Chieng-mai, in the upper valley of the Meping. Petroleum is abundant at Nuang-Fang (in the Meping valley, N. of Chieng-mai). **Industry** is but little developed; nevertheless the people make boats, silk and cotton cloths, shoes, gold and silver work, paper, coloured tiles and earthen jars, mats, arrack, and sugar (at Chieng-mai). At Bangkok there are several rice-scutching mills, steam saw-mills, and shipbuilding yards, conducted on European models. Silkworms (cocoons) are reared at Battambang. The principal means of **communication** are the rivers, though the Menam is less useful than it might be by reason of a bar at its mouth, which shuts out vessels drawing a deeper draught than 12 ft., and of sandbanks between Paknam-Po (at the confluence of the Menam and Meping) and Raheng (on Meping), and Patnam-Po and Pitsanulok (on Menam), which, during the drier season of the year, prevent the passage of all save native boats. During the flood or rainy season (June–Dec.) steamboats of shallow draught can get up to Raheng, though not beyond because of rapids. In addition, commodities are transported by elephants, oxen, ponies, mules, and even men, along various well established routes; though, except in the vicinity of such towns as Bangkok, Korat, and Chieng-mai, there are no better roads than mere tracks, passing through forests and over mountains. The more important of these caravan trade routes go W. into Burma (Bangkok to Tavoy, Raheng to Maulmein, Chieng-mai to the Salwín), and N. into China (Chieng-mai to Yünnan). Others connect Bangkok and Chieng-mai respectively with the trading-centres on the Mekong, viz., Bassac, Lakhon, Nong-kai, Luang Prabang, Chieng-Sen, Chieng-Hong, with Muang-Nan on the Menam, and with Korat. Railways are, however, beginning to be constructed. One, connecting Bangkok with Paknam (14 m.), at the mouth of the riv. Menam, was opened in 1892. A line from the cap. to Korat (165 m.) was commenced in 1892. Two others, one from Bangkok to Patrien (50 m. E.), and the other from Singgora to Kedah and thence to Kulim (136 m.), across the Malay Penin., have been surveyed and resolved upon. Others are advocated and more or less surveyed, especially between Bangkok and Chieng-mai (500 m.), up the Menam Valley, and thence to Chieng-Sen, and eventually Yünnan; and from Maulmein to Raheng and to Chieng-Sen. Telegraph lines connect Bangkok with Chieng-mai, with Tavoy, with Bassac, with Saigon, and with Luang Prabang, Raheng with the Burmese lines, Chieng-mai with Lakhon, Korat with Nong-Hai, and there are some minor ones, making altogether a total length exceeding 2500 m. The **commerce** is chiefly concentrated at Bangkok, at Chieng-mai in the Shan states, and at the ports of the Malay Penin. The exports from Bangkok consist principally of rice (60 to 80 per cent. of the whole) and teak, with pepper, fish, cattle, other timber than teak, buffalo skins, tin, teel-seed, and cardamoms, and averages annually 1½ to 3¼ millions sterling. The imports range between 1¼ and 3 millions, and embrace cottons, treasure and gold leaf, jewellery, opium, and gumy bags, supplemented by petroleum, silks, cotton yarn, iron and steel, machinery, sugar, coco-nuts, betel-nuts, crockery and glass, and matches. Ninety-eight per cent. of the imports, and 90 per cent. of the exports, come from and go to Singapore and Hong-kong. Nine-tenths of the total tonnage is English. The bulk of the trade of Siam, and a large part of the industry of Bangkok, are in Chinese hands. The Malay Penin. trades every year to the extent of £600,000 for imports, and £750,000 for exports, principally tin. Between Maulmein and Bangkok, and Maulmein and Chieng-mai, there is a trade valued in the aggregate at between a quarter and half a million sterling. The Yünnan caravans bring down to Chieng-mai loads of silk, tea, opium, lacquer-boxes, cottons, betel-nuts, with petroleum, beeswax, &c., and take away cottons, salt, iron, cattle, horns, ivory, fish, &c. There exist no statistics of the value of this trade. Chinese merchants trade also with Lakhon, and even go down to Maulmein. The **monetary unit** is the tical = 2s., divided into 4 salung, each salung containing 2 fuang. The unit of bronze is the att, of which 64 = 1 tical. But the Indian rupee is current both N. and E. of Raheng, and further S. a similar function is performed by the (Mexican) dollar. In some dists. barter

is the principal form of transaction, the recognised media being cowries, iron bars, pieces of ivory, and salt. The unit of **length** is the va=approximately 6⅓ ft.; 8000 va being equal to 1 yot or yod (=10 m.). There are divisions and subdivisions of the va down to the niuh (=1.2 in.). The unit of area is the rai=120 sq. ft. The measures of **weight** are the chang=½ catty=2.66 lbs.; 100 chang=1 hab. But the choi=3⅓ lbs., the coyan=26 cwts., and the picul=133⅓ lbs., are also in use. The **government** is concentrated in the hands of an absolute monarch, who delegates part of his authority to his ministers (7), and seeks advice from a council (30–40 members). There existed previous to 1885 the peculiar office of a second king, whose functions, except that he was the commander-in-chief of the army, were not very easy to understand, and depended in great part upon the holder's personal influence. The civil law is based on Chinese originals; the ecclesiastical and moral law on Hindu models. Siam enjoys the rare fortune of having no national debt (1891). The **army** consists, on a peace footing, of 4000 to 5000 men, chiefly in garrison in the capital, and in time of war of 60,000 men; but all Siamese are liable to serve. These troops are well armed with modern firearms, and have been drilled by European officers. The **navy** embraces a few feeble gunboats, and some hundreds of war-canoes. The **people,** who call themselves Thai (*i.e.*, free men), are of Mongolian origin; but strong strains of Chinese, Cambodian, and Malay blood are plainly perceptible. The Shans and the Laos (*q.v.*) are both closely akin, but individually they are more enterprising and industrious than the Siamese. Population estimated differently, from 6,000,000 to 12,000,000; probably about 9,000,000, of whom some 6,000,000 are in Siam proper, and a little more than half a million in the Malay Penin. There are fully one million Chinese, if not more, in Siam, engaged chiefly in commercial and industrial pursuits, and as coolies. The language is a monosyllabic-root speech, cognate with Burmese. The **religion** is Buddhism; the priests are both numerous and influential. The education of the country is almost entirely in their hands. Not only Bangkok, the cap., but most of the other principal **towns,** have been already mentioned. It only remains to state that previous to 1770 the cap. was Aynthia, 45 m. N. Bangkok; and that ruins similar to those of Angkor (*q.v.*), survivals of ancient Cambodian power and enterprise, exist at various places (Korat, Bassak, Kukan) between the Pnom-Dongrek Mts. and the Se-mun R. **History.**—Somewhere about the middle of the 7th century the Siamese, who appear to have come originally from the SE. borders of the Tibetan plateau, were settled in the upper valleys of the Menam, and there they remained about seven hundred years. During this period the dominant power in what is now Siam was Cambodia; but about 1350 the Siamese moved S. and established themselves at Aynthia. During the next centuries they gradually subdued the Cambodians, but have been deprived of these conquests by the French during the 19th century. The Burmese, too, on the W. wrested valuable provs. from them between 1750 and 1770; in this last year the Burmese burned Aynthia after a siege of two years. The aggressive action of France in 1893, resulting in the loss to Siam of her provs. on the E. side of the Menam, has been already alluded to. See Colquhoun, *Among the Shans* (1885); Hallet, *A Thousand Miles on an Elephant* (1889); M'Carthy, in *Proc. R. G. S.*, 1888, p. 117; and John Anderson, *English Intercourse with Siam in the Seventeenth Century* (1890); map (1 : 4,000,000) in *Geog. Jour.* (1893). [**J. T. B.**]

Siberia, an extensive terr. of the Russian Empire, stretching over the whole of N. Asia, and covering 25 degrees of lat. and 120 degrees of long., its S. limit formed, roughly speaking, by the 50th degree of lat. Administrative Siberia has on the S. the provs. Turgai, Akmolinsk, and Semipalatinsk of the Governor-Generalship of the Steppes, the Chinese provs. of NW. and N. Mongolia and Manchuria (if the Russian provs. of Amur and Maritime be reckoned with Siberia). Within these limits its administrative subdivisions are :—

	Area sq. m.	Pop. in 1889–92.	Density per sq. m.
Tobolsk (govt.)	539,659	1,313,000	2
Tomsk (govt.)	331,159	1,230,000	3
Western Siberia	*870,818*	*2,623,000*	*3*
Yeniseisk (govt.)	987,186	459,000	0.4
Irkutsk (govt.)	287,061	421,000	1
Yakutsk (prov.)	1,533,397	280,000	0.2
Transbaikalia (prov.)	236,868	545,000	2
Eastern Siberia	*3,044,512*	*1,705,000*	*0.5*
Amur (prov.)	172,848	88,000	0.3
Maritime Prov., or Primorskaya	715,982	103,000	0.1
Sakhalin (otdyeł)	29,336	20,000	0.6
Amur Region	*918,166*	*210,000*	*0.2*
Total	4,833,496	4,539,000	0.9

The **surface** and **physical features** of this immense terr. offer a great diversity. The **High Plateau** of E. Asia, which stretches as an immense triangle, having its base in the Himálayas and its extremity at Bering Strait, enters Siberia to E. of Lake Baikal, and continues NE., with a diminishing height and width, to the land of the Chukchis. Its upper terrace (average height, 3300 ft.) is separated from the lower terrace (2000–2500 ft.) by the **Yablonovoi,** or **Stanovoi** Mts.; the upper terrace is suitable for agriculture only in the broad trenches which rise gently from Lake Baikal to the level of the plateau (valleys of Uda and Selenga); while the lower terrace is peopled and cultivated in E. Transbaikalia. A huge **border ridge,** pierced by the Selenga near Lake Baikal, fringes the NW. border of the plateau. It attains 6000 to 7000 ft., and assumes various names—Sayan, Barguzin, S. Muya, Aldan Mts. It is flanked, in its turn, on the NW. by **alpine regions** containing a series of chains shooting NE. and separated by deep valleys—the **Altais,** the Oya, and other unnamed ridges in Yeniseisk; the Tunka, Kitoi, and Byelaya Alps in Irkutsk; the Baikal Mts. on NW. shore of Lake Baikal; the Olekma and Vitim Mts.; and a series of unnamed chains further NE. They are thickly clothed with forests (*taigá*), and contain the rich gold-mines of Siberia. Another huge **border ridge** fringes the plateau on the SE. It has the name of Great Khingan in N. Manchuria, and this ridge, which is pierced by the Amur 120 m. above Blagovyeshchensk, joins the Stanovoi Mts., or Jugjur, further to the NE., on the coast of the Sea of Okhotsk. It is also flanked on its outer side by a series of alpine parallel ridges. The SE. slopes of this plateau belong to the **Amur** terr. (*q.v.*), while the Kamchatka Penin. (*q.v.*) forms a region apart. Several chains of mountains run across Siberia proper in the same NE. direction,

namely, in the region of the Yeniseisk gold-mines; while one ridge shoots NW. from the plateau between the Katuñ and the Irtysh (Kuznetskiy Alatau), and another (Verkhoyanskiy Khrebet), under the Arctic Circle, has the same direction. A broad belt of **high plains** (1000 to 1800 ft.), forming the best parts of E. Siberia, fringes the NW. borders of the plateau from Minusinsk to the high plains of the Vilui; while the whole of NW. Siberia is covered with **lowlands,** often marshy and wooded, hardly rising 100 to 350 ft. above the sea. They have the characters of rich fertile prairies in the S., and of unpracticable woody marshes in the N. Along the Arctic coast spread the treeless *tundras.* All **geological formations** are represented. The oldest granites and crystalline slates, as well as Silurian and Devonian rocks, covered with sheets of lava in the neighbourhood of the NW. border ridge, and with boulder-clays and Tertiary sands elsewhere, make the backbone of the plateau. Folded Silurian and Devonian rocks form the alpine tracts; while widely-spread layers of Devonian, Carboniferous, and all younger formations, mostly horizontal, cover the plains. **Minerals.**—Gold, silver, lead, copper, iron, and coal are found in Siberia, the chief gold-mining regions being the Altai, the Nizhneudinsk, Yeniseisk, Olekma and Vitim, Nerchinsk, and upper Zeya regions; silver in Altai and Nerchinsk regions. Iron ore is found in many places, but is chiefly extracted on the Siberian slope of the Urals. Coal is only obtained from Jurassic fresh-water deposits. Excellent graphite (Mount Alibert) in the Kitoi Alps and in Turckhansk dist.; rock-salt is met with on the Lena and in Transbaikalia; salt springs occur on the Angara (Usoliye) and the Lena (Ust-kut); precious stones (jasper, malachite, beryl, dark quartz, &c.) in the Urals (Ekaterinburg), the Altai (Kolyvañ), and Nerchinsk. The three chief **rivers** of Siberia—Ob′, Yenisei, and Lena—flow from the high plateau northwards into the Arctic Ocean. Each of them receives immense tribs., and each may be considered as composed of a pair of equally great rivers—Ob′ and Irtysh, Yenisei and Angara, Lena and Vitim. Three smaller rivers—Yana, Indigirka, and Kolyma—flow also into the Arctic Ocean. The Amur, formed by the Shilka and Arguñ, flows into the Pacific. These rivers of Siberia, whose tribs. rise on the same plains and plateaux, often in common marshes, have formed the routes along which Siberia was colonised, and now they are important channels of navigation, not only N. to S., but also W. and E. Steamers now ply from Tyumeñ to Tomsk; and as the Ob′ is being connected by a canal with the Yenisei, and the Angara is getting cleared of its rapids, a water communication will soon be established from the Urals to Verkhneudinsk, in Transbaikalia; while the Amur is again navigable from Nerchinsk to its mouth. Countless **lakes** cover Siberia, the chief of them being Lake Baikal (12,430 sq. m.), Oron in Vitim highlands (unexplored), Khangka (1692 sq. m.), and countless lakes in the prairies of W. Siberia, like Chany (1300 sq. m.), all of them rapidly desiccating. Siberia has an extensive **coast-line,** but in the Arctic Ocean it remains ice-bound for, at least, ten months every year. Still, a regular intercourse has lately been established between W. Europe and the mouths of the Ob′ and Yenisei. The Sea of Okhotsk (*q.v.*) is a good hunting ground, but is surrounded by barren highlands. The Pacific coast is also uninhabited, with the exception of the Gulf of Peter the Great, where Vladivostok is the chief naval station. The **climate** of Siberia is extremely severe, as seen from the following table. All over Siberia the winter is very cold, and at Verkhoyansk, under 67° 34′ N., 134° 20′ E. (*q.v.*), lies the pole of cold of this part of the N. hemisphere. Even in S. Siberia mercury remains frozen for weeks in Dec., Jan., and even Feb., and over large areas the always-frozen soil thaws but for a few inches below its surface. The summer, on the contrary, is hot as a rule, especially in E. Siberia, and even at Yakutsk barley ripens two months after it has been sown, while water-melons are grown in the open field in S. Siberia. W. Siberia has, as a rule, a much moister and less sunny climate than E. Siberia.

[1] One year only (1891).

As to the main **elements of the population** of Siberia, see the second table under **Russian Empire.** The **indigenous** population of Siberia consists of (1) Ugrian stock (Voguls, Ostyaks, and Samoyedes); (2) Turkish stocks, of whom the Yakuts are the most numerous, while some 15 different stems of Tatars and kindred stems dwell in the outer spurs of the hilly tracts of S. Siberia; (3) the Mongol stock, represented by the Buryats, some 20,000 Kalmucks in the SW., the Tunguses, and some 15,000 Chinese Manchurians and Koreans in the basin of the Amur; and (4) the Hyperborean stock and others yet undetermined as to their origins—Chukchis (13,000), Koryaks (about 5000), Kamchadales (about 3000), Gilyaks (nearly 5000), and the Ainos (about 3000) on Sakhalin (see **Russia**). The Russians consist chiefly of free immigrants, of whom 50,000 to 100,000 have lately come to settle, to Siberia every year. As to the exiles, of whom over 20,000 are transported to Siberia every year, only one-third of them contribute to the increase of the settled population. **Agriculture** is carried on everywhere, even under the 62nd degree of lat. It prospers on the wide prairies of southern W. Siberia, in the valleys of the Altai, and the Baraba Steppe, which are the real granaries of Siberia; in the Angara basin, in govt. Irkutsk; and on the plains of the Zeya and Selinja, in the Amur prov. Cattle-breeding is carried on everywhere, especially in Transbaikalia, the Baraba Steppe, and partly in Yakutsk. Hunting and fishing are still profitable branches of income, especially in E. Siberia, the Amur, and the Altai. **Manufactures** are in a very backward state; so also **mining.** Nearly 74,000 oz. of gold are extracted in the Altais, and nearly 960,000 oz. in E. Siberia (about 430,000 in Yakutsk, 160,000 in Nerchinsk, 160,000 in Amur region, and the remainder in upper and lower Yeniseisk regions); the Altai mines yielded, moreover, from 208,000 to 267,000 oz. of silver. Lead, copper, iron, and coal are extracted in but small quantities. Siberia being still supplied with all manufactured and grocery goods from Russia, this is the chief item of **trade.** Tea imported from China; various produce of cattle-breeding and furs are the chief exports. Great **fairs** are held at Irbit (£5,000,000 to £7,000,000 annual returns), as also at Ishim, Irkutsk, Tomsk, and Verkhneudinsk. Siberia is crossed by a great **highway** from Ekaterinburg *viâ* Tyumeñ, Tomsk, Omsk, Krasnoyarsk, and Irkutsk; from this place the high-road goes round the southern extremity of Lake Baikal to Verkhneudinsk, Chita, Nerchinsk, and Sryetensk, whence steamers ply down the Amur to its mouth, and up the Usuri to Lake Khangka, the upper Usuri being now connected by rail with Vladivostok. During the winter a sledge communication is established down the Amur, but in spring and autumn saddle and pack horses must be resorted to over wide areas along the Shilka, the Amur, and the Usuri. A railway is now being built across Siberia *viâ* Samara, Orenburg, and Chelyabinsk, and in 1895 it had reached Omsk. Another railway line, starting from the Kama at Perm and Berezniki, crosses the Urals *viâ* Ekaterinburg, and now reaches Tyumeñ. The chief towns of Siberia are named in the separate provinces. Tomsk is the commercial and intellectual cap. of W. Siberia, and Irkutsk of E. Siberia, and both (as well as Ekaterinburg) are cities in the European sense of the word. Khabarovsk, at the junction of the Amur with the Usuri, is the administrative chief town of the Amur region.

Sicie, Cap, cape, France, S. ct., dep. Var, 7½ m. SW. Toulon.

Sicily, Italian **Sicilia,** the ancient *Trinacria* or *Sicilia,* an isl. in the Mediterranean, lat. 36° 38′ and 38° 18′ N., long. 12° 25′ and 15° 40′ E., separated on the NE. from Naples by the Strait of Messina, and forming, previous to 1860, the *Dominii al di la di Faro,* or the terr. 'beyond the strait,' of the former kingdom of the 'Two Sicilies.' In shape it is triangular, in size more than one-fourth larger than Wales. Length, E. to W., 185 m.; breadth, 120 m. Its old divs., dating from Norman times, into Val Demone, Val di Noto, and Val di Mazzara, being obsolete since 1818, it was subdivided into the seven provs.: Trapani (in the W. angle), Palermo and Messina (in the N.), Catania and Syracuse (in the E. and SE.), Caltanissetta and Girgenti (in the S.). The Madonian Mts. (6480 ft.) and the Monti Nebrodici (Sori, 6055 ft.), stretching from E. to W. through the N. part of the island (E. half), consist of granite, quartz, and mica, flanked, as in the Apennines, by limestone and other calcareous formations. In some parts are mountains isolated from the rest, the chief of which is the volcano of Mount Etna, near the E. ct., 10,840 ft. above the sea. Almost the entire island, with the exception of narrow maritime strips (larger in the SE. and in the plain of Simeto, S. of Etna), is over 1000 ft. in height. The mean alt. of the island has been calculated at 1445 ft. (Marinelli). Rivers all small, and not navigable; in the summer dry. The chief lakes are Biviere or Lentini, near the E. ct.; the pool of Enna (Castrogiovanni), near the centre of the island. Soil everywhere of high fertility; in some places it consists of a rich loam from 20 to 30 ft. deep. Climate one of the most delightful in Europe [**Palermo, Messina, Syracuse, Caltanissetta**], but in many places highly malarious. Over large areas, chiefly in the SE., the death-rate due to malaria on the average of the three years 1890–92 exceeded 4, in some communes 8, per 1000. The summer is almost rainless [**Europe,** Climate], and in that season the heat is oppressive during the prevalence of the sirocco, which is felt most at Palermo. Snow is never seen, except on Etna and the highest points of the other mountains. The papyrus, sugar-cane, date-palm, and other tropical products ripen at a height of 600 ft.; evergreens flourish at 2000 ft.; oak and chestnut woods cover the mountain sides to the height of 4000 ft., wheat thrives at 4500 ft., and beech woods prevail to 6000 ft. in elevation. Under the Romans, the island of Sicily was considered the granary of Italy, and it still yields grain in abundance; but there are few countries in which **agriculture** is so unscientifically conducted, and the plough is a ruder instrument now than that of Virgil's time. There are no proper roads in the island. The Indian fig, a species of cactus, grows wild in profusion. Lands chiefly belong to the nobility, the clergy, or the crown. The chief cereal is wheat (covering five times the area occupied by barley, the next in importance). The most important agricultural export crop is oranges, which are grown on the N. and E. slopes of the island to a greater extent than anywhere else in Europe. Wine also is a product of growing importance, now covering an area fully one-third larger than it did on the average of the five years 1870–1874. Chief crops are beans, pulse, maize, rice, olive-oil (of which the annual crop is estimated at 15,000 tons), oranges, lemons, citrons, almonds, and other fruits; potatoes, tobacco, flax, hemp, sumach, liquorice, manna, carob, hazel-nuts, and mulberry. Silk is produced chiefly in the NE. part of the island, and woven at Catania. **Minerals.**—The **sulphur beds** of Sicily are of great value; they extend in the centre and the S. in a belt stretching from the prov. Girgenti E. by N. through Caltanissetta into the W. of prov. Catania, to a smaller extent in other provs., and occupying an area of 2600 sq. m., in which upwards of 500 mines are wrought, which yield from 350,000 to 400,000 tons annually, and employ above 30,000 persons. The sulphur is found in Tertiary formations. The principal comms. in which it is mined are Racalmuto, Favara, Comitini, Cianciana, Aragona (in Girgenti), Caltanissetta, Castrogiovanni, Villarosa, Montedoro (in Caltanissetta), Leonforte (in Catania), and Lercara (in E. of Palermo). Among other minerals worked are rock-salt, in the same provs. that produce sulphur, copper, silver-lead, and antimony, in prov. Messina, and asphalt in Syracuse; besides jasper, alabaster, agates, amber, &c. Medicinal and sulphureous springs are very numerous. The tunny, sword-fish, and anchovy fisheries are important. The coral fishery on the African coast is frequented by many fishermen from Trapani, where the coral procured is polished. The manufacture of silk was introduced into the island from Greece in 1147. The **harbours** are—Palermo on the N., Trapani on the W., Messina, Agosta, and Syracuse on the E. The **population** of Sicily, very mixed in origin in accordance with the chequered history of the island, attains a high density even at considerable elevations. The zone from 1300 to 2300 ft. in alt. has the densest population in the island (according to the census of 1881, the last taken), and even that between 3000 and 3600 ft. is more than twice as densely peopled as the coast-strip below 1300 ft.—a fact ascribable, in all probability, partly to physical causes (malaria, &c.), and partly to the historical vicissitudes of the island.

Sicily was, in ancient times, the seat of many flourishing Greek colonies, of which Syracuse and Agrigentum were the most famous, and boasts of some of the most magnificent remains of ancient art in the world. It fell successively under the Carthaginians, Romans, Goths, Greek emperors, Saracens, Normans, French, Swabians, Austrians, Spaniards, &c. It was annexed to Naples in 1736. In 1847, 1848, and 1849, unsuccessful attempts were made to shake off the Neapolitan government. Messina was bombarded and taken by the Neapolitan troops, September 7, 1848, and Catania, April 6, 1849. The Sicilians again rose in insurrection in 1860, and, with Garibaldi at their head, defeated the Neapolitans at Calatafimi, Palermo, and Milazzo. He then, at Naples, annexed the Two Sicilies to the new kingdom of Italy under Victor Emmanuel. See **Italy,** table, and Historical Notes.

Siedel, Ger., 'a settlement' or 'possession.' See *Set.*

Siedlce (Russian **Syedlets**), govt., Russian Poland, between the Vistula and the Bug, having Łomża and Warsaw on N. and W., Radom and Lublin on S., and the Russian govts. Grodno and Volhynia on E. Mostly flat; marshy in SE. Watered by Vistula and Bug, and their tribs. Wieprz and Liwice. Good forests. Population mixed, Poles (40 per cent.), Little Russians (43 per cent.), Jews (15 per cent.), and Germans. Manufactures and trade insignificant. Divided into nine dists.: Siedlce, Biala, Konstantinow, Garwolin, Lukow, Radzyn, Sokolow, Węgrów, and Włodawa. Area, 5535 sq. m. P. (1891) 671,598.

Siedlce, tn., Russian Poland, cap. of above govt., 57 m. ESE. Warsaw, on railway to Brest, in valley of Liwica. P. 16,600.

Sieg, riv., Prussia, in the S. of the Rhine Prov., flows W. to the Rhine below Bonn; not navigable.

Siegburg, tn., Prussia, Rhine Prov., on the Sieg, 14 m. SE. Cologne, and 6 m. NE. Bonn, cap. circle Sieg (**Siegkreis**); manufactures of firearms and calico; has tanneries. On the Michaelsburg is a former Benedictine abbey, founded in 1066 by Archbishop Hanno. P. (1816)<2000; (1890) 8300.

Siegen, tn., Prussia, in the S. of prov. Westphalia, 33 m. W. by N. Marburg, cap. circle Siegen; important manufactures of leather, and tanneries and iron-works. In the vicinity are mines of iron, copper, and sulphuret of lead and zinc. Siegen was formerly the cap. of a princip., and was the birthplace of the painter Rubens. P. (1816)<4000; (1890) 12,300; comm. (including Hammerhütte and Sieghütte) P. 18,200.

Sieghübel, mt., Austria, Bohemia, in the N., 34 m. NW. by W. Trautenau, in the Isergebirge.

Sieglar, vil., Prussia, Rhine Prov., circle Sieg, dist. Siegburg. P.<3000.

Sieker, peasant vil. (*Bauerschaft*), Prussia, Westphalia, circle and dist. Bielefeld. P.<3000.

Sielce, industrial vil., Russian Poland, govt. and 85 m. SSW. Piotrków, near Warsaw–Vienna Rly.; cotton-mills; coal-mines. P. 12,000.

Siemianowitz, tn., Prussia, prov. Silesia, circle Kattowitz, 38 m. ENE. Ratibor, and 3½ m. E. by N. Königshütte. P. 5100.

Siem-Rap, tn., Indo-China, 220 m. E. by S. Bangkok, near the N. end of Lake Tale Sap, in the dist. containing the ruins of Angkor Tom.

Siena, city, Italy, Tuscany, cap. prov. Siena, 31 m. S. Florence; seat of a university, founded about 1240; of a school of arts and crafts, founded 1876; of the lyceum and college of Tolomei; and of a small museum, with important state archives. Siena is also the seat of an archbishop. Manufactures cloth, silk,

velvet, furniture, paper, &c. The 'panforte' of Siena is a kind of cake, sent out to all parts of Italy. Siena is one of the most picturesque towns of the kingdom, having preserved its mediæval aspect. It is built on the plan of a star, with three branches; its walls date from the 13th century. The cathedral, built between 1125 and 1260, was enlarged in the 14th century; the pulpit is the work of Nicolas Pisano. The Libreria Piccolomini is decorated with frescoes by Pinturicchio, &c. Here is also the fine government palace (formerly Piccolomini palace). Constituted an independent republic after 1125, Siena was for a time the rival of Pisa and Florence. Scene of a memorable siege in 1554, when for six months she held out against the imperial troops under Cosmo I. de Medici. In 1557 Siena was made a fief of the grand-duchy of Tuscany by Philip II., King of Spain. Birthplace of St. Bernard (died 1444), Ste. Catherine de Siena (died 1347), Pope Pius II. (Æneas Sylvius Piccolomini, died 1458), and several other popes. Alt. 1000–1150 ft. Mean temp. (15 yrs.), yr. 56.4° F., Jan. 40.4°, July 74.7°; mean rfall. (1839–91), yr. 30.5 in., Oct.–Nov. 7.8 in. P. 23,700.

Sierra de las Estancias, range of mts. in the S. of Spain, prov. Almeria, 20–60 m. WSW. Lorca.

Sierra de las Filabres, range of mts. in the SE. of Spain, prov. Almeria, 50–90 m. E. Granada.

Sierra de Yeguas ('mares' mountain'), tn., Spain, Andalusia, prov. and 37 m. NW. Malaga. P. <3000.

Sierra la Sal, range of mts., U.S., Utah, in the E., trending N. and S., crossed by 36° 31′ N. Mount Peale is 13,891 ft. high.

Sierra Leone, British colony in W. Africa, situated from 7° to 9° N. lat., between Liberia and the Rivières du Sud. Sierra Leone has a coast-line of about 200 m. Principal rivers, Great Skarcies or Kolentang, Little Skarcies or Kabba, Rokelle, Bagru, Jong, Bum, Kittam, Sulyma, Mano—most of them navigable for a distance of from 40 to 50 m. from the coast. The delta of the Bagru, Jong, Bum, and Kittam Rivs. forms the so-called Sherbro R., and separates the isl. of Sherbro from the mainland. This delta is a vast mangrove swamp. The coast-belt consists of an undulating plain, and at an average distance of from 80 to 100 m. from the coast the plateaux of the interior rise abruptly. The country is inhabited by various negro tribes (Sherbros, Mendi, Bullom, Krim, Gallinas, Gbemna, &c.). Principal exports, palm-oil and palm-kernels. In the interior rice is prolific, the kola tree abounds, and indigo grows almost wild. Cotton is plentiful, and ivory and gold are brought to the coast from the far interior. Principal places, Freetown (cap., P. about 20,000), Port Lokko, Lavana, Sulyma, Bonthe. Sierra Leone was annexed by England in 1791, and was for some time in the hands of a company; but in the beginning of this century it was formed into a crown colony, with the object of introducing escaped and freed slaves. Area estimated at 15,000 sq. m. P. estimated at 180,000. (See Garrett, *Sierra Leone, Proc. R. G. S.*, 1892, pp. 433–55). [**H. G. S.**]

Sierra Madre, mts., U.S., Colorado. See **Saguache,** mts.

Sierra Madre, mts., U.S. See **Zuni.**

Sierra Mojada, range of mts., stretching about 70 m. NNW. and SSE. in the W. of the state of Coahuila, Mexico. **Sierra Mojada, Villa de,** tn., at the N. end of that range, 205 m. ESE. Chihuahua.

Sierra Mojada, mining camp, Mexico, Coahuila, at the N. end of the mountain range of that name, 220 m. NW. Monterey, in one of the richest silver-lead dists. in the world, now being connected by rail with Monclova, 155 m. distant, on the International Rly.

Sierra Morena ('dark Sierra'), one of the chief mt. ranges of Spain, forming the S. edge of the central plateau, stretches from E. to W. between the Guadiana and Guadalquivir. It is lowest in the central parts (2000–2500 ft.), but rises in the E. to 7900 ft., and in the W. to 5300 ft. Lead, silver, quicksilver, and coal exist in the middle of the range, and tin ore in the W. (Rio Tinto mines).

Sierra Nevada ('snowy ridge'), the ancient *Oropeda*, Moorish *Ho Laiz*, the highest mountain mass of the Iberian Penin., at the SE. corner of Andalusia, between the valley of the Guadalquivir and the Mediterranean, 50 m. long (NW.–SE.), 20 m. wide; highest peaks, Mulahacen, more properly Muley Hacen, 11,781 ft. (Clemente), 11,660 ft. (Coello), 11,421 ft. (Vogel); Picacho de Veleta ('watch summit'), 11,597 ft. (Clemente), 11,432 ft. (Boissier), 11,388 ft. (Coello); Alcazaba, 11,356 ft. (Clemente), 10,872 ft. (Coello). The range is exceedingly picturesque (the Alpujarras, 'pasture mountains,' the Lecrin valley, 'valley of joy,' 'paradise of the Alpujarra'). Persistent snow begins at 10,000 ft. alt. The Ventisquero del Jenil (between 9300 and 9600 ft. alt., 1900 ft. long by 800 ft. wide, and 200–400 ft. thick) is the southernmost glacier in Europe (37° N. lat.). Some small lakes, above 9000 ft. alt., are remains of old glaciers. The sierra is principally formed by schists, gneiss, and crystalline limestone, with some serpentine and porphyries. All vegetable forms are to be seen, from tropical flora at the foot (palms, sugar-cane, pineapple, banana, and cotton), up to the polar lichens. The top commands magnificent views from the Sierra Morena to the Morocco Mts. The Cumbre (summit) de Mulahacen was used to connect the European geodetical triangulation with the African one in the prov. of Oran, Algeria.

Sierra Nevada, an aggregate of ranges of mts., U.S., California, in the E. The total length from Mount San Jacinto to Mount Shasta is 600 m., but the name is sometimes limited to that part between Tahachapi Pass and Lassens Peak; length, 430 m. The S. part is separated into two branches by Kern's Cañon. The eastern range contains the culminating summit, Mount Whitney, 14,900 ft. high, the highest mountain in the U.S. The range is 70–100 m. wide; it is broken by numerous cañons.

Sierra Nevada de Santa Marta. See **Santa Marta, Sierra Nevada de.**

Sierra Range, mts., Victoria, trending S. from the Grampians, crossed by 37° 30′ S.

Sierre, French; **Siders,** German, tn., Switzd., cant. Valais, 9½ m. ENE. Sion, a little to the N. of the Rhone. Alt. 1765 ft. P. <2000.

Siewers Canal, NW. Russia, near Novgorod, connects Msta and Volkhov.

Sifan, Chinese name meaning western barbarians, equivalent to Mantsŭ, but also applied in a more restricted sense to the people inhabiting a part of W. China, E. of Tibet, more particularly in the upper (N. to S.) part of the valley of the Tung or Tatu-ho, and the valley of the Ya-lung, between 29° and 33° N., and 101° and 103° E.

Sifta, or **Sifte,** tn., Lower Egypt. See **Zifte.**

Sig, riv., in W. of Algeria, prov. Oran, flows NNE. then NE., generally through narrow gorges, past Sidi-bel-Abbès, where it is known as the Mekerra, and St. Denis du Sig (*q.v.*), and after uniting with the Habrá enters the Mediterranean a little to the W. of the Greenwich meridian. Length, 135 m.

Sikhota-alin, alpine region, E. Siberia, between the Usuri and the lower Amur and the Pacific coast, from the Gulf of Peter the Great till the mouth of the Amur. Little known; consists of several ridges trending NE. and attaining an alt. of 3000 to 4000 ft., and 5000 ft. in the S. Its steep E. slopes reach the Sea of Japan as high rocky cliffs. Thickly clothed with rich virgin forests, especially on W. slopes.

Sikhs, people, or rather a religious sect, mostly Jats, of N. India, founded at end of the 15th century, became a powerful military confederacy, which waged two separate wars against the British in 1845–46 and 1848–49, after which their territories in the Punjab were annexed to Brit. India. P. nearly 2,000,000.

Si-kiang, or **Hsi-kiang** ('west river'), the large riv. in the S. of China, in the delta of which Canton stands, and which forms the western waterway for that city. It is formed by headwaters converging at an acute angle, and different views are taken as to which is the main stream. Formerly the Hun-shui (*q.v.*) was represented as the true headstream; but recent travellers agree in stating that the name Si-kiang is applied to the stream from the confluence of the Yü-kiang or Right R., and the Tso-kiang or Left R., which takes place in Kwangtung, in about 22° 42′ N., 108° 15′ E., making the Hun-shui a trib. of the Si-kiang. Of the two headwaters that meet at this point the Yü-kiang is considerably the longer, rising in Yünnan in about 105° E., whereas the Tso-kiang is formed at Lung-chou, near the frontier of Tongking, by two headwaters, the longer of which does not appear to rise much further W. than 106° E., if, indeed, the source is not further E. Below the confluence the general course of the Si-kiang is easterly, but about 20 m. W. Canton it divides into several branches and turns SE. and S., forming a wide delta. Vessels of large draught can only reach the head of the delta. Above the delta, according to Agassiz, there is no obstacle to the ascent of steamers of 8 ft. draught to Wu-chou (about 140 m. above the delta, in 111° 15′ E.), and the same authority asserts that, with a little engineering skill, the river might be made navigable to Hsun-chou, at one of the points where the Hun-shui connects with the Si-kiang (about 110° 10′ E.). There are, however, rapids about 12 m. above Wu-chou, also at Hsun-chou; still worse rapids at the Nganpai gorge, in about 109° 20′ E., and others a few miles higher up. Below the confluence of the Hun-shui, the Tan-kiang or Fu-ho and the Pe-kiang are the chief tribs., both from the N., and forming important waterways. See *Proc. R. G. S.*, 1891, pp. 256–60.

Sikinos. 1. Island, Greece, one of the Cyclades, 92 m. S. by E. of the SE. point of Eubœa I. **2.** A town on the W. ct. P. (demos) 996.

Sikkeh, or **Dikkeh,** ruins, Palestine, perhaps the *Secacah* in the O. T., 31° 44′ N., 35° 15′ E., 3 m. SE. by S. Jerusalem.

Sikkim, native state, India, in the E. Himálayas, bounded N. and NE. by Tibet, SE. by Bhután, S. by dist. Darjíling, and W. by Nepál. Sikkim is now under the protection of the British, who, under a convention concluded with China, 1890, have exclusive control of the internal administration and frontier relations of the state. Easy passes lead from Sikkim into Tibet (Jelep-la, 13,000 ft.; Yak-la, 14,000 ft.; Cho-la, 15,000 ft.), with which there might be a large trade but for the opposition of the Tibetan rulers. In the Chola Range, which separates Sikkim from the Chumbi or Chambi Valley on the E., a number of lakes are found at great elevations. The principal are Cholo, Chokham, Bhewsa, Minyetso or Minijo, Bidantso or Blackwater, and several smaller lakes or tarns. The scenery is remarkable for beauty and grandeur. Numerous glaciers occur in the Kanchinjinga regions NW. of the state, the largest being the Zemu glacier, the terminal face of which is 400 or 500 ft. deep (*Proc. R. G. S.*, 1881, pp. 321–28; 1892, pp. 613, et seq.). Sikkim is drained by the Titsa and affluents. The rivers run in deep ravines, and their banks are precipitous. The valley of the Titsa is not more than 2000 ft. Dense jungle and tropical trees are found in the lower zones, while rhododendron and dwarf bamboo and cane, used in the construction of the cane bridges, grow above the level of 10,000 ft. Leeches abound. There are cane bridges in some places; but the roads are mere bridle paths, and communication is exceedingly difficult. Copper is found near Mintugong, and Sikkim is still noted to some extent for such industries as flourish in a princely capital—ivory carving, embroidering with gold and silver, and the weaving of fine silks. The chief villages are Tumlong, the cap. of Sikkim, and Gantak. The population, estimated in 1815 at 160,000, consists of Lepchas, Bhutias, and Limbus, and the Buddhist monks are influential.

Sikló, comm., Hungary, co. Arad, dist. Elek. P. <4000.

Silesia, duchy, now forming a crownland of Austria, and composed of the small portion of the much larger duchy of that name which remained to Austria after the wars between Maria Theresia and Frederick the Great. It lies S. of the Prussian prov. of Silesia, and is composed of two sections: one stretching SE. along the Sudetes Mts. (with the Altvater, 4870 ft.) from the Glatz Schneegebirge to the Oder; the other, which is traversed by spurs of the Carpathians (Jablunka Mts.), separated from the former by a tongue of Moravia, stretching E. to the Biala, which separates it from Galicia. Rivers, the Vistula in the E., the Oder with the Oppa, Olsa, Ostrawitze. The mineral wealth of the terr. is very important, the Ostrau-Karwin coalfield, a portion of the great coalfield of Upper Silesia [**Silesia,** prov. Prussia], in the NW. of the E. section, covering an area of 54 sq. m., with 102 workable seams (with a thickness of 20 in. to 13 ft.). Iron ore and lignite also mined. Manufactures are also highly developed, particularly machine-making and textile industry, cloths, fancy-stuffs, linen, cotton-goods, ribbons, hosiery, chemical drugs, sugar, spirituous liqueurs, glass, articles of marble, colours, paper, turnery wares. The cap. of the prov. is Troppau, which is also the chief seat of the textile industries. Jägerndorf is also noted for its woollens. The inhabitants are nearly all Roman Catholics. Half are German, half Slavonic, and the population is the most dense in Austria. See **Austria-Hungary,** Historical Notes.

Silesia, the southernmost prov. of Prussia, about twice the size of Wales. It is mainly composed of lowlands traversed from SE. to NW. by the Oder, but having in its SW. frontier the Sudetes Mts. (including the Isergebirge, Riesengebirge, with the highest peak of the prov., the Schneekoppe, 5260 ft.; the Eulengebirge and Reichensteingebirge succeeding one another on different sides of the Neisse in front of the lozenge-shaped portion of the prov. containing the upper valley of the Neisse, and the Habelschweidt, on the W. side, and Glatz Schneegebirge on the SE. side of that lozenge. On the right of the Oder, in the S., there lies the plateau of Tarnowitz with the Annaberg (1310 ft.). The principal river is the Oder. Tributaries on the right: the Olsa, Klodnitz, Malapane, Weida; on the left: the Oppa, Glatzer Neisse, Ohlau, Weistritz, Katzbach; the Bober and Lausitzer Neisse join the main stream outside the province. In the SE. the Vistula forms part of the boundary for a time, in the W. the Iser, Spree, and Schwarze (Black) Elster flow into the Elbe. The Oder is navigable throughout the province. The only canal is the Klodnitz Canal, a lateral canal of the riv. Klodnitz, 28 m. long, constructed for the conveyance of coal from Gleiwitz to the Oder, a little above Kosel. The climate is mildest near Grünberg, in the district of Liegnitz; it is more severe in the higher-lying mountainous districts. The mean temp. is between 40.6°–47.7° F. Annual rfall. 20-24 in., among the mountains 46 in. Arable and garden land make about 55 per cent., forests nearly 29 per cent., covering large areas, not only on the mountains, but also in the plains in the NW. (Forests of Schwarzkollm, Hoyerswerda, Muskau, Sagan, Sprattau, Primkenau, and further S. the Görlitz Communalheide and the Wehrheide) and E. of the Oder S. of Breslau, as well as W. of the Oder above the lat. of Oppeln. The region fronting the mountains is specially noted for its fertility. Besides cereals, flax, beetroot, chicory, potatoes, hops, oil-plants, are all largely cultivated; among other crops are tobacco, vines (Grünberg), and fruit. Cattle and sheep breeding are in a very flourishing condition. There is plenty of game in the large forests; here and there a wolf may be seen, coming from the Carpathians. Poultry is also important, and a new method of bee-keeping has taken its rise in the prov. About 51 per cent. of the land is in the hands of large landed-proprietors. Except in the mountains, where the geology is complicated, by far the greater part of Silesia is covered with Quaternary deposits, though in many places Tertiary rocks crop out on the surface, and in the SE. there is a considerable area of Triassic age. The important feature of the geology of the prov., however, is the small area of Carboniferous rocks containing vast wealth in coal. The coal-measures occur both in Upper and Lower Silesia, the former region being by far the richer. The Upper Silesian coalfield extends into neighbouring countries (Austria and Russian Poland), the whole probably covering an area of about 1150 sq. m. The Prussian section alone (in the extreme SE. of the prov., from Tarnowitz southwards and Gleiwitz and Rybnik eastwards round Königshütte and Beuthen) has an area of about 175 sq. m., or twice that of the whole area in which coal has been reached by borings. Within this area there are 104 workable seams, with a total thickness of 500 ft. The lower Silesian coalfield lies W. of the Oder, near Waldenburg. It is much smaller, and has seams with a rather steep dip (total thickness 90 ft.), but yields excellent coking-coal. Coal is also found in Cretaceous sandstone on the Queiss. Lignite is also mined in considerable quantity. Next in importance to coal among the minerals of the prov. are zinc ore (calamine; centre of production Königshütte), iron, and silver-lead. The manufacturing industry is considerable, supporting 35 per cent. of the population. Linen-manufacture, cotton-weaving, dye-works, and bleaching-fields are flourishing. There are also carpet manufactures, manufactures of woollen goods (including carpets), machines, sugar, starch, paper, chemicals, clocks, tin, lead, railway-carriages, cement, glass, porcelain, and pottery. Finally, there are large breweries, distilleries, liqueur-factories, mills, tanneries. The higher education is provided by the university at Breslau, two military schools at Glogau and Neisse, &c. Mineral springs, which have given rise to frequented bathing-places, are to be found at Warmbrunn, Saltbrunn, Reinerz, Landeck, Rudowa, Charlottenbrunn. The prov. is divided into the three government dists. (*regierungsbezirke*) of Breslau, Liegnitz, and Oppeln. The capital is Breslau. Other towns: Ratibor, Beuthen, Glatz, Schweidnitz, Hirschberg, Görlitz, Bunzlau, Glogau. Most of the inhabitants speak German, but there are nearly 1,000,000 Poles E. of the Oder, where Polish is partly spoken; and in the S. there are about 60,000 Chekhs, in the NW. (Lower and Upper Silesia) about 32,000 Wends (Slavs), who are, however, rapidly becoming Germanised. See **German Empire,** table, and **Prussia,** History.

Silfberg, vil., Sweden, prov. Kopparberg, 17 m. SSW. Falun; deposits of sulphur. The silver-mines are now quite exhausted. P. (comm.) <2000.

Silgueiros, tn., Portugal, dist. Vizeu. P. <4000.

Silian, par., Wales, Cardiganshire, 2½ m. N. by W. Lampeter. P. <500. See **Llanwnen.**

Siliana, riv., central Tunis, r. bk. trib. of the Mejerda, which it joins 2 m. above the town Testur. Length, 90 m.

Silipica, tn., Argentine Republic, prov. and 22 m. SSE. Santiago, cap. dep. P. <2000.

Siliqua, comm., Sardinia, prov. Cagliari, on the Siscerri, 15 m. E. by S. Iglesias. P. <3000.

Silistria, or **Silistra,** the Roman *Durostorum*, fortified tn., Bulgaria, cap. prov. Silistria, on the Danube, 62 m. ESE. Bukarest; manufactures cloth, and has mills and tanyards. The old fortress, formerly very important, was dismantled in 1878. The town is situated in a marshy region, and is subject to virulent fevers. In the Roman era Silistria was one of the most important cities of Lower Mœsia. Frequently besieged and taken during the Middle Ages, and in modern times it was unsuccessfully besieged during the Crimean War by Russia, 12th May to 26th June 1854, when the fortifications had been partly rebuilt from Moltke's plans. P. (1881) 10,600; (1888) 11,400; Bulgarians, 4100; Moham. 5300.

Silivri, the ancient *Selymbria*, a Megarian colony, seapt. tn., Turkey in Europe, prov. Chatalja, on the Sea of Marmora, 36 m. W. Constantinople. P. 5700 (mostly Greeks).

Siljan, lake, Sweden, prov. Kopparberg, 24 m. WNW. Falun, in Dalecarlia, is traversed by the Oester Dal, left branch of the Dal, which enters at the NW. extremity. The water is limpid, hence its epithet, 'the eye of Dalecarlia.' The people on its shores have best preserved the old costume and habits of Dalecarlia, famous as the centre of Swedish freedom, and closely associated with the history of King Gustavus Vasa. Alt. 738 ft. Length, NW. to SE., 24 m.; breadth, 3½–11 m.; area, 123 sq. m.

Siljansnäs, vil., Sweden, prov. Kopparberg, 29 m. WNW. Falun, on S. shore of Lake Siljan. P. (comm.) <3000.

Silkeborg, tn., Denmark, Jutland, prov. Aarhus, 24 m. NNW. Horsens; manufactures paper; important market. P. <5000.

Simbirsk, prov. of SE. Russia, on r. bk. of middle Volga; has Kazañ on N., Samara on E., Saratov on S., and Penza and Nizhniy Novgorod on W. Surface a plateau, sloping N. and S., very much cut by ravines, and of hilly aspect along the Volga (Gorodishchenskiye, Undorskiye, Kremenskiye, Zhegulovy, and Samara Hills, the latter compelling the Volga to make its great Samara bend); low in NW. (Za-Suriye). Carboniferous deposits in S., containing asphalt; Jurassic, Triassic, and Cretaceous further N.; boulder-clay all over. Volga flows along E. border, receiving the Syzrañ in S.; the Sviyaga flows parallel to Volga, but in the opposite direction, as well as the Sura. Climate extreme, the yearly average temp. being 38.5° at Simbirsk. Population Great Russians (60 per cent.), Mordves (13 per cent.), Chuvashes (9 per cent.), and Tatars (8 per cent.). Agriculture prosperous; grain exported, as also linseed, hemp-seed, and kitchen garden produce. Apiculture much spread among Mordves; extensive timber trade, shipbuilding, and fabrication of all sorts of wooden goods; various domestic trades in the villages; active shipping on Volga and Sura. Divided into eight dists.: Simbirsk, Alatyr, Ardatov, Buinsk, Karsuñ, Kurmysh, Sengilei, and Syzrañ. Alatyr, Syzrañ, Batraki, Berezniki, and Promzino Gorodishche are important river-ports. Area, 19,110 sq. m. P. (1891) 1,655,500.

Simbirsk, cap. of above govt., 576 m. ESE. Moscow, between the Volga and the Sviaga, which here closely approach each other. Its central part (Vyenets), containing the cathedral, a public garden, a library, and the best houses, stands on a high hill, while the storehouses, many shops, and the poorer suburbs are on the banks of both rivers. Brisk trade, and considerable fair. Alt. 476 ft. Mean temp., yr. 38.3° F., Feb. 8.6°, July 68.6°. P. (1867) 24,600; (1891) 39,125.

Simcoe, co., Canada, Ontario, between Georgian Bay and Lake Simcoe.

Simcoe, tn., Canada, Ontario, Norfolk co., 39 m. SW. Hamilton (cap.), on a railway. Alt. 700 ft. Mean temp. (15 yrs.), yr. 45.6° F., Jan. 21.1°, July 70.2°. P.<3000.

Simcoe Lake, Canada, Ontario, between Simcoe and Ontario cos., drained by the riv. Severn into Georgian Bay. Alt. 704 ft.

Simeto, the ancient *Adranus,* riv., Sicily, in the E., rises in the NE. of the island, in the Monti Nebrodici, and flows S. along the base of Mount Etna, then ESE. into the middle of the Gulf of Catania. Length, 72 m.; area of basin, 1695 sq. m.; mean discharge, 3180 cubic ft. per second.

Simia, Es. See **Es Simia.**

Simiti, vil., Colombia, Bolivar, 175 m. NE. Medellin. P.<2000.

Simlu, riv., equatorial Africa, S. trib. of the Victoria Nyanza, flows into the Gulf of Speke, in the S. Length about 150 m.

Simla, municip., Brit. India, Punjab, cap. Simla dist., 54 m. NNE. Ambala, occupies a ridge of the Himálayas S. of the Sutlej; has long been the seat of the supreme government of India during the hot season. Improved water supply and extended drainage systems are in progress. Exports opium, fruits, and shawl-wool. Alt. 7048 ft. Mean temp., yr. 55.0° F., June–Sept. 51.3°, July–Aug. 37.4°; rfall., yr. 70.1 in., June–Sept. 51.3 in., July–Aug. 37.4 in. P. (with Kasumtí) 13,800; Hindus, 8500; Moham. 3500.

Simla Hill States, collection of twenty-three native states, India, Punjab, surrounding the sanitarium of Simla.

Simm, Cape, or **Ras Tegriwelt,** cape, W. ct. Morocco, 10 m. SW. Mogador, in 31° 26′ N.

Simplon, French; **Simpeln,** German, vil., Switzd., cant.

Valais, 8½ m. SSE. Brieg; it gives name to a noted pass, across which a road was constructed under the orders of Napoleon I. This road, extending from Glys (Valais) to Domodossola, a distance of nearly 38 m., is 6592 ft. above the sea, and from 25 to 30 ft. in width. It is carried through several extensive tunnels, passes over 611 bridges, is furnished with 20 station-houses for travellers, and was completed between 1800 and 1806. It was greatly injured by storms in 1834, 1839, and 1849, and is now nearly impassable on the Sardinian side. During the French Empire, under Napoleon, the Simplon gave name to a dep. now forming the cant. of Valais. Near its highest point (6640 ft.) is an hospice, founded by Napoleon, conducted since 1825 by the monks of St. Bernard. In 1799 Simplon was the scene of several sanguinary battles. In 1891 plans were finally agreed upon for boring a tunnel through the mountains underneath the pass, planned to be 12½ m. long, and to cost £3,250,000. Alt. (vil.) 4850 ft.; pass, 6595 ft.; hospice, 6565 ft. P. (vil.) <2000. See **Alps,** PASSES AND RAILWAYS, **III.** (4).

Sinai, mt. of Arabia Petræa, famous in Scripture, and generally identified with the Jebel-Musa, or 'Mount of Moses' (alt. 8535 ft.), one of a cluster of mountains of which Mount Horeb forms a part of the N. end, these being two peaks of a mountain (in 28° 30′ N., 33° 45′ E.) now known as Mount Catherine. Others contend for Mount Serbal (6725 ft.), a mountain to the NW. from Mount Catherine, as the true Mount Sinai of Scripture. On the NE. side of Mount Catherine, at an alt. of 5000 ft., is the fortified monastery of St. Catherine, founded by the Emperor Justinian in 527, and from this point the mountain is ascended by a rude staircase of 3000 steps, known as 'the Pilgrims' Stairs.' The **Peninsula of Sinai,** between the Gulfs of Suez and Akabah, the scene of the Israelite wanderings in the desert, is about 140 m. in length N. to S., and as much in breadth at its N. extremity, whence it gradually tapers southward to its S. extremity, Ras Mohammed, in the Red Sea, in 27° 43′ N., 34° 18′ E. Surface generally mountainous and rocky; in different localities of it are hieroglyphic and other ancient inscriptions. Politically it now belongs to Egypt.

Sinaïa, tn., Roumania, Walachia, dep. and on riv. Prahova, 37 m. NW. Ployeshti; hydropathic establishment. Has the country seat of the King of Roumania, and is a summer residence of the Roumanian aristocracy. P. <2000.

Sinaloa, or **Cinaloa,** one of the states of Mexico, along the SE. ct. of the Gulf of California; important mines of silver and gold, exported by Culiacan-Mazatlan, the most important W. port of Mexico, in connection with San Francisco.

Sind, or **Scinde,** prov. of the Presidency of Bombay, Brit. India, forming a separate commissionership, situated to the N. of the Arabian Gulf and the Rann of Cutch, mainly composed of an alluvial plain, every part of which appears to have been traversed at one time by the Indus or its branches. The eastern part of it is now mainly desert, but vestiges of ancient towns here testify to the former presence of fertilising water. Almost the only exception to the generally level character of the surface is in the wild and rocky tract of Kohistan, between the easterly curve of the Indus and the Pab Hills and Kirthár Mts., which separate Sind from Baluchistan, the terr. belonging to the nearly rainless region of India [**Jacobábád, Haidarábád, Karáchi**]. Cultivation in the plains mainly depends on irrigation from rivers, and that mode of irrigation being favourable to 'wet' crops, rice is grown more largely than millets of all kinds in some parts of the prov. The domestic and other animals are even more characteristic of the prov. than the agriculture. Immense herds of camels are reared on the salt marshes of the Indus. On the swamps of the delta graze herds of buffaloes, from whose milk *ghí* (clarified butter) is made in such quantity as to form one of the exports of the prov. Here also are to be seen great numbers of long-legged birds, such as flamingoes, storks, cranes, and the Egyptian ibis, besides pelicans. The chief seaport and the headquarters of the administration is Karáchi. Haidarábád, the old cap. of Sind, and now the second town in population, lying to the E. of the Indus, stands on one of the few insignificant limestone ridges that traverse the Indus valley. A second forms the basis of the towns of Rohri and Sukkur, and the island fort of Bukkur, in the Indus, between these towns, situated where the railway from the Punjab has since 1889 been carried across the Indus. The British terr. surrounds on three sides the native state of Khairpur, which is attached to the commissionership. The language of the prov. is a special Aryan dialect. The prov., previously tributary to Afghanistan, was annexed by the British in 1843 after the victory of Sir Charles Napier at Miáni (Feb. 17th). See **Bombay,** table.

Singan-fu (**Sian-, Hsian-,** or **Hsingan-fu**), the *Chan-gan* of Marco Polo, probably the *Thinæ* of Ptolemy, large tn., China, cap. prov. Shensi, situated int he midst of a vast wheatfield to

the SW. of the confluence of the rivs. Wei-ho and King-ho, and at the convergence of trade-routes in all directions, marked out once for all by nature. The valley of the Wei forms the E. and W. route, continued eastwards through the gate of Tung-kwan to the Hwang-ho valley, with an important branch diverging NE. from this latter point by the valley of the Fen-ho (Fön-ho) through the heart of Shansi. A little to the SE. the Tsinling Pass (4100 ft.) forms the sole means of communication with the productive regions of the SE. (by the Tan-ho and Han-kiang valleys). Finally, the valley of the King-ho is the principal route to the NW. and central Asia. It was founded in the 12th century B.C., and was for 2000 years (1122 B.C. to 1127 A.D.) the cap. of eastern China. It still remains necessarily an important centre of trade, and has a prosperous appearance, with clean straight streets, some of them broad, and fine shops. It is 8–10 m. in circuit, but includes within its lofty walls considerable tracts of cultivated fields. It now has a large arsenal, where cannons and rifles are manufactured; also a rich archæological museum. The environs are the richest in China in all sorts of antiquities. Here is the celebrated bi-lingual inscription of the 8th century, in Chinese and Syrian. Alt. 1000 ft. (Michaelis); 1513 ft. (Richthofen); 1700 ft. (Col. Bell); 1800 ft. (Rockhill, *Land of the Lamas*, p. 25). P. about 500,000 (Michaelis); 1,000,000 (*Bevölkerung der Erde*, No. ix.). See Richthofen's *China*, vol. ii., pp. 681–82, and pp. 541, &c.; *Proc. R. G. S.*, 1890, pp. 61–63.

Si-ngan-kiang, riv., China, enters Chekiang from Nganhwei, then flows E. to the Tsientang-kiang, which it joins at Yan-chou (85 m. SW. Hangchow); navigable for the greater part of its course.

Singapore (*Singapura*, 'City of the Lion'), one of the Straits Settlements belonging to Great Britain, in SE. Asia, consisting of an island off the S. extremity of the Malay Penin., separated from the mainland by the Old Strait, in one part only ¼ m. across, and having on its S. side a town of same name, and having Singapore Strait to the S., in 1° 17′ 0″ N., 103° 50′ 47″ E. Length of island, 27 m.; breadth, 11 m.; area, 224 sq. m. Surface generally low, undulating, and densely wooded; a chain of hills traverses the island W. to E., highest point 560 ft. Soil mostly clay, resting on sandstone and granite; not particularly fertile, the luxuriant vegetation of the island being due to its hot damp climate; climate healthy. Iron is mined, and there are small deposits of tin and steatite. Chief products, coco-nut oil, gambier, pears, tapioca, indigo, cacao, and aloes, and a great variety of fruits. Around the town of Singapore nutmegs and vegetables are cultivated. The flora and fauna are the same as in the Malay Penin. The island is chiefly valuable as a depôt for the British and Indian trade with the islands of the eastern seas; trade is also carried on with the Dutch East Indies, United States, Siam, France, China, &c. The annual value of the trade has increased from £2,000,000 in 1823 to £40,000,000 in 1891, the imports exceeding the exports by about £5,000,000. The principal imports are cotton, textiles, rice, tin, opium, gambier, pepper, coal, fish, gutta-percha, copra, skins, tobacco, spices, coffee, sugar, silk, and rattans. The exports are pretty nearly the same things. Manufacturing industry is limited to the preparation of tapioca, sago, gambier, white pepper, the making of tools, implements, vehicles, and furniture, with shipbuilding. There are, however, important machine shops and engineering works connected with the docks. The island is administered by a governor, who is also governor-general of the Straits Settlements; he is assisted by a local council. Singapore was purchased from the Sultan of Johore (Malay Penin.), and settled by the English in 1819. Since then it has rapidly risen into importance. The cap. town on the SE. ct., the most S. point of Asia, in 1° 77′ 22″ N., is on a small river in an open bay, with an anchorage 2 m. from the shore; is regularly laid out, well built, and divided into Malay, Chinese, Kling, Malabar, and European quarters. Excepting in the Chinese and Malay quarters the streets are wide, and have fine houses surrounded with verdure. The public institutions include the Raffles museum, the botanical gardens, the Protestant and Roman Catholic cathedrals, the Straits branch of the Royal Asiatic Society. Singapore is the residence of the Roman Catholic archbishop of the penin. The chief residence of the Europeans is on a series of almost parallel ridges and hillocks, 50 to 120 ft. high, behind the native town. Two hills overlook the city on the N., the nearest having 'Fort Canning' at its summit, while the other, further NE., has the fine palace and gardens of the governor-general of the colony. It has two ports, the New and the Old, the former being a channel between the island of Singapore and the islands Blakan-Mati and Pulo Brani to the S. The old port is a creek opposite the E. part of the town; its situation on the direct route from Europe to the E. of Asia, and its being the only port on that route, make it a coaling station and centre of transit trade. It has convenient quays, available for the largest vessels. The harbour is defended by several forts armed with armour-piercing and medium guns, and by a system of submarine mines. Shortest sea-route to Liverpool, 12,000 m. Mean temp. (Singapore, 15 yrs.), yr. 82° F., Jan. 80.1°, July 81.6°; at Raffles lighthouse, in 1° 9′ N., 103° 44′ E. (2 yrs., 1866–1867), yr. 80° F., the daily range being from 73.3° to 86.7°, Feb. 78.7°, July 80.4°; mean annual rfall. (18 yrs.), 92.9 in. But in spite of the great heat, the proximity to the sea and frequent breezes keep the city very healthy. P. (1891) 186,600, of whom 122,000 were Chinese, 36,000 Malays, 16,000 natives of India, and only 1200 Europeans; four-fifths of the total are males. See **Straits Settlements.**

Siruela, tn., Spain, Estremadura, prov. and 105 m. E. Badajoz. P. (comm.) <4000.

Siruguppa, tn., Brit. India. See **Siraguppa.**

Sirúr, tn. and cantonment, Brit. India, Bombay, dist. and 35 m. NE. Poona, 100 m. E. by S. Bombay. Alt. 1750 ft. P. 7700; Hindus, 4200.

Sirutandanallúr, trading tn., Brit. India, Madras, dist. and 32 m. E. by S. Tinnevelli, at the mouth of the Tambraparni R. P. 5900; Hindus, 4100.

Sis, tn., Turkey in Asia, vilayet and 44 m. NE. Adana, sanjak Khozan. Sis is the religious cap. of the Turkish Armenians. A vast monastery, like a fortress, replaces the royal palace on the summit of a hill. Here the kings of Armenia resided from 1182 to 1374. On site of ancient *Flaviopolis.* P. <4000.

Sisal, or **Sizal,** seapt. tn., Mexico, state of Yucatan, 31 m. NW. Merida, on the long tongue of sand which lines the N. ct. of Yucatan. Its roadstead is open to N. winds. Being the former place of export of the henequen of Yucatan (before Merida was connected by rail with Progreso), that fibre was long known as 'Sisal hemp.' P. (comm.) 2000.

Sisante, tn., Spain, New Castille, prov. and 48 m. S. Cuenca. P. <3000.

Sisauli, tn., Brit. India, NW. Provs., dist. Muzaffarnagar, 33 m. NNW. Meerut. P. 5100; Hindus, 4500.

Sisek, or **Sissek,** tn., Hungary, Croatia-Slavonia, at the confluence of the Save and Kulpa, 30 m. SE. Agram. Alt. 325 ft. P. 6100.

Sisikon, vil., Switzd., cant. Uri, 5 m. SSW. Schwiz, on the E. side of the Bay of Uri. Near here is William Tell's chapel, on the Tellsplatte, on the spot to which the hero is said to have leaped from the vessel in which Gessler was carrying him away as prisoner. P. <2000.

Siskiyou, co., U.S., California, on N. frontier, and crossed by 122° W. The **Siskiyou Mountains** lie on the NW., partly in Oregon.

Sisland, par., Eng., Norfolk, S. div., 9½ m. SE. Norwich, 4 m. SW. Cantley stn. P. <250.

Sisotár, tn., Brit. India, NW. Provs., dist. Ballia, 2 m. N. Sikandarpur. P. (1881) 6000.

Sissach, vil., Switzd., cant. Basel, 3⅜ m. ESE. Liestal; near here are the baths of In der Alp. Alt. 1230 ft. P. (comm.) <3000.

Sissek, tn., Hungary. See **Sisek.**

Sisseton, settlement, U.S., S. Dakota, Roberts co., 184 m. NE. by E. Pierre.

Sissinghurst, eccles. par., Eng., Kent, Ashford div., 12 m. S. Maidstone, 4½ m. S. Staplehurst stn.; in the vicinity are ruins of Sissinghurst Castle. PMT.O. P. <1500.

Sissonne, tn., France, dep. Aisne, arr. and 13 m. E. Laon. P. <2000.

Sistan, region, Persia and Afghanistan. See **Seistan.**

Sisteron, the ancient *Segustero,* tn., France, dep. Basses-Alpes, on the Durance, 68 m. NNE. Marseilles, 17 m. NW. by W. Digne; cap. arr. Sisteron is a military camp, and has a citadel which was used as a state prison. The church of Notre Dame, formerly the cathedral, a Romanesque building, is in almost perfect preservation; was the seat of a bishop from the middle of the 4th century to 1790. Alt. 1575 ft. P. <4000.

Sisters, The, group of small isls. to the N. of Grenada, British W. Indies.

Siston, par., Eng., Gloucestershire, Thornbury div., 6½ m. ENE. Bristol, 1½ m. SE. Mangotsfield stn. P. <1500.

Sistova, tn., Bulgaria. See **Svištov.**

Siswali, tn., India, Rájputána, 113 m. SSE. Jaipur. P. (1881) 5000.

Sitabáldi, European suburb within the municipal limits of Nágpur city, Brit. India, with hill of same name crowned by a fort.

Sítákund, sacred hill, Brit. India, Bengal, dist. Chittagong. Alt. 1155 ft.

Sítákund, or **Chandranáth,** sacred spring on Sítákund Mt.; the spot is a revered place of pilgrimage for Hindus. The Siva Chaturdasi festival, usually in February, is attended by from 10,000 to 20,000 devotees.

Sitalpur, vil., Brit. India, Bengal, dist. Purniah, 52 m. NE. by E. Bhágalpur. P. <5000.

Sitamarhi, municip., Brit. India, Bengal, dist. Muzaffarpur, 70 m. N. by E. Patna; manufactures saltpetre; has large annual fair, to which great numbers of bullocks are brought. P. 8700; Hindus, 7100; Moham. 1600.

Sítámau, walled tn., Central India, 95 m. NNW. Indore; cap. native state Sítámau. P. 5900; Hindus, 4700; Moham. 1000.

Sítámpetta, pass, Brit. India, Madras, one of the principal roads from Vizagapatam to Ganjám; the usual route to Jaipur, practicable for wheeled traffic, in 18° 40′ N., 83° 55′ E.

Sitanos, vil., Turkey. See **Kato Zakro.**

Sitápur, municip. and cant., Brit. India, Oudh, dist. Sitápur, 52 m. N. by W. Lucknow; has a suburb, Thomsonganj. P. 17,100; Hindus, 10,400; Moham. 6500; total including cant. 21,400.

Sitaram Mountain. See **Safed Koh.**

Sitges, tn., Spain. See **Sitjes.**

Síth, Gaelic, 'a fairy' or 'fairy hill.' See *Sídh.*

Sithney, par., Eng., Cornwall, Truro div., 10 m. E. Penzance, 1½ m. WNW. Helston; 5826 ac. P. <3500.

Sitia, seapt. tn., Turkey, on the N. ct. of the isl. of Crete, 57 m. E. by S. Candia, in 26° 8′ E. The Bay of Sitia is the most easterly on the N. ct. of Crete. P. <3000.

Sitjes, or **Sitges,** seapt. and fishing tn., Spain, Catalonia, prov. and 21 m. WSW. Barcelona, on the Mediterranean coast; manufactures and exports Malmsey wine. P. <4000.

Sitka, vil., U.S., Alaska, cap. terr., on W. ct. of Baranof I., in 57° 0′ N., 135° 17′ W., is situated on a low strip of land, the governor's house rising on a rocky height above the general level. Snow-capped mountain peaks surround it. Mount Edgcumbe, an extinct volcano of 8000 ft., on Crooze I., opposite the town, is the landmark of the port. Salmon fishing and curing is the chief industry. Sitka has an industrial school. Steamers ply once a month between Sitka and Portland (Oregon). It has a small but commodious harbour, and was formerly the headquarters of the Russian-American Fur Co. Mean temp. (43 yrs., 1832–45, 47–76), yr. 43.3° F., Jan. 31.4°, Aug. 55.9°; annual rfall. (30 yrs.), 84.06 in.

Sitpur, vil., Brit. India, Punjab, dist. Muzaffargarh, 78 m. SW. by S. Múltán. P. <5000.

Sitsang, or **West Tsang,** the Chinese name of Tibet.

Sittaford Tor, eminence, Eng., Devonshire, on Dartmoor, 6 m. SW. Chagford, with logan stone. Alt. 1764 ft.

Sittard, tn., Holland, prov. Limburg, 14 m. SSW. Roermond; manufactures tobacco and chicory, and has tanyards. The town was known in the 9th century; it was conquered by the

Dutch in 1632, by the French in 1794, and again by the Dutch in 1815. P. 5700.

Sit-taung, tn., Burma, dist. Shwegyin, 28 m. ENE. Pegu. P. <5000.

Sit-taung, riv., Burma, rises in the westernmost chain of the Shan Yoma, in about 20° 31′ 25″ N., and descends SSE. through the dists. of Yamethin, Pyinmana, Taungugu, and Shwegyin, and enters the Gulf of Martaban by a wide estuary, at the same time forming a delta 40 m. long from NNW. to SSE. Remarkable for the tidal bore, which rushes up with great violence. The river carries a great deal of silt in suspension. The middle course, above Shwegyin, is narrow and unnavigable; below this point it widens, but the strength of the current impedes upward navigation. Boats rarely pass below Kayasu, which, previous to the opening of the Nyit-kyo Canal, was the chief line of communication with the Pegu R. and Rangoon. Length, 350 m.; area of basin, about 22,000 sq. m.

Sitten, Switzd. See **Sion.**

Sittingbourne, par. and market-tn., Eng., Kent, div. and 7 m. WNW. Faversham, on the L. C. & D. R. Sittingbourne was a famous place of call for pilgrims to Canterbury; centre of an important fruit-growing dist., and has oyster fisheries, paper-mills, cement works, &c. Market-days, W. and F. P. 8300.

Sitting-Gomba, large Buddhist Llama monastery, Tibet, prov. Nari, a few miles W. the fortress of Taklakar, in about 81° E., in the valley and near the source of the Yaru-Tsangbo.

Sittra, Lake, oasis, W. Africa, in N. of the desert of Libya, 102 m. ESE. the oasis of Siwah, below the level of the Mediterranean.

Sitz, Ger., 'a settlement' or 'possession.' See *Set.*

Siu, or **Siyu,** tn., in the centre of Pata I., on the coast of Brit. E. Africa, in 2° S. P. 5000.

Siuchou, tn., China, prov. Kiangsu, 175 m. NW. by N. Nanking.

Siuchou, or **Hsüchou-fu,** tn., China, Süchwan. See **Sui-fu.**

Siun, group of isls., Japan, immediately S. of Kiushiu I.

Siuri ('chief town'), tn., Japan, on S. side of Okinava I., Luchu group, in about 26° 13′ N. P. 24,500.

Siut, tn., Upper Egypt, cap. prov. Siut, between l. bk. Nile and Bahr Yusuf, in 27° 10′ N. Alt. 150 ft. P. (1882) 31,400.

Siuyangching, tn., China, Manchuria, prov. Liautung, 85 m. SE. by E. Newchwang.

Sivagangá, tn., Brit. India, Madras, dist. and 25 m. E. by S. Madura. P. 8800; Hindus, 8000.

Sivagangá, hill, India, Mysore, in 13° 10′ N., 77° 17′ E.; covered with sacred buildings and inscriptions. The ascent is held to answer for a pilgrimage to Benares. Alt. 4559 ft.

Sivagiri, tn., Brit. India, Madras, dist. and 44 m. NNW. Tinnevelli. P. 9000; Hindus, 8200.

Sivakási, tn., Brit. India, Madras, dist. Tinnevelli, 40 m. SW. Madura. P. 12,200; Hindus, 10,700.

Sivas, tn., Asia Minor, on the Kizil-Irmak, 108 m. NE. by E. Kaisarie, cap. vilayet Sivas; important centre of caravan routes, connected since 1883 by carriage-road by way of Tokat and Amasia with the seaport of Samsun. P. 43,100; Moham. 32,500 (Sunnites, 22,000; Shiahs, 10,500); Gregorian Armenians, 8800; Orthodox Greeks, 1500 (Cuinet).

Sivri-hissar, tn., Asia Minor, 80 m. WSW. Angora. P. 11,500.

Sivri-hissar, tn., in the W. of Asia Minor, vilayet, sanjak, and 22 m. SW. Smyrna. P. 3600; Moham. 2000; Orthodox Greeks, 1500.

Siwa, tn., Upper Egypt.

Siwah ('oasis of Jupiter Ammon'), the *Ammonium* of the ancients, oasis, Egypt, 340 m. WSW. Cairo, in 29° 12′ N., 25° 42′ E., 160 m. from the Mediterranean, occupying the lowlands between the plateau of Libya on the N., and the desert of Libya on the S.; it is irrigated by numerous canals, covered with beautiful forests of date and olive trees, yields annually three harvests, and has large quantities of rock-salt. Mineral springs occur in the neighbourhood. P. <4000.

Siwah, Little, oasis, same as El Gara. See **Gara, El.**

Siwálik Hills, a name applied in a special sense to a mt. range, Brit. India, NW. Provs. and Punjab, running parallel with the Himálayas from Hardwár to the banks of the Beas near Ditárpur; after leaving the Sutlej, the range becomes more and more a mere broad tableland. There are abundant remains of large vertebrates, including the sivatherium, a gigantic ruminant larger than the rhinoceros. Sometimes the name is applied to the whole range of hills, or rather relatively low mountains, parallel to the S. range of the Himálayas, W. of the break in this range in N. Bengal. Length, 200 m.; highest alt. 3500 ft.

Siwantse, vil. and Roman Catholic mission station, China, in NW. of prov. Pechili, in 40° 58′ N., 115° 18′ E., 25 m. ENE. Kalgan. Alt. 3900 ft. Mean temp. (2 yrs., 1873-75), yr. 37.5° F., Jan. 2.5°, July 65.2°.

Siwenhoa-fu, tn., China, prov. Pechili, 8 m. WNW. Peking, about 9 m. from the Great Wall, on the Yang-ho, at the entrance of a gorge traversed by the road from Peking to Kalgan; is an important market. Siwenhoa-fu was the summer residence of the Mongol emperors in the 13th and 14th centuries. P. 90,000.

Skali, Georgian, 'stream.'

Skali, Scandinavian, 'a hut' or 'shed.' See *Scale.*

Skalice, Česká, comm., Austria. See **Böhmisch-Skalitz.**

Skalitz, Hungary. See **Szakolcza.**

Skalitz-Böhmisch, comm., Austria. See **Böhmisch-Skalitz.**

Skalkajaur, lake, Sweden, in centre of prov. Norrbotten, extending 23 m. WNW. and ESE. along the course of the Little Luleå R. Its breadth varies from ½ to 3½ m.

Skallingen, penin., Denmark, on the SW. of Jutland.

Skällvik, vil., Sweden, prov. Östergötland, 37 m. E. Linköping; iron mined. P. (comm.) <2000.

Skamander, riv., Asia Minor. See **Menderez.**

Skamania, co., U.S., Washington terr., traversed N. to S. by the Cascade Mts.

Skanderborg, tn., Denmark, in the SE. of Jutland, prov. and 13 m. SW. by W. Aarhus. P. <3000.

Skanderoon, tn., Syria. See **Alexandretta.**

Skåne, Swedish name for the old prov. **Scania** (*q.v.*).

Skaneat'eles, vil., U.S., New York, Onondaga co., on Skaneateles Lake, 15 m. WSW. Syracuse; has various manufactures, and is a favourite summer resort. P. <1500. **Skaneateles Lake** is 16 m. long, and 1–2 m. broad, and is drained N. into the Seneca R. Alt. 932 ft. (Toner).

Skannive, electoral div., Ire., Galway, dist. Roundstone No. 2.

Skanör, tn., Sweden, prov. Malmöhus, on The Sound, 14 m. SW. by W. Malmö, now, with the adjacent town of **Falsterbo,** forming a commune. Skanör is one of the oldest towns of Sweden, and as early as 879 the town is mentioned as a place of considerable trade; the 'fair of Scania' from June to November was famous in the Middle Ages. In 1631 the sands, raised by a great storm, obstructed the port and partly buried the town; the church of Falsterbo is still partly covered. The scene of several battles, Skanör was in 1312 burnt down by the Hanseatic League, and it was again burnt down in 1885. P. <2000 (mostly fishermen and pilots).

Skanzoura, isl., Greece, one of the Sporades, 26 m. NNE. of the E. ct. of Eubœa I., midway between Skopelos and Skyros.

Skapta, riv., Iceland, in the S., rises in the SE. of Lake Langi-Sjör, flows SW. and SE., and joins the Asar by a channel on r. bk. of the Holmsa, an arm of Kadarfljot Fjord.

Skär, Skaer, Swedish; Dutch, *Skjaer;* Gaelic, *Sgor* and *Sgeir,* 'a cliff' or 'skerry;' allied to the Welsh *skerid,* cleft asunder. *Esgair,* another word from the same root, is applied to a long ridge. Scarborough, 'the town on the rock or cliff;' Skerryford; Sheerness, 'the sharp headland;' Scuir, 'a sharp rock;' Scordale, in Westmorland; Scarba, 'the island of the sharp rock;' Skerryvore, 'the great rock.'

Skara, tn., Sweden, prov. Skaraborg, 59 m. W. by S. Motala; seat of a bishop, college, observatory, and a famous veterinary school, founded 1774. The cathedral was consecrated in 1151. Near the town is the fortified castle of Skaraborg; another castle, the Jarlaqvist, was a royal residence. At Husaby, near Skara, King Olaf Skötkonung was baptized, and built the first Swedish cathedral, afterwards moved to Skara. The town suffered from fires in 1678, 1827, and 1859. P. <4000.

Skardo, tn., India. See **Iskardo.**

Skärgård, or **Skjærgaard** ('skerry fence'), the general name for the island belts which stretch along the W. ct. of Norway and the E. of Sweden.

Skärhamn, fishing vil., SW. Sweden, near Marstrand.

Skarpanto, or **Scarpanto,** isl., Turkey. See **Kerpe.**

Skatarion (skatari), vil., Greece, prov. Laconia, on the W. shore of the Gulf of Laconia, 20 m. N. of Cape Matapan. P. <2000.

Skatelöf, vil., Sweden, prov. Kronoberg, 13 m. SW. Vexiö. The famous singer Christine Nilsson was born at Huseby, 2½ m. NNE., in 1843. P. (comm.) <4000.

Skateraw, vil., Scot., Haddingtonshire, on the NE. ct., 4 m. SE. by E. Dunbar, close to Innerwick stn.

Skate Road, anchorage, Eng., Northumberland, inside Holy I.

Skaterow, or **Skateraw,** vil., Scot., Kincardineshire, on the E. ct., on Skaterow Harbour, 8 m. S. by W. Aberdeen, close to Newtonhill stn. P. <500.

Skaw, or *Skagi,* Scandinavian, 'isthmus' or 'promontory;' *e.g.,* the Skaw or Skagen, cape on the coast of Denmark; Skagerack or Skagen-rack, 'the strait near the promontory.'

Skaw, The. See **Skagen, Cape.**

Skawina, tn., Austria, crownland Galicia, 8 m. SW. Cracow. P. <2000.

Skeabost Bridge, PMT.O., Scot., Inverness-shire, Skye I., 8 m. NW. Portree.

Skeagh, electoral div., Ire., Cavan, dist. Bailieborough.

Skeagh, electoral div., Ire., Down, dist. Dromore.

Skeagh, electoral div., Ire., Westmeath, dist. Ballynacarrigy.

Skeagh, Lough, small lake, Ire., in the NE. of co. Cavan, 1½ m. E. by S. Cavan, drained SE. to the Boyne.

Skean, Lough, lake, Ire., N. co. Roscommon, 7 m. NW. Leitrim, 169 ft. above sea-level, drained into the Shannon.

Skeckling, part of par., Eng., Yorkshire. See **Burstwick.**

Skedevi, vil., Sweden, prov. Östergötland, 39 m. NNE. Linköping. P. (comm.) <4000.

Skedsmo, vil., Norway, prov. and 18 m. ENE. Christiania, on the Glommen. P. (comm.) <5000.

Skedvi, Stora, vil., Sweden, prov. Kopparberg, 15½ m. SSE. Falun, on l. bk. of the Dal-Elf; iron, silver, and copper mined. P. <4000.

Skee, or **Skede,** vil., Sweden, prov. Göteborg and Bohus, 3½ m. E. Strömstad, at head of a small bay on the Skager-Rak; several mineral springs near, and numerous tumuli. P. (comm.) 5200.

Skeeby, par., Eng., Yorkshire, N. Riding, div. and 2 m. NE. Richmond, P.O. P. <250.

Skeen, Loch, small lake, Scot., Dumfriesshire, 8½ m. NE. Moffat, ¾ m. long, drained SE. by the Tail Burn into the Moffat Water. See **Grey Mare's Tail.**

Skeena, the largest riv. in Brit. Columbia, N. of the Fraser, flows SW. then WSW., and enters the Pacific in the lat. of the N. point of the Queen Charlotte Is.; important for its salmon fisheries, canneries dotting its shores for 20 m.; navigable by small steamers 60 m. up, by canoes 200 m.

Skeffington, par., Eng., Leicestershire, Melton div., 10 m. E. by S. Leicester, 2 m. SW. by S. Tilton stn., P.O. P. <250.

Skefling, par., Eng., Yorkshire, E. Riding, Holderness div., on the N. shore of the estuary of the Humber, 18 m. ESE. Hull, 4½ m. SE. by E. Patrington stn. P. <250. See **Easington.**

Skeg, Scandinavian, 'wood' or 'grove.' See *Skaw.*

Skegby, par., Eng., Nottinghamshire, div. and 3 m. W. Mansfield, 1½ m. S. Teversall stn., P.O. P. <3500.

Skogerö, isl., off N. ct. of Norway, prov. Tromsö, in a bay on the S. ct. of Varanger Fjord. Length, 12½ m.; mean breadth, 6 m.; area, 51 sq. m. P. <2000.

Skogn, vil., Norway, prov. and 35 m. ENE. Trondhjem, on NE. shore of Trondhjem Fjord. P. (comm.) <4000.

Skogsö, isl., off W. ct. of Norway, one of the Vesteraalen. Area, 14 sq. m. P. <2000.

Skokloster ('the sheltered convent'), vil., Sweden, prov. and 10 m. S. Upsala; was the seat of a convent of Dominicans, later Cistercians. Secularised by Gustavus Vasa, who gave it to Field-Marshal Wrangel, whose son filled it with treasures and artistic objects taken from Germany in the Thirty Years' War. Its library has the richest collection of MSS. in Sweden.

Skole, tn., Austria, crownland Galicia, 22 m. S. Drohobycz, on the railway across the Carpathians from Stryi to Munkacs; iron mined. P. <3000.

Skomer Island, Wales, off the W. ct. of Pembrokeshire, on the S. of St. Bride Bay.

Skön, or **Sjön,** vil., Sweden, prov. Vesternorrland, 24 m. SW. Hernösand. P. (comm.) 6900.

Skopelos, isl., Greece, one of the Sporades, 14 m. off the NE. ct. of Eubœa I. Area, 33 sq. m. (Wizotski); 47 sq. m. (Strelbitsky).

Skopelos, seapt. tn., Greece, on Skopelos I. and Bay (NE. ct.). P. <4000.

Skopin, dist. tn., Russia, govt. and 58 m. SSW. Ryazañ, on railway from Tula to Ryazhsk (23 m.); considerable trade in grain, hemp, oil, swine meat, cattle, and salt, exported mostly to Moscow, as also in hardware goods imported from Nizhniy, Tubla, and Bolkhov. Considerable gardening; flour-mills, oil-mills, tanneries, soap-works. Two large fairs. P. 11,025.

Skoplje, Turkey in Europe. See **Üsküb.**

Skopos, mt., in the SE. of the Greek isl. of Zante.

Skotschau, tn., Austria, Silesia, 41 m. ESE. Troppau, 7 m. ENE. Teschen. P. <4000.

Skoulikaria, comm., Greece, prov. Arta, 57 m. N. by W. Mesolonggi. P. <3000.

Skowhegan, tn., U.S., Maine, cap. Somerset co., on the l. bk. of the Kennebec R., 45 m. W. Bangor. P. 5100.

Skraaven, islet, Norway, Lofoten Is., 5½ m. SE. Vaagen; one of the busiest fishing-places of Norway.

Skreen, par., Ire., SE. co. Meath, bar. Skreen, 7 m. SE. Navan; 4520 ac. P. <750.

Skreen, par., Ire., N. co. Sligo, bar. Tireragh, 10 m. W. by S. Sligo, PM.O.; 13,240 ac. P. <2500.

Skreen, par., Ire., co. and 6 m. NE. Wexford, bars. Skreen, Ballaghkeen, and E. Shelmaliere. P. <250.

Skrevena, vil., Bulgaria, circle Vratca. P. <3000.

Skripou, vil., Greece, prov. Bœotia and Attica, 34 m. W. Chalkis, on the site of the ancient *Orkhomenos;* formerly on the borders of Lake Kopais (now drained).

Skrópha, Cape, Greece, on the W. ct., in 38° 17′ N., at the mouth of the Gulf of Patras.

Skuč, tn., Austria, Bohemia, 27 m. S. by E. Königgrätz. P. <4000.

Skudesnäshavn, tn. and port, Norway, Karmö I., 24 m. NW. Stavanger; has a naval dockyard. The outer harbour is 37–44 ft. deep. Mean temp. (15 yrs.), yr. 44.7° F., Feb. 34.2°, July 58.2°; annual rfall. (20 yrs.), 42.64 in. P. <2000.

Skudevigtsbugten, harb., Norway. See **Bergen.**

Skull, or **Schull,** par. and tn., Ire., SW. co. Cork, bar. W. Carbery, W. div., 12½ m. W. by S. Skibbereen; barytes is obtained here. Par. 37,923 ac., P. 7200; tn. P. <500.

Skulyany (Skuleni), tn., Russia, prov. Bessarabia, 57 m. NW. Kishinev, on Pruth R., on Roumanian frontier; custom-house. P. <5000.

Skunk, riv., U.S., Iowa, rises in Hamilton co., flows S. then SE. into the Mississippi in Henry co., 10 m. below Burlington. Length about 250 m.

Skuo, isl., in the central group of the Danish Is. Highest point, 1480 ft.; length, 3½ m.; breadth, 2 m.

Skurup, vil., Sweden, prov. Malmöhus, 24 m. ESE. Malmö. P. (comm.) 4000.

Skurz, vil., Prussia, prov. W. Prussia, 38 m. S. by W. Danzig. P. <3000.

Skutari, tn., Asia Minor, the Asiatic suburb of Constantinople, built in an amphitheatre at the mouth of the Bosporus; the roads are crooked, and very muddy or dusty; manufactures, silks, cottons, and leather. Besides the mosque, the town has theological colleges, schools, baths, &c., and the large Turkish printing-press, founded 1723. On the plateau overlooking the town is the large Turkish cemetery. Here, during the Crimean War, the English troops had their barracks and hospital, and here is their burial-ground, marked by a marble obelisk. Near the shore is the Tower of Leander, the lover of Hero, now used as a lighthouse. Here Xenophon stopped with the Ten Thousand before proceeding into Europe. On the plains of Skutari were gained the last victories of Constantine the Great over Lucinius. In 1689 Skutari was the centre of the revolt against Solyman (Suleiman) II. Mean temp. (15 yrs.), yr. 58.6° F., Jan. 41.9°, Aug. 76.0°. P. 45–50,000.

Skutari, Turkish **Üsküdar,** Albanian **Skodra,** Slavonic **Skadar,** tn., Turkey in Europe, cap. vilayet Skutari, on the Boyana, about 1½ m. from the foot of Lake Skutari, from which it is separated by a marshy plain, the town itself being subject to inundations. W. of the town, on the top of a hill about 500 ft. high, is the old Servian fortress of Bosapha, now in ruins. The town has been in Turkish hands since 1477. P. 36,000; Moham. 27,500; Christians, 8000.

Skutari, Lake of, partly in Montenegro, partly in Albania, in 42° 3′ 33″–42° 20′ 10″ N. Its length (about 27 m.) is parallel with the shore of the Adriatic, 10 m. distant, with a gulf 10 m. N. from its E. shore. Its W. ct. is rocky and indented, while the E. ct. is low and strewn with islets. All navigation centres at the two ends; in the S. round the town of Skutari, and in the NW. round Vir-Bazar town, and in the N. round the small town of Prieka. Its principal trib. is the Moraca; its sole exit by the Boyana, which flows into the Adriatic. Breadth, 8 m.; area, 144 sq. m.

Skutterskelf, par., Eng., Yorkshire, N. Riding, 3 m. SW. Stokesley. P. <250.

Skvira, dist. tn., Russia, govt. and 78 m. SW. of Kiev. P. 12,200.

Skye, vil., Canada, Ontario, Glengarry co., 32 m. from Cornwall. P.<1500.

Skye, the largest isl. of the Inner Hebrides, Scot., co. Inverness, from the mainland of which county it is separated N. by Loch Alsh, and E. by Sound of Sleat. It extends for 48½ m. in a NW. direction; it being indented NW. and W. by numerous deep lochs. Surface mountainous, rising 2000 to upwards of 3000 ft. above the sea, in the Cuillin or Cuchullin Hills to above 3200 ft.; N. part bold and strikingly picturesque. It is composed chiefly of trap rocks, quartz, limestone, sandstone, and lias. Climate very moist and variable [**Portree**]. Little of the land is suited for agriculture; such as there is is mainly near the seacoast, and even the pastures are chiefly in heath and coarse grass. Cattle, fish, and kelp are the chief exports. The island contains many Danish antiquities. Portree is the cap.; other villages are Stein, Kyle-Akin, Broadford, Oronsay, Armadale, and Uig. Alt. 165 ft. Mean annual rfall. 81.75 in. P. 15,700.

Skyreburn, P.O., Scot., Kirkcudbrightshire, 4 m. SW. Gatehouse.

Skyreholme, vil., Eng., Yorkshire, W. Riding, Burnsall par., 3 m. NE. Skipton.

Skyring Water, a sheet of water in the S. of Chile, crossed in the middle by 72° W., communicating with Otway Water on the E. by the Fitzroy Canal. It is not known whether it has any communication with the W. ct., but the set of currents that have sometimes been observed in its eastern outlet seems to prove that there is. Coal occurs on its shores. See *Proc. R. G. S.*, 1880, p. 553.

Skyros. 1. An isl., Greece, one of the Sporades, to the E. of the middle of Eubœa. Area, 79 sq. m. (Wisotzki). **2.** A town on the E. ct. P.<4000.

Slack Side, P.O., Eng., Yorkshire, 1 m. from Wibsey.

Slad, eccles. par., Eng., Gloucestershire, 2 m. NE. Stroud, P.O. (**The Slad**). P.<2000.

Slade Road, PM.O., Eng., 2 m. from Erdington, near Birmingham.

Sladesbridge, P.O., Eng., Cornwall, 2 m. from Wadebridge.

Slagelse, tn., Denmark, Seeland, prov. Sorö, 50 m. WSW. Copenhagen; divers industries; has a church of the 11th century. P. 6800.

Slaggyford, stn., Eng., Northumberland, on the l. bk. of the South Tyne, div. and 18 m. WSW. Hexham, on the NE. R., P.O.

Slaght, electoral div., Ire., Londonderry, dist. Garvagh.

Slaidburn, par., Eng., Yorkshire, W. Riding, in the SW. of the Skipton div., on the Hodder, 15 m. NW. by N. Burnley, 6 m. NNW. Chatburn stn., PMT.O.; 5182 ac. P.<500.

Slains, ct. par., Scot., Aberdeenshire, 12 m. SW. Peterhead, 6 m. E. by S. Ellon stn.; 9124 ac. P.<1500.

Slaithwaite, par. and tn., Eng., Yorkshire, W. Riding, Colne Valley div., on the Colne and Huddersfield Canal, 4½ m. SW. by W. Huddersfield, on the L. & NW. R.; manufactures woollen and cotton goods; its mineral spring, with the same properties as that of Harrogate, is much frequented. PMT.O. Par. P.<3500; tn. P.<5000; eccles. par. (**Slaithwaite with Lingards**) P.<5000.

Slaley, par., Eng., Northumberland, div. and 4½ m. SSE. Hexham, 3½ m. SW. Riding Mill stn., P.O.; 7518 ac. P.<500.

Slamannan, par., Scot., Stirlingshire, on the Avon, 4½ m. SSW. Falkirk, on the N. B. R.; has extensive coal-mines in the vicinity. PMT.O. Par. (including Blinkbonny) 7062 ac. P. 6700.

Slamat, mt., Java, 85 m. NW. by W. Jokjokarta. Alt. 11,240 ft.

Slane, tn., Bohemia. See **Schlan.**

Slane, par. and tn., Ire., NE. co. Meath, bar. Upper Slane, on the l. bk. of the Boyne, 8 m. W. Drogheda, 2 m. from Beauparc stn.; has remains of the hermitage of St. Erc, who founded the see of Slane. PMT.O. Par. 5869 ac., P.<1500; tn. P.<500.

Slane, Lower and **Upper,** two bars., Ire., in the NE. of co. Meath, Upper Slane bounded by the Boyne in the S.

Slanemore, PM.O., Ire., W. co. Westmeath, bar. Moyashel and Magheradernon, 3½ m. WNW. Mullingar.

Slanes, par., Ire., co. Down, bar. Upper Ards, 4 m. NE. Portaferry. P.<500.

Slaney, riv., Ire., rises in the SW. of co. Wicklow, flows S. and SE. through cos. Carlow and Wexford, and enters the sea through Wexford Harbour after a course of about 60 m.

Slieve-na-Muck, or **Tipperary Hills,** hill range, Ire., co. and 3½ m. SE. Tipperary. Length, 6 m.; greatest alt. 1215 ft.

Slievenanee, mt., Ire., in the NE. of co. Antrim, 19 m. NW. Larne. Alt. 1782 ft.

Slieve Phelim Mountains, Ire., co. Limerick, bar. Owneybeg. Greatest alt. 1523 ft.

Slievereagh, electoral div., Ire., Cork, dist. Inchigeelagh.

Slieve Snaght ('snow mountain'), mt., Ire., in the NW. of co. Donegal, 24 m. N. Donegal. Alt. 2240 ft.

Sligichan, PT.O., Scot., Inverness-shire, Skye I., 9 m. S. Portree, at head of **Sligichan Loch,** sea loch, which extends 3 m. to the NE.

Sligo, vil., Canada, Ontario, Peel co., 31 m. WNW. Toronto, on a railway. P. <1500.

Sligo, maritime co., Ire., prov. Connaught, with a very irregular coast; divided as shown in the following table:—

Baronies.	Acres.	Pop. 1891.
Carbury	76,603	26,707
Coolavin	25,814	7,055
Corran	45,376	10,198
Leyny	121,543	21,628
Tireragh	106,673	18,616
Tirerrill	75,807	13,809
Total, Sligo	451,815[1]	98,013

[1] Exclusive of 10,330 ac. under the larger rivers, lakes, and tideways.

Surface well wooded and sometimes picturesque, with some fine ranges of hills. The geological floor is Carboniferous Limestone, with black shale strata and Upper Carboniferous Limestone, the latter forming plateaux. There are two masses of Old Red Sandstone near Loch Arrow. Ironstone, though plentiful, is not worked; copper and its sulphate are also found. Silver, though not in paying quantity, is met with near Ballysodare. Barytes is dug at Bundoran; coal at Ballynashee. In the N. the gneiss mountains rise to 1950 ft. at King's Mt., and the limestone range to 1722 ft., Benbulbin; in the W. Ox Mts., 1778 ft.; and a smaller range, the Curlew Mts. (under 900 ft.), are on the Roscommon border. Chief rivers, the Moy, flowing into Killala Bay, the Easky, from a loch of the same name, the Owenmore, and the Garvogue. The sea and salmon fisheries are important. Manufactures some coarse woollens and linens, leather. Soil is in some parts light, in others deep and fertile, with many patches of bog land. Agriculture has declined as to tillage; cattle-feeding is a main industry. For agricultural statistics, see **Appendix,** pp. 10–12. Before Henry II. the dist. belonged to the O'Connors, and then came under the De Burgos. The antiquities are Druidical cairns and cromlechs, a round tower at Drumcliffe, a fine Celtic cross, two ruined abbeys, &c. Communication by the M. G. W. R., passing from the S. border to the county town, with a branch on the Sligo, Leitrim, and N. Counties Rly. The chief towns are Sligo, Ballymote, and Tobercurry. See **Ireland,** table.

Sligo, civic tn., Ire., cap. co. Sligo, bar. Carbury, 34 m. W. by S. Enniskillen, picturesquely situated near the mouth of the Garvogue, the short stream draining Lough Gill into Sligo Bay, in the angle at the E. end of the N. ct. of prov. Connaught, on the M. G. W. R. and Sligo, Leitrim, and N. Counties Rly. It is the chief town and seaport in the NW. of Ire., exporting large numbers of cattle and great quantities of agricultural produce. The harbour has a depth of 27½ ft. high water, 16 ft. low water on the bar at ordinary spring tides. At Oyster I. moorings (close to Rosse, 4 m. from the town) the depth is 19 ft. at low water ordinary springs. Sligo has a large town-hall, including an exchange, free library, assembly room, &c., a Roman Catholic cathedral (diocese of Elphin), and ruins of an old abbey, originally dating from the 13th century, but rebuilt after its destruction by fire in 1414, though the chancel appears to have escaped, and to belong to the original edifice. Its cloisters are noted for their beauty. Sligo returned one member to Parliament till 1870, when it was disfranchised. Market-days, Tu. and F. P. (1841) 12,300; (1851) 11,100; (1871) 10,700; (1891) 10,300; parl. divs., **N. Sligo,** P. 48,700; **S. Sligo,** P. 49,300.

Sligo, bor., U.S., Pennsylvania, Clarion co., 51 m. NE. by N. Pittsburg. P. <1500.

Sligo Bay, the inlet on which the town of Sligo, Ire., stands, lies immediately S. Donegal Bay; extends inland for 12 m., dividing at its upper part into three arms, Drumcliffe Bay in the N., the upper part of Sligo Bay in the middle (nearly shut off from the outer part by Coney I.), and Ballysodare Bay in the S. Breadth at entrance, 6 m. In 1588 three ships of the Spanish armada were stranded here.

Smorodinnoye, vil., Russia, govt. and 35 m. by rail NE. of Kursk. P. 7000.

Smyela, tn., Russia, govt. and 102 m. SE. Kiev; railway junction; sugar and mechanical works; brisk trade. P. 12,600.

Smygehuk, cape, Sweden, on S. ct. prov. Malmöhus, in 13° 18′ E.

Smyrna, or **Aidin,** Turkish **Izmir,** tn., Turkey in Asia, W. ct. Asia Minor, near the head of the Gulf of Smyrna, in 38° 25′ N., cap. vilayet and sanjak Smyrna. This is the most important town of Asia Minor, its natural and principal seaport being connected with the interior by three lines of railway. The town, famous for its beauty, has four quarters—the European, Turkish, Jewish, and Armenian quarters. The European quarter has a quay 2½ m. long on the Mediterranean coast, where are the principal hotels, cafés, &c. Smyrna is the seat of archbishops of the Greek Orthodox, the Roman Catholic, and the Armenian churches, and has a Greek Church cathedral; has also a large Greek college. The chief exports are valonia, sponges, raisins, figs, cereals, oil, cotton, tobacco, opium, raw and tanned hides, carpets, and mats. The imports consist of cotton and linen goods from England, woollen cloth from Germany, Lyons silks, and all kinds of manufactured goods, valued at £3,000,000 per annum. 'Smyrna carpets' are made in the interior. Smyrna existed before the Greek era. Conquered and colonised by the Ephesians, it formed part of the Æolian Confederation, and resisted Gyges, King of Lydia, and was taken by Alyattes in the 7th century B.C. Rebuilt by Lysimachus, it was made the cap. of Antigonus; and falling later into the hands of the Romans, figures in the Apocalypse among the number of the Seven Churches. During the persecutions of Marcus Aurelius in 166, St. Polycarp was martyred here. The town was taken by the Seljuks in 1084, and in 1402 by Tamerlane; finally conquered by the Osmanli in 1419. It suffered from terrible earthquakes in 1688, 1768, and 1880. Mean temp. (7 yrs., 1864–70), yr. 63.3° F., Jan. 47.4°, July 79.9°; mean annual rfall. (20 yrs.), 25.63 in. P. 200,000; Moham. 89,000; Orthodox Greeks, 59,000; Jews, 16,000; Armenians, 5600; beside 36,300 foreigners, of whom 25,000 Greeks.

Smyrna, tn., U.S., Delaware, Kent co., 30 m. S. by W. Wilmington; has shipyards and iron-foundries. P. <3000.

Smyrna, Gulf of, gulf in the Ægean Sea, on the coast of Asia Minor, extends NW. and SE. in two arms between three penins. It is 13½ m. wide at mouth, and nearly 18½ m. at the head; length, 40 m. The Bay of Smyrna, properly so called, is 3½ m. wide, and 2-5½ m. long. Formerly this bay was in danger of being silted up by the deposits of the Gediz-chai (*q.v.*).

Smyth, co., U.S., Virginia, in the SW., to the E. of 82° W., crossed in the N. by 37° N.

Smyth Bay, Canada, Ontario, Grand Mantoulin I., an inlet of Georgian Bay, in 45° 45′–50′ N.

Smyth Channel, Chile, between the SE. of Queen Adelaide I. and the mainland, crossed by 52° 20′ S.

Smythesdale, gold-mining bor., Victoria, Grenville co., 15 m. SW. Ballarat. P. <1500.

Snaasen, lake, Norway, prov. and 60 m. NE. Trondhjem. Alt. 62 ft.; length, ENE. to WSW., 24 m.; mean breadth, 2 m.; area, 40 sq. m.

Snab Point, cape, Eng., on coast of the co. of Northumberland, 8 m. ENE. Morpeth.

Snæfell ('snow mountain'), mt., in SE. of Iceland, N. of the E. end of Vatna Jökull. Alt. 5964 ft.

Snaefell, mt., Isle of Man, 5 m. SW. Ramsey, is the highest mountain in the island. Eng., Scot., and Ire. are visible from it. Lead is mined on the mountain. See **Man, Isle of.**

Snæhätten ('the snow cap'), the second highest mountain in Norway, 73 m. SE. Christiansund. Alt. 7566 ft.

Snailwell, par., Eng., Cambridge, div. and 2½ m. N. Newmarket, P.O. P. <250.

Snainton, par., Eng., Yorkshire, N. Riding, Whitby div., 8½ m. WSW. Scarborough, on the NE. R., PM.O.; 4836 ac. P. <750. See **Brompton.**

Snaisgill, place, Eng., Durham; lead and barytes are worked here.

Snaith and Cowick, par., Eng., Yorkshire, W. Riding; Snaith, on the Aire, Osgoldcross div., 7 m. W. by S. Goole, with a stn. (**Snaith**) on the L. & Y. R.; has agricultural trade, and cattle fairs. PMT.O. (**Snaith**). Market-day, Th. 6018 ac. P. <2000.

Snake, Lewis Fork, or **Shoshone,** riv., U.S., the largest trib. of the Columbia, issues from a lake 7790 ft. high in the Yellowstone Park, Wyoming, flows S. to Idaho, then SW. and NW., describing a curve of more than 350 m., flowing in S. Idaho through a cañon of 100–1000 ft. deep; here occur the American, Shoshone, and Salmon Falls. It then flows N. and NW. to near Fort Boise, where it bends N., forming the boundary between Idaho and Oregon, and afterwards between Idaho and Washington to Lewiston, where it turns W. to its junction with the Columbia, in about 46° 15′ N., 119° 0′ W. The Shoshone Falls, in 42° 33′ N., 114° 22′ W., are surpassed in America only by Niagara and Yosemite. In the main fall the water descends in an unbroken sheet for 200 ft. Length more than 900 m. Steamers ascend to Lewiston, and it is again navigable above the rapids for 150 or 200 m.

Snake Island, Victoria, at the mouth of Corner Inlet, Buln Buln co., crossed by 146½° E.

Snake River, riv., U.S., Minnesota, rises in S. of Aitkin co., flows S. to Brunswick, and E. into St. Croix R., in Pine co. Length about 135 m.

Snake River, riv., U.S., Nebraska, rises in W. of Sioux co., flows ENE. into Niobrara R. Length about 100 m.

Snake River, stn., Canada, Ontario, Renfrew co., close to Lake Muskrat, 61 m. WNW. Ottawa.

Snakes, tribe of Indians, U.S. See **Shoshones.**

Snake Valley, post-tn., Victoria, Grenville co., in 37° 36′ S., 144° 31′ E. P. <1500.

Snape, par., Eng., Suffolk, Eye div., 17½ m. NE. by E. Ipswich, 1½ m. NE. its stn. on the G. E. R., PT.O. P. <750. See **Friston.**

Snowdon, stn., Wales, near Beddgelert, on the N. Wales Narrow Gauge Rly.

Snowdon, mt., Wales, Carnarvonshire, Eifion div., 10 m. SE. Carnarvon, is the highest mountain of Wales and S. Britain. It has five distinct peaks, of which Y-Wyddfa, the central and highest, rises 3571 ft. Its W. side is very precipitous, and partly formed of basalt. Its summit, to which a railway is now (1895) being made, commands magnificent views.

Snowdon Ranger, stn., Wales, Carnarvonshire, Eifion div., on the N. Wales Narrow Gauge Rly., 7½ m. SE. Carnarvon.

Snow Hill, central stn. of the G. W. R., Eng., Birmingham.

Snow Hill, stn., Eng., London, on the L. C. & D. R., near St. Paul's Cathedral.

Snow Hill, tn., U.S., Maryland, cap. Worcester co., 97 m. SE. by E. Washington (D. C.). P.<1500.

Snowmass Mountain, mt., U.S., Colorado, a peak of the Elk Range, in about 107° N. and 39° W. Alt. 13,970 ft.

Snowshill, par., Eng., Gloucestershire, Tewkesbury div., 7½ m. SE. by S. Evesham. P.<250. See **Stanton.**

Snow Shoe, vil., U.S., Pennsylvania, Centre co., 79 m. NW. Harrisburg, 26 m. W. by S. Lock Haven. P.<1500.

Snowtown, tn., S. Australia, Daly co., 83 m. NNW. Adelaide. P.<1500.

Snowy River, riv., Gippsland, Victoria, Australia, and the longest of the streams that water Gippsland, rises in New South Wales, near Mount Table Top, in the N. ranges of the Australian Alps, flows S. through Wallace co. (New South Wales), crosses the supposed line from Forest Hill to Cape Howe that separates the colonies, traverses Gippsland North, and falls into the sea. Its course and its mouth are very nearly in the same meridian. Its upper course is among rugged and barren mountains; lower it passes through a sandy soil, timbered with mahogany. Length 240 m., 160 m. of its course being in New South Wales, and 80 m. in Victoria.

Snug River, post-tn., Tasmania, Buckingham co., 13 m. SSW. Hobart. P.<1500.

Snydale, par., Eng., Yorkshire, W. Riding, 4 m. W. Pontefract. P.<1500.

Snyder, co., U.S., Pennsylvania, bounded on the E. by the Susquehanna, just below the confluence of the W. Branch of the Susquehanna.

So, Chinese, 'a small fortress.'

Soa, salt-pan, S. Africa. See **Kalahari.**

Soa, islet, Scot., Argyllshire, to the W. of Mull, in 56° 17′ N., 1½ m. SW. Iona.

Soana, valley, Italy, Piedmont, prov. Turin, W. of Ivrée, traversed throughout its whole length by the Soana, l. bk. trib. of the Orco.

Soane, riv., India. Same as **Son.**

Soar, riv., Eng., Leicestershire, flows N. past Leicester and Loughborough to the Trent; navigable for barges to Leicester (*q.v.*).

Soata, tn., Colombia, dep. Boyaca, cap. North prov., 75 m. NE. Tunja; has large trade in sugar. P. 7200.

Soave, tn., Italy, Venetia, prov. Verona, 3 m. NNW. San Bonifacio; the 'vino santo' of Soave is a much appreciated sweet wine. P.<4000.

Soay, isl., Scot., Inverness-shire, divided from the S. ct. of the isl. of Skye by Soay Sound, in 6° 10½′–15′ W., P.O. P. 78.

Soay, isl., Scot., Inverness-shire, Harris par. P. 15.

Soba, Valle de, comm. and valley, Spain, prov. and 25 m. SE. Santander, dist. Ramales. P.<4000.

Sobaïre, tn., Arabia, Hadramut, 65 m. SW. Terim. P. 4000 (Werde).

Sobat, riv., Africa, eastern Sudan, r. bk. trib. of the Bahr-el-Abiad or White Nile, into which it flows in 9° 24′ N., 31° 46′ E.; its source is not yet exactly known.

Sober, comm., Spain, Galicia, prov. and 40 m. S. Lugo, dist. Monforte. P. 8500.

Sobernheim, tn., Prussia, Rhine Prov., circle Kreuznach, on riv. Nahe, 17 m. SW. Bingen. P.<3000.

Soberton, par., Eng., Hampshire, Petersfield div., on the Titchfield, 10½ m. N. Portsmouth, 4 m. E. by S. Bishop's Waltham stn., P.O., and P.O. (**Soberton New Town**); 5885 ac. P.<1500. See **Meon Stoke.**

Soběslau, tn., Austria, Bohemia, on riv. Lužnitz, 11 m. S. by E. Tabor. P.<4000.

Sobnáli, riv., Brit. India, Bengal, dist. Khulná, rises in Bayrá marsh, near Báltiá, and flows SE. into the Kholpetua; it forms one of the principal boat-routes between Calcutta and the eastern dists. It is also known as the Kundriá and Bengdaha, and in its lower reaches as the Guntiakhálí.

Sobonor, Sogoknor, or **Gashun-Nor,** salt lake, central Mongolia, said to lie in about 42° 30′ N. and 98° 50′ E., and to receive the main stream of the Édzin R., a branch of which enters the much smaller lake of Sogok to the W.

Sobotka, tn., Austria, Bohemia, 22 m. S. by E. Reichenberg. P.<3000.

Sobrado, comm., Spain, Galicia, prov. and 29 m. SSE. Corunna, dist. Arzua. P.<5000.

Sobral, vil., Brazil, on the Rio Acaraçu, state and 145 m. W. Ceara, connected by rail with the seaport of Camocim. P. 10,500.

Sobráon, vil., Brit. India, Punjab, Lahore dist., on W. bank of the Sutlej, in 31° 7′ N., 74° 54′ E.; opposite the village is the battlefield where Sir Hugh (afterwards Lord) Gough gained, in 1846, the decisive victory which closed the first Sikh war. P.<5000.

Sobreira Formosa, tn., Portugal, dist. and 18 m. WSW. Castello Branco. P.<5000.

Socapa, La, vil., Cuba, S. ct., 8 m. SW. by W. Santiago de Cuba, in 75° 58′ W.

Soccia, vil., Corsica, arr. and 20 m. NNE. Ajaccio. P.<2000.

Sochaczew, dist. tn., Russian Poland, govt. and 23 m. W. Warsaw Lake, on Bzura R. P. 6500.

Soche, vil., Portuguese S. Africa, about 100 m. W. Blantyre, in about 15° 52′ S., 33° 35′ E.

Söchhön, or **Sechen,** tn., Korea, 95 m. S. by W. Söul, on the W. ct., in 36° 3′ N.

Sochi-chou. See **Sokii-chou.**

So-chou, tn., China, prov. Shansi, 220 m. W. by S. Peking.

Söchwan, prov., China. See **Süchwan.**

Social Circle, settlement, U.S., Georgia, Walton co., 40 m. E. by S. Atlanta.

Society Bay, E. side of Gulf of Liautung, Manchuria, in 39°–39° 20′ N.

Society Hill, settlement, U.S., S. Carolina, Darlington co., on the Great Pee Dee R., 75 m. ENE. Columbia.

Society Islands, archipelago in the Pacific Ocean, since 1842 under the protection of France, between 16° and 18° S., 148° and 155° W.; comprising two groups, the Windward and the Leeward, the former annexed in 1880, the latter in 1885. The largest of the Windward Is. are Tahiti and Moorea or Eimeo, and of the Leeward Raiatea, Tahaa, Huahine, Tubwaï, Bora-bora, and Lord Howe's I. They are mountainous, of volcanic origin, surrounded by coral reefs, and watered by numerous streams; the highest peak on Tahiti is 8500 ft. above the sea. Climate mild and healthy. Many of the inhabitants have been converted to Christianity by the missionaries, who have also introduced the arts of civilised life. Chief exports, copra and mother-of-pearl. Area, 630 sq. m. P. (1878) 16,300. [**Polynesia.**]

Sockbridge and Tirril, par., Eng., Westmorland, 2 m. SW. Penrith. P.<250.

Sockburn, par., Eng., Durham, 6 m. E. Darlington. P.<250; eccles. par. is partly in Yorkshire.

Sock Dennis, par., Eng., Somerset, 1 m. SW. Ilchester. P.<250. See **Ilchester.**

Södra-Möckelby, vil., Sweden, prov. and 21 m. SSE. Kalmar; has large alum-works. P. <2000.

Sodus, vil., U.S., New York, Wayne co., 87 m. E. by N. Rochester. P. <1500.

Sodus Bay, Great, U.S., New York, Lake Ontario, in 77° W. **Sodus Bay, Little,** 13 m. to the E. **Sodus Point,** cape, at the W. of the mouth of Great Sodus Bay; summer resort.

Soekadana, tn., Borneo. See **Sukadana.**

Soerabaja, Soerakarta. See under **Surabaya, Surakarta.**

Soest (sōst), tn., Prussia, prov. Westphalia, cap. circle Soest, 28 m. E. by N. Dortmund; with a winter agricultural school, puddling-furnaces, rolling-mills, tanning, &c. Formerly cap. of Engern, and a Hanse town, Soest fell in 1449 to the dominion of Cleves and Brandenburg. In its prime it had a population of 30,000. P. (1816) 6700; (1890) 13,300; comm. P. 15,100.

Sœul, Korea. See **Söul.**

Sofahun, small tn., Kashmír, at SE. extremity of the valley; with iron-mines, the works of which have greatly fallen off, the iron being inferior to that of Bajour and Chinese Tartary. Lat. 37° 3′ N., long. 71° 31′ E.

Sofala, goldfields tp., New South Wales, Roxburgh co., 25 m. NNE. Bathurst. P. <1500.

Sofala, seapt., the oldest tn. in Portuguese S. Africa, on the E. ct., in about 20° 10′ S.; now in ruins. See **Ophir.**

Sofas, marauding tribe inhabiting the country on r. bk. of upper Niger, western Sudan.

Sofejin, Wadi-, valley and, at times, riv., Africa, Tripoli, containing sometimes more water than most streams of that country; flows on the whole E. into the Wadi-Merdum (Gerat Syrtis).

Sofia, cap. of Bulgaria and of prov. Sofia, situated to the S. of the Balkans, in a considerable plain (about 35 m. NW. to SE., by about 12 m.), traversed by numerous headwaters of the Isker, 80 m. WNW. Philippopolis, 48 m. SE. Pirot (Servia). Founded by the emperor Trajan under the name of *Serdica Ulpia* (the first part of the name referring to the Thracian tribe of the Serdes, the second from the gentile name of Trajan), later known as *Sardica.* The most notable monument of the Middle Ages is the church (now a ruin), on a hill on the E. Suffered greatly from pestilence in 1811 and 1837, and from two severe earthquake shocks in 1818. Alt. 1800 ft. Mean temp., yr. 50.8° F., Jan. 28.8°, July 73.0°. P. (1881) 20,500; (1888) 30,400; Bulgarians, 20,300; Spanish Jews, 5100; Gypsies, 1200.

Sofiysk, dist. tn., Russia, E. Siberia, Maritime Prov., on r. bk. Amur, 300 m. NE. Khabarovsk. P. <1000.

Söflingen, vil., Ger., kgd. Würtemberg, circle of the Danube, dist. and 2 m. W. Ulm. P. <3000.

Sofro, or **Soforo,** walled tn., Africa, Morocco, 18 m. SSE. Fez. In its vicinity are productive salt-mines.

Softly, part of par., Eng., Durham. See **Lynesack.**

Sogamoso, or **Chicamocha,** riv., Colombia, rises in dep. Boyaca, flows NE. then NW., enters dep. Santander, where it falls into the Magdalena in 7° 15′ N.; receives from the S. the Suarez, about the middle of its course through Santander.

Sogamoso, tn., Colombia, dep. Boyaca, 110 m. NE. Bogotá; has important trade in cattle and cereals, and various manufactures. Alt. 8320 ft. P. 14,000.

Soganly, mt., Transcaucasia, govt. Erivañ, dist. Novo Bayazed. Alt. 10,986 ft.

Sogcomet Point, cape, U.S., Rhode Island, in the SE. of New Port co., in 71° 12′ W.

Sögel, vil., Prussia, prov. Hanover, circle Meppen, 45 m. NW. by N. Osnabrück. P. <2000.

Soghair, isl., Red Sea. See **Jebel Soghair.**

Soghanlü (or **Soghanli)-su,** riv., Asia Minor. See **Filios.**

Soghd, valley of the Zarafshan, or riv. of Samarkand, Bukhara. It is one of the 'four paradises' of the Persian poets, and in antiquity it gave name to the region known as Sogdiana.

Soghirma, tn., Africa, central Sudan, 52 m. WSW. Gando, with well-kept clay walls. P. 7500.

Soglah, Lake, Asia Minor, pash. and 63 m. W. Karaman. Length, 11 m.; breadth, 7 m.

Sogliano al Rubicone, vil., Italy, Emilia, prov. Forli, 13 m. W. by S. Rimini. P. <2000.

Sogndal, vil., Norway, prov. and 83 m. NE. Bergen, on a N. arm of the Sogne Fjord. P. <2000.

Sognefjeld, mt. chain, S. Norway, prov. Bergen.

Sogne Fjord, inlet, Norway, on the W. ct., prov. N. Bergenhus, running inland E. for about 115 m., in about 61° N., with branches running off to N. and S.

Sogod, Ensenada de, bay, on N. ct. of Camarines Penin., Luzon, Philippine Is., in 122° 12′ E. long.

Sogoknor, lake, China. See **Sobonor.**

Sögüd, tn., Asia Minor, 57 m. E. by S. Brussa. P. 2000.

Sohag, Upper Egypt. See **Suhag.**

Sohág, Upper, canal, Brit. India, Punjab, dists. Lahore and Montgomery, in 30° 28′–30° 46′ N., 73° 33′–74° 21′ E.; it is dry during the cold weather; usually flows from April to October; irrigates a large area. The **Lower Sohág** canal is in Montgomery dist.

Sohágpur, municip., Brit. India, Central Provs., dist. Hoshangábád, 60 m. SE. by E. Bhopál; its fort is now dismantled; has manufactures, silk-weaving, and lac-melting. P. 7300; Hindus, 4700; Moham. 2200.

Soham, par. and market-tn., Eng., Cambridgeshire, Newmarket div., 5 m. SE. by S. Ely, on the G. E. R. In the neighbourhood are extensive market-gardens. Market-day, F. 12,999 ac. P. <4500; eccles. par. (**Soham with Barway**) P. <4500.

Sohám, maritime vil., SE. Arabia, Oman, 12 m. SE. Sohar.

Sohán, riv., Brit. India, Punjab, rises in the Murree (Marri) Hills a few miles from Murree sanitarium, flows into the plains near the ruined Ghakkar fortress at Pharwála, then SW. into the Indus 10 m. below Mokhad; there are dangerous quicksands in the lower river-bed.

Sohar, maritime tn., SE. Arabia, on Gulf of Oman, 117 m. WNW. Muscat; surrounded by fortifications; industries include weaving and working in gold and silver; safe roadstead; formerly belonged to Persia under name of Mazun; long a place of considerable trade. P. <5000.

Sohawal, tn., Central India, 88 m. SW. Allahábád.

Sohela, tn., Brit. India, Central Provs., dist. and 40 m. W. by S. Sambalpur. P. <5000.

Sohl, co., Hungary. See **Zolyom.**

Sohland, vil., Ger., kgd. Saxony, circle and 9½ m. S. Bautzen. P. 5200.

Söhle, tn., Austria, Moravia, dist. Neutitschein. P. <3000.

Sohna, municip., Brit. India, Punjab, dist. Gurgáon, 28 m. SSW. Delhi; manufactures glass bangles; has a hot sulphureous spring, 115°–125° F., which possesses remarkable curative properties. P. 6000; Hindus, 3800; Moham. 2200.

Soho, stn., Eng., Staffordshire, Handsworth div., a suburb of Birmingham, on the NW., with two stns. on the L. & NW. and G. W. Rlys., and a third stn. (**Soho Road**) on the L. & NW. R.

Sohos, tn., Turkey in Europe. See **Suho.**

Sohrau, tn., Prussia, prov. Silesia, circle Rybnik, 21 m. E. by S. Ratibor. P. <4000.

Soignies, tn., Belgium, prov. Hainaut, cap. arr. Soignies, on the Senne, 10 m. NE. by N. Mons; has flax-spinning and bleach-works. P. (comm.) 9200.

So-l-ling, pass, China, prov. Süchwan, on the road from Kiating-fu to Tatsienlu, N. of the Tung, in about 29° 25′ N., 103° 20′ E. Alt. 8780 ft.

Soissons (Roman *Suessiones*), tn., France, dep. Aisne, cap. arr. Soissons, on the Aisne, 18 m. SW. Laon; seat of a bishopric; has iron-founding and copper-smelting. At Soissons, Clovis defeated the Romans A.D. 486. P. 9000.

Sojat, tn., India, Rájputána, 48 m. SE. by E. Jodhpur.

Sojitra, tn., India, Gujarat, 17 m. NNE. Cambay. P. (1881) 10,300.

Sok, or **Sokpa** ('prairie folk'), name given by the inhabitants of Tibet to the nomadic Mongols in NE. of the plateau of N. Tibet, in contrast to the settled population, *Hor* or *Horpa*, of the Turkish race who inhabit the NW. of the same plateau.

Sokal, tn., Austria, crownland Galicia, 45 m. N. by E. Lemberg. P. 8000.

Sok-chou, riv., SE. Tibet, l. bk. trib. of the Sokoir-chou or Lu R.

Söke, Sevke, or **Sokia,** tn., in the W. of Asia Minor, vilayet and 38 m. S. by E. Smyrna, sanjak Aïdin, 2 m. from the r. bk. of the Menderez. P. 12,000; Moham. 8000; Orthodox Greeks, 4000.

Sokeholme, also spelt and always pronounced **Sookholme,** par., Eng., Nottinghamshire, Bassetlaw div., 3½ m. N. by E. Mansfield, 1 m. SSE. Shirebrook stn. P. <250.

Soken, The, dist., Eng., NE. Essex, comprising the pars. of Thorpe-le-Soken, Kirby-le-Soken, and Walton-le-Soken.

Sokil- (or **-chil**) **chou,** Chine e official name of Kashgar.

Sokna, oasis, Tripoli, 243 m. NNE. Murzuk; cereals, tomatoes, and other vegetables are produced in abundance. P. <5000.

Sokolka, dist. tn., Russia, govt. and 25 m. by rail SW. Grodno. P. 5500.

Sokolo, tn., Africa, French Sudan, in Bambara terr., about 205 m. NE. Bamako; great commercial centre. P. <3000.

Sokolów, tn., Austria, Galicia, 98 m. E. by N. Cracow. P. <5000.

Soko'ta, tn., Abyssinia, Amhara, 87 m. NE. Samara (Debra Tabor); chief centre of salt trade in the country. Alt. about 7000 ft. P. (1868) about 5000; in 1881 (according to Rohlfs) <2000.

Sokoto, Sakkatu, central African sultanate, situated between Bornu (*q.v.*) and the Niger (*q.v.*). The southern parts are mountainous, the northern consists of undulating plains and plateaux. Rivers: Benue (*q.v.*), Kaduna, and Sokoto (all trib. of the Niger). The reigning race are the Fellata (*q.v.*), but the majority of the population of Sokoto consists of Haussa (*q.v.*). Tributary states are Gando, Bautshi, Nupe, and Adamawa. Principal towns: Wurno (cap.), Sokoto, Kano, Katsena, Jakubu, Gombe. Clapperton was the first European who reached Sokoto in 1824. Sokoto belongs to the British sphere of influence. Area estimated at 125,000 sq. m. P. estimated at 10,000,000. See **Niger Territories** and **French West Africa.** [**H. G. S.**]

Sokoto, tn., Sudan, former cap. of the empire of Sokoto, on the Sokoto R., 20 m. SW. of Wurno, the present cap., in 13° 5′ N., 5° 10′ E., about 140 m. in a direct line NE. of the nearest point of the Niger. Alt. 750 ft. P. about 20,000.

Sokoto, or **Gulbi-n-Sokoto,** riv., Sudan, flows SW. past Wurno and town of Sokoto, and enters the Niger opposite Gomba in 11½° N. and about 4° E.

Sokotra, the ancient *Dioscoridis Insula*, isl., in the Indian Ocean, about the size of the co. of Cumberland, about 150 m. ENE. Cape Guardafui, in the E. extremity of Africa, between which and the main island on the same submerged bank lie the dependencies of Abd-el-Kuri and the Brothers, annexed along with Sokotra in Oct. 1886 by the British, under whose influence they had already stood in a certain measure since 1876 by a treaty with the Sheikh of Keshin. Tamarida, its cap. and chief port, lies about the middle of its N. ct. Length, E. to W., 70 m.; greatest breadth, 20 m. Its centre is a chain of granite and limestone mountains, rising to above 4000 ft. in elevation, around which a belt of low land, from 2 to 4 m. across, skirts the sea; in its fertility it presents in some parts a favourable contrast to the adjacent mainland. Climate more temperate than on the African continent. Period of fine weather Feb.–May, when the northern anchorages are regarded as safe; chief rainy season Nov.–Jan.; rains also occur in June–Aug., when violent valley-winds are also frequent. Fever prevails at the time of the change of the monsoons. Vegetation mostly of the African type in its general aspect, showing a predominance of 'stem,' with scanty foliage. Above 3300 ft. forests suddenly cease. Products comprise aloes of the finest quality (not derived, however, from *Aloe socotrina*, but probably from *Aloe vulgaris*), dragon's blood and other gums, tamarinds, tobacco, dates, a kind of millet, and ghee. Domestic animals—oxen, sheep, goats, camels, and civet cats. Trade mostly with Maskat, whence provisions are imported. The island was captured by the Portuguese under T. da Cunha and Albuquerque in 1507, at which time it was mainly inhabited by Christians, but the Portuguese soon abandoned it. Christianity gave place to Mohammedanism only in the 17th century. Area, 1520 sq. m. P., about 2000, 'Arabs' (a mixed race) and Beduins.

Sokpa, Mongols. See **Sok.**

Soktrang, tn., Lower Cochin-China, 93 m. SW. Saigon, on an arroyo or river-arm of the Mekong delta, 10 m. from the r. bk. of the Bassak arm.

Solah Saráï, tn., Brit. India, in NW. of NW. Provs., E. of the Ganges, dist. Moradábád. P. 10,300; Moham. 6600; Hindus, 3700.

Solam, vil., Palestine, *Shunem* in the O. T., 32° 36′ N., 35° 20′ E., 7 m. S. by E. Nazareth.

Solan, small cant. and hill sanitarium, India, 12 m. S. by W. Simla. P. <5000.

Solana, tn., Spain, prov. Ciudad Real, dist. Manzanares, 73 m. W. Albacete. P. (comm.) 7500.

Solander, Cape, E. Australia, S. entrance to Botany Bay, named after the naturalist who accompanied Captain Cook (1718–71).

Solander Island, islet off SW. extremity of New Zealand, in 166° 56′ E.

Solano, wind. See **Mediterranean.**

Solano, co., U.S., California, bounded on the S. by the estuary of the Sacramento R.

Solares, small tn., N. Spain, prov. and 7 m. SE. Santander, with which it is connected by rail (part of projected railway to Bilbao).

Solarino, tn., Sicily, prov. and 10 m. WNW. Syracuse. P. <3000.

Söla-Sund, strait, Baltic Sea. See **Sele-Sund.**

Solcano, Austria. See **Solkan.**

Soldau, tn., Prussia, in the SW. of prov. E. Prussia, circle Niedenburg, 68 m. E. by N. Thorn. P. <4000.

Sölde, vil., Prussia, prov. Westphalia, govt. Arnsberg, circle Hörde, 5 m. E. Dortmund. P. <3000.

Soldierstown, P.O., Ire., SE. co. Antrim, bar. Upper Massereene, 5 m. NE. Lurgan, 1 m. NW. Moira stn.

Soldin, tn., Prussia, prov. Brandenburg, cap. circle Soldin, 27 m. NNE. Küstrin, with manufacture of machinery. Soldin became in course of time cap. of Neumark. The Soldin group of lakes, between Soldin and Lippehne, and in the basin of the Mietzel, includes the Soldin, Libbe, Bandin, and Klopp Lakes, the latter noted for its lampreys. P. 5800.

Sole, Val di, Ger. **Sulzbergthal,** valley, Austria, Tirol, in the Trentin dist. and W. of Cles, traversed throughout its length by the Vermiglio and the Noce.

Sole Bay, Eng., Suffolk. See **Southwold.**

Soledad, tn. and stn., Argentine Republic, Santa Fé, 65 m. N. by W. Santa Fé.

Solloghodbeg, par., Ire., co. and 3 m. NW. Tipperary, bar. Clanwilliam. P. <750.

Solloghodmore, par., Ire., co. and 4 m. NW. Tipperary, bar. Clanwilliam; 6657 ac. P. <2000.

Sollom, vil., Eng., N. Lancashire, Tarleton par., 7 m. NE. Ormskirk.

Sollstein, mt., Austria, Tirol, NW. Innsbruck. Alt. 8710 ft.

Solmona, ancient *Sulmo*, tn., Italy, Abruzzi e Molise, prov. Aquila, 24 m. SSW. Chieti; birthplace of Ovid. Alt. 1320 ft. P. 14,600.

Solms, an old princip. of Ger., situated on the Lahn, now subdivided into several small mediatised princips. belonging to the different branches of the House of Solms, the chief of which are (1) Braunfels, with possessions in Prussia, Würtemberg, and Hesse, cap. Braunfels; (2) Lich and Hohen-Solms, cap. Lich; (3) Solms-Laubach, in Hesse; (4) Solms-Laubach-Baruth-Rödelheim and Arnheim, in Hesse; (5) Solms-Baruth-Wildenfels, in Hesse.

Solna, a northern suburb of Stockholm, Sweden.

Solnhofen, vil., Ger., kgd. Bavaria, Middle Franconia, dist. Pappenheim, on the Altmühl; noted quarry of lithographic stone, discovered 1739, in which was found the remarkable fossil bird known as Archæopteryx. P. <2000.

Solo, riv., in the E. of Java, flowing ENE. into Surabaya Strait.

Soloco, vil., Peru, dep. Amazonas, 320 m. SE. by S. Guayaquil. P. <2000.

Solofra, tn., Italy, Campania, prov. Avellino, 22 m. S. by E. Benevento. P. <5000.

Sologne, plateau, about 1850 sq. m. in extent, in central France, in deps. Cher, Loiret, and Loir-et-Cher, bounded N. by the bend of the Loire, a flat region consisting of Tertiary (Miocene) formations, of compact clayey soil, unhealthy and barren, but now in part planted with fir-trees; formerly, when its plains were covered with vast forests, the ground was healthier and the atmosphere less impure. Improvements are being effected by means of marl brought from Blancafort by the Sauldre Canal. To hasten the reclamation of the Sologne, a canal running from E. to W., from Châtillon-sur-Loire to Selles-sur-Cher, has long been proposed, but not yet carried out. The area under cultivation and the population are nevertheless steadily increasing. In 1830 the field and garden land of the region occupied 49.3 per cent. of the surface, heath 24.7 per cent., and the population was about 103,000; in 1889 the field and garden land had risen to 65.8 per cent., the population to nearly 150,000, and the heath had declined to 6.6 per cent.

Solola, tn., Guatemala, 50 m. WNW. Guatemala, cap. Solola dep.; situated on a promontory rising precipitously to a height of nearly 2000 ft. above Lake Atitlan. P. <5000.

Solombala, suburb of Archangel, and port of the city. P. 11,700.

Solombo, Great and **Little,** two small isls., in the Java Sea; Great Solombo in 5° 33′ S., 114° 24′ E.

Solomon, riv., U.S., Kansas, in the N., trib. of Smoky Hill R., which it joins on the l. bk. at Solomon City; it is joined on the r. bk. by the S. Fork of the Solomon R., in about 98° 26′ W.

Solomon City, vil., U.S., Kansas, Dickinson co., on riv. Solomon, 94 m. W. Topeka; has salt springs. P. <1500.

Solomon Islands, archipelago, Melanesia, SE. of the Bismarck Archipelago and NW. of the New Hebrides, extending NW. and SE., between 2°–13° 30′ S. and 154° 5′–164° E. The isls. Bougainville, Choiseul, Isabel, New Georgia, Malaita, Guadalcanar, San Christoval, Eddystone, Savo (the former *Sesarga*), and Murray are of volcanic formation, but there is now only one active crater, Mount Bagana, in the interior of Bougainville; earthquakes are still frequent. The smaller islands of the group are coral islands, and the larger islands have fringing and barrier coral reefs. The whole group is for the most part covered with thick forests, and the fauna is similar to that of Papua and Melanesia. The climate is generally unhealthy by reason of its moisture, and enervating on account of the NW. monsoon. The annual rainfall is approximately five times greater than that of England. Trade consists in bartering copra and vegetable ivory in exchange for tobacco, stuffs, beads, knives, &c. The inhabitants are Melanesian; cannibalism is rife among them. The group is divided between Germany and England, the former having the large islands Bougainville, Choiseul, Isabel, and their dependencies in the N., while England has the S. portion, consisting of Vella-Lavella, New Georgia, Russell, Guadalcanar, San Christoval, and Rennell. Mendaña landed on Isabel I. in 1568, and named the group **Solomon,** and Bougainville rediscovered the islands in 1768. Area estimated at 16,950 sq. m. See H. B. Guppy, *The Solomon Islands and their Natives*, London, 1887; also C. M. Woodford in *Proc. R. G. S.*, 1888, pp. 351–76, and 1890, pp. 393–418, with map (p. 444) on which are given the original Spanish as well as the modern names of the islands.

Solones (or **Solons**) **The,** a people of Manchuria belonging to the western division of the Tungus stock. According to Schrenck, their original home was in the upper valley of the Argun, where a considerable number are still to be found, and it is thought they may even be identical with the Niuchiu of the same region. The Solones as a separate people are now found chiefly in the upper Noni valley. They were formerly noted as brave hunters, but only a few nomadic tribes still follow the chase. Many serve in the Chinese army, and some thousands were settled as military colonists in the Ili basin.

Solopaca, tn., Italy, Campania, prov. and 12½ m. WNW. Benevento; in the neighbourhood are ferruginous and sulphureous springs. P. <5000.

Solor, isl. of Malay Archipelago, off the E. extremity of Flores, separated from it by the Strait of Flores and by another strait from Adenara in the N.; S. point in 8° 47′ S., 123° 8′ E. Length, E. to W., 30 m.; breadth, 15 m. P. (variously estimated) 10–30,000.

Solör, the part of the valley of the Glommen, Norway, between about 60° 30′ and 60° 50′ N.; traversed (since 1893) by a railway.

Solothurn, French **Soleure,** irregularly shaped cant. in NW. of Switzd., between the Jura portion of cant. Bern and cant. Basel-land, mainly occupied by ranges of the Jura, but containing also in the E. and SE. portions of the valley of the Aar; somewhat smaller than the isl. of Angleesy. See **Switzerland.**

Solothurn, French **Soleure,** tn., Switzd., cap. cant. Solothurn, 18 m. N. by E. Bern; watchmaking. P. (comm.) 8500.

Solotwina, tn., Austria, Galicia, dist. S.; has salt-mines. P. <4000.

Solovetskiye Islands, Russia, govt. Archangel, White Sea; six islands surrounded by several small ones, Solovetskiy being the largest (102 sq. m.); considerable fishing of herrings. The

Solovetskiy monastery (**Solovki**) stands on Solovetskiy I. It was founded in 1429, and is one of the most venerated monasteries of Russia, visited yearly by thousands of pilgrims, a great number of whom live in the monastery, and work for it, on its steamers and fishing-boats. A biological station has lately been opened at the monastery.

Solport, par., Eng., Cumberland, 7 m. NW. Brampton. P. <250.

Solway Ash, part of eccles. par., Eng., Dorsetshire, P.O. (**Solway Ash**). See **Netherbury.**

Solway Firth, large inlet, stretching from the Irish Sea NE. between Eng. and Scot., having S. and E. the co. Cumberland, and N. the cos. Kirkcudbright and Dumfries. Breadth at entrance between St. Bees Head and Balcurry Point, 24 m. It extends inland for about 38 m., diminishing in breadth to 1½ m. At its head it receives the Esk; the Annan, Nith, Dee, and Urr join it from the Scotch, and Derwent and Ellen from the English side. During ebb tide much of the firth is a naked flat, but the tide returns very suddenly, and many accidents have been thereby caused. Its fisheries, chiefly salmon, are extensive and valuable. The railway viaduct which crosses the head of the firth between Bowness and Annan is 1960 yds. long.

Solway Light Vessel, Solway Firth, Robin Rigg Channel, 7½ m. SW. Silloth; has fixed light seen 6 m.

Solway Moss, tract, Eng., on the NW. border of the Eskdale div. of Cumberland, between the Sark and the Esk, about 10 m. N. by W. Carlisle. It was formerly a bog, but has been reclaimed. In 1542 it was the scene of a battle in which the Scottish army of James V. was routed by a small body of English.

Solyma, mt., Lycia. See **Takhtalu.**

Syderö, one of the Faroe Is., 20 m. S. Strömö.

Soma, tn., Asia Minor, vilayet Smyrna, sanjak Sarukhan, 54 m. NNE. Smyrna; coal-mine worked near. P. 6000; Moham. 4000; Orthodox Greeks, 2000.

Soma, vil., Tunis, 37 m. ESE. Tunis.

Somain, tn., France, dep. Nord, arr. and 9 m. E. by S. Douai; has coal-mines. P. 5300.

Somali (native name, 'dark, black'), important E. African tribe of Hamitic-Semitic origin inhabiting Somali-land (*q.v.*). Chief occupation, pastoral pursuits. In the interior, the Somali border upon the Gallas (*q.v.*), the boundary line between the two tribes running from Harrar to the Lower Jub R., and from there to the Lower Tana R. The principal subdivisions of the Somali, according to Guillain and Révoil, are the following: Eyssa, Gadabursi, Aji, Mejertin, Hawia, Abgal, Ranu, Rami, Rahanwir. P. unknown. [**H. G. S.**]

Somali-land, the most eastern country of Africa, forming the huge penin. between the Gulf of Aden and the equatorial coast of the Indian Ocean (the *Sinus Barbaricus* of the ancients). The country consists of savannahs and deserts, the former prevailing in the SW., the latter in the NE. A mountain range, rising near Harrar to 7400 ft., runs from Kaffa to Cape Guardafui, and from this range the country slopes gradually towards the S. Somali-land is a country of few rivers. The largest, the Webi Doboi, takes its rise in the mountains S. of Shoa, and traverses the whole of Somali-land, but it is a characteristic sign of the topographical and meteorological peculiarities of the country, that the Webi Doboi is unable to reach the sea, but finds its termination in a small lake close to the Indian Ocean. Another river, the Jub (Juba, Webi Giwena), belongs only in its lower course to the Somali country. In the NE. parts of Somali-land numerous periodical rivers (wadis) are met with, the largest being the Wadi Nogal, Tug Dehr, and Tug Daror. The only towns of importance are the Arabian settlements on the sea-coast, Zeyla, Berbera, Mogdishu. Among places in the interior the principal are Harrar, Faf, Barri, Mudug, Shidle, Gelidi, and Bardera. Somali-land belongs to the British and Italian spheres of influence. British Somali-land includes an area of 75,000 sq. m., and extends from Ras Jebuli (W. of Zeyla) to the 49th degree of E. lat., and in the interior from Jildesa to Milmil, and thence along the 8th degree of N. lat., the boundary line ultimately reaching the coast near Bandar Ziyada. The Italian sphere of influence extends S. of British Somali-land. About the southern boundary line of the former, see British E. Africa. The interior of Somali-land remained unexplored till 1885, when James reached Barri on the Webi Doboi. The first who crossed the whole of the Somali Penin. (from Obbia to Berbera) was Robecchi (1891). See **Somali.** [**H. G. S.**]

Somatino, vil., Sicily, prov. and 11½ m. S. by W. Caltanissetta.

Somerset ('seat or abode of the Sumars'), maritime co., Eng., bounded N. and NE. by the estuary of the Severn and Bristol Channel; divided into the following parl. divs.:—

	Acres.	P. 1891.
Northern	124,630	53,412
Wells	133,152	55,581
Frome	101,444	53,552
Eastern	170,394	50,151
Southern	104,773	51,300
Bridgwater	141,668	48,226
Western, or Wellington	261,457	48,122
Parl. bors.	5,967	123,993
Total	1,043,485[1]	484,337

[1] The administrative county excludes the co. bors. of Bristol and Bath. Area, 1,040,106 ac., P. 386,866; or including co. bors., 1,042,488 ac, P. 438,710.

There are three natural dists.—the N., between the Mendip range and Bristol; the Sedgmoor plain, mostly alluvial but interrupted by ridges and heights like Brent Knoll, Glastonbury Tor, and the Poldens; and in the S., a mountainous region with Blackdown on the Devonshire border, Quantock (1262 ft.) extending to Exmoor and the sea. The highest point of this S. dist. is Dunkery (1709 ft.), and in it rise the upper streams of the Exe which flow to the English Channel. Geologically this county is chiefly Carboniferous, with some traces of Old Red Sandstone in the Mendip Range, though the steep crags and picturesque lines are due to limestone, with caves and gullies hollowed out by the streams and weathering. The coal-measures, 7000 ft. thick, include an upper and a lower series; chief workings at Bristol, Radstock, Bath Paulton, &c., in the Bristol coalfield. After coal, freestone is the most important mineral; lead has been dug in the Mendips from early times, but that industry has recently been unimportant; fireclay is worked at Combe Hay (Lower and Upper), S. Stoke, Bath, &c.; iron ore near Wells, Winford, &c.; lead ore at Winford and Cuthberts; manganese ore at Higher Pitts; ochre at Flax Bourton and Winford; slate at Wiveliscombe and Washford; and stone at Limpley Stoke, Freshford, &c. Much of the surface of this county is alluvial; and amongst the most famous caves are Banwell (bones), Cheddar (stalactites), and Wookey (hyæna remains, &c.). The chief rivers are the lower Avon from the moors of Wiltshire, navigable to Bath, and the Parret from Dorsetshire, a tidal stream to Bridgwater. The Devonshire Exe has its rise in Exmoor Forest in this county. The whole county is intersected by the G. W. R. and L. & SW. R. and their numerous branches. Manufactures, woollen and worsted in many towns; silk at Frome, Taunton, and Shepton-Mallet; shirts and collars at Taunton; lace at Chard; gloves, crape; some large potteries and breweries; and at Frome large printing works. The Vale of Taunton produces good wheat, and the rivers are generally rich in meadow land. The county is noted for its orchards, its cider, and its Cheddar cheese. From the agricultural statistics in **Appendix,** pp. 7–9, it may be seen that in 1893 the percentage of area under orchards exceeded even that of Kent, and that the county ranks high in cattle-rearing. The 'shire' was formed by the early English by gradual conquest from the Welsh. The Romans had a great town at Bath called *Aquæ Sulis,* as the remains of their baths still show, and in many other places there are traces of their rule. Other antiquities refer to King Arthur, Glastonbury monastery in the Vale of Avalon, and Alfred the Great's struggle with the Danes, &c. This county is in the diocese of Bath and Wells and parts of that of Gloucester and Bristol. It has two cities, Bath and Wells; two parl. bors., Bath and Taunton. Besides those three, four other towns are mun. bors., Bridgwater, Chard, Glastonbury, and Yeovil; Weston-super-Mare, a favourite watering-place; Bridgwater, an important harbour. See **England,** table.

Somerset, electoral div., Ire., Londonderry, dist. Aghadowey.

Somerset, co., Queensland, in the angle in the extreme N.

Somerset, settlement, Queensland, N. Cook co., in 10° 45′ S., 142° 40′ E., the most northerly settlement on mainland; pearl-fishing stn. Mean temp. (2½ yrs., 1865–67), yr. 79.3° F., Feb. 80.9°, Aug. 76.2°.

Sommatino, tn., Sicily, prov. and 11 m. S. Caltanissetta, on a high hill. P. 5400.

Somma Vesuviana, tn., Italy, Campania, prov. and 10 m. E. by N. Naples. P. <5000.

Somme (*Samara*), riv., France, rises NE. of St. Quentin, dep. Aisne, flows W. past Ham, Péronne, Amiens, and Abbeville, and enters the English Channel between Crotoy and St. Valery. Chief affluent, the Arve, on the left. It has been canalised to Amiens, and is connected with the Oise and Scheldt by the canal of the Somme. Length, 147 m.

Somme, maritime dep., N. France, traversed from SE. to

NW. by Somme R., formed in 1790 of parts of Picardy (Vermandois, Santerre, Amiénois, Ponthieu, Vimeu, and Marquenterre), with a small dist. from Artois; divided into five arrs.: Amiens, Montdidier, Péronne, Doullens, and Abbeville. Coastline almost unbroken, except by the wide and shallow estuary of the Somme in the centre, the Bay of Authie on N., and mouth of Bresle on S. frontier—is bordered N. of the Somme by sand-dunes, S. of that river to near Ault by great banks of shingle, and further S. by chalk cliffs. Along the coast various tracts have been reclaimed, and afford good pasturage, as the Marquenterre, between the Somme and the Bay of Authie, the Cayeux low-lands, and the salt-meadows on the shores of the Somme and Bay of Authie. Surface consists mainly of undulating plains, highest point (690 ft.) in SW. near Bresle R. The dep. is drained chiefly to the Somme, partly also to the Authie and the Bresle. The Somme, of which the length in the dep. is about **125 m.**, flows through a flat, marshy valley, principal tribs., **r. bk.** Ancre; l. bk. Avre, Noye, and Celle; the Bresle receives **r. bk.** the Liger. The Somme (*q.v.*) is now an artificial waterway. Climate [**Amiens**]. Principal cereals, wheat and oats; sugar-beet is a very important culture (Santerre, Péronne); flax and hemp are grown in the centre; apples for cider in various parts (best in W.); potatoes on the coast for export. In the production of peat the dep. ranks first, producing more than ⅘ of the total for France (Longpré, Long, Fontaine, &c.); phosphates of lime (Hallencourt, Beauval). Textile industries are the most important; linen and hemp (arrs. Amiens, Abbeville, Doullens); cashmeres, fancy wool, and silk stuffs (Amiens); hosiery (Santerre); gauzes, &c. (Péronne); carpets (Abbeville); with upholstery, and cotton goods, and the allied industries of bleaching, printing, and dyeing. The sugar manufacture is next in importance; metallurgical and chemical works, &c. Area, 2423 sq. m. P. (1891) 546,509. See **France,** table.

Sommen, lake, Sweden, prov. Östergötland, 30 m. SSW. Linköping, 15 m. E. Lake Wetter; it discharges its surplus waters by the Savarta northward into Lake Roxen and the Baltic Sea. Length, 25 m.; breadth, 8 m.

Sömmerda, tn., Prussia, prov. Saxony, circle Weissensee, 13 m. NNE. Erfurt, with manufacture of arms and ammunition. P. (1816) <2000; (1890) <5000.

Sonámukhi, tn., Brit. India, Bengal, Bánkurá dist., 78 m. NW. by W. Calcutta. P. (1881) <5000; (1891) 13,500; Hindus, 13,300.

Sonamura, vil., India, Bengal, Hill Tipperah, 55 m. ESE. Dacca. P. <5000.

Sonapet, small riv., Brit. India, W. Bengal, in E. of Lohardaga dist., flows E. to Subarnarekha; alluvial gold in its valley.

Sonápur, market-vil., Brit. India, Assam, Kámrúp dist., in 26° 16′ N., 91° 40′ E., police outpost station. P. <5000.

Sonápur, decaying seapt., Brit. India, Madras, on the Bay of Bengal, dist. and 26 m. SW. by S. Ganjam; has govt. salt factory at Surla, 3 m. distant. P. <5000.

Sonárgáon, vil., Brit. India, Bengal, Dacca dist., 2 m. from the Brahmaputra; formerly famous for the manufacture of fine muslin. The ancient Mohammedan cap. of E. Bengal, now an insignificant village called Painám. P. <5000.

Sonbarsá, vil., Brit. India, NW. Provs., dist. and 22 m. from Ballia. P. (1881) 8700.

Son Canals, a grand system of irrigation canals, India, Behar prov., all branching from an anicut or dam, consisting of a mass of masonry 12,500 ft. long by 120 ft. broad, across the Son at Dehri. The plan comprises the Dehri anicut, a Main W. Canal with Arrah and Baxár canals, and Main E. Canal with Patna branch; the two main canals are unfinished.

Soncino, tn., Italy, Lombardy, on the Oglio, prov. and 20 m. NNW. Cremona. P. 5600.

Sonda, tn. and ruined fort, Brit. India, Bombay, N. Kanara dist., 10 m. N. Sirsi; a religious festival is held here in April–May. P. <5000.

Sondanais, or **Sundanais,** people of Java I., forming the greater part of the population of the W. provs., numbering about 5 millions.

Söndeled, vil., Norway, prov. Christiansand, on Söndeled Fjord; has fisheries, and trade in wood. P. <4000.

Sonderburg, tn., Prussia, prov. Schleswig-Holstein, 16 m. NE. by E. Flensburg, on Alsen I. and the Alsener Sund (Sound), cap. Sonderburg circle; united by a pontoon bridge to the mainland; steamboat communication with Flensburg, Kiel, and Apenrade. P. (1803) <3000; (1890) <5000.

Sondershausen, tn., Ger., cap. princip. Schwarzburg-Sondershausen, 29 m. NNW. Erfurt, at the confluence of the Wipper and Bebra; manufacture of woollen goods, tapestry and needles. P. 6600.

Söndfjord, inlet, Norway, W. ct., prov. N. Bergenhus, in about 61° 30′ N., 40–50 m. long.

Söndre, Norwegian, 'southern.'

Söndre-Aurdal, vil., Norway, prov. and 52 m. W. Hamar; has cattle and horse raising, and trade in wood. P. (comm.) 5500.

Söndreland, vil., Norway, prov. and 28 m. W. Hamar, on the Randsfjord. P. (comm.) <5000.

Sondrio, tn., Italy, Lombardy, cap. prov. Sondrio, on the Adda, 34 m. N. by E. Bergamo. P. <5000.

Sone, riv., India. Same as **Son.**

Sonepat, municip., Brit. India. See **Sonpat.**

Song, Tongkinese, 'river.'

Songa, vil., W. Africa, Congo Free State, 98 m. S. by W. Leopoldville.

Songarh, vil. and fort, India, Káthiáwár Penin., 60 m. SW. Cambay. P. <5000.

Song-bo ('black river'). See **He-ho.**

Song-Dinh, maritime tn., Tongking, prov. and 21 m. ENE. Kwang-yen, on Hongai Bay, in 21° 5′ N.

Songeons, tn., France, dep. Oise, arr. and 13 m. NW. Beauvais. P. <2000.

Songfan ('wild men'), collective name given by the Chinese to the indigenous tribes in Formosa I.; they resemble the Malays, and are usually connected with this race.

Songhai, or **Sonrhai,** tribe, Africa, western Sudan, on both shores of the middle Niger, from S. of Timbuctu to its confluence with the Sokoto R., and in the interior of the large bend of the Niger. They were formerly very powerful, but are now subjected, except in some isolated dists., as the mountains of Hombori.

Songju, tn., Korea, 65 m. NW. Fusan.

Songka, or **Nganka,** riv., in the N. of Annam, prov. Ngean, flows on the whole SE., receiving about the middle of its course the Nam-mo from the S., and lower down the Song-kon from the N., near its mouth unites with the Ngan-sau from the S., and finally enters the Gulf of Tongking by an estuary called Kwa-hoi in 18° 50′ N.; said to be navigable nearly to its source.

Songkau, riv., Tongking, flows from the N., and joins an arm of the Songkoi delta, about 15 m. N. by E. Hanoi.

Songkhra, or **Songkla,** tn., Malay Penin. See **Singgora.**

Songkikong, riv., Tongking. See **Li-kiang.**

Songkoi, or **Songka,** Annamite name of the **Songtao** of Tongking, also known in Europe as the **Red R.,** the principal riv. of Tongking, rises in the SE. of Yünnan, China, and flows SE. past Manhao, in about 105° 20′ E., receives from the S. the He-ho, or Black R., and soon after breaks up into numerous arms, traversing a delta filling the triangle between the mts. of Tongking. On the main stream stands Hanoi, cap. of Tongking; and on the Kwa-kam, one of the northern arms, Haifong, the chief seapt. of Tongking; navigable by boats, though with difficulty on account of rapids, to Manhao, in about 103° 10′ E. In the Tongking portion of the river the chief obstructions to navigation have been partially removed, so that stern-wheel steamers of not more than 2–3 ft. draught, and with a speed of 9 knots, can ascend as far as Laokai, on the Tongkinese frontier.

Songkon, riv., Annam. See **Songka.**

Song-lo ('clear river'), Tongking. See **Tsin-ho.**

Songma, riv., Tongking, flows SE. into the Gulf of Tongking. Length, 280 to 310 m.

Songo, country, equatorial W. Africa, in the interior of the Portuguese possessions of Angola, bounded N. by the Quize and S. by the Luvoe, r. bk. tribs. of the Quanza.

Songo Manara, isl., Ger. E. Africa, to the S. of Kilwa Kisiwani, in 9° 5′ S.

Song-tubon, riv., Annam, flows E. and then N. into the Bay of Turan by several mouths. In its upper basin are the rich coal-mines of Nong-son.

Songwe, riv., equatorial E. Africa, flowing E. into the N. end of Lake Nyassa, which it enters in 9° 41′ S. It forms part of the frontier between the British and German spheres of influence. Another Songwe flows NW. into the SE. end of Lake Hikwa, or Kukwa.

Sonklar Spitze, summit of the Alps, Tirol, second highest point of the Stubai group. Alt. 11,410 ft.

Sonmiáni, vil., Baluchistan, on Sonmiáni Bay, in the SE. of the country, 49 m. NW. by N. Karáchi.

Sonna, electoral div., Ire., W. co. Westmeath, bar. Moygoish, 6 m. NW. Mullingar.

Sonnagh, electoral div., Ire., Longford, dist. Ballinalee.

Sonnagh, electoral div., Ire., Mayo, dist. Lowpark.

Sonnblick, mt., Austria, Salzburg, in the Hohe Tauern group; on its summit is the highest meteorological station in Europe, founded 1886. Alt. 10,170 ft. Mean temp., yr. 19.6° F., Feb. (the coldest month) 8.6°, two warmest months 33.3°; average total period above freezing-point, 66 days.

Sonnborn, vil., Prussia, Rhine Prov., circle Mettmann, 2½ m. SW. Elberfeld. P. <2000.

Sonneberg, tn., Ger., duchy Saxe-Meiningen, cap. circle Sonneberg, 11½ m. NE. by E. Koburg; very important manufacture of toys and articles of luxury. P. (1834) <4000; (1890) 11,500.

Sonnenberg, tn., Austria, Bohemia, 28 m. WSW. Teplitz, and 5 m. E. Pressnitz. P. <2000.

Sonnenberg, vil., Prussia, prov. Hesse-Nassau, govt., circle, and 4 m. ENE. Wiesbaden. P. <3000.

Sonnenburg, tn., Prussia, prov. Brandenburg, circle Oststernberg, 8 m. ESE. Küstrin; silk-weaving. P. <5000.

Sonning, par., Eng., Berkshire, Wokingham div., on the r. bk. of the Thames, 4 m. ENE. Reading, 2 m. W. Twyford stn., PMT.O. P. <750; eccles. par. is partly in Oxfordshire.

Sonnino, tn., Italy, prov. Rome, 17 m. SSW. Frosinone. At the beginning of the 19th century the forests in the neighbourhood were much infested by brigands. P. <4000.

Sonnois, dist., France. See **Saosnois.**

Sonobe, tn., Japan, 22 m. NW. Kyoto. P. <3000.

Sonoki, tn., Japan, Kiushiu, 22 m. N. Nagasaki. P. <5000.

Sonoma, tn., U.S., California, Sonoma co., 30 m. N. San Francisco. P. <1500.

Sonora, mining city, U.S., California, Tuolumne co., 112 m. E. by N. San Francisco. P. <1500.

Sonora, one of the states of Mexico, stretching along two-thirds of the NE. ct. of the Gulf of California, between the mouths of rivs. Colorado and del Fuerte; very dry region. Culture and pastures along the river valleys. Important silver-mines (Hermosillo, Alamos). Guaymas is one of the best harbours. See **Mexico,** table.

Sonpat, Sonepat (census), municip., Brit. India, Punjab, dist. and 30 m. NNW. Delhi. In the neighbourhood are some ancient Pathán tombs. P. 12,600; Hindus, 5300; Moham. 6500.

Sonpur, vil., Brit. India, Bengal, dist. Sáran, in 25° 42′ N., 85° 13′ E., at confluence of the Gandak and Ganges; famous for its great fair, probably one of the oldest *meláś* in India, and its annual race meeting frequented by Europeans. P. <5000.

Soufrière, vil., W. Indies, on the W. ct. of St. Lucia.

Souillac, tn., France, dep. Lot, on the r. bk. of the Dordogne, arr. Gourdon, 43 m. SE. by E. Périgueux, 31 m. N. Cahors. P.<3000.

Souilly, vil., France, dep. Meuse, arr. and 10 m. SSW. Verdun-sur-Meuse. P.<2000.

Söul (sö-ul), or **Seul, Seoul,** and sometimes **Syoul,** city, cap. of Korea, 25 m. E. by N. Chemulpo, a few miles to the N. of the Han R.; situated in a hollow surrounded by rocky hills up and down which run the city walls, enclosing an area of 10 sq. m. The interior has three streets 60 yards wide and well kept, but the remainder is a labyrinth of narrow, filthy, uneven lanes. Founded 1397. Population within the walls about 200,000, in addition to which there are about 50,000 inhabitants in the suburbs outside.

Soulac-sur-Mer, vil., France, dep. Gironde, arr. Lesparre, 27 m. NW. by N. Pauillac. P.<2000.

Soulaines, vil., France, on the E. border of dep. Aube, arr. Bar-sur-Aube, 31 m. E. by N. Troyes. P.<2000.

Soulanges, co., Canada, occupying the S. part of the angle belonging to Quebec, between the rivs. St. Lawrence and Ottawa.

Sound, par., Eng., Cheshire, Eddisbury div., 3 m. SW. by S. Nantwich, 1½ m. ENE. Wrenbury stn., P.O. P.<250.

Sound, The, Danish **Öre Sund,** channel between Sweden and the Danish isl. of Seeland, connecting the Baltic with the Kattegat and North Sea. Length N. to S. 30 m.; breadth at its narrowest point, between Helsingör (Elsinore) and Helsingborg, 3 m.; depth 4–20 fathoms. The Danish sovereigns formerly possessed the terr. on both sides of the strait, and they long continued to exact toll from all foreign vessels passing through it at Elsinore, the average annual amount of which was £153,644, and the number of ships passing the Sound about 20,000 annually. In 1857 the Sound dues were abolished by treaty with the commercial nations of Europe on the payment of £3,500,000, of which one-third was paid by England. The Sound is seldom closed by ice. In the period 1871–91, this happened only in the winters 1878-79 and 1880–81.

Sounds, co., New Zealand, South I., on the NE. ct., crossed by 41° S.

Southacre, par., Eng., Norfolk, 3 m. N. Swaffham. P.<250.

South African Republic, popularly known as the **Transvaal,** republic, S. Africa, about one-third larger than Great Britain, lying between about 25° and 32° long. E., and 22° and 28° lat. S.; bounded on the N. and NW. mainly by the Limpopo, separating it from Brit. South Africa and Bechuanaland, E. by the Lobombo and Longwe Mts., separating it from Portuguese E. Africa, further S. by an arbitrary line separating it from Swazi-land and Zulu-land, and S. by the Orange Free State (from which it is separated mainly by the Vaal), Natal, and Zulu-land; divided into dists.; cap. Pretoria. **Surface.**—The country is mainly a plateau, from 3000 to upwards of 4000 ft. in alt., studded with isolated mountains and longer or shorter mountain ranges running in various directions. Some of the more important have an approximately E. to W. trend, such as the Magaliesberg chain, extending from Rustenberg to near Pretoria slightly N. of the latter town; the well-known Witwatersrand ridge to the S. of Pretoria; and the Zoutpansberg, Murchison, and Drakensberg Ranges in the NE. of the country. The tops of the mountains are generally flat, and their denuded sides lay bare the rocky under-features. The highest parts of the plateau are in the region round Pretoria, whence the **rivers** radiate in all directions to the frontier rivers or across the frontier. The principal tribs. of the Vaal are the Gansvlei, Sand and Kaffir Spruits, Likwa, Krom, Waterval, Klip, Mooi, and Hartz Rivs.; those of the Limpopo, the Jokesky, Hennops, Sandaapies, Pienaars, Pongola, Nylstroom, Sand, Zehlaba, and Olifant's Rivs. With the exception of the two main rivers and their most important affluents, the streams have but little water in winter. In summer (the wet season), on the contrary, they are transformed into roaring torrents. The rivers running into the Indian Ocean S. of the Limpopo are the Crocodile and Komati, which unite to form a single stream that enters the ocean on the N. side of Delagoa Bay under the several names of Manisa, M'Komoyas, or St. George's; the Maputa, formed by the union of the Usuta and Pongola, also discharging itself into Delagoa Bay (S. side); the White and the Black Umvolosi and the Buffalo, the latter a trib. of the Tugela. The **only lake** of any importance is Lake Chrissie, 36 m. in circumference. There are numerous **salt-pans** throughout this large area; also some mineral springs (sulphur), the most renowned being that at Warmbad, near Nylstroom, in the Zoutpansberg dist., which is said to be particularly efficacious for rheumatism, its kindred diseases, and for scrofulous eruptions. Advancing from S. to N., the **climate** varies from temperate through semi-tropical to tropical; and consequently the flora partakes, according to latitude, of the peculiarities of these regions. The shrubs and trees of the Transvaal are those of S. Africa in general, though the northern dist. exhibits some essentially tropical trees, such as ebony. The animal kingdom has here more representatives than in any other part of S. Africa. From a climatic point of view, the country is divided into two regions—the High Veld between the Vaal and the Magaliesbergen, and the 'Bosch Veld' beyond. In summer the northern region is the warmer, and in winter colder than the High Veld. Winter is here the dry season. The country is admirably suited for raising all kinds of grain and agricultural produce, as well as for cattle, sheep, and goat breeding. Certain industries (strongly 'protected' under the disguise of 'concessions,' &c.) have been started in a few towns; such as iron-foundries, distilleries, breweries, sugar-boiling houses, tanneries, tobacco factories, potteries, steam, corn, and saw mills; dynamite and gunpowder factories. Transvaal tobacco is much esteemed throughout S. Africa. **Mineral Products.**—The S. African Republic is with-

out exception the richest in minerals of all the settled states of southern Africa. Gold is found in the districts of Pretoria, Heidelberg, Potchefstroom, Lydenburg, Rustenburg, Marico, Zoutpansberg; silver in Pretoria, Middelburg, Rustenburg; copper in the same dist., as well as in Zoutpansberg; lead and plumbago principally in Marico; cobalt in Middelburg; iron everywhere, particularly in Rustenburg, Zoutpansberg, and Waterberg, where there are entire mountains of it; zinc in Middelburg; tin, bismuth, and platinum in Rustenburg; cinnabar in Lydenburg. Limestone is everywhere abundant, and a natural cement is dug in many places. The eastern frontier of the state furnishes coal, met with almost on the surface. There are coalfields about 40 m. from Pretoria, near Heidelberg; and excellent coal is now mined in increasing quantity at Boksburg, E. of Johannesburg, which is now connected with the coalfield by rail. Of all the minerals mentioned, by far the most important is gold, and by far the most productive goldfield is that of **Witwatersrand,** popularly known simply as the Rand, a ridge more than 60 m. long, about 30 m. due S. of Pretoria, on the borders of dists. Pretoria and Heidelberg, extending also W. into Potchefstroom. Here promising indications of the occurrence of gold were first discovered in March 1885, and now the Rand produces more than eleven-twelfths of the gold produced in the country. Before the close of the year mining had been started, and in July 1886 a portion of the region was proclaimed a public goldfield. The town of Johannesburg speedily grew up as the mining centre of the region, and the yield of gold has since grown year by year with extraordinary rapidity. Regular returns of the output have been made since the beginning of 1888, and the results are as follows:—

Year.	Gold.	Year.	Gold.
	Oz.		Oz.
1888 . .	229,320	1892 . .	1,293,803
1889 . .	382,364	1893 . .	1,478,477
1890 . .	494,393	1894 . .	2,024,162
1891 . .	729,213		

Of the minor goldfields of S. African Republic, the most productive at present, the Kaap (De Kaap) fields, in the E. of the country, in Lydenburg dist. (centre Barberton), in a beautiful but unhealthy valley, where gold was first found in 1870, and has been actively mined since 1882; the Lydenburg field, near the cap. of the same dist., where gold has been mined since 1869 (the oldest goldfield in the country); the Komati goldfield, in the S. of the same dist. (round Steynsdorp); the Zoutpansberg fields, in the NE. of the republic, scattered over various parts of the dist.—at Marabastad and Eersteling in the SW., and in the Klein Letaba Valley N., and the Selati Valley (with Leydsdorp and Spitzkop) S. of the Murchison Range, in the SE. of the dist.; the Klerksdorp fields, near the S. frontier, in Potchefstroom and the Malmani goldfield in the W., in Marico dist. Till recently, waggons formed the only means of transport in the South African Republic, and the government of the country was long adverse to the introduction of railways, but the rapid development of these goldfields has at last caused the government to yield. Since the 1st of Jan. 1893 Pretoria has been connected by rail with Cape Town, and since the 8th of July 1895 with Delagoa Bay; the latter line, with branches running N. to the Selati goldfield and S. to the Kaap field, Pretoria, is also being (in 1895) connected with the railway system of Natal at Charlestown. The **monetary system** is the same as the English, except that the sovereign is slightly finer. Under the present **constitution,** as last modified in 1890, the legislative authority is essentially vested in the first chamber of the Volksraad, a body consisting of 24 members elected solely by burghers who acquired burgher rights before 1890. All members of this chamber must be 30 years of age, and born in the country, or must have been qualified voters for 15 consecutive years, and must be members of a Protestant church, and possess fixed property in the country. Owing to the large influx of foreigners (chiefly British subjects) into the country through the development of the goldfields, an act was passed in 1890 creating a second chamber to have a voice on such subjects as most closely concerned the mining industry, and to be composed of members elected by voters qualified by residence for two years in the country, naturalisation, and the taking of an oath of allegiance. The first chamber, however, has the right of veto on all measures passed by the second chamber, and it is left to the discretion of the President to determine what measures passed by the second chamber shall be sent up to the first chamber for approval or rejection. The executive authority is vested in the President, elected for five years by all voters in the country qualified to vote for members of the first chamber; a state secretary, elected by the Volksraad for four years; a commandant-general, elected for ten years by general election throughout the state; a secretary for native affairs, and two non-official members, elected for three years by the Volksraad. Each dist. is presided over by a 'landdrost,' who acts as magistrate and civil commissioner. Public **education** is subsidised by the state, but in all subsidised schools instruction must be given in the Dutch language. English is, nevertheless, the language chiefly spoken in the towns and business places. The South African Republic owes its origin to a number of Dutch farmers ('Boers'), who in 1840 left the Cape Colony in consequence of their discontent with British rule and settled first in Natal, but being expelled from thence, withdrew to the region N. of the Vaal, and established a republic, which in 1854 was recognised by the British. Troubles arose with the natives around them, and during one of these disturbances the British intervened in 1877 and annexed the territory. The Boers, however, rose in rebellion in 1880, and after a short war, in which the British were worsted, the independence of the country, subject to the 'suzerainty' of the British crown, was again recognised. In 1895 the South African Republic took over the administration of Swazi-land (*q.v.*). Area, 119,139 sq. m. P., whites, 'according to the rather incomplete census of April 1, 1890,' 119,000; natives estimated in 1894 at about 370,000.

Southall, eccles. par. and tn., Eng., Middlesex, div. and 4 m. WNW. Brentford, on the G. W. R. Market-day, W. P. 5000.

Southam (*Sucham* in Domesday Book), par., Eng., Warwickshire, Rugby div., 7 m. ESE. Leamington, 3 m. E. **Southam Road and Harbury** stn. on G. W. R.; it has an ancient Gothic church and a mineral spring. Fairs are held. PMT.O. Market-day, M. P. <2000.

Southam and Brockhampton, par., Eng., Gloucestershire, Tewkesbury div., 2½ m. NE. by N. Cheltenham. P. <500.

Southampton, vil. and port of entry, Canada, Ontario, Bruce co., on Lake Huron, 56 m. W. Collingwood, on a railway at the mouth of the Saugeen R. P. <1500.

Southampton, parl. and (since Henry I.) mun. bor. and co. bor., and seapt., Eng., Hampshire, 12 m. SSW. and in the diocese of Winchester, on a penin. between the Test and Itchen Rivs., with terminal stn. on SW. R. The remains of its town walls, with a fine arcade on the W. shore, and four out of seven gates, with ancient Norman house, old prison, &c., show its ancient importance, still largely maintained and growing by the traffic of its harbour, the annual revenue of the Dock Company in 1890 being £1,113,000. In 1891 the docks were acquired by L. & SW. R. Company. Besides considerable trading with the French coast and the Channel Is., it has large imports of cattle from Spain and Portugal, and is the mail steam-packet station for West Indies, Brazil, and South Africa, and a place of call for several lines of Atlantic steamers. The docks can float the largest steamers. A new tidal dock, costing £300,000, was opened in 1890. Total length of the dry docks, including new graving dock (opened in 1895), 2350 ft.; depths of the five docks, at high water, respectively 21, 15, 25, 25, and 28½ ft. The Town Quay is 6072 ft. long, and the quays of the four docks belonging to the L. & SW. R. 3000, 2580, 1792, and 3735 ft. respectively. An extension adding 3550 ft. of quayage is nearly completed, and further additions are proposed. The united area of the three largest docks is 44½ ac., and their depth at low water 18 ft. (Open Dock) to 26 ft. (Empress Dock), at high water 28 ft. (Close Dock) to 38 ft. (Empress Dock). The depth alongside the new quay walls is at low water 28 ft., at high water 40 ft. For shipping statistics, see **Appendix,** p. 13. There is a steam floating bridge over the Itchen. *Suth Hamtun* is mentioned in the Saxon Chronicle; its prosperity began under the Normans, from the ready transit to Normandy. Richard II. enlarged the castle and fortifications. Among the chief antiquities are the ruins of Netley Abbey and others. The common has been transformed into beautifully wooded pleasure grounds of 430 ac. area. The present area of the municipal borough is 2004 ac. In May 1895 it was arranged that the existing borough be extended to include the Shirley and Freemantle district, part of Millbrook par., and parts of Bitterne and South Stoneham pars., the whole extended area amounting to 4357 ac. Market-day, F. Mean rfall. (1866–80), Cadland (alt. 52 ft.) 35.5 in.; Ordnance Survey Office (alt. 75 ft.) 33.1 in. Mun. and co. bor. P. (1801) 7900; (1851) 35,300; (1871) 53,700; (1891) 65,300; parl. bor. (two members) P. 93,600.

Southampton, tn., U.S., Massachusetts, Hampshire co., 7 m. W. by N. Holyoke. P. <1500.

Southampton, vil., U.S., New York, Suffolk co., on Long I., 86 m. E. by N. Brooklyn. P. <1500.

Southampton, co., U.S., Virginia, in the SE., on the S. frontier, crossed in the E. by 77° W., traversed by the Nottoway R.

Southampton, County of. See **Hampshire.**

Southampton Island, Canada, N. of Hudson Bay, in about 62° 50′–66′ N. and 80° 87′ W.; coasts rugged and mountainous.

Southampton, South, isl., Canada, S. of Hudson Bay, S. of Southampton I., of which it was formerly supposed to be the S. extremity; its SW. point is about 61° 58′ N.

Southampton Water, fine inlet, Eng., Hampshire, stretching from the Solent and Spithead NW. into the interior of Hamp-

shire, forms one of the safest harbours on the English coast. Length, 11 m.; greatest breadth, about 2 m.

South Australia, colony, Australia, comprised between 129° and 141° E., from the Southern Ocean to 26° S., and N. of that parallel between 129° and 138° E. to the Sea of Arafura and the Gulf of Carpentaria. The latter region (N. of 26° S.), known as the Northern Territory, was incorporated with the colony in 1863; its northern part forms the penin. of Arnhem Land. An error having been detected in the position of the Victorian frontier line, South Australia now claims from Victoria a strip of land along the 141st meridian 1½ m. wide and 142 m. in length. The name, South Australia, which is inappropriate, was selected owing to the belief that it would ultimately embrace the terr. now belonging to Victoria. The S. ct. is penetrated by deep arms of the sea; Eyre's Penin. juts S. between the Great Australian Bight and Spencer Gulf, while Yorke's Penin. separates the latter from St. Vincent Gulf. Off the coast are Kangaroo I. and several groups of small islands (Nuyt's Archipelago, Investigator group, Sir Joseph Bank's group, Whidby Is., &c.). The N. ct. is indented, besides the Gulf of Carpentaria, by Arnhem Bay, Van Diemen's Gulf, Port Darwin, and Queen's Channel; off the coast are Melville, Bathurst, and the Wessel Is., Groote Eylandt, and Sir Edward Pellew's group.

Surface.—The principal mountains are the Mount Lofty Range, S. and E. of Adelaide, highest point 2234 ft.; the Flinders Range, parallel with the NE. part of Spencer Gulf, and stretching N. to Lake Blanche, highest points Mount Remarkable and Mount Brown, each 3100 ft.; the Gawler Range, mainly E. and W., in Eyre's Penin., S. of Lake Gairdner, highest point about 2000 ft.; the Macdonnell and Musgrave (4500 and 4000 ft.), with the Stuart and other ranges (E. and W.) in the centre, and the Ashburton Range (N. and S.) in the Northern Terr. A large tract in the interior, S. of the tropic, forms a basin under 600 ft. in alt., and of which Lake Eyre occupies the lowest depression; in the W. the low land is continued S. to Spencer Gulf and the Gawler Range, and in the E. to the Mount Gambier region, on the Victorian frontier, in the SE., where are several extinct volcanoes. Along the SW. ct., between Fowler Bay and Port Eucla, are the Nullarbor Plains, extending inland for about 100 m., and with precipitous seaward cliffs 250-300 ft. in height. The principal rivers are the Murray (lower course), the only important river in the S.; in the N., the Roper (navigable for nearly 100 m. by sea-going steamers), Alligator Rivs., E. and S., Adelaide, Daly, and Victoria, all navigable to a greater or less extent; the principal river in the interior is the Finke, flowing S. to Lake Eyre, which, however, it only reaches in times of flood, as do also other tribs. of the same basin, Cooper Creek or Barcoo, Diamantina, Warburton, &c. The colony contains all the largest lakes in Australia—Gairdner, Torrens, Frome, with many intervening lagoons, N. of Eyre's Penin. and Spencer Gulf, Eyre further N., with Gregory, Blanche, and Blanchwater to the NE., and Amadeus, on the W. Australian frontier, all salt; several fresh-water lakes occur about the mouth of the Murray (Alexandrina, &c.), and in extinct craters in the SE. (Blue Lake, &c.). The Coorong, an arm of the sea, ½ to 2 m. in width, stretches SE. of Encounter Bay for about 100 m. As regards **geological structure,** Palæozoic formations, with outcrops of granite and other igneous rocks, predominate in the higher parts; the great basin is formed of Cretaceous rocks, overlaid in parts with Tertiary deposits, forming table-topped hills; Tertiary and Post-Tertiary deposits elsewhere cover a large part of the country; the Nullarbor Plains are formed of crystalline limestone. A great sandy desert stretches N. from Lake Eyre to near the tropic, and smaller desert tracts occur further S.; mallee (*Eucalyptus dumosa*) scrub, with occasional grassy plains, covers a considerable area on both sides of the Murray, but large tracts of this land are now being reclaimed for agriculture. Spinifex scrub and forests cover a wide belt in the interior along the Overland Telegraph route; the northern region is well wooded, especially near the coast. The **climate** in the N., except on the interior tablelands, is tropical, with two seasons, the dry and the wet [**Port Darwin, Daly Waters**]; in the S. it resembles that of S. Italy; the coldest months are June, July, and August, when frosts occasionally occur; the heat in summer is sometimes very great, but the temperature decreases southward from the mean annual of 70.6° F. near the tropic, to 57.6° F. near 38° S. [**Alice Springs, Port Augusta, Adelaide, Mount Gambier**]. The dryness of the air renders the heat less oppressive, and the climate in the S. is very healthy, though ophthalmic affections are caused in summer by the glare and dust; in the N., especially near the coast, intermittent fevers are common. Throughout the greater part of the colony, from about 20° in the W. and 23° in the E. to 'Goyder's Line' (see below) in the S., the mean annual rainfall is less than 10 in., in some places and in some years less than 1 in.; from about 23° the rainfall increases northward, and in Arnhem Land exceeds 40 in. Water conservation is, consequently, a matter of prime importance over large areas; and a royal commission has been appointed to deal with it, as also with projects for irrigation by the Murray R., on the plan of the Renmark colony. The sinking of artesian wells, especially around Lake Eyre, has revealed the existence of vast subterranean reservoirs, which will doubtless prove important auxiliaries in this work. **Agriculture.**—South Australia is the great wheat-producing colony of Australia, but the wheat area on unirrigated land is comprised within 'Goyder's Line of Rainfall,' which embraces the hilly region E. of Spencer and St. Vincent Gulfs, and the W. coast of Eyre's Penin. between Franklin Harbour and Streaky Bay, while of this area little more than one-third, or about 14,000 sq. m., is actually suited to wheat. The vine flourishes, yielding excellent wines; the olive occupies a considerable area, and the oil is the finest in Australia; the cultivation of fruit is rapidly extending; and sericulture on a limited scale has proved successful. The Northern Terr. seems well adapted for the culture of the sugar-cane. Sheep-rearing is an important source of wealth, and about one-seventh of the country is occupied for pastoral purposes; camels are used for transport in the interior. **Minerals** include copper, iron, gold, silver, lead, &c.; copper ores, by far the most important, have served to promote the prosperity of the colony, as gold has done in the eastern colonies; the Kapunda mine was discovered in 1843, and two years later the Burra-Burra, since eclipsed by the Moonta and Wallaroo mines; gold has been obtained at Echunga and other places; but the most important goldfields are the Teetulpa, about 230 m. NE. Adelaide, discovered in 1886, and the Wadnamuga, SE. of Teetulpa. The principal mining region in the N. is inland from Port Darwin; gold, copper, tin, iron, and other minerals occur, but owing to the cost of labour and difficulties of transit their development has made little progress; the Daly R. copper-mine is important, and the tin lodes of Mount Wells are said to be very rich. Manufactures, with the exception of wine, are mainly for use in the colony. The chief exports are wool, wheat and flour, copper, skins and hides, wine, &c. Trade is carried on chiefly with the neighbouring colonies and with Britain. Railways have made great advance since their first opening in 1856; the Southern, or Intercolonial Rly., connects with the Victorian system at Serviceton; and the Northern Rly., of which the present terminus is at Oodnadata, 688 m. N. of Adelaide, has an important branch line from Petersburg to Cockburn, on the New South Wales frontier, near the Barrier Ranges. The great Overland Telegraph from Adelaide to Port Darwin (1975 m.) was completed in 1872, the work involving the clearing of a 50-ft. track through about 500 m. of forest and scrub. As to **government,** see **British Empire, The.** Elementary education, provided for by the government, is compulsory for children within reach of a school between the ages of seven and thirteen, unless exempted as efficient; higher education is afforded by a university and a technical school. South Australia was founded by an Act of the British Parliament in 1834, and the first settlers arrived in 1836. Area, 903,690 sq. m. P. (1891) 320,400 (exclusive of Aborigines, estimated at 5000). See **Australasian Colonies,** table, **Australia,** and **British Empire, The.**

South Platte River, U.S. See **Platte.**

Southport, mun. bor. (since 1867) and parl. div., Eng., Lancashire, 15 m. SW. Preston, 18 m. N. and in the diocese of Liverpool, on a flat sandy coast, with stns. on the L. & Y. R. and W. Lancashire and Cheshire Lines Rlys. Southport has grown entirely within the 19th century, and is a rapidly rising residential town, especially for people having their business in Liverpool or Manchester. It is also a favourite winter and spring resort, on account of the dryness of its soil and climate. It has sea-water baths, but no sea-bathing on account of the flatness of its sandy beach, which necessitates the steamboat pier being carried out to a length of about ¾ m. Has an art gallery and free library, schools of science and art, &c., winter garden, marine lake, a public park of 30 ac. P. (1851) 4800; (1871) 18,100; (1891) 41,400; parl. div. P. (1891) 76,600.

Southport, favourite watering-place, Queensland, Ward co., on the E. ct., 35 m. SE. by S. Brisbane, in 27° 57′ S. P. <1500.

Spadha, cape, Turkey, N. ct. of Crete, in 23° 44′ E.

Spaichingen, tn., Ger., in the SW. of Würtemberg, Black Forest circle, cap. dist. Spaichingen, 34 m. SSW. Tübingen. P. (comm.) <3000.

Spain, Spanish **España** (from *span*, *sapan*, Phœnician for 'rabbit,' or *Espana*, Euskarian for 'margin'), ancient Greek *Hesperia* ('most western country') and *Iberia*, Latin *Hispania*, a state occupying about five-sixths of the south-westernmost (Iberian) penin. of Europe, between 36°–44° N., 10° W.–4° E., 12 m. (Tarifa) N. of Africa, naturally bounded by the Pyrenees (separating it from France for a distance of 268 m.), the Atlantic (NW., 607 m.), the Mediterranean (E., SE., 715 m.). From Portugal also, with which it has a common frontier of 495 m., Spain is mostly naturally separated by rivers and mountains. Spain is the fifth European nation in area; twice as large as Great Britain. At the extreme S. point of a narrow penin., Punta de Europa, at the entrance of the Mediterranean, the fortress of Gibraltar belongs to England (since the 18th century). The country is now divided into 49 provs. (including the Balearic and Canary Is.), which in the table below are enumerated under the old divisions or provinces still familiarly known :—

Table showing the Provs. and Old Divs. of Spain, with their Area in Square Miles, their Population in Thousands (000 omitted) at three successive Censuses, the Population per Square Mile, and the Mean Rate of Increase per Cent. per Annum between the successive Censuses for which particulars are given :—

[2] Since 1857.

Orography and Hydrography.—Spain is the highest country (after Switzerland) in Europe (2200 ft. mean alt., with four-fifths of the whole area above 1500 ft.), being almost entirely composed of a central plateau (Meseta, 2000 ft. mean alt.) with a N.–S. and NE.–SW. general inclination (Douro valley, 2700 ft.; Tagus valley, 1630 ft.; Guadiana valley, 1400 ft.), surrounded by high mountainous ridges; bounded on the N. by the Pyrenees and Cantabrian Mts., continued W. and SW. along Portugal (Medulios and Cabreira ridges, the former with Teleno peak, 7180 ft.); on the S. by the Sierra Morena, continued E. and then N. by the highlands of S. and E. New Castille (the Idubedas, with Oca–Madera, 7600 ft.; Albarracin, general alt. 5000–7500 ft.), which are separated from the Pyrenees by the large basin of the Ebro (N., 1200 ft.; S., 450 ft. mean alt.). This plateau is traversed by two NE.–SW. parallel central ridges, detached from the Idubedas border masses (Moncayo – San Felipe) and connected among themselves towards the Portuguese border, to terminate on the Atlantic coast of Portugal, thus forming three parallel fluvial basins (*Cuencas*, once enclosed lakes), viz., that of the Douro in the N. (with 1.68 per cent. gradient), between the Medulios (Vindicos) – Cantabrian – Pyrenees series, and the (Serratica) Barahona – Guadarrama – Gredos – Gata ridge (5000–6000 ft. general alt.; Almanzor, 8500 ft.); that of the Tagus in the middle (the longest of all, with 1.3 per cent. gradient), between the latter series of mountains and the Albarracin–Bascuñana highlands, the Toledo–Consuegra (4654 ft.)–Guadalupe (4725 ft.)–Montanches ridge (ancient *Carpetanos* ?); and that of the Guadiana in the S. (with 1.36 per cent. gradient), between this last series and Sierra Morena–Aroche (the ancient *Oretana*, *Marianica*), 3630 ft., continued E. to Cape San Antonio (Aitana) and the Balearic Is. The rivs. Sil–Miño, Ulla, Tambre, drain the Galician NW. corner; the Guadalquivir–Guadalimar–Jenil (400–160 ft. mean alt.) in the W., and the Segura in the E., drain the extreme S. The San Felipe–Muela de San Juan–Albarracin mountain mass, from which waters run N. to the Ebro, NW. to the Tagus, SW. to the Guadiana, also contain the upper sources of the Jucar–Cabriel, and the Guadalaviar, which flow through ramifications of the Idubedas–Universales–Ares–Espiña, which are more or less distinctly connected with the Alcaraz range (ancient *Orospedanos*), 5900 ft.; the Sagra, 7860 ft.; the Maria – Filabres, 6820 ft.; the Sierra Nevada, 11,400 ft.; and the Sierra de Ronda, 6300 ft. (Tarifa). In the extreme NE. corner the Llobregat and Ter principally drain (with a rapid gradient) the last expansion of the Pyrenees (ancient *Laletanos*), with the Cadi (8316 ft.) and the Llaveria, between the Segre, Ebro, and the Mediterranean. The principal hydrographic features of Spain depend on the orographic treble cross made by the N.–S. Idubedas ranges (from the Cantabrian Pyrenees to Cape Oropesa), with the parallel NE.–SW. Serratica, Carpetana, Oretana ridges. At the headwaters of the great rivers, or connecting the more conspicuous parts of the mountain ridges, there are some peculiar isolated plateaux called *paramos*, *parameras* (Lora, Soria, Siguenza, Molina, Avila). The N. **coast** has many harbours (Bilbao, Santoña, Santander, Avilez, Ribadeo). The NW. littoral is indented by a quantity of fjord-like *Rias*, with some very good ports (Ferrol–Betanzos–Corunna, Muros–Noya, Pontevedra, Vigo). On the S. coast Spain has two of the best ports of Europe (Cadiz, Algeciras).

Geology.—The whole middle of the Spanish plateaux is fundamentally Archæan (gneiss, schists: Guadarrama–Gredos, Morena; connected, towards Portugal, by Cambrian) and Palæozoic (Silurian and Devonian: León, S. of Salamanca, from Gata and San Mamede to Morena; Carboniferous: Morena, Guadarrama, Burgos, Cuenca). Mesozoic formations appear all along the E. (Triassic: Burgos, Riojas, Siguenza, Molina, Cuenca, Morena, N.; Jurassic and Cretaceous from Burgos to Teruel and Valencia), surrounded by extensive Tertiary zones (the Miocene lakes of the Douro, Tagus, and Guadiana basins) extending as far as the Pyrenees chain. The present Archæan and Palæozoic rocks of the Iberian plateau are, it seems, the mere basis of an old mountain fold. A Pyrenean-Catalonian system (Archæan, Palæozoic, Mesozoic up to Eocene) in the N. and an Andalusian one (Archæan, Palæozoic, Mesozoic, Tertiary) were added later on (the valley of the Ebro having been, like those of the other great rivers, a Miocene lake). Volcanic rocks are to be seen at Olot (Catalonia, *bufadores*), Calatrava (Ciudad Real), Tremedal (Teruel), Gata–Mujacar, Almanzora, (Almeria), Columbretes Is. (off Valencia). The S. of Spain belongs to the present Mediterranean volcanic region. Africa (at the Pliocene epoch), and Ireland, are supposed to have been once united to Spain. Economic **minerals** are exceedingly varied and abundant. The mines, all on the slopes of the plateau or of the coast mountains, have been worked since Phœnician times. In many points the old refuse products are now profitably worked. The mines were, up to 1820, a state monopoly. The annual production, amounting to from £5,000,000 to £6,000,000, is largely exported to Great Britain; the chief products being iron at Somorrostro,

in prov. Biscay; in provs. Guipúzcoa, Santander; at Mieres, in prov. Oviedo; at Sabero, in prov. León; in prov. Navarre; at Albarracin, in prov. Teruel; at Herrerias, near Cartagena; and in provs. Malaga (at Marbella, Estepona, &c.) and Almeria; mercury at Almaden (prov. Ciudad Real) and in prov. Oviedo; gold at Cartagena (worked by Hannibal); tin in provs. Asturias, Orense, at Verin and Monterey; zinc in provs. Santander, Murcia; silver at Hiendelaencina, prov. Guadalajara, and Gata, prov. Almeria; argentiferous lead at Linares (prov. Jaen) and Herrerias (prov. Murcia); lead at Gador (prov. Almeria) and in provs. Jaen and Murcia; argentiferous pyrites (Madrid); copper in prov. Oviedo and at Tharsis, Buitron, Rio Tinto, prov. Huelva, also in provs. Seville, Córdoba, Alicante; sulphur in prov. Teruel; at Hellin, in prov. Albacete; at Mundo, prov. Murcia; and in prov. Cadiz; antimony (prov. Zamora and in Mancha at Alcudia); manganese (provs. Oviedo, Huelva, Seville); cobalt (prov. Oviedo); coal (from Oviedo and León to Santander; also at Orbo, prov. Palencia; at Demanda, prov. Burgos; at Arnedillo, dist. Rioja; at Belmez and Espiel, prov. Córdoba, as well as in provs. Soria, Cuenca, Seville, and Gerona); lignite (provs. Guipuzcoa, Santander, Teruel, Barcelona); peat (prov. Oviedo); asphalt (prov. Alava); bituminous schists at Puerto del Escudo, Barbayon, prov. Santander; alum (Murcia); rock-salt at Minglanilla, prov. Cuenca; in Murcia, and at Cardona, in Catalonia; barilla (provs. Burgos, Madrid, Toledo); phosphate of lime at Logrosan, prov. Cáceres; marbles in the Pyrenees, and in provs. Granada and Almeria (Macael); mineral waters very abundant (more than 2000 springs: Pyrenees, Sierra Nevada).

Climate.—The N. regions of Spain facing the Atlantic winds are among the dampest in Europe (Santiago, Oviedo, Bilbao; rfall. from 39 in. up to 158 in.; mean temp. 59° F., max. 86°, min. 26°). The climate of the high central plateau is very peculiar, and characterised by great extremes (Valladolid, Salamanca, Madrid; rfall. from 20 in. to 10 in.; summer, 4 in. to 2 in.); very dry; very hot in summer (Madrid, max. 104°); very cold in winter (Madrid, min. 14°). The Ebro valley is also subject to extremes of temperature, and very dry (Saragossa, max. temp. 105° F., min. 21°; rfall. 14 in.). Catalonia is more temperate (Barcelona, max. temp. 87° F., min. 32°). The NE.–SW. mountains (Guadarrama–Gredos and Nevada) condense some of the N. wind's humidity (Granada, rfall. 48.5 in.). The SE. littoral climate (Andalusia to Valencia) is one of the hottest and dryest in Europe (summer rain, 8 in.), with a dry season of 4 to 5 months, humidity decreasing from W. to E., and a very mild winter. On the highest points of the Cantabrian and E. Pyrenees, Guadarrama–Gredos, Sierra Nevada, there is snow the greater part of the year. Spain is between the isotherms of 55° and 68°; 72° represents the mean summer, and 50° the mean winter temp.; but the variety of latitudinal and altitudinal local climates is immense. W. Atlantic winds are the dominant winds; but E. and S. winds (*leveche*–sirocco, *solano*) are frequent on the Mediterranean zones. Rains are particularly abundant (NW.) in winter and autumn, scarce in summer. For those needing a dry, warm, temperate climate, many parts of Spain are the best sanatorium in Europe. Spain has the most varied and the richest endemic **flora** of all Europe. The N. and NW. present the typical plants of N. and central Europe. Some oaks, *Quercus lusitanica*, *Q. alpestris*, *Q. Cerris*, form a sort of transition to the southern evergreens. The birch (*Betula alba*) and the beech tree have their southern limit. In the S. the flora is characteristic of sub-tropical regions (with forms belonging to Africa, to the Atlantic islands, and to Asia). The nature of the climate of the central plateau and the S. causes the vegetation to consist mostly of evergreens (*Quercus Ilex*, *Q. Suber*, *Q. hispanica*, *Q. Ballota*, *Q. coccifera*; the *Olea*, *Laurus*, *Nerium*, *Ceratonia siliqua*), with tough incrusted leaves, sometimes resinous (Cistineæ, *C. ladaniferus*, *Nerium*), sometimes woolly (Cistineæ, *Quercus Suber*, *Q. Tozza*), frequently small (Thymeleæ, *Myrtus*, *Cupressus*, *Juniperus*, *Tamarix*), even acicular (Ericeæ, Coniferæ), and sometimes almost totally absent (Genisteæ, *Ephedra*), with mucronate, thorny branches and leaves (Genisteæ, Carduineæ), or with a fleshy texture (*Salsola*, *Mesembryanthemum*, *Apteranthes*, *Agave*, *Opuntia*, *Yucca*, introduced from America, *Aloe* from Africa). Most plants are very dark green and aromatic. Ligneous vegetation (shrubby or arboreal) greatly predominates. The forests are composed of Coniferæ—*Juniperus thurifera*, *Abies Pinsapo* (on the Sierra de Ronda), *Pinus sylvestris*, *P. Laricio*, *P. pyrenaica*, *P. Pinaster*, *P. Pinea* on the N., and on some of the mountainous, littoral dists.; of evergreen oaks in the centre and S. One extensive plantation of date palms (*Phœnix dactylifera*) is to be met with in Valencia (Elche). Large areas are thickly covered with shrubs (*Montes bajos*, 'low forests'), where Cistineæ (*Jarales*), Ericeæ, Genisteæ (*Ulex*, *Retama*, *Genista*, *Spartium*, *Pterospartum*) or Labiatæ (tomillares, *Thymus*, *Lavandula*, *Mentha*, *Rosmarinus*, *Origanum*) predominate, or, on the poorest lands, ferns (*Pteris aquilina*). In some parts (Valladolid, Madrid to Cuenca, Albacete, Mancha, middle of Ebro basin, NE. of Andalusia, lower Jenil, Almeria and Murcia) the excess of gypsum and salt produces a special steppe-like flora (*Lygeum*, *Artemisia*, *Helianthemum squamatum*, *Gypsophila*, *Zollikoferia*, *Sideritis*, *Astragalus*, *Chænopodiaceæ*); some of the arid high lands in the S. are clad with the *Esparto* or *Alfa* (*Macrochloa tenacissima*). In all the S. littoral (from Algarve to Catalonia up to 3000 ft.) the dwarf palm (*Chamærops humilis*) grows spontaneously. Fig, orange, lemon, almond, pomegranate, mulberry, now grow wild in the S., and are generally cultivated. **Fauna.**—Spain forms a special dist. in the Mediterranean section of the Palæarctic zoological region. As well for animals as for plants Spain is a transitional ground for the meeting of N. European, N. African, and even Asiatic forms. Wolves, hares, rabbits (supposed to be originally from Spain), otters, weasels, badgers, lynxes, wild cat, foxes, wild boars, *Sus scrofa*, fallow-deers (Sierra de Alcudia, and round Madrid), red deer, roebuck, are very abundant. Squirrel and bears (Cantabrian Mts., Sanabria, Pyrenees) are still to be met with. The only European monkey (*Innuus*, or *Macacus*, *ecaudatus*, also commoner in the N. of Africa, but of an eastern type) still exists in the S. of Spain (Gibraltar) as well as camels (now wild, in the *marismas*, though originally introduced by man). The porcupine (very rare), some Viverridæ (the genette and Civet-cat ?), *Ovis Musimon* (SE. mountains), *Capra pyrenaica* (Gerez in Portugal, Morena, Gredos, Sierra Nevada, Ronda), *Rupicapra tragus* (Pyrenees), are met with. Spain is on the migration route, and, in some cases, the bibernating place for N. European and African birds (flamingo). Many species of sea birds at the littoral lakes (Albufera, Mar Menor). Some birds are endemic Iberian forms (*Aquila adalberti*, *Gyps occidentalis*). Among the reptilia, which also comprise some endemic species (*Lacerta ocellata*, a lizard about 4 ft. long), are tortoises and terrapins, and the asp (the only poisonous one). The coasts are very rich in different species of fish. Tunnies, sardines, anchovies, abound along the coasts; the Cyprinidæ (carp, barbels) and the Salmonidæ (salmon, trout) are plentiful in the rivers and in some lakes. Coral occurs on the Andalusian coast. The entomological fauna is very rich (a very poisonous scorpion, the musical cicada, the Marismas *Ichneumon*). Locusts are naturalised in Spain (Sierra Morena, *Despoblados* of Andalusia and Estremadura), and come over from Africa in immense quantities to destroy all cultivated plants. The fossil hyæna, elephant, rhinoceros, hippopotamus, tapir, have been found in Spain.

Ethnography.—Numerous prehistorical monuments are met with. So-called Iberian and Celtic tribes are the first historical inhabitants of Spain. Greek, Phœnician, and Carthaginian colonies were established in many points of the littoral (Betica). The Romans conquered a great part of the Iberian Penin., afterwards invaded by Alani, Suevi, Vandals, Goths, and then by African Berbers and Arabs. Jews were very numerous at all historical epochs from the Middle Ages (about one million in the 15th century). So were gypsies (*gitanos*), some of whom are now settled in villages or towns. Negroes were at one time largely imported. The inhabitants of the old provs. (the Basco–Navarrese, Aragonese, Asturians, Gallegos or Galicians, Castillians, Estremeños, Manchegos, Andalusians, Valencians, and Catalans) still form distinct types. The Euskalduna–Basques (speaking the only agglutinative language in W. Europe) are by some considered the representatives of the primitive Iberians. In some parts of the S. people still live in caves; in other parts there are tribes that keep almost entirely apart from any intercourse with the civilised world (Batuecas, in the Peña de Francia; Hurdes, in the Sierra de Gata), or remain in a very primitive condition (Charros, near Salamanca; Maragatos, near Astorga). All the large Spanish towns (with the exception of Madrid) are on the littoral zones, where live 66 per cent. of the total population. The upper parts of the basins of all important rivers, and the central parts of those of rivs. Tagus and Guadiana, are almost deserts (*dehesas*, *despoblados*). There is an important emigration to S. America (Argentina, Uruguay, Brazil). **Agriculture** is very varied and prosperous wherever there is water, whether naturally (N., NW., Granada) or by artificial irrigation (Alicante, Murcia, Valencia, Aragon, Catalonia). Many of the trees that furnish timber and fuel also yield industrial products and fruits: chestnut, walnut, almond, oak, mulberry, olive, orange, pomegranate, carob-tree, *Pinus Pinea*, &c. In some cases (in the N.) they give support to the climbing vines. Artificial irrigation (*acequias*, *pantanos*) dates at least from the Arabs, and is still very well conducted (*huertas*, *vegas*). Irrigated area about 4500 sq. m. The plains of the central plateau and of Aragon (principally where ground water is near the surface) are the principal regions of wheat production (*Tierras de campos*, *Tierras de barros*). Maize is largely produced in the moister dists.; rice only in the swampy part of the S. littoral (Valencia); barley, rye, oats, buckwheat, in the poorest high regions. Sorghum and a Penicillaria are also cultivated. Chick-peas form an important food element, as well as other Leguminosæ (lentils, horse-beans). Onions, garlic, and tomatoes are largely consumed and exported. Vines are abundant throughout the country. Grapes and raisins are

extensively produced and exported. The centre and N. dists. produce many table wines (Asturias, *Jacoli*, Rioja, Val de Peñas, Saragossa, Catalonia), the S. the famous sherries and Amontillados (Malaga, Rota, &c.). Cider is made in the N. dists. Silk is produced principally in the S. The principal dye-plants are saffron, madder, woad, cochineal (since 1820). Among other products are liquorice, aniseed (to flavour brandy, *anisado*, largely consumed), cummin, ground-nuts, hemp, flax (N.), esparto (S.). Sweet potatoes (*Batatas edulis*), chirimoyo, sugar-cane (since the 12th century), bananas, and cotton are all produced in the S. Numerous herds of sheep are reared (*transhumantes*—winter in Estremadura, Mancha, Andalusia; summer in Plasencia, Avila, Segovia, Cuenca), once noted as producing the best wool in the world (merino). The domestic animals include oxen (many employed as draught animals in agriculture; some kept for the bull-fights), very good breeds of strong horses (Navarre, Andalusia), the best asses and mules in the world.

Industry.—Catalonia (Barcelona) is the great industrial progressing centre: cotton, wool, linen, spinning and weaving (linen also in Asturias and Galicia). Catalonia is now also the centre of the old leather (cordowan, cordwain) production. Corks are largely produced; so are esparto products (Murcia, Alicante), paper (Catalonia, Valencia), silks (Valencia, Murcia, Seville), tobacco (Seville, Madrid, Santander, Gijon, Corunna, Valencia, Alicante), soap, chocolate (largely consumed), brandy, sugar (Barcelona, Malaga, Almeria, Granada), porcelain (Moncloa, Madrid); foundry products, artillery (Trubia), steel, and swords (Toledo); charcoal is extensively produced (from the wild shrubs) all over Spain. Fisheries very important: principally sardines in the N., and tunnies in the S. Large preparation of fish preserves. **Means of Communication.**—Not all districts have good roads. The principal railway net (begun in 1848) is now almost complete. The chief lines may be classed under two centres of radiation near the middle of the plateau—1. Medina del Campo (in Old Castille, SW. of Valladolid); branches (*a*) SW., Salamanca–Zamora–Portugal; (*b*) NW., Leon–Tuy–Portugal; Corunna, Oviedo, Valladolid (Pajares), Gijon; (*c*) NE., Valladolid–Palencia (Reinosa), Santander, Burgos–Bilbao (Idiazabal), Irun–France, Miranda, Pamplona; Ebro valley; (*d*) Madrid (Sierra Ministra), Saragossa. 2. Madrid (*a*) SW., Tagus valley–Portugal; (*b*) SW., Guadiana valley–Portugal; (*c*) S., Manzanares (Despeña Perros), Guadalquivir, Huelva–Cadiz, Algeciras, Malaga; (*d*) SE., Albacete, Murcia, Cartagena, Alicante, Valencia; (*e*) NE., Barcelona–França. Spanish gauge different from that of France, but the same as the Portuguese. Among the canals are Canal de Castilla, between Valladolid, Medina, Valencia, Alar del Rey. In the Ebro valley: (*a*) Canal de Tauste (Tudela–Tauste), on the left bank; (*b*) Imperial Canal, up to Saragossa and El Burgo (81 m.), and to Escatron (70 m.), on the right bank; (*c*) San Carlos de la Rapita–Puerto de los Alfaques, on the delta. See **Appendix,** p. 5. **Commerce.**—The exports are principally natural products: wine, minerals, fruits, olive-oil, cork-wood, silks, wool, preserves, cereals (in some years). The imports are raw materials (cotton, &c.), articles of food (sugar, cod fish, cacao, &c.), machinery, tobacco, coal, mineral oil (import duties from 5 to 30 *ad val.*). For the value, see **Appendix,** p. 3. Commerce chiefly with France, then Great Britain, Portugal, U.S., Belgium, Germany. **Public Institutions.**—Spain is a monarchy (constitution of 1876). The legislative assembly, called the *Cortes*, is composed of a Senate (with hereditary, life, and elected members) and a Congress (one deputy for every 50,000 inhabitants; for 40,000 in Cuba; and representatives of minorities). State religion, Roman Catholic; all others tolerated. Nine archbishoprics. Ten universities (the oldest in Palencia, 1208, removed to Salamanca in 1239). Special schools of civil engineering, mines (Madrid, Almaden), medicine, agriculture, forestry, veterinary, navy, army, &c. For military organisation the country is divided into 12 *capitanias generales*. One battle-ship, 2 port-defence ships, 65 cruisers (10 of the 1st class), 40 torpedo-boats; 30,000 men. **Measures.**—Metric system adopted in 1859. Old measures still used (*libra*, 1.014 lbs.; *quintal*, 101.4 lbs.; *arroba* (wine), 3½ gallons; (oil), 2⅞ gallons; *vara*, 1 yard; *fanega*, 1½ bushel. **Money.**—The unit is the *real de vellon*, 2½d. (nearly). The *peseta* is the practical unit and money of account. It is a coin of the same weight and fineness as the franc, but circulates at a lower rate of exchange; average value about 9½d. *Peso duro*= 5 *pesetas* or 20 *reales*; *onza*=320 *reales*. Bimetallic standard—gold : silver : : 1 : 15½. **History.**—Under this head there is space only for the briefest notes of the main epochs in the long and eventful history of Spain. The Greeks had very rich colonies in Spain (Emporion, Rhodon, Sagonton). Phœnicians and Carthaginians established themselves on the littoral (Cadiz, Malaga, Cartagena) and in some mines (Betica). The Romans conquered Spain (149–25 B.C.). Christianity was preached in the 1st century (Sant 'Iago ?). Visigothic Empire (6th to 8th centuries). Arab conquest (711–713). Spanish Mohammedan civilisation. Córdoba califate (8th to 11th centuries). Christian reaction: kingdoms of Asturias and León (8th to 10th centuries); kingdoms of Sobrarbe, Ribagorza, Aragon (7th to 8th century); county, afterwards kingdom of Navarre, cap. Pamplona; counties of Barcelona, Catalonia (8th century); kingdom of Castille (11th century). The Arab Almuhades or Almoravides succeeded to the Ommaiades (end of 11th century). Toledo became (1085) the cap. of Castille and León. Saragossa (1118) became cap. of Aragon. Battle of Navas de Tolosa (Guadalquivir valley), fought against the Mohammedans by the kings of Castille, Aragon, Navarre, Portugal (1212). Conquest of Córdoba. Union of the kingdoms of Aragon, Castille, León, with which Catalonia was afterwards incorporated (12th century). All Spain united under Isabel of Castille and Ferdinand of Aragon (1479). Conquest of Granada, expulsion of the Moors (1469–92). Voyages of Columbus to America (1492–1503). Nationalisation of the Inquisition (15th to 16th centuries). Conquest of Navarre (1511). Charles I. of Spain, Emperor (Charles V.) of Germany (1519–56). Conquest of Mexico by Cortes (1519). Voyage from the Atlantic to the Pacific, by S. America, by Magellan (Fernão de Magalhães, 1519–20). Conquest of Peru by Pizarro and Almagro. Foundation of the Society of Jesus (1534). Conquest of Florida by Soto (1539). Union of Portugal to Spain under Philip II. (1580). Great Spanish Empire: the Iberian Penin., the Low Countries, Milan, the Two Sicilies, Charolais, Franche-Comté, Artois-Burgundy, India, Malacca, Philippine Is., Moluccas, Ceuta, Tangier, Oran, Atlantic islands, W. and E. coasts of Africa, Mexico, Central and S. America (16th century). Portugal separated from Spain (1640). Philip (the Fifth) of Bourbon becomes king of Spain (1700). War of Succession (1700–13). England takes possession of Gibraltar (1704). French invasion (1808–1813). Independence of the Spanish American colonies (1810–1823). First Constitution proclaimed (Cadiz, 1812). Revolution of 1868. Amadeus of Savoy becomes king of Spain in 1871. Republic in 1873. Restoration of the Bourbon monarchy in 1874. **[J. B. B.]**

Spalathra, comm., Greece, prov. Larisa. P. <4000.

Spalato ('Palatium,' the ancient *Salona*), tn., Austria, crownland Dalmatia, 74 m. SE. Zara, now being connected by rail with the valley of the Bosna. It is the most commercial town in Dalmatia, with manufactures of wool and silk; exports olive-oil, wine, fruits, &c. Harbour, protected by a mole, about 2180 ft. in length. Spalato was founded in the 7th century on the site of a palace built in the 3rd century by Diocletian, the walls of which, still standing, enclose the old town, which has a temple of Jupiter or Diana, now converted into a cathedral. P. 15,700.

Spalding, settlement, Cape Colony, dist. Barkly West, 65 m. N. by W. Kimberley.

Spalding (spawl'ding), par. and tn., Eng., Lincolnshire, Holland div., on the Welland, on the G. N. R., G. E. & G. N. Joint Rly., and M. R., 14 m. SW. Boston, of which port it is a member. It has various mills and breweries, and warehouses, at which vessels of 60 tons load and discharge. Remains of a priory of 1501. Market-day, Tu. 10,752 ac. P. 9000. **Spalding Marsh,** P.O., adjoining Spalding.

Spinone, or **Endine,** lake, Italy, Lombardy, prov. Bergamo, between two mountain chains; it is fed by subterranean springs, and gives rise to the Cherio. Length, about 18,045 ft.; breadth, 2460 ft.

Spinoso, tn., Italy, prov. and 27 m. SSE. Potenza. P. <3000.

Spirano, tn., Italy, Lombardy, prov. Bergamo, 6 m. NE. Treviglio. P. <3000.

Spirding, the largest lake of E. Prussia, govt. Gumbinnen, circle Johannesburg. Length, 11 m.

Spires, in Ger. **Speier,** or **Speyer,** tn., Ger., kgd. Bavaria, cap. govt. Palatinate of the Rhine, 11½ m. S. Mannheim, a free port on riv. Rhine (here crossed by a bridge of boats); has a town museum, picture-gallery, and botanical garden; manufactures of iron, machinery, coloured papers, &c. Spires is an ancient town, the *Nemetium* of the Romans, celebrated in the Middle Ages, and a place of importance down to the 17th century. Seat of a bishop in 610, and soon after that an imperial residence. In the cathedral (begun in 1030, destroyed by the French in 1689 and 1794, consecrated anew in 1822) Bernard of Clairvaux preached a crusade before Conrad III. in 1146. From 1513 to 1689 it was seat of the Imperial Chamber, and 29 imperial diets were held here (in the Retscher). One of these is rendered celebrated by the delivery of the protest (19th April 1529) to which the Protestants owe their name. A Protestant church (the Retscher church) in memory of this event has recently been erected. P. (1840) 11,100; (1890) 17,400; comm. P. 17,600.

Spirillen, lake, Norway, prov. Christiania, trib. by the Bægnalv of Lake Tyrifjord; the name is derived from its strong current. Area, 18 sq. m.

Spirit Lake, vil., U.S., Iowa, Dickinson co., 76 m. E. of NW. corner of state, 6 m. S. of state frontier, between Okoboji Lake on N. and Spirit Lake on S.; popular summer resort. P. <1500.

Spital, Spittal, Spittle, old forms for 'hospital'; frequent in place-names.

Spital, stn., Eng., Cheshire. See **Spittle.**

Spital, par., Eng., Northumberland, div. and 9 m. E. by N. Hexham, 3 m. NW. Wylam stn. P. <250.

Spital-am-Semmering, vil., Austria, Styria, 35 m. ENE. Leoben. P. <2000.

Spital Hill, par., Eng., Northumberland, 1½ m. NW. Morpeth. P. <250.

Spital (or **Spittal**) **of Glenmuick,** hamlet, Scot., W. Aberdeenshire, on the Muick, 6½ m. SSE. Crathie.

Spital (or **Spittal**) **of Glenshee,** hamlet, Scot., W. Perthshire, near the head of the Blackwater or Shee Water, 14½ m. E. by N. Blair Athole. Alt. 1125 ft. See **Blackwater** and **Glenshee.**

Spithead, a celebrated roadstead, off the S. ct. of Eng., Hampshire, between Portsea I. and the Isle of Wight. It communicates westward with the Solent and Southampton Water. It is so secure from all winds, except the SE., as to have been termed by sailors 'the king's bedchamber,' and it is a principal rendezvous of the British navy. There are circular forts, on Horse, Norman, and Sturbridge shoals. Portsmouth and Ryde are on its opposite sides. Length, NW. and SE., 2 m.; average breadth, 1½ m.

Spiti, riv., Brit. India, Punjab, Kángra dist. and Bashahr state, rises at the base of a peak, at the converging angle of the Kanzam and Outer Himalayan ranges, flows on the whole SE. to the Sutlej, in 31° 42′ N., 78° 39′ E. Length, 120 m.

Spitsbergen, group of isls. in the Arctic Ocean, midway between Greenland and Novaya Zemlya, mainly in 76° 26′–80° 50′ N. and 10° 20′–32° 40′ E., comprising six large (Western Spitsbergen or New Friesland, Prince Charles Land, Stans Foreland or Edge Land, Barents Land, North-East Land, and King Charles or Wiche Land) and numerous smaller isls. (including the group of Seven Sisters N. of North-East Land), separated by many straits, amongst which are Hinlopen, between Western Spitsbergen and North-East Land, Walter Thymen, between Stans Foreland and Barents Land, and Olga Strait, more than 50 m. wide, between the Spitsbergen group proper and King Charles group. Western Spitsbergen, the most important of the archipelago, is triangular in form, with apex pointing S., indented by numerous deep fiords, of which the largest, Isfjord, is 17 to 27 m. in breadth, with arms stretching far inland; Smeerenberg Bay, in the NW., said to afford the best anchorage, is much frequented by whalers, and on its shores the Dutch have formed a station. The interior of the island is mountainous, but traversed by at least three great lines of depression; highest point known, Hornsound Peak, 3300 ft. The islands are covered with perpetual snow and glaciers. During the ten winter months mercury freezes, and from October 22 to February 22 the sun never rises above the horizon. According to Ch. Martens, the mean annual temp., in 77° 30′ N., is about −14.8° F.; Nordenskiöld found at Mossel Bay, 79° 53′ N. (1872-78), a maximum July temp. of 39.3° F., and a minimum Feb. temp. of −40.86° F. The flora is richer than in any other country in the same latitude, and comprises more than 120 species, belonging chiefly to the Natural Orders, Gramineæ, Cyperaceæ, Cruciferæ, Confervæ, and Caryophyllaceæ. The islands are visited by English, Danish, and Norwegian whalers for the numerous whales, white bears, and seals on the coasts. Reindeer are found in some parts, and there are several species of migratory birds. This archipelago, formerly considered as belonging to America, is now usually classed among European groups, and claimed by Russia as a dependency of its empire. Was discovered by Hugh Willoughby in 1553. Area (exclusive of King Charles group) estimated at about 24,000 sq. m.; Western Spitsbergen, 14,700 sq. m. (Reclus).

Spittal, tn., Austria, Carinthia, on the Drave, 42 m. WNW. Klagenfurt. P. <3000.

Spittal, eccles. par., coast tn., and watering-place, Eng., in the N. of the Berwick-upon-Tweed div. of Northumberland, on the coast, on the estuary of the Tweed, ½ m. ESE. Tweedmouth stn., PMT.O. P. <2000. See **Berwick** and *Spital.*

Spittal, P.O., Scot., Caithness, 14 m. NW. Wick.

Spittal, vil. and former par., Scot., Roxburghshire, 3½ m. W. by S. Jedburgh, 2½ m. E. by S. Hassendean stn.; now included in Crailing par.

Spittal, par., Wales, Pembrokeshire, 5 m. N. by E. Haverfordwest, P.O. P. <500.

Spittal, North, or **Little Port of,** vil., Scot., Wigtownshire, 2½ m. E. by S. Portpatrick, 1½ m. S. by W. Colfin stn.

Spittal Colliery Rows, vil., Scot., Lanarkshire, Cambuslang par. P. <500.

Spittalfield, PMT.O., Scot., Perthshire, 3 m. from Murthly.

Spittle, vil., Eng., Cheshire, Wirral div., 4 m. S. by E. Birkenhead, with a stn. (**Spital**) on the L. & NW. R. See **Poulton with Spittle**; also *Spital.*

Spittle, vil., Eng., Yorkshire. See **Fangfoss with Spittle.**

Spittlegate, par., Eng., Lincolnshire, suburb of and included in the parl. bor. of Grantham. P. 6200.

Spitz, tn., Lower Austria, on the l. bk. of the Danube, 45 m. W. by N. Vienna. P. <2000.

Spitzberg, mt., on the borders of Austrian and Prussian Silesia, 17 m. SE. by E. Glatz.

Spitzcunnersdorf, vil., Ger., kgd. Saxony, circle Bautzen, dist. and 6 m. WNW. Zittau. P. <3000.

Spitzkop, vil., S. African Republic, Zoutpansberg dist., about 115 m. N. Barberton, in the Salati R. goldfield.

Spixworth, par., Eng., Norfolk, E. div., 5 m. N. by E. Norwich, 3½ m. SW. Coltishall stn. P. <250.

Split Cape, cape, Canada, Nova Scotia, Kings co., on Minas Basin, in 64° 30′ W.

Spluga, mt., Italy, Lombardy, prov. and 16 m. W. Sondrio. Alt. 9350 ft.

Splugen, Pass. See **Alps,** PASSES, **III.** (8).

Spofforth, par., Eng., Yorkshire, W. Riding, Barkston Ash div., 3½ m. S. Knaresborough, on the NE. R., PMT.O.; 5466 ac. P. <1000.

Spokane, co., U.S., Washington, on the E. frontier, crossed in the N. by 48° N.

Spokane, formerly **Spokane Falls,** city, U.S., Washington, cap. Spokane co., 118 m. NNE. Wallawalla; first settled in 1878, now an important commercial town. The adjacent falls on the Spokane R., 65 ft. high, afford water-power estimated at 216,000 horse-power, which is largely utilised in flour-mills, saw-mills, &c. Alt. 1910 ft. (R.R.). Rfall. (6 yrs.), 20.78 in. P. (1880) <1500; (1890) 19,900.

Spokane River, U.S., Idaho and Washington, flows WNW. from Cœur d'Alene Lake into Columbia R., in Spokane co. Length about 125 m.

Spoleto, tn., Italy, Tuscany, prov. Perugia, 12½ m. NNE. Terni; has important trade in grain and oil. Spoleto was a Roman colony about 242 B.C. P. 9000.

Spondon, par., Eng., Derbyshire, S. div., 3 m. E. Derby, on the M. R., PMT.O. P. <2500.

Spon Lane, stn., Eng., S. Staffordshire, on the L. & NW. R., 4 m. WNW. New Street stn., Birmingham; glass factory here.

Spooner, tn., U.S., Wisconsin, Washburn co., on the Yellow R., 67 m. S. Duluth (Minn.). P. <1500.

Spooner Row, stn., Eng., Norfolk, Mid div., 11½ m. SW. by W. Norwich, on the G. E. R., P.O.

Spoon River, U.S., Illinois, flows S. out of Bureau co. through Peoria, Knox, and Fulton cos. into Illinois R., nearly opposite Havana. Length about 140 m.

Sporades, or **Scattered Islands,** a subdivision of the Grecian Archipelago, consisting of the islands surrounding the central group, or Cyclades, forming two groups, a northern and a southern, the former belonging to Greece, the latter to Turkey. The **Greek Sporades,** on the W., consist of Skiathos, Skopelos, Khiliodromia, Skyro, Ægina, Salamis, Hydra, Spetsai, &c., comprised in the Greek prov. of Eubœa. The **Turkish Sporades** comprise Scarpanto, Rhodes, Kos, Kalimno, Patmos, Nicaria, Samos, Khios, Mitilini, Lemnos, Imbros, Samothraki, Thasos, and other islands along the coasts of Asiatic and European Turkey, and are attached to the prov. of Jezairi-Bahri-Señid (Islands of the White Sea).

Sporades, Polynesian, small isls., in the equatorial region of Polynesia, including Palmyra, Fanning, Christmas, Malden, Starbuck, and Howland, islands in possession of England.

Sporle with Palgrave, par., Eng., Norfolk, SW. div., 16 m. ESE. King's Lynn, 2 m. NE. by E. Swaffham, 1½ m. WSW. Dunham stn., P.O. (**Sporle**); 4255 ac. P. <750.

Spotland, par., Eng., Lancashire, 1 m. W. and partly included in the parl. bor. of Rochdale; 14,174 ac. P. 37,800.

Spotorno, vil., Italy, Liguria, prov. Genoa, on the coast, 6½ m. SW. by S. Savona. P. <2000.

Spott, par., Scot., Haddingtonshire, on Spott Burn, 2 m. S. by W. Dunbar; 7583 ac. P. <500.

Spottsville, vil., U.S., Kentucky, co. and 10 m. E. Henderson, on Green R.; has coal-mines. P. <1500.

Spottsylvania, co., U.S., Virginia, in the E., to the N. of 38° N., and E. of 78° W., bounded on NE. by the Rappahannock.

Sprague, tn., U.S., Connecticut, New London co. P. <1500.

Sprague, tn., U.S., Washington, Lincoln co., 37 m. SW. Spokane Falls. P. <2000.

Sprague's Mill, vil., U.S., Maine, Aroostook co., 3 m. W. Easton. P. <1500.

Spratton, par., Eng., Mid div. of Northamptonshire, 6½ m. N. by W. Northampton, on the L. & NW. R., PM.O. P. <1000.

Spray Down, upland tract, Eng., in the SE. of the Tiverton div. of Devonshire, about 7 m. NE. Exeter.

Sprečа, riv., Bosnia, one of the principal r. bk. tribs. of the Bosna, which it joins opposite Doboi after a W. and NW. course of 56 m.

Spree, riv., Ger., rises in the E. of the kgd. of Saxony, close to the Bohemian frontier, flows N., passing Bautzen in Saxony, Spremberg and Kottbus in the Prussian prov. of Brandenburg, and then winds on the whole NW., passing Lübben and traversing Berlin, finally entering the Havel opposite Spandau, about 6 m. W. of Berlin; navigable from Leibsch; connected by the Friedrich Wilhelm Canal with the Oder at Brieskow. Above Lübben it divides into several small arms, traversing the marshy tract called the **Spreewald,** which has a length of 27

m., and width of 1 to 7 m. This tract is divided into the Upper and Lower Spreewald; the W. part of the former and whole of the latter are well wooded. The woods of the Upper Spreewald or Spreewald proper are mostly of alder, and furrowed with innumerable natural and artificial canals, which the inhabitants traverse in boats.

Spremberg, tn., Prussia, in the S. of prov. Brandenburg, 14 m. S. Kottbus, cap. circle Spremberg, with wool spinning and weaving, and noted cloth manufacture. P. (1816) <3000; (1890) 10,400; comm. P. 10,600.

Sri-Govindpur, municip., Brit. India, Punjab, dist. Gurdáspur, 38 m. E. by N. Amritsar, on the r. bk. of the Beas; place of great sanctity amongst the Sikhs. P. <5000.

Sriharikot, isl., Brit. India, off the E. ct., stretching about 30 m. in front of the Pulicat lagoon; contains a dense jungle which supplies firewood to Madras city.

Srí-Madhopur, tn., India, Rájputána, 75 m. SE. by S. Jaipur. P. (1881) 6800.

Sri-Mentani, or **Menanti,** state, Malay Penin., one of the Negri-Sembilan group (*q.v.*); it has rich tin-mines.

Srinagar, tn., Brit. India, NW. Provs., dist. Garhwál, 100 m. NE. by N. Meerut. P. 2400; Hindus, 2200.

Srínagar, decayed tn., Brit. India, NW. Provs., dist. and 63 m. S. Hamírpur, founded by Mohan Singh about 1710 A.D.; he also built a fort and established the mint for Srínagarí rupees, still the commonest throughout S. Bundelkhand; manufactures brass idols. P. (1881) <5000.

Srinagar ('the city of fortune'), cap. Kashmír, extends about 2 m. on both sides of the Jehlam, here 90 to 150 yards in width, crossed by seven roughly-made wooden bridges, and lined with numerous bathing-places. The city is picturesquely situated in an exceedingly fertile and healthful valley, but surrounded by swampy tracts; near to it are the Takht-i-Suláimán (alt. 6950 ft.), crowned by an old stone temple; the Hari-Parbat, an isolated hill on the N. outskirts, about 250 ft. high, crowned by the fort. The British Residency is outside the native town, and adjoining it is the Munshi Bagh, or European quarter. Behind the city is the Dal Lake—on which the best of cucumbers and melons are grown on a soil of fine mud, spread over floating beds of matted reeds—surrounded by the pleasure-grounds of the Mughal sovereigns. The leading manufactures are silk and wine. Artistic industries, for which the city has long been noted, appear to have declined, though fine cashmere shawls are still made. The natives make use of the filthy canal water, and suffer terribly from cholera. The Europeans send for water to Lake Dal. Alt. 5276 ft. P. 119,000 (of which about 10,000 live in boats on the river).

Sringeri, sacred vil., India, Mysore, Kádúr dist., on l. bk. of Tunga R., in 13° 25′ N., 75° 18′ E. P. (1881) <5000.

Sríperambúdúr, Sriperumbúdúr (census), tn., Brit. India, Madras, Chengalpat dist., 35 m. from Madras; birthplace of the Hindu reformer Rámanujá (1016 A.D.), who founded no less than 700 colleges. P. 6000; Hindus, 5800.

Srirangam, municip., Brit. India, Madras, dist. and 3 m. N. Trichinopoli, on Coleroon R.; has a great temple to Vishnu, the largest in S. India. P. 21,600; Hindus, 21,400.

Srírangavarapukot, tn., Brit. India, Madras, Vizagapatam dist., in 18° 7′ N., 83° 11′ E. P. <5000.

Staffordshire, midland co. in the W. of Eng., divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Leek	156,323	56,711
Burton	77,084	58,640
Western	158,310	56,546
North-Western	113,650	63,164
Lichfield	97,732	52,020
Kingswinford	64,250	47,636
Handsworth	21,928	84,782
Parl. bors.	60,324	663,909
Total	749,601[1]	1,083,408[1]

[1] The administrative county includes also the part of Burton-upon-Trent urban sanitary dist. in the ancient county of Derby, and the part of Tamworth dist. in that of Warwick, but excludes part of Birmingham county borough. Area, 749,713 ac. P. 1,087,161.

Staffordshire consists mainly of the upper part of the basin of the Trent, which has its source in the NW. of the county, and is joined on the borders of the county by two important tribs., the Dove from the N. forming the greater part of the frontier on the E., separating Staffordshire from Derbyshire, and the Tame from the SW., also forming a part of the Derbyshire frontier. In the SW., where the county is traversed by the Stour, it belongs to the Severn basin. The surface consists mainly of gently undulating lowlands, the higher parts being mainly on the NE., where the county is entered by spurs of the Pennine Chain. This dist. belongs mainly to the Lower Carboniferous series, and is composed largely of the so-called mountain limestone, but the remainder of the county belongs chiefly to the New Red Sandstone, except in two important dists., one in the N., and one in the S., where the coal-measures crop out on the surface, and along with other local advantages have given rise to two important industries. The county as a whole is one of the most productive coal-mining counties in the country, producing annually above 13,000,000 tons of coal. The great bulk of this quantity is produced in the southern coalfield, in the dist. known as the Black Country, which stretches into the adjacent cos. of Warwick and Worcester, but within Staffordshire itself covers an area measuring about 15 by 10–13 m., mainly occupied by the contiguous parl. bors. of Wolverhamp-

ton, Walsall, Wednesbury, and West Bromwich. This region has long been noted for carrying on all branches of the iron industry, an industry that flourished here long before coal was used in the smelting of iron, and no doubt owed its origin to the abundance of iron ore in the neighbourhood, the former abundance of forests that supplied charcoal fuel for smelting, and the facility with which iron could be sent up the Severn from the Forest of Dean, and the products of the iron industry distributed by the same route. Among the specialties of the different places in this dist. are locks at Wolverhampton and Walsall, nails and chain cables at Cradley Heath, spurs and saddlery at Walsall, bits at Bloxwich, anchors at Tipton, steam-engines at Soho, glass at Smethwick, railway carriages and aluminium at Oldbury, keys at Wednesfield, tinplate at Bilston. Iron ore is still largely produced in the county, but mainly in the N. of the county, and of late years the production has decreased (a few years ago upwards of a million tons annually, now about three-quarters of a million). The N. coalfield forms the dist. known as 'the Potteries,' from the industry which has long had its chief seat here [**Burslem**]. It is occupied by the three contiguous parl. bors. of Hanley, Longton, and Newcastle-under-Lyme. Next in importance to coal among minerals is iron. Besides coal and iron, the principal minerals are gypsum at Hanbury, and salt, which is extracted from brine, at Stafford. Zinc ore is mined to a small extent at Warslow, and copper ore at Ecton, near Warslow. Apart from agriculture, the most important industries of the county, in addition to those mentioned in connection with the two coalfields, are the brewing of ale at Burton, and the dyeing and spinning of silk at Leek. The middle parts of the county are entirely agricultural and pastoral, and from pp. 7–9 of the **Appendix** it may be seen that the county takes a high place as regards the extent of permanent pasture and the number of cattle reared relatively to area. The county is well provided with the means of communication. There is a close network of railways, chiefly belonging to the L. & NW. R. and G. W. R., but including in the N. the North Staffordshire Rly., the lines of which connect the Potteries and Leek with the L. & NW. R. system at Crewe, Sandbach, and Macclesfield. The Trent and Mersey Canal traverses the N. of the county, the Stafford and Worcester Canal the S., and the Birmingham canals circulate in the Black Country. Staffordshire is in the diocese of Lichfield. It has thirteen mun. bors.: Burslem, Burton, Hanley, Lichfield (also a city), Longton, Newcastle-under-Lyme, Stafford, Stoke-upon-Trent, Tamworth, Wolverhampton, West Bromwich, Wallsall, and Wednesbury. Under the early English this county was part of the kingdom of Mercia; in 1016 the inhabitants were as much Danish as Saxon. At Bloreheath, 1459, occurred one of the Yorkist victories; and at Tutbury Castle Mary Queen of Scots was imprisoned, 1579–72. See **England,** table.

Stamford (Anglo-Saxon *Steanford* ('stone-ford'), so called because the Roman paved road known as Ermine Street here crossed the Welland by a ford), mun. bor. (since the year 972), par., and market-tn., Eng., Lincolnshire and Northamptonshire, Stamford div. of the former, and Northampton div. of the latter, in the diocese of Lincoln, on the Welland, on branches of the G. N. R., L. & NW. R., and M. R. The chief trade is agricultural. Of very ancient origin; here was fought the first battle in repelling the Picts and Scots (A.D. 449); became one of the five Danish towns. From Edward IV. till 1867 it returned two members to Parliament, then one till 1885, when it was merged in the parl. div. of Stamford. Adjoining on the S. are Burghley House and Park (200 ac.), the former begun by Lord Treasurer Cecil in 1577. Market-day, F.; cattle-market, M. Mun. bor. P. (1801) 4000; (1851) 8900; (1891) 8400; parl. div. P. 47,700.

Stanovoi Khrebet, Russia, E. Siberia, the watershed between the rivers flowing into the Arctic Ocean and the Pacific. According to old conceptions, an uninterrupted chain of mountains was traced, and is traced still, on obsolete maps, along this water-parting from the sources of the Selenga, in the S. of Urga, along the **Yablonovoi,** or **Stanovoi Mountains** in middle Transbaikalia, then eastward across the lower terrace of the High Plateau (see **Siberia**), to join the Stanovoi ridge, or Jugjur, on the coasts of the Sea of Okhotsk. The non-existence of a chain of mountains in the middle parts of this stretch was already proved by the Siberian expedition (Schwarz, *Memoirs of Siberian Expedition,* 1864), and subsequently it was shown (*Memoirs Russian Geog. Soc., General Geography,* v., V.) that the Yablonovoi ridge projects north-eastwards from Urga to Chita and the upper Nercha, as a border ridge of the *upper* terrace of the plateau, separating it from the lower terrace, while the Stanovoi, or Jugjur, runs NE. to SW. to join the Great Khingan, and is the SE. border ridge of the *lower* terrace of the plateau, and must be pierced by the Amur about Kumara. The passes across it, easily reached from the plateau, lie almost in the level of the latter (2000–3500 ft.), while the mountains rise to 5000–7000 ft., and have a very steep slope towards the E., sharply separating the Siberian flora from the Manchurian.

Stavoren, tn., Holland, prov. Friesland, on the Zuider Zee, 25 m. E. by S. Helder.

Stavropol, govt., Russia, N. Caucasia, bounded by Don Cossacks and Astrakhañ on N., Kubañ on W., Terek on S., and Caspian Sea on E. It covers the E. part of the undulating high plains (1500–2000 ft.) which spread out at the foot of the main chain of the Caucasus, and are diversified about Pyatigorsk by a group of several mountains (2800–4600 ft. high), the Beshtau, while on N. and E. they are enclosed by prairies 200–400 ft. above the sea-level. Poorly watered by the Kuma, which is lost in the steppes before reaching the Caspian, and the Podkumok, Karamyk, Buivola, tribs. of the Kuma. The Manych chain of lakes (which receives the two Yegorbyks and the Kalaus) separates it from European Russia. Forests scarce, even in the S. Climate severe, the average temp. at Pyatigorsk being, yr. 48°, Jan. 25°, July 71°. Population mixed, there being in the steppes about 10,000 Lamaite Kalmyks, nearly 18,000 Turkomans, and over 17,000 Nogais. The remainder (over 650,000) are Great and Little Russians, whose numbers rapidly increase. Together with Terek and Kubañ, Stavropol is now becoming a granary for Russia, the crops of 1892 having attained 3,400,000 quarters of various grains (2,040,000 of wheat). Vine culture much spread in the basin of middle Kuma; flax is also grown. Cattle-breeding is very important, there being 125,000 horses, 653,000 horned cattle, and over 2,600,000 sheep kept. Manufactures (chiefly flour-mills, distilleries, and tanneries) are only beginning to develop. Divided into four dists.: Stavropol, Alexandrovsk, Medvyezhinsk, and Novogrigorievsk. The terr. occupied by the nomads is divided into three dists. (*pristavstvo*): Bolshe-Derbetovskiy, Turkoman, and Achikulak. Alt. 1919 ft. Mean temp., yr. 47.5° F., Jan. 25.2°, July 68.8°. Area, 23,398 sq. m. P. (1892) 695,366.

Stavropol, tn., Russia, cap. of above govt., 360 m. NW. Tiflis,

and 30 m. from Kavkazskaya railway stn., with which it is going to be connected by rail; brisk trade in corn, cattle, and sheep-skins, exported. P. 35,960.

Stavropol, dist. tn., Russia, govt. and 97 m. NW. Samara, on l. bk. Volga. P. 5380.

Stephenson, co., U.S., Illinois, on N. frontier, and E. of 91° W.

Stephenson's Road. See **Nyassa,** lake.

Stephenville, vil., U.S., Texas, Erath co., 90 m. WSW. Dallas. P. <1500.

Stepney, part of London, Eng., Middlesex, one of the parl. divs. of Tower Hamlets bor., 2 m. St. Paul's, London, on the G. E. R. Parl. div. P. (1891) 58,700.

Stepney, stn., Eng., Yorkshire, E. Riding, 2 m. NE. Paragon stn., Hull, on NE. R.

Stepnitz, or **Stepenitz,** riv., Prussia, in the NW. of prov. Brandenburg, flows SW. into the Elbe just above Wittenberge; not navigable.

Stepper Point, cape, Eng., on the NW. ct. of Cornwall, at the mouth of the Camel, on the r. bk.

Steppes, the plains of S. Russia and the W. provs. of the Asiatic dominions of the Russian Empire.

Steppes, Governor-Generalship of the (Stepnoye General Gubernatorstvo), div. of the Russian Empire, placed under a separate governor-general, and including the terr. of what was formerly known as the Kirghiz Steppe, as well as part of what might properly belong to southern West Siberia; consists of the following provs.:—

Provinces.	Area sq. m.	Pop. (1889).	Density per sq. m.
Akmolinsk	229,609	500,180	2
Semipalatinsk	184,631	576,578	3
Turgai	176,219	364,660	2
Uralsk	139,168	559,552	3
Lake Aral	26,166	...	...
General Governorship of the Steppes . .	755,793	2,000,970	2

It is bounded by the Ural R. and the Caspian Sea on the W., the Transcaspian terr. and Russian Turkistan on S., the Chinese prov. Chuguchak and Russian govt. Tomsk on the E., and Tobolsk and Ufa on the N. With the exception of the Tarbagatai Mts. and their spurs on the Chinese frontier, and the spurs of the Urals in the W., it consists of plains rising but a few hundred feet above the sea, and going beneath the sea-level on approaching the Caspian Sea. The Mugojar Hills separate the Steppe rivers from the tribs. of the Caspian. Though watered by many rivers, the terr. generally suffers from want of irrigation. The upper Ishim and Tobol in the N., the upper Ural with its tribs., the Emba in the W., and the Irtysh in the E., are its chief rivers. Many Steppe rivers—Irgiz, Turgai, Sary-su, Nura—are lost in the Steppes, or in rapidly desiccating lakes which have no outlet. Sandy deserts in the S. Climate extremely dry, very hot in summer and rough in winter, the average temp. being: Omsk, yr. 32.5°, Jan. -2°, July 67°; Uralsk (alt. 367 ft.), yr. 39°, Jan. 8°, July 67°; yearly rfall., 6.7 in. For the population and its occupations, see the above-named provs. The cap. of the terr. is at Omsk.

Steppingley, par., Eng., Bedfordshire, Luton div., 9 m. S. by W. Bedford, 1½ m. SW. Ampthill stn. P. <500.

Steps, vil., Scot., NW. Lanarkshire, 4½ m. NE. by E. Glasgow, with stn. (**Steps Road**) on the C. R., PT.O. (**Stepps**). P. <500.

Steptoe Valley, U.S., Nevada, White Pine co., 240 m. E. by N. Carson City.

Sterkrade, vil., Prussia, Rhine Prov., circle Ruhrort, 8 m. NW. by W. Essen; has large iron-works and manufacture of machinery. P. 8700.

Sterkstrom, vil., Cape Colony, dist. Queenstown, 60 m. S. Aliwal North. Alt. 4405 ft. P. <1500.

Sterling, tn., U.S., Connecticut, Windham co., 7 m. E. Plainfield by rail. P. <1500.

Sterling, city, U.S., Illinois, Whiteside co., on Rock R., 110 m. W. Chicago. The town is supplied with water by artesian wells, one of which is 1650 ft. deep. The river is here crossed by a dam of solid masonry, 1100 ft. long and 7 ft. high, which affords an immense water-power with the 9 ft. fall of the rapids. Manufactures include articles of wood, agricultural implements, machinery, &c. P. 5800.

Sterling, city, U.S., Kansas, Rice co., 17 m. NW. Hutchinson, on Arkansas R. P. <2000.

Sterling, tn., U.S., Massachusetts, co. and 13 m. N. by E. Worcester. P. <1500.

Stert, par., Eng., Wiltshire, div. and 2½ m. SE. Devizes, 11½ m. E. by N. Trowbridge. P. <250. See **Urchfont.**

Stert Flats, sandbank, Eng., Somerset, at the mouth of the Parret, in Bridgwater Bay.

Sterzing, tn., Austria, Tirol, 27 m. S. Innsbruck; iron-mines and marble-quarries. P. <2000.

Stetchworth (colloquially stĕch'er), par., Eng., Cambridge, div. and 3 m. S. by W. Newmarket, 1½ m. E. Dullingham stn., PMT.O. P. <750.

Stetten, comm., Ger., gd.-duchy Baden, circle and 2 m. S. Lörrach. P. <3000.

Stetten in Remsthal, vil., Ger., kgd. Würtemberg, Neckar circle, dist. and 6 m. ESE. Kannstatt. P. (comm.) <3000.

Stettin, tn., Prussia, cap. prov. Pomerania, cap. circle Stettin, on the Oder R., 37 m. SSE. Swinemünde; has royal palace (1575), and two gates, formerly in the town walls (dismantled in 1873). Stettin is a busy seaport (the nearest to Berlin) and industrial centre, the principal industries being shipbuilding (ironclads, &c.), iron-foundries, machine shops, chemical products, cement, flour-mills, and sugar-refineries; there are also manufactures of sugar, chicory, cigars, oils, perfumery, soap, fire-proof safes, and distilleries. At present the depth of water alongside the quays is only 18 ft., but great harbour improvements are now (1–95) about to be made, and projects are entertained for deepening the Swine Channel, by which the port is approached [**Stettiner Haff**], for greatly improving the navigable connections with Berlin (by the Oder, Finow Canal, and Havel), and for the establishment of a free port at Stettin. Stettin exports cereals and flour, wine and spirits, sugar, timber, oleaginous fruits, chemicals, iron, zinc, &c., to the annual value of £7–8,000,000; and imports iron and other mineral ores, coal, petroleum, oil-seeds and oil-cake, timber, wine, herrings, and groceries to the annual value of £7–8,000,000. Stettin dates from the 9th century; was occupied by Sweden from 1637 to 1713, and by the French from 1806 to 1813, and given up to Prussia in 1720. P. (1816) 24,500; (1871) 76,000; (1890) 116,000. But the town virtually makes one with the town of Grabow and the villages of Bredow, Züllchow, and Frauendorf, which stretch N. alongside the Oder. Mean temp., yr. 46.9° F., Jan. 31.0°, July 65.7°. P. 116,000; comm. P. 116,200.

Stettiner Haff, coast lake or lagoon, in the N. of Prussia, prov. Pomerania, separated from the Baltic by the islands of Usedom and Wollin, receiving at its SE. end the Oder (Papen Wasser), and at its W. end the Peene. It is divided into the Grosses Haff in the E., and the Kleines Haff in the W. It is for the most part shallow, especially near its shores, with only a few channels navigable by large vessels. It is connected with the Baltic by the Peene to the W. of Usedom I., navigable by vessels of about 8 ft. draught; the Swine, below Usedom and Wollin, navigable by vessels of about 18 ft. draught; and the Diepenow, E. of Wollin I., navigable by vessels of about 4½ ft. draught. See **Anklam.**

Steuben, co., U.S., Indiana, in extreme NE.

Steuben, co., U.S., New York, on the S. frontier, partly bounded on the E. by 77° W.

Steubenville, city, U.S., Ohio, Jefferson co., on the Ohio, 22 m. N. by E. Wheeling (W. Va.); coal abounds; there are shafts in the city; extensive manufactures, foundries, boiler, machine, and glass works. Alt. 679 ft. (R.R.). P. (1850) 6100; (1870) 8100; (1880) 12,100; (1890) 13,400.

Stevenage, par., Eng., Hertfordshire, Hitchin div., 9½ m. E. by N. Luton, on the G. N. R.; manufactures straw-plait. Former market now transferred to Hitchin. 4545 ac. P. <3500.

Stevens, co., U.S., Kansas, on the S. frontier, W. of 101° W.

Stevens, co., U.S., Minnesota, in the W., to the N. of 45° N., and crossed by 96° W.

Stevens, co., U.S., N. Dakota, partly bounded in the S. by riv. Missouri, crossed in the E. by 101° W.

Stevens, co., U.S., Washington, in the NE. corner of the state, traversed by Columbia R.

Stevens Point, city, U.S., Wisconsin, Portage co., on the l. bk. of the Wisconsin, 78 m. W. of the head of Green Bay. Alt. 1090 ft. (R.R.). P. (1880) <5000; (1890) 7900.

Stevenston, par. and tn., Scot., N. Ayrshire, 2 m. E. Ardrossan, on the G. & SW. R.; in the neighbourhood are coal-mines, blast-furnaces, iron-works, large explosive works, &c. PMT.O. Par. (including **Saltcoats**) P. 6200; tn. P. <4500.

Stickillin, par., Ire., co. Louth, on riv. Dee, bar. and 2 m. E. Ardee. P.<250.

Stickine, Stickin, or **Stickeen,** the first being the spelling of the U.S. Board on Geographic Names (from native **Sta-kina,** 'great river'), riv., N. America, mainly in Brit. Columbia, but having its mouth in the U.S. terr. of Alaska, rises near the source of the riv. Aux Liards, and flows W., SW., S., and finally W., entering the sea between Wrangell and Mitkof Is., in 56° 35′ N. It flows through magnificent fiord or cañon scenery, receiving the direct drainage of about 300 glaciers. Very shallow at the mouth, where it has a speed of 5 knots, but in its upper reaches its current is so swift that the steamers which used to navigate it for 150 m. up had to reverse the machinery for large stretches of the down journey to prevent themselves from being carried down headlong. Important gold-mines worked on the river banks from 1873 to 1887, yielding, however, in the last few years only scanty returns. Total length about 500 m.

Stirling (formerly *Struvelyne*, *Strewelin*, or *Estrivelin*, and in Celtic times designated *Strila*), royal parl. burgh, river-port, tn., and par., Scot., cap. co., on the r. bk. of the Forth, where it first becomes fordable, here crossed by two bridges, 6 m. W. Alloa, 31 m. WNW. Edinburgh, and 26 m. NE. Glasgow. The town stands on the SE. declivity of an abrupt basaltic hill, crowned by the ancient castle, whence a magnificent view is obtained of the windings of the Forth and the surrounding scenery. The oldest existing charter of the burgh is dated 1360, but it professes to be a confirmation of one granted by Alexander II., 1226. The castle, the origin of which is not known, was a favourite residence of James V. (popularly known as the 'gudeman of Ballengeich,' from a steep pass behind the castle), and contains the Chapel Royal (originally founded by Alexander I. and rebuilt by James VI.), the Parliament House (built by James III.), the Palace (by James V.), and other portions, which now serve as barracks for a battalion depôt of Highland regiments. Amongst the principal public buildings are the old Greyfriars church, in which Mary and James VI. were crowned; Cowan's Hospital, founded 1639, as an almhouse, now the Guildhall; the Spittal Hospital, erected about 1530, by a tailor of James VI., the oldest charitable institution in the town; Allan's Hospital, founded 1724, for the education of boys; other objects of interest are the King's Knot, the King's Park, and the Mote Hill. Stirling communicates by railway with Edinburgh, Glasgow, and the Highlands. Steamers ply to and from Granton pier, near Edinburgh. The burgh unites with Dunfermline, Culross, Inverkeithing, and S. Queensferry (forming the Stirling dist. of burghs) in sending one member to the House of Commons. Near to the town were fought in 1297 the battle of Stirling Bridge, in 1314 the famous battle of Bannockburn, in 1488 that of Sauchieburn, and in 1788 Sheriffmuir. The whole dist. is full of interest and historical associations. **Snowdon** was another name for Stirling Castle, where it gives title to a herald in the Lyon Court of Arms, 'And Snowdon's knight is Scotland's king!' The manufacture of cotton was actively carried on at the end of last and beginning of present century. In the 16th century shalloons were manufactured, chiefly for the Netherlands; these were replaced in the beginning of last century by tartans and carpets; the former, after undergoing various vicissitudes, is now a leading branch of the woollen industry, which includes shawls, tweeds, carpets, and yarn-spinning. At the ruins of Cambuskenneth Abbey (Augustinian, founded by David I.), ½ m. from Stirling, are to be seen the tombs of James III. and his queen. About 2 m. off is the Abbey Craig, surmounted by the Wallace monument (220 ft. high). Market-day, F. Par. (partly in Clackmannanshire) P. 14,400; royal burgh (which was extended in 1888, and is partly in the par. of St. Ninians) P. (1841) 8300; (1871) 10,900; (1891) 17,000; parl. burgh and tn. P. 16,800; parl. dist. P. (1891) 40,000.

Stirling, co., W. Australia, on the S. ct., crossed by 117° E.

Stirling, North, post-tn., S. Australia, Frome co., 4 m. SE. Port Augusta. The overland telegraph from Port Darwin here joins the line to Adelaide. In the neighbourhood are rich copper-mines. P. <1500.

Stirling Bridge, vil., Scot., Lanarkshire. See **Chapel and Stirling Bridge.**

Stirling Range, mt. range, W. Australia, stretching E. and W., N. of Albany, rising to over 3000 ft.

Stirlingshire, midland co., Scot., entirely in the Forth basin, except in W., where the Endrick flows to Loch Lomond, and SW., where the Kelvin valley slopes to the Clyde. Geologically, the broad strath between the Grampians in the W., with their crystalline schists, and the Ochil Range in the E., with their igneous rocks, is composed of Old Red Sandstone, overlaid in the valleys of the Forth and Teith by fresh-water and marine alluvium. A minor range are the Lennox Hills, composed mainly of porphyrite and other crystalline rocks of the age, the Calciferous Sandstone series of the Carboniferous system, to the E. of which are masses of intrusive basalt, one of which is the rock on which stands Stirling Castle. S. and E. of these occur members of the Carboniferous Limestone series, followed in the E. of the county by the coal-measures. The chief coal-mining centres are Denny, Kilsyth, Bannockburn, Larbert, Falkirk, Slamannan, Bonnybridge, and Polmont. Ironstone was formerly mined at Kilsyth. The Grampian spur, NW. of the county, culminates in Ben Lomond, 3192 ft. In the Forth valley are many glacial drifts, and some terraces indicating ancient seamargins. The Forth forms the chief boundary on N., receiving the Teith and Allan (l. bk.), and the Bannock (r. bk.). The Forth and Clyde Canal traverses the SE. to join the riv. Carron at Grangemouth. The chief manufactures are connected with the iron industry. Carron iron-works, formerly the most important in Scotland, are still extensive, and Falkirk is one of the chief centres in the country for all kinds of domestic iron-work. Manufactures of wool are important; especially carpets, shawls, and tweeds at Bannockburn, Cambusbarron, and Stirling; calico-printing in W.; shipbuilding at Grangemouth. The 'Carse' of Stirling is one of the most fertile parts of the kingdom, 28 m. long, with breadth of from 1 to 4 m.; the 'dryfield,' on he hill slopes, is valuable for potatoes and turnips; and the Lennox Hills are of importance as pasture-land. For agricultural statistics, see **Appendix,** pp. 10–12. Roman remains of the Great Wall at Castlecary; feudal castles are Sir John Graham's (killed, 1298, in the battle of Falkirk), Herbertshire, with fine battlements, &c. Battlefields at Falkirk, Bannockburn (1314), Sauchieburn (1488), Kilsyth (1645). Railway communication with Edinburgh, Glasgow, and Perth, with branches to Dumbarton, Alloa, Dunblane, Callander, &c. This county returns one member to Parliament. Chief towns: Stirling (the only royal burgh), Falkirk, Kilsyth, Grangemouth. Area, 286,338 ac. P. (1891) 125,600. See **Scotland,** table.

Stirrup, Great, low isl. of the Bahama group, with lighthouse, visible 15 m., 600 yards from E. end, in 25° 50′ N., 77° 54′ W.

Stockholm, cap. of Sweden, forms an administrative dist. by itself, separate from the prov. (län) of Stockholm, and occupies a picturesque site amongst wooded heights, between Lake Mälar and an inlet of the Baltic, 40 m. from the open sea, in (observatory) 59° 20′ 33″ N., 18° 3′ 42″ E. The oldest public buildings — *e.g.*, the massive Renaissance 18th century royal palace; the Great Church, in which the kings of Sweden are crowned; the Ridderholm church, in which kings and great men are buried; the Houses of Parliament and the Nobles' Palace; and the chief naval establishments—are situated on islands between the lake and the inlet (Saltsjö). N. of them is the handsome quarter of Norrmalm, containing the National and the Northern Museums, with extremely valuable antiquarian and other collections; the Academies of Science (1739) and the Fine Arts (1735); the National Library (250,000 vols.), observatory, Technological Institute, industrial (*slöjd*), mining, and other special schools, hotels, theatres, &c. The quarter of Södermalm climbs up the heights on the S. of the islands; and E. of them is the picturesque island park of Djurgård (Deer Park). Stockholm is the seat of the Swedish Academy (1786), a high school of medicine, a conservatory of music, and numerous learned societies. Sea-going vessels penetrate to a magnificent granite pier in the heart of the city. The aggregate quayage of the port is nearly 5 m.; the greatest depth alongside, 19.3 ft. The port is, however, closed for about three months in the year by ice; but access is being facilitated by the construction of a harbour at Nynäs, 30 m. S., on the Baltic, and by the cutting of a canal (1300 yards long, 21½ ft. deep) between the Baggensfjord (10 m. E. Stockholm) and the Lännersta Sound, which will shorten the passage by 22 m. Stockholm has iron and steel furnaces, forges, &c., sugar-refineries, and manufactures of tobacco, silks, linens, cottons, candles, &c.; imports wheat, rye, and flour, wine and spirits, coffee and sugar, iron, coal, salt, herrings, oils, manure, seeds, &c.; and exports iron and steel, oats, wood wares, machinery, zinc, &c. Though founded in the middle of the 13th century, Stockholm only supplanted Upsala as the official cap. of Sweden in the 16th century. The city was besieged and taken by the Danes in 1389 and 1520; in this latter year Christian II. of Denmark massacred many of the Swedish nobles (Blood Bath of Stockholm) in the market-place. Near the city the Danes were defeated in 1471 and 1497. Temp., yr. 41.4° F., Jan. 26.1°, July 61.4°; mean rfall. 16.4 in. P. (1800) 75,500; (1850) 93,000; (1880) 168,800; (1890) 246,500.

Stockport, parl., mun. (by prescription), and (since 1888) co. bor., and market-tn., Eng., principally in Cheshire but partly in Lancashire, 6½ m. SSE. Manchester, in the diocese of Chester, on the Mersey, with stns. on L. & NW. R., M. R., M. S. & L. R., and the Stockport and Timperley Rly. It occupies an irregular site at the junction of the two streams which form the Mersey; has high banks on both sides of the river joined by bridges, one of which has eleven arches. There was a Roman station here, and afterwards a Norman castle, demolished in 1644. Its modern importance is due to the enormous growth of its cotton industry, whether spinning, weaving, bleaching, or printing; also large felt hat manufactures, iron and brass foundries, &c. Stockport, made a parl. bor. in 1832, has since returned two members to Parliament. Market-days, F. and S. Parl., mun., and co. bor. P. (1851) 53,800; (1871) 53,000; (1891) 70,300; eccles. par. (**Stockport with Brinksway**) P. 10,700.

Stockton Heath, eccles. par., Eng., Cheshire, in ancient pars. of Budworth and Runcorn; manufactures spades. PMT.O. P.<2500.

Stockton-on-Tees, parl. bor., mun. bor. (of ancient incorporation), seapt., and market-tn., Eng., Durham (with part of the parl. bor. in Yorkshire), 11 m. ENE. Darlington, in the diocese of Durham, on the Tees, with stns. on the NE. R. The Stockton and Darlington Rly. was the first to begin passenger traffic. Stockton is connected with Thornaby, on the Yorkshire side of the river, by a fine stone and iron bridge. Chief

industries are shipbuilding (especially iron), with blast-furnaces, foundries, engine-works, large potteries, and iron-works. (See **Cleveland.**) The river is here available for large vessels, the navigation having been much improved. The two chief wharves are the corporation wharf, 604 ft., and the railway wharf, 450 ft. long, which accommodate vessels drawing 21 ft. water, while deeper draughted vessels moor below the town in 24 ft. low water; the other wharves belong to private firms. The corporation wharf is provided with large grain warehouses and elevators. There is a well-known racecourse in the neighbourhood. At the Restoration, Stockton had only 120 houses. Stockton has returned one member to Parliament since 1867. Market-days, W. and S. Mean rfall. (Egglescliffe, alt. 80 ft., 1866–80), yr. 26.7 in. Mun. bor. P. (1801) 4000; (1871) 27,700; (1891) 49,700; parl. bor. P. (1891) 68,900.
